The July border tension occurred in the two-week run-up to Cambodian elections, and some speculated that it affected the outcome, but the overwhelming victory of the dominant Cambodian People's Party (CPP) was already expected. The CPP consolidated its position significantly, winning 73% of the seats in the National Assembly. The election was marred by irregularities, in particular the disappearance of tens of thousands of names from voter registration lists and the illegal issuance of voting certificates. European Union observers said that the election failed to meet key international standards. The most strident opposition party, the Sam Rainsy Party (SRP), strengthened its position somewhat over previous elections by capturing 21% of the Assembly seats. It was the party most subject to intimidation, and an SRP journalist and his son were assassinated. Gains by the CPP and the SRP came at the expense of the royalist Funcinpec Party. It had split into two parties, and both did poorly.

The Khmer Rouge Tribunal (officially the Extraordinary Chambers in the Courts of Cambodia) gained momentum after four key figures, Nuon Chea, Khieu Samphan, Ieng Sary, and Ieng Thirith—all power brokers in the

1975–79 Pol Pot period—were arrested in late 2007. A formal indictment was issued on August 12 for Kang Kek Ieu (aka Duch), former head of the infamous S-21 detention centre, whose trial was expected to begin in early 2009. The tribunal faced continuing funding problems, however.

(JOHN A. MARSTON)

CAMEROON

Area: 475,650 sq km (183,649 sq mi), excluding the 700-sq-km (270-sq-mi) Bakassi Peninsula

Population (2008 est.): 18,468,000, excluding the Bakassi Peninsula

Capital: Yaoundé

Chief of state: President Paul Biya

Head of government: Prime Minister Ephraim Inoni

Ignoring widespread complaints from opposition parties and nongovernmental organizations, Cameroonian Pres. Paul Biya announced in early January 2008 his intention to eliminate the two-term limit of presidential office defined by the constitution. Throughout February a national transport strike to protest huge increases in food and fuel prices turned into antigovernment demonstrations against the planned constitutional amendment. By February 29 at least 100 people had died in the violence as security forces attempted to restore order in Yaoundé, Douala, and Bamenda. Human rights organizations charged the government with arresting hundreds of youths and conducting a campaign of intimidation and censorship against the press. Three private radio stations were taken off the air in March for their coverage of the demonstrations. On April 21, a few days after the parliament passed the amendment, the opposition Social Democratic Front declared a day of mourning for the constitution.

On August 14 Nigeria officially relinquished the Bakassi Peninsula to Cameroon, six years after the World Court decision to uphold Cameroon's claims to the oil-rich area. In the months before the handover, more than 50 people died in clashes between the mainly Nigerian residents and the Cameroonian army. Despite President

Biya's August 22 promise of providing security for all, an estimated 100,000 people fled Bakassi for Akwa Ibom state in Nigeria.

In early February, clashes in the capital of Chad between the military and antigovernment protesters caused some 40,000 people to flee into northeastern Cameroon. The UN established new camps for this latest wave of refugees. On February 21 the UN announced that it had also completed the vaccination of 35,000 children against measles and polio in that same region.

CANADA

Area: 9,984,670 sq km (3,855,103 sq mi)

Population (2008 est.): 33,213,000

Capital: Ottawa

Chief of state: Queen Elizabeth II, represented by Governor-General Michaëlle Jean

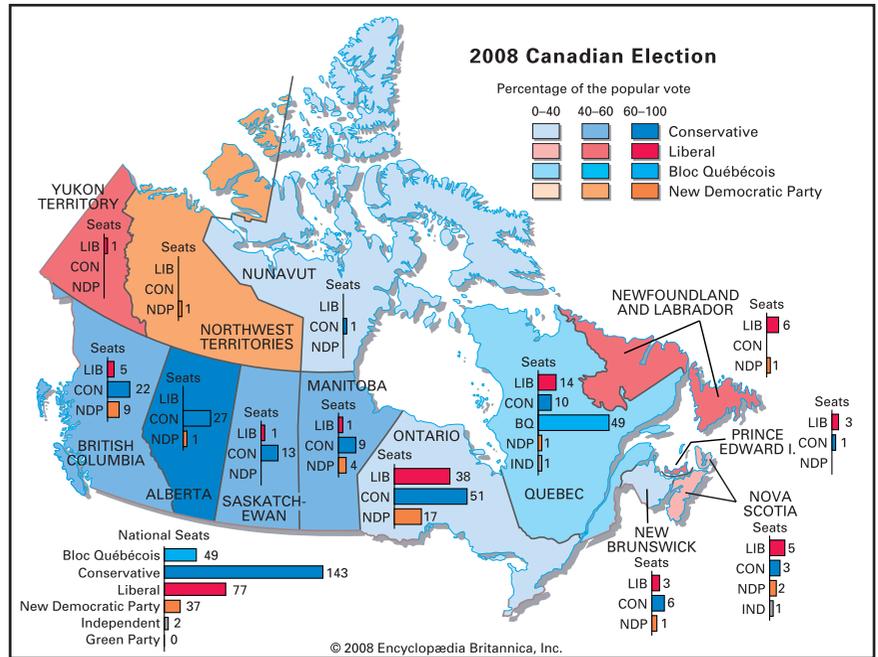

Head of government: Prime Minister Stephen Harper

Domestic Affairs. Prime Minister Stephen Harper's centre-right Conservative Party won reelection on Oct. 14, 2008, in Canada's third general election since 2004. (See MAP.) The Conservatives won an increased minority in the House of Commons, taking 143 of 308 seats. The centre-left Liberal Party, under the leadership of Stéphane Dion, took 77 seats to retain its position as the official opposition but garnered its lowest share of the national vote (slightly over 26%) since confederation in 1867. On October 20, after only two years as Liberal leader, Dion announced that he would step down as soon as a new leader could be chosen. The separatist Bloc Québécois, under Gilles Duceppe, took 49 seats in the 75 constituencies that it contested in Quebec. The left-wing New Democratic Party, led by Jack Layton, increased its seat total from 29 to 37, and two independent MPs were reelected. Despite becoming the only major political party to increase the total number of votes that it received, the environmentalist Green Party, under leader Elizabeth May, once again failed to win any new seats and lost its first MP when Liberal-turned-Independent-turned-Green MP Blair Wilson of British Columbia was

defeated. Voter turnout reached a historic low at 59.1%. Harper, who was first elected in January 2006, sought the new election in contravention of a law passed by his own government, which set election dates every four years. He explained that he found the existing minority government to be dysfunctional and wanted a fresh mandate to pursue his party's agenda.

Harper's reelection was a bright spot in an otherwise difficult year for the government as Conservatives faced several embarrassments and scandals. Following a series of missteps, Foreign Affairs Minister Maxime Bernier was forced to resign his cabinet post on May 26. Bernier had previously been criticized for promising to fly aid to hurricane-ravaged Myanmar (Burma) on military planes that were actually unavailable, for not knowing the name of the president of Haiti in spite of a long-term Canadian military mission in that country, and for compromising a quiet campaign by Canadian officials to get the Afghan government to replace a governor who was accused of corruption and of permitting torture in war-torn Kandahar province. The scandal that ultimately forced Bernier out of office, however, revolved around a romantic relationship. Bernier was attacked by opposition parties when news surfaced that a woman with whom he had been involved, Julie Couillard, had had previous relationships with Quebec's biker-gang crime syndicate. Although the government initially defended his right to have a personal relationship with Couillard, Bernier submitted his resignation hours before Couillard went public with news that the minister had left confidential NATO documents at her home and had asked her to dispose of them. Couillard also claimed that she believed someone, probably a government security agency, had bugged her home and that Bernier had offered to help her secure a federal appointment in another ministry.

Harper came under fire in February after the author of a soon-to-be-published book on Independent MP Chuck Cadman released an audiotape interview from 2005 in which the Conservative leader appeared to indicate that his party had offered financial incentives to Cadman in an effort to persuade him to cast a vote of no-confidence in the previous Liberal government in order to trigger a general election. Conservative strategists speculated that Cadman, who was then in the late stages of terminal cancer, wanted to avoid an early

election because he would lose his salary and medical benefits. Cadman's wife confirmed that the MP, who died soon after the May 2005 vote, told her that the Conservatives had offered him a million-dollar life insurance policy in exchange for his deciding vote in an otherwise evenly split Parliament. Harper denied the claims, insisted that the audiotape had been altered, and sued the Liberal Party and its leader for libel for repeating the claims outside Parliament, where they did not have privileged legal protection. On October 10 an audio expert hired by the Conservatives testified that key parts of the tape had not been altered.

On November 27 Finance Minister Jim Flaherty tabled a fiscal update in the House of Commons that triggered an unprecedented political and constitutional crisis. In spite of comments that Harper made at an international economic conference that suggested that he would strongly favour an economic stimulus package to combat a feared recession, and suggestions that he favoured a more cooperative and conciliatory parliament, the fiscal update promised no immediate major spending initiatives and included several proposals that the opposition parties argued were overly partisan and unacceptable. The fiscal update would have eliminated public financing to political parties (a move that would have severely compromised the solvency of some opposition parties), placed a temporary ban on federal public sector

strikes, and delayed the achievement of pay equity between men and women in the federal public service. Organizers for the Liberals and the New Democratic Party began to work on a formal coalition agreement, signed on December 1, to replace the Conservatives if their minority government lost the confidence of the House of Commons.

The Conservatives attempted to win back the confidence of Parliament first by delaying votes of confidence until December 8 and then by removing from their fiscal update the proposals regarding political financing and the right to strike. The finance minister also promised an early budget in January 2009 that would include a stimulus package if necessary. Nevertheless, the leaders of the coalition, Dion and Layton, refused to back down from their decision to defeat the government at the earliest opportunity. In an effort to delay the confidence votes further, Harper asked the queen's representative, Governor-General Michaëlle Jean, to prorogue Parliament. Requests to prorogue parliament are ordinarily uncontroversial. However, the new session of Parliament had begun only two weeks earlier, and no legislation had yet been passed. Opposition critics called Harper's move undemocratic and a desperate bid to save his own job and hold onto power, and some constitutional experts contended the move could set a dangerous precedent.

On December 4 Jean agreed to the prime minister's request. A new session of Parliament would begin on January

26, 2009, quickly followed by the tabling of a budget and a subsequent vote of confidence in the government. Polls taken during the week of the crisis revealed a deeply divided Canadian public; although the coalition was found to be less popular than a continued Conservative minority government, Harper's personal popularity suffered.

On June 11 the prime minister made a formal apology on behalf of the government and the country to former students of residential schools, which were operated by the government and numerous Christian churches from the 19th century until the last one closed in 1996. The schools were designed to remove aboriginal children from their families and communities as a part of an aggressive assimilation policy that sought to destroy First Nations' culture and change their religious adherence and were often sites of physical, emotional, psychological, and sexual abuse. Although First Nations communities continued to suffer from the effects of generations of attacks on their culture and familial bonds, many aboriginal leaders accepted the apology and urged other Canadians to take notice of a truth and reconciliation commission in which survivors would tell their stories and to enter a new period of Canadian-aboriginal relations. Approximately 86,000 of the 150,000 residential school students were still living in 2008; they would share in a Can\$2 billion government compensation package.

The Economy. The federal government, all 10 provinces, and the 3 northern territories presented balanced budgets with modest to large surpluses during the first half of 2008. In the wake of a global credit crisis and fears of a worldwide economic slowdown or recession, however, by October some governments were warning that budgetary deficits could quickly become a reality. Following years in which the federal government had made two consecutive 1% reductions in the national sales tax and numerous other targeted tax cuts and spending increases, Finance Minister Jim Flaherty on February 26 presented Canada's smallest budget in 11 years. Major spending announcements included Can\$1 billion over three years and Can\$250 million over five years to assist the struggling manufacturing and auto industries, respectively; a Can\$2 billion infrastructure investment fund; a tax savings account in which Canadians could deposit or invest up to Can\$5,000 tax free each year; Can\$500 million for public transit; Can\$350 mil-

lion for a Canada Student Grant program; and Can\$330 million to improve access to safe drinking water in First Nations communities. Spending increased by only 3.4% in the 2008–09 budget—a significant reduction from the 14.8% rise from two previous Conservative budgets.

Although Canada had posted consecutive budgetary surpluses since 1998 and both Harper and Dion pledged during the election campaign to continue to present balanced budgets, two days after winning reelection Harper told reporters that the severity of the global economic crisis might force his government to run a deficit at some point during his term. Similarly, despite projecting a budgetary surplus in Ontario's spring budget and balanced budgets until at least 2010–11, the province's finance minister on October 22 announced an updated prediction of a Can\$500 million deficit. One day later the Bank of Canada reported that the country was on the edge of a recession in which a recovery might be distant and not complete. The announcement followed a two-month period in which Canada's stock market lost 20% of its value and was off by almost 40% from record highs set the previous year. The Canadian dollar also plunged below U.S.\$0.80 in October following a 30-year high in 2007 in which it had closed above parity with the U.S. dollar.

Foreign Affairs. The prime minister's chief of staff, Ian Brodie faced intense criticism for his role in a leak that had ramifications in the U.S. Democratic presidential primaries. On February 27 the Canadian Television Network (CTV) reported that both Hillary Clinton and Barack Obama had made comments that suggested that the North American Free Trade Agreement (NAFTA) might be renegotiated if either candidate were elected president. Clinton denied the reports that day, and Obama denied the story two days later. On March 5 Canadian news reports disclosed that the initial leak had come from Brodie's office during a prebudget media lockup. Brodie remarked to a reporter that, despite recent campaign rhetoric, Clinton's campaign had assured the Canadian government that she did not plan to seriously renegotiate NAFTA if she became president. Brodie resigned for his part in the scandal.

Arctic initiatives, particularly those strengthening Canada's claim of sovereignty over its territorial northern waters for security and resource-extraction purposes, were high priorities.

During August the government announced a state-of-the-art mapping program to identify energy and mineral development potential in the area and a series of large-scale rehearsals for emergencies involving cruise ships, commercial vessels, and pleasure crafts. (WILLIAM STOS)

CAPE VERDE

Area: 4,033 sq km (1,557 sq mi)

Population (2008 est.): 500,000

Capital: Praia

Chief of state: President Pedro Pires

Head of government: Prime Minister José Maria Neves

In 2008 Cape Verde continued to enjoy political stability and annual economic growth of more than 6%, thanks in part to new infrastructural development and increased tourism. In January, Cape Verde was upgraded by the United Nations from a lower-income country to a middle-income country, joining only 13 other African countries with that status.

Cape Verde, which had been involved in accession negotiations with the World Trade Organization (WTO) since 1999 and in December 2007 was invited to join the body, accepted the terms of accession on June 23, 2008; Cape Verde became the WTO's 153rd member on July 23. Some concerns were expressed, however, that businesses would be unable to survive without tariff protection, which would be phased out under WTO rules. The country remained highly dependent on remittances from expatriates to cover a large trade deficit, and the government sought continued international aid to help it reduce its economic vulnerability and to further boost economic growth. After Prime Minister José Maria Neves reshuffled his cabinet in June, he signed a €50 million (€1 = about \$1.40) development-fund agreement with Spain; the money would be used in part to pay for a ship to boost interisland trade and passenger links. In August the EU promised Cape Verde €51 million over five years, mainly to fund programs to promote economic growth, poverty reduction, and good governance. (CHRISTOPHER SAUNDERS)

(CHRISTOPHER SAUNDERS)

CENTRAL AFRICAN REPUBLIC

Area: 622,436 sq km (240,324 sq mi)

Population (2008 est.): 4,424,000

Capital: Bangui

Chief of state: President François Bozizé

Head of government: Prime Ministers Élie Doté and, from January 22, Faustin Archange Touadéra

After being named prime minister of the Central African Republic (CAR) on Jan. 22, 2008, Faustin Archange Touadéra, rector of the University of Bangui, declared that peace and security were his government's priorities. Nevertheless, by February 100,000 Central Africans had fled from the north to neighbouring countries, while an additional 200,000 had been driven from their homes by continuing violent confrontations between the army and various rebel groups. In other conflict-related news, an EU force of more than 3,000 was mobilized in March to CAR and Chad to protect displaced people fleeing from the strife in Darfur, a region in The Sudan.

On May 9 the government, having reached agreement with several smaller rebel factions, signed a cease-fire with two major groups, the Popular Army for the Restoration of the Republic and Democracy (APRD) and the Union of Democratic Forces for Unity (UFDR). The APRD, however, later disowned the pact and renewed attacks on government troops; a major confrontation occurred on August 7. In an effort to restart the peace process, the government appointed a special commission to study the feasibility of an unconditional amnesty for the rebels.

Armed banditry was on the increase in the northwest. Five persons were kidnapped in early March, three of whom were later found dead. In another incident two doctors and their staff were taken and held for eight days before a ransom was paid. On March 14 the nongovernmental organization Doctors Without Borders suspended their northern operations after a series of attacks on its ambulances killed an aid worker. In early June bandits reportedly killed at least 37 villagers north of Kamba Kota in Ouham province.

CHAD

Area: 1,284,000 sq km (495,755 sq mi)

Population (2008 est.): 10,111,000, excluding more than 200,000 refugees from The Sudan

Capital: N'Djamena

Chief of state: President Lieut. Gen. Idriss Déby

Head of government: Prime Ministers Delwa Kassire Koumakoye and, from April 16, Youssouf Saleh Abbas

The deployment took place in Chad in January 2008 of a portion of the planned EU military force of 3,700 troops (EUFOR). This was to help protect humanitarian personnel providing services mainly to refugees in Chad streaming in from Darfur, a war-torn region in The Sudan, as well as some 180,000 internally displaced people. The deployment of EUFOR had been delayed owing to logistic, financial, and political factors. In February the long-standing armed conflict in eastern Chad between the government and rebels reached the capital, N'Djamena, and heavy fighting occurred there before the rebel troops were expelled. A leading opposition figure fled to France, which claimed that its troops had not been involved in the fighting, but French logistic assistance was likely to have helped to ensure the survival of the government of Pres. Idriss Déby. Accusing The Sudan of aiding the rebels, Déby renewed Chad's state of emergency. By October, EUFOR troops numbered more than 3,300, and UN Secretary-General Ban Ki-moon called on the Security Council to replace EUFOR (its mandate was to expire in March 2009) with a 6,000 UN troop contingent in Chad and the Central African Republic. As long as the Darfur crisis continued, there was little hope of stability in Chad. (See *The Sudan*: Sidebar, below.)

Chad retained its reputation as one of the most corrupt countries in the world, and much of the money that flowed to the government from the new oil revenues seemed to be swallowed up by the armed conflict against the rebels. In September 2008 the World Bank withdrew its loan agreement that backed a vast oil pipeline project with Cameroon, operated by ExxonMobil, on the grounds that Déby's government had not complied with the commit-

Chadian refugees return to N'Djamena in February after having briefly fled across the Chari River to Cameroon to escape fighting between government troops and rebel forces.

ment it had given to set aside oil revenues to benefit local communities, especially in respect to health and education. (CHRISTOPHER SAUNDERS)

CHILE

Area: 756,096 sq km (291,930 sq mi)

Population (2008 est.): 16,454,000

Capitals: Santiago (national) and Valparaíso (legislative)

Head of state and government: President Michelle Bachelet

In 2008 Chile continued to thrive as an economic success story under democratic rule. Politically, there were harbingers of change after prolonged rule by the centre-left Concertación coalition. Pres. Michelle Bachelet, who took office in 2006, began the second half of her nonrenewable four-year term. Increasingly a lame duck, she continued to deal with domestic issues involving education, health care, transportation, and energy supply, while around her there was increased political maneuvering in anticipation of the December 2009 presidential election. Sebastián Piñera, whom Bachelet had defeated for the presidency, remained the front-runner for the opposing centre-right coalition Alliance for Chile. Within the Concertación there were indications of

interest from several former presidents, notably Socialist Ricardo Lagos and Eduardo Frei of the Christian Democratic Party (PDC). There were conflicts within the PDC—especially in the aftermath of losses in the October 26 municipal elections—which resulted in the resignation of its president, Soledad Alvear, and an end to her presidential quest. The Concertación's political waters were also roiled by competition from Concertación members who had left the coalition, including, for example, independent Sen. Fernando Flores.

The municipal elections were an indication of problems for the Concertación owing to the growing appeal of the Alliance for Chile. Although the Concertación won a majority of the local council seats, the Alliance took a majority of the mayoralties, including holding on to the mayoral position in the country's capital, Santiago, where a third of Chile's population resided. Although both sides declared a victory, the results were a warning signal to the ruling coalition.

Bachelet devoted considerable time to foreign relations. Fearing the possibility of civil unrest on her country's borders, she took the lead in organizing a regional summit to discuss the increasingly worrisome internal conflict in Bolivia between Pres. Evo Morales, who was supported largely by the poor and the indigenous, and his more upscale political opponents in eastern Bolivia, who were clamouring for greater regional autonomy. There was also continuing friction with her counterpart in Venezuela, Pres. Hugo Chávez. In September the Chávez government expelled the director of Human Rights Watch for the Americas, José Miguel Vivanco, a Chilean. The move elicited a protest by the Chilean government.

Chile's economy continued to thrive, with yearly growth estimated at 4%. Inflation was up, running at 9%. Ironically, the consequences of the U.S. financial crisis for Chile had positive as well as negative aspects. For example, the U.S. dollar, which had dropped markedly in recent years, gained significant ground in the latter months of 2008. This, coupled with the decline in the price of oil, helped boost the Chilean export sector, one of the most vibrant sectors of Chile's economy. The price of copper, still Chile's leading export, declined in the latter part of the year, however, as the global slowdown reduced demand for the metal.

The spread of an infection among Chile's farmed salmon wreaked havoc in

the salmon industry. First thought to be an isolated issue, the problem grew as the virus—known as infectious salmon anemia, or ISA—spread to dozens of salmon farms in southern Chile. By late 2008 the government had temporarily closed down nearly 50 sites and quarantined another 80. Despite these difficulties, the volume of Chile's exports of farmed salmon, as well as trout, continued unabated, with most of the exports being sent to the U.S. and Japan, the country's two largest export markets. (LOIS HECHT OPPENHEIM)

CHINA

Area: 9,572,900 sq km (3,696,100 sq mi), including Tibet and excluding Taiwan and the special autonomous regions of Hong Kong and Macau

Population (2008 est., excluding Taiwan, Hong Kong, and Macau): 1,324,681,000

Capital: Beijing

Chief of state: President Hu Jintao

Head of government: Premier Wen Jiabao

Domestic Affairs. For the Chinese government and the vast majority of its citizens, China's remarkably smooth hosting of the 2008 Olympic Games in Beijing symbolized that the country had achieved its modern national goals: wealth and power. (See Special Report on page 194.) On the one hand, the Olympics were held as China celebrated the 30th anniversary of the beginning of reform and opening up that had helped to create much of the country's wealth, while on the other, the Games were viewed as marking the end of what official Chinese history referred to as China's "national humiliation" at the hands of Western powers and Japan over the previous 150 years.

Such a momentous year got off to a chaotic start, however, with three weeks of severe snowstorms in January that crippled China's transportation system just as millions of domestic migrant workers were heading home for the Lunar New Year holiday. Hundreds of thousands of troops had to be deployed to maintain order as China's basic infrastructure proved inadequate, despite massive investment in recent years. Faced with mounting criticism of the government's handling of the sit-

uation, Premier Wen Jiabao issued a remarkable apology to travelers waiting to return home in southern Hunan province. Although China's government allowed even less political dissent than usual in 2008 as the country prepared for the Olympics, Wen's apology set a precedent for a more responsive, hands-on approach to governance by China's political leadership.

Other examples of the government's new emphasis on accessibility included a Chinese-language Facebook page created for Wen in May and an online chat session that Pres. Hu Jintao joined at People's Daily Online after he listened to a presentation about the site's popular Strong China Forum. In June the number of Internet users in China reached 253 million, which meant that China had overtaken the U.S. as the country with the world's largest population of online users.

China's leadership also enhanced its standing with the Chinese people with a strong response to a wave of unrest in Tibet that drew international attention in early March to China's Tibetan policy and human rights record. The unrest began with protests by Tibetan monks but quickly escalated a week later into a day of rioting during which Tibetans burned and looted businesses owned by ethnic Han Chinese in the Tibetan capital of Lhasa. Chinese troops were sent to restore order but not before violence had spread to other ethnic Tibetan areas of China, including Qinghai, Gansu, and western Sichuan.

While there was widespread sympathy internationally for the Tibetan people, China's ethnic Han majority, which accounted for 92% of the country's population of more than 1.3 billion, was deeply shocked by powerful images of Tibetan resentment of Chinese rule. For many Chinese, the Tibetans appeared as ungrateful recipients of the billions of dollars of development projects that the central government had poured into Tibet, including a \$4 billion high-altitude railroad that connected Lhasa to the outside world in 2006. For many Tibetans, though, the railroad and the influx of Han Chinese migrants into Tibet threatened to make Tibetans a minority in their own homeland.

In the weeks following reassertion of Chinese control over Tibet, the world tour of the 2008 Olympic torch drew significant protests in London, Paris, San Francisco, and Seoul in support of the Tibetan uprising. A contingent of Chinese guards dressed in track suits protected the torch as it was attacked

by demonstrators trying to snuff it out. In one such incident in Paris, demonstrators tried to wrest the torch away from a paraplegic Chinese athlete. This reinforced the growing sense in China that China itself was under attack.

On May 12 a magnitude-7.9 earthquake struck Wenchuan township in western Sichuan province, killing nearly 70,000 people and leaving millions homeless. (See DISASTERS.) The Chinese army mobilized tens of thousands of soldiers in a disaster effort once again led personally by Wen. Abandoning its policy of secrecy about natural disasters, the Chinese government allowed unprecedented coverage of the aftermath of the earthquake by both Chinese and international media. As the scope of the devastation became clear, China allowed foreign relief organizations to enter the country and briefly tolerated protests by the parents of the many children who died when their school buildings collapsed.

Despite the earthquake, Beijing went ahead with the Summer Games. A major concern for athletes and visitors had been high levels of air pollution in Beijing that had resulted from decades of explosive growth and dramatically increased car ownership. Nonetheless, a policy of shifting heavy industry outside Beijing and last-minute traffic-control measures effectively reduced smog levels. Visitors found a modern capital city studded with ambitious architecture. Major new structures that opened in late 2007 and 2008 included the National Centre for the Performing Arts, known as the Egg, the Beijing National Aquatics Center, known as the Cube, and the Beijing National Stadium, known as the Bird's Nest.

The Bird's Nest was the location of the Games' opening ceremony, a mass spectacle that involved some 15,000 performers and celebrated 5,000 years of Chinese cultural achievements and the concept of social harmony (*he*), the central tenet of the Communist Party of China's (CPC's) ideology under Hu. To ensure social harmony during the Games, three protest zones were set up in Beijing where residents could protest if they registered and received a permit. No permits were granted, however, and in one case two elderly women who had applied to protest were initially

Rescue workers move rubble by hand to search for survivors near the epicentre of the earthquake in Yingxiu, China's Sichuan province, on May 16.

sentenced to reeducation by labour, though this sentence was later canceled. A total of 58 foreigners were deported during the Games for protests that authorities said violated Chinese law. At the close of the Olympics, China had won the most gold medals (51) and the second highest number of medals overall (100), affirming its status as a sports superpower.

In late September China launched a Shenzhou 7 rocket carrying three astronauts, one of whom successfully carried out the country's first space walk. The government's confidence in the mission was strong enough to broadcast the 13-minute space walk live on television. Despite impressive examples of how the central government could mobilize the vast resources at its disposal for national projects or natural disasters, dissent against local governments flickered across China throughout the year. Following protests in 2007 that halted construction of a major chemical plant in the coastal city of Xiamen, residents of Shanghai protested against the proposed Shanghai-Hangzhou Maglev Train during January and February 2008. The protesters opposed the project on grounds that it would lower property values and emit harmful levels of electromagnetic radiation. The project was nonetheless approved in August, with construction slated to begin in 2010. While the Shanghai protests were peaceful, a violent outbreak of rioting occurred in late June in Weng'an, a remote township in Guizhou province. Some 10,000 protesters set fire to government buildings and overturned cars following the death of a 15-

year-old girl. The girl's family claimed that she had been raped and murdered, and there were allegations that the crime had been covered up by local authorities.

The two main political events in 2008 were the National People's Congress in March and the CPC's Central Committee meeting in October. The National People's Congress attempted to streamline the Chinese government by creating new superministries under the State Council extracted from clusters of existing specialized ministries. The Congress also elected Li Keqiang one of four vice premiers under Wen on the State Council and Xi Jinping vice president under Hu. This was interpreted as a setback for Hu, who was believed to favour Li Keqiang as his successor. Both Li and Xi were also among the nine current members of the CPC's Political Bureau's Standing Committee that in practice functions as China's highest executive authority.

The Central Committee meeting, which was attended by more than 300 senior party members, committed the state to a policy of loosening the restrictive household-registration system that bifurcated Chinese society in terms of access to resources between those born in the country and those born in the city. In addition, the Central Committee also signaled that Chinese farmers would soon be permitted to buy and sell land-use rights. Both policies were intended as concrete steps in narrowing the vast disparity between the incomes of rural and urban residents by accelerating migration to urban areas. In 2007 the per capita income for rural residents was \$608, while urban residents earned \$2,027 per capita. The party planned to double the annual income of rural residents by 2020.

The Economy. In 2008, despite record high oil prices and the world credit crisis, China's economy continued its rapid expansion. Though GDP growth slipped to below 10% (from 11.6% in 2007), China's trade surplus continued to increase rapidly, setting a single-month record of \$29.3 billion in September as commodity prices decreased from earlier in the year. In turn this pushed China's foreign-exchange reserves—the world's largest—to \$1.9 trillion by the end of the third quarter. That figure was almost twice the size of Japan's foreign reserves, the world's second largest. Up to \$1 trillion of

China's foreign reserves were held in U.S. treasury bills.

Nonetheless, China Investment Corp., China's \$200 billion sovereign wealth fund, did not seek to diversify significantly from U.S. dollar-denominated assets in 2008. One reason for this was widespread domestic criticism of the fund's losses caused by investments in the U.S. financial firms Morgan Stanley and the Blackstone Group in 2007 and \$5 billion frozen in a failed money-market fund in September 2008. Chinese finance officials feared that any significant movement away from U.S. dollar assets could trigger a sharp decline in the value of those assets. The Chinese renminbi, meanwhile, accelerated its appreciation against the U.S. dollar, rising some 6.5% over the course of the year.

In addition to China Investment Corp., other Chinese financial companies suffered losses related to the 2008 financial crisis. One prominent example was Ping An Insurance, which was forced to write off \$2.5 billion in connection with its investment in the Dutch-Belgian bank Fortis after the bank was taken over by the governments of The Netherlands, Belgium, and Luxembourg. In general, though, China's capital controls and its limited appetite for the types of credit risk that caused the financial crisis staved off serious short-term impact on Chinese financial institutions. The main concern was that a slowdown in China's major export markets would ratchet down economic growth in 2009 and beyond.

Domestically, consumer prices surged in the first half of the year, peaking in May with a consumer price index increase of 7.7%, but by August consumer price inflation had dropped to 4.7% as lower oil and grain prices began to alleviate the pressure. Faced with rapidly changing economic conditions, China's central bank reversed course in September, dropping interest rates for the first time in six years and lowering bank reserve ratios in an effort to anticipate slower economic growth through the end of 2008 and into 2009. A dramatic 70% drop in share prices on the Shanghai Stock Exchange by the third quarter, combined with a sharp decline in real-estate transactions in major cities such as Beijing and Shanghai and slower growth in industrial output, contributed to the prevailing sense that the economy was slowing down. In response, in November the central government announced a major economic-stimulus plan.

Two important laws took effect in 2008 that were expected to have a profound impact on China's economic environment. The first of these was the Labour Contract Law, which went into effect on January 1 and required written contracts to formalize employment relationships between workers and employers. The new law made it more difficult to terminate workers and gave workers the right to file complaints and be compensated for wrongful termination. The second law was the Anti-Monopoly Law, which took effect in August. The Anti-Monopoly Law allowed the Chinese government to block acquisitions of companies if the acquisition harmed competition or threatened national economic development.

In April former Shanghai party chairman Chen Liangyu was convicted of having accepted nearly \$340,000 in bribes in connection with a scheme to divert money from pension funds into development projects; he was sentenced to 18 years in prison. In China's southern Guangxi province, Sun Yu, a high-ranking party official, was removed from office and prosecuted for having taken more than \$58 million in bribes. Official corruption was estimated to cost China's economy \$86 billion annually.

In addition to corruption, China struggled to contain the damaging effects of a series of food- and drug-safety scandals. In March and April the U.S. Food and Drug Administration (FDA) traced tainted batches of Heparin, a commonly used blood thinner, to Chinese suppliers who had sourced the ingredients of the drug from unregulated slaughterhouses. By the end of May, the FDA had identified 149 deaths that it related to tainted Heparin. In all, 10 countries, including China, Japan, and Germany, reported problems with Heparin products.

The scale of the Heparin scandal, however, was dwarfed by a scandal that began to emerge in August involving dairy products that had been laced with melamine—a chemical used in making plastic—in order to increase apparent protein content. In China alone, more than 50,000 babies became ill and four died as a result of having ingested milk formula containing melamine. By the end of October, the scandal had spread far beyond China as melamine-containing products ranging from fertilizer to chocolate candies were found in countries in the region.

Foreign Relations. Direct talks between China and Taiwan resumed in June af-

ter having been suspended for nearly a decade. The talks, held in Beijing, came a month after Ma Ying-jeou took office as the new Taiwanese president while vowing to establish better relations with China. The development raised concerns in the U.S. that Taiwan, a traditional U.S. ally, was tilting too much toward China. In that context the administration of U.S. Pres. George W. Bush announced \$6.5 billion in weapon sales to Taiwan in October. China reacted angrily to the deal, declaring that it would cause "harm to Chinese interests and Sino-U.S. relations" and canceling several planned military as well as diplomatic exchanges with the U.S. Historic agreements on expansion of direct flights and trade between Taiwan and China were signed at a second round of talks, held in Taipei in November.

Some tensions arose in China's relations with Russia as well. The Chinese foreign-policy establishment was dismayed by the Russian invasion of Georgia in August and Russia's diplomatic recognition of South Ossetia and Abkhazia, since these acts could create precedents for the diplomatic recognition of Tibet or Taiwan as independent countries. Nonetheless, China and Russia resolved a long-running border dispute in October when Russia handed over 340 sq km (131 sq mi) of territory to China on the border of China's Heilongjiang province.

Relations with other countries were generally cordial. In March China opened the last link in a new paved highway connecting Yunnan province to northern Thailand. In May President Hu made a state visit to Japan that contributed to the general thaw in Sino-Japanese relations in the years since anti-Japanese riots occurred in China in 2005. Relations with India became somewhat more difficult when China raised objections to a decision by the Nuclear Suppliers Group in September to lift a nuclear trade embargo on India. The decision was expected to pave the way for the approval of a U.S.-India pact that would allow India access to civilian nuclear technology. This was followed in October by an unsuccessful round of talks on the disputed Sino-Indian border.

Farther afield, Chinese ties with Africa continued to expand, with bilateral trade hitting \$100 billion during the year. Relations with France, however, were marred by Chinese boycotts of the French supermarket chain Carrefour following protests against the Olympic torch relay in Paris and

threats by French Pres. Nicolas Sarkozy to boycott the Olympic Games because of Chinese policies in Tibet.

(MICHAEL R. FAHEY)

COLOMBIA

Area: 1,141,748 sq km (440,831 sq mi)

Population (2008 est.): 44,442,000

Capital: Bogotá

Head of state and government: President Álvaro Uribe Vélez

The Revolutionary Armed Forces of Colombia (FARC), a leftist guerrilla group opposing the government, suffered several major setbacks in 2008. In March the Colombian military struck a rebel camp in Ecuadoran territory, killing, among others, senior leader Raúl Reyes and setting off a diplomatic skirmish with Venezuela, Nicaragua, and Ecuador. In May the group revealed that its leader and founding member, Pedro Antonio Marín (also known as “Tirofijo” and Manuel Marulanda Velez [see OBITUARIES]), had died of natural causes at what was believed to be the age of 77. In July the Colombian military rescued 15 FARC hostages, including former presidential candidate Ingrid Betancourt (see BIOGRAPHIES) and three U.S. Defense Department contractors. Later that month hundreds of thousands of Colombians participated in peaceful marches calling for an end to the kidnappings and violence perpetrated by armed groups—the FARC had more than 700 captives and the National Liberation Army (ELN) more than 200, most of whom were ordinary citizens being held for ransom. A military operation in September resulted in the killing of a particularly violent FARC commander, Aicardo de Jesús Agudelo, known as “El Paisa.”

The daring rescue of Betancourt and 14 others was made possible by government infiltration of the upper reaches of the group’s leadership. A member of the FARC, cooperating with government forces, convinced the leader of the cell holding the hostages that a humanitarian nongovernmental organization (NGO) was arriving to transfer them to another cell. The helicopters sent to carry out the transfer were carrying government personnel

rather than NGO workers. After take-off, the cell leader and his aide were overpowered, and the hostages were informed that they had been freed.

The much-heralded rescue of Betancourt and the others was welcome news for the administration of Pres. Álvaro Uribe. It showed that the falling out with Venezuela’s Pres. Hugo Chávez over Chávez’s failed mediation efforts between the government and the guerrillas did not mean that the fate of the hundreds of hostages held by the FARC was completely without hope. The rescue also helped divert public attention from a corruption scandal involving the government and its supporters in Congress. In 2004 Congress had approved a constitutional amendment clearing the way for Uribe to run for a second term in 2006. Allegations emerged that congressional support was purchased by the administration through bribes and promises of government favours, particularly in the cases of Yidis Medina and Teodolindo Avendaño.

Previously, members of the government had been charged with having close ties to the right-wing paramilitary group the United Self-Defense Groups of Colombia (AUC) and with accepting AUC campaign contributions. Critics suggested that the extradition of 14 AUC leaders to the U.S. in May was in part motivated by an effort to keep them from identifying their ties to the government.

Despite such criticism, Uribe’s continued popularity, which spiked even higher after the rescue of the hostages,

fueled speculation that he would find a way to seek a third term. When the Supreme Court concluded that his 2006 reelection was tainted by corruption, Uribe suggested that he would hold a referendum to see whether the presidential vote should be repeated. If the proceedings had gone forward, they might have been used as a means to extend his stay in office, which was currently proscribed by the constitution after 2010. Instead, the new interior minister, Fabio Valencia, was charged with consolidating congressional support behind the process of amending the constitution yet again to allow the president to serve a third term. Uribe suggested that he would consider sitting out a term and seeking reelection in 2014, but this would also require a constitutional amendment. While the administration turned its attention to Congress, the tension between the Supreme Court and the executive branch over the connections between politicians and right-wing paramilitary groups continued unabated.

The “firing” of Chávez as a mediator between the government and guerrillas and the incursion into Ecuador to strike a FARC camp precipitated diplomatic crises. The situations were exacerbated by the ideological distance between the conservative Uribe and the left-of-center Presidents Chávez and Rafael Correa of Ecuador. Colombia’s apparent isolation on the continent seemed to ease in the latter half of the year. Bogotá joined a regional defense alliance spearheaded by Brazil, and an anti-drug-trafficking summit held in Cartagena generated international cooperation, including promises of support from Venezuela. COMOROS

Area: 1,862 sq km (719 sq mi), excluding the 374-sq-km (144-sq-mi) island of Mayotte, a de facto dependency of France since 1976

Population (2008 est.): 645,000 (excluding 192,000 on Mayotte)

Capital: Moroni

Chief of state and head of government: President Ahmed Abdallah Mohamed Sambi

The political crisis that began in Comoros in 2007 after Anjouan Pres. Col.

Karel Prinsloo/AP

Displaced by a rebel offensive in eastern Democratic Republic of the Congo, civilians laden with whatever possessions they can carry walk alongside a convoy of Congolese army tanks in October.

Mohamed Bacar defied orders to step down from office boiled over into 2008 when African Union (AU) and federal troops invaded the island to wrest control back from the renegade leader. Bacar, who was elected Anjouan president in 2002 after having seized power in a 2001 coup, unilaterally declared himself president in illegal local elections held in June 2007. In the coup-prone Comoros, each of the three autonomous islands of Grande Comore, Anjouan, and Mohéli had its own president; the federal presidency rotated between the island leaders every four years.

In an unprecedented move, on March 25 more than 1,500 Comoran and AU troops landed on Anjouan under a military action dubbed "Operation Democracy," which retook the island and ousted Bacar, who fled to neighbouring French-controlled Mayotte. After the deposed leader unsuccessfully sought haven in France, Bacar was expelled to Benin, which granted him asylum. The coalition troops were able to quickly establish calm on the island following the coup, and on June 29, Anjouan voters elected Moussa Toybou as Anjouan's president. In July, Mohéli Pres. Mohamed Ali Saïd suspended the island's government; it was the third time he had done so during his term in office.

(MARY EBELING)

CONGO, DEMOCRATIC REPUBLIC OF THE

Area: 2,344,858 sq km (905,355 sq mi)

Population (2008 est.): 66,515,000

Capital: Kinshasa

Head of state: President Joseph Kabila

Head of government: Prime Ministers Antoine Gizenga and, from October 10, Adolphe Muzito

Though the apparatus of government was in place in the Democratic Republic of the Congo (DRC) in 2008 and central and provincial assemblies existed, little was achieved. The most important external factor in fostering growth was the implementation of the agreement reached by the government in 2007 with three Chinese state-owned companies; by 2008 work had begun on the restoration of the DRC's infrastructure in re-

turn for profits from copper, cobalt, and coltan mining. Under the agreement a number of Congolese staff were to be trained and 10% of the work would be subcontracted to Congolese companies.

In March the U.S. announced that it would dispense \$500 million in aid during the year. The following month Pres. Joseph Kabila visited South Africa and, together with Pres. Thabo Mbeki, drafted a number of proposals for cooperation. In June the U.K. provided the initial capital to launch a fund for the protection of the Congo basin, which was threatened by timber companies and mining, and in August the French government increased its offer in support of other European countries that were helping to fund the DRC local elections due in 2009.

In the war-torn eastern border province of Kivu, however, occasional glimmers of hope were usually quickly extinguished. On January 23, representatives of the UN, the EU, the U.S., and the African Union brokered a cease-fire between the government forces and two rebel militias: the Tutsi Gen. Laurent Nkunda's National Congress for the Defense of the Congolese People (CNDP) and the Hutu Democratic Forces for the Liberation of Rwanda (FDLR). The CNDP, however, complained that the government was collaborating with the FDLR and objected to the integration of Rwandan Hutu rebels into the Congo army. The government, on the other hand, believed that Nkunda was effectively operating as a proxy for Rwanda. Adding to the many problems of the region, in early February an earthquake

on the eastern border killed 40 people.

On March 13 the UN Security Council unanimously called for the immediate and unconditional disarmament and repatriation of all Rwandan rebels in the DRC and for more purposeful cooperation between the governments of the DRC and Rwanda. At a meeting on March 16, Rwandan Pres. Paul Kagame accused the DRC of arming, supplying, and exchanging intelligence with the FDLR. Although President Kabila had set yet another date (late in May) for the FDLR to disarm, the DRC army proved too weak to enforce the decree. A damaging blow to peace efforts in the region was delivered in October when General Nkunda announced that he intended to transform the CNDP into a national movement aimed at liberating the whole country.

Late in August ethnic clashes occurred in Katanga province between residents of Kolwezi and miners who had arrived from a neighbouring province to work in the copper, cobalt, and tin mines.

An incursion by Ugandan rebels of the Lords Resistance Army made it necessary in August to deploy UN and DRC troops to Orientale province. Friction along the Ugandan border, arising from claims that oil had been discovered in the region, was calmed after a conference in Kampala, Ugan., in September.

In September Prime Minister Antoine Gizenga announced that he was stepping down because of poor health. The following month Budget Minister Adolphe Muzito was appointed in his place.

(KENNETH INGHAM)

CONGO, REPUBLIC OF THE

Area: 342,000 sq km (132,047 sq mi)

Population (2008 est.): 3,847,000

Capital: Brazzaville

Head of state and government: President Denis Sassou-Nguesso, assisted by Prime Minister Isidore Mvouba

New voting cards were issued in the Republic of the Congo to all Congolese electors prior to the June 29 and Aug. 4, 2008, local and senatorial elections. In the balloting the presidential coalition took 600 of the 846 seats in local councils and captured 70 of the 72 Senate seats in the National Assembly. Charges of widespread fraud were made by opposition parties and international observers from the African Union. On August 12, representatives of the Alliance for the New Republic, an organization of three major opposition parties, withdrew from the National Electoral Commission, claiming that the entire process had been a "masquerade." Nevertheless, presidential elections were still scheduled for 2009.

On June 9 the program of demobilization, disarmament, and reintegration of the former rebels known as "Ninjas" was finally launched in Kinkala in the southern Pool region. The Ninja chief, Frédéric Bitsangou (alias Pastor Ntoumi), attended the ceremony. There were an estimated 30,000 combatants from the bloody 1998–2003 rebellion eligible for the program. While security had greatly improved in the region, the presence of thousands of former rebels still bearing arms continued to create a volatile situation.

On March 5 the government lifted its ban on the adoption of children by foreigners. This ban had been imposed in November 2007, following the October arrest of several French aid workers in Chad on child-trafficking charges.

Mobile laboratories to fight Ebola and other tropical viruses were being prepared. In May, Canadian health officials launched a program to train local specialists in the use of the equipment. On June 13 the government announced a new campaign to encourage the use of insecticide-treated mosquito netting for beds to reduce the spread of malaria. The following month the government also agreed to provide free antimalarial

drugs to pregnant women and all children under age five. More than 20,000 Congolese children died annually from the disease. (NANCY ELLEN LAWLER)

COSTA RICA

Area: 51,100 sq km (19,730 sq mi)

Population (2008 est.): 4,389,000

Capital: San José

Head of state and government: President Óscar Arias Sánchez

Much of the political energy in Costa Rica during 2008 was focused on passage of legislation to implement the Central America–Dominican Republic Free Trade Agreement (CAFTA-DR). After years of debate, a national referendum on Oct. 7, 2007, had produced a very slim victory (51.6–48.4%) for the pro-ratification side. Formal ratification could not be completed, however, until a package of some dozen bills modifying existing Costa Rican legislation had been approved. The main opposition party, the Citizens' Action Party (PAC), had enough votes in the legislature to seriously delay this package, and by February 2008 some eight bills remained unapproved. Two of the bills were certain to have a major long-term impact. One bill liberalized the state monopoly over telecommunications and thereby opened the door to cell-phone competition; currently only the parastatal Instituto Costarricense de Electricidad could provide such service. A second key bill opened up the insurance industry to competition, previously also dominated by a parastatal monopoly. In November Costa Rican lawmakers voted their approval for CAFTA-DR, and on December 23 Pres. George W. Bush issued a proclamation that would bring the pact into force between the U.S. and Costa Rica on Jan. 1, 2009.

The government faced a crisis in March when Fernando Berrocal, the public security minister, reported finding that a large cache of funds attributed to Colombian guerrillas had been found in the home of two Costa Rican leftists. The trail to the funds had been established from the computer disks captured by a controversial Colombian military cross-border raid into Ecuador. Berrocal stated that he had also uncovered

evidence linking the Colombia guerrillas to Costa Rican politicians. Protests against these revelations forced Berrocal to step down at the end of March. He was replaced temporarily by Laura Chinchilla Miranda, who was rumored to be a strong candidate for the presidency in 2010. In April Janina del Vecchio was named to the security post.

Higher-than-expected levels of inflation continued to cloud the economic news, but the government demonstrated important progress in lowering the poverty rate. Although the high cost of fuel also had a negative effect, the cost was partly mitigated by concessionary prices offered by Venezuela.

(MITCHELL A. SELIGSON)

CÔTE D'IVOIRE

Area: 320,803 sq km (123,863 sq mi)

Population (2008 est.): 19,624,000

De facto capital: Abidjan

Chief of state: President Laurent Gbagbo

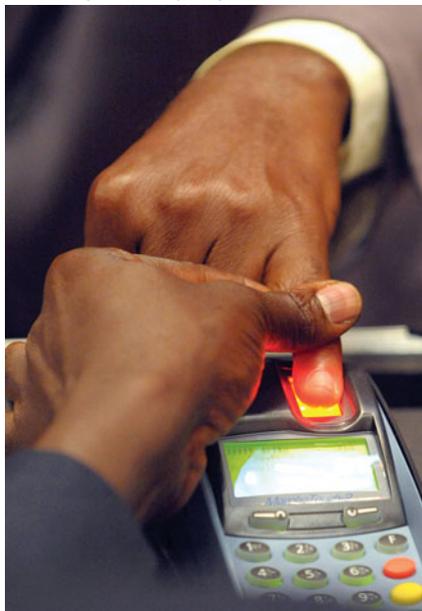

Head of government: Prime Minister Guillaume Soro

Ten people who were arrested on Dec. 27, 2007, for having plotted to overthrow the government in Côte d'Ivoire were indicted on Jan. 18, 2008. The men allegedly were followers of the former leader of the New Forces, Ibrahim Coulibaly, who was living in exile in Benin.

On January 15 the UN Security Council voted to continue (until new elections were held) its peacekeeping operations in Côte d'Ivoire's "zone of confidence," which since 2002 had separated the rebel-held north and the government-controlled south. In February four UN observation posts in the zone were dismantled as a stage in the establishment of a "green line," which was a much-narrower buffer area. On May 3 more than 1,000 former members of the New Forces participated in a disarmament ceremony in Bouaké.

Public services in the north began reopening as the 2007 peace pact held. In January post office employees started to clear the five-year mail backlog, and customs officials resumed their duties in the north on May 15. Leaders of the fishermen's union and Ministry of Food officials on July 3 called for the lifting

Issouf Sanago—AFP/Getty Images

An employee of an identification commission in Côte d'Ivoire records a voter's fingerprint during a ceremony to launch a new census in preparation for the country's presidential election, which was rescheduled for 2009.

of a 2004 UN-imposed arms embargo, claiming that they were unable to import parts to repair two naval vessels that were essential to keeping foreign boats from operating in Ivoirian territorial waters.

During the year demonstrations reached violent proportions over such grievances as water shortages, racketeering, and rocketing food prices. On February 20, thousands of women, demanding an end to a monthlong stoppage of drinking water, took to the streets of Abidjan and were teargassed by police. Protests on April 1 and 2 against high food prices turned into riots throughout Abidjan; at least one person was killed and dozens injured as the police attempted to regain control. Pres. Laurent Gbagbo responded by removing all import taxes on foodstuffs. A government announcement on July 6 declaring that it would no longer subsidize fuel prices provoked another series of strikes and protests in Abidjan as prices rose sharply. On July 21 Prime Minister Guillaume Soro stated that the fuel subsidy would be reinstated and that all government ministers would take a 50% pay cut to help pay for it.

Though originally scheduled for June, presidential elections were postponed until November but then further delayed until 2009.

(NANCY ELLEN LAWLER)

CROATIA

Area: 56,594 sq km (21,851 sq mi)

Population (2008 est.): 4,433,000

Capital: Zagreb

Chief of state: President Stipe Mesic

Head of government: Prime Minister Ivo Sanader

In January 2008 the Croatian Democratic Union (HDZ), which had won 66 of the 153 seats in the November 2007 parliamentary elections, joined forces with the Croatian Peasant Party (HSS), the Croatian Social-Liberal Party (HSLs), the Croatian Pensioners' Party (HSU), and ethnic minority representatives to form a government. Prime Minister Ivo Sanader continued as head of government and reiterated his commitment to completing accession negotiations with the EU in 2009 and thereby paving the way for membership in 2010 or 2011. That same month, however, Croatia found itself in a dispute with neighboring Slovenia and Italy when it unilaterally declared its own "ecological and fisheries protection zone" (ZERP) in the Adriatic Sea, which thus prevented Slovenia and Italy from fishing there. The issue prompted renewed tensions between Ljubljana and Zagreb; a series of other disputes were still unresolved. In March the Croatian parliament adopted amendments to the ZERP that gave EU member states an exemption. EU Enlargement Commissioner Olli Rehn welcomed the resolution of the issue and signaled that accession negotiations would accelerate as a result.

By July 2008 Croatia had opened negotiations on 21 of the 35 chapters of EU law. The European Commission had repeatedly requested that Croatia provide a plan to reform the shipbuilding sector, for which it would be required to cease providing state subsidies upon joining the EU. Shipbuilding accounted for 12–15% of total exports and directly employed more than 11,000 workers. Five of the six state-owned shipyards were operating at a deficit, despite repeated attempts to make them more competitive. In late August the government announced that by early 2009 it would privatize all six state-owned shipyards.

The EU identified anticorruption efforts as a key area in which Croatia

needed to demonstrate progress. In 2008 Croatia took several steps toward these goals, including the establishment of a new Police National Office for Quashing Corruption and Organized Crime, the prosecution of a surgeon for having accepted bribes from patients, and the launch of investigations into the conduct of Interior Minister Berislav Roncevic over a scandal involving the procurement of trucks when he was defense minister in 2004. Police also raided universities in a clampdown on professors who had accepted unofficial payments in return for granting good grades and for enrolling unqualified students. Concerns about organized crime reemerged in early October, however, when Ivana Hodak, the daughter of prominent lawyer Zvonimir Hodak, was shot dead. Zvonimir was representing former general Vladimir Zagorec, who was charged with having stolen diamonds valued at €3.5 million (about \$4.4 million) to use as collateral in wartime arms deals. In response to the murder, Sanader fired Roncevic, as well as Justice Minister Ana Lovrin and Zagreb Police Chief Marijan Benko.

Croatia's bid for EU membership was strengthened by the fact that it had important allies among the current member states, including Germany and Austria. The EU, however, was not universally popular in Croatia; a Euro-

A Croatian policeman confiscates documents and computer equipment from the University of Zagreb in September as part of a government crackdown on corruption in academic circles.

AFP/Getty Images

barometer poll in June found that only one-third of Croatians approved of EU membership, while one-quarter believed that it was bad for Croatia (39% were undecided).

In April Croatia was invited to join NATO, along with Albania. Current NATO member states signed accession protocols for Croatia in July, and the country was expected to formally join in April 2009 on the organization's 60th anniversary. Croatia was also a non-permanent member of the UN Security Council for the 2008–09 term.

According to the IMF, GDP growth was forecast at 4.3%, while the budget deficit was projected at only 1.3% of GDP. Croatia's macroeconomic stability was endangered, however, by its high external debt and accelerating inflation; the IMF forecast that by year's end the current account deficit would reach 9% of GDP, and the Croatian National Bank expected that the average inflation rate would climb to 7%. The global economic crisis was likely to increase the cost and difficulty of maintaining this debt, while foreign investment and exports were expected to decline, exacerbating the country's economic vulnerability. (LIZ DAVID-BARRETT)

CUBA

Area: 109,886 sq km (42,427 sq mi)

Population (2008 est.): 11,236,000

Capital: Havana

Head of state and government: President of the Council of State and President of the Council of Ministers Raúl Castro Ruz (acting until February 24 for Fidel Castro Ruz)

Fidel Castro resigned as president of Cuba in February 2008 at the age of 81, thus ending his 49-year tenure as the country's unrivaled leader. His younger brother and longtime minister of defense, 76-year-old Raúl Castro, was elevated to the presidency, which thereby formalized the transfer of power that had initially occurred in July 2006 when a serious stomach illness forced Fidel to relinquish power on a provisional basis. While younger officials, such as economic czar Carlos Lage and Foreign Minister Felipe Pérez Roque, remained in prominent roles, expectations of generational change were dampened when

Cuban shoppers survey computers for sale at a store in Havana following the lifting of a ban on the ability of ordinary Cubans to purchase consumer electronic goods.

Ramon Espinosa/AP

Raúl appointed 77-year-old José Ramón Machado, a top communist apparatchik, as the new first vice president and named 72-year-old Julio Casas the new minister of defense. Though officially retired, Fidel remained active by writing provocative columns about international affairs in the Cuban newspaper *Granma*; although Fidel never appeared in public, he remained in the public eye through the release of a small number of carefully selected photographs and video clips.

During his inauguration speech, Raúl hinted that the government would embrace a limited path of economic reform under the banner of the Communist Party, and in March 2008 the government approved a series of new economic measures. These included lifting a ban on the ability of ordinary Cubans to buy consumer electronic goods, such as DVD players and cell phones, and dropping a stricture that prevented Cubans from staying in the country's top tourist hotels. After introducing a plan in April that allowed thousands of Cubans to receive titles to their homes, the government eliminated salary caps and raised pensions for the country's more than two million retirees. The state also began to allow market forces to take root in the agricultural sector by permitting farmers to select crops and to play a larger role in making decisions about land use. In late August and early September, however, Cuba was struck in rapid succession by major hurricanes Gustav and Ike; more than 100,000 homes were damaged, and 30% of the country's crops were destroyed. The government estimated that storm damages would exceed \$5 billion. In November Hurricane Paloma hit the already-devastated island. As a result, Cuba was unlikely to match the 7.5% growth rate achieved in 2007, and the pace of economic reform was crippled.

Cuba reported that its top trading partner in 2007 was Venezuela (\$2.7 bil-

lion), followed by China (\$2.5 billion), Canada (\$1.4 billion), and Spain (\$1.2 billion). The U.S. (in the fifth spot) ranked among Cuba's largest trading partners, owing to a record \$582 million in all-cash sales from American food producers to Cuba; the deal was made possible by a loophole in the U.S. embargo approved by Congress in 2000.

On a political level, U.S.-Cuban relations remained frozen through much of 2008, symbolized by the two countries' inability to agree on the terms of hurricane relief assistance following the onslaught of Gustav and Ike. U.S. authorities offered Cuba \$5 million in emergency aid, but the Cuban government rebuffed the offer and instead called for the lifting of the U.S. embargo. U.S. presidential election victor Barack Obama called for increased dialogue between the U.S. and Cuban governments and favored lifting restrictions on the travel of Cuban Americans to visit family members in Cuba. In November Russian Pres. Dmitry Medvedev paid a visit to Cuba, sightseeing with Raúl Castro and later meeting privately with Fidel. The following month President Castro, making his first official foreign trip since assuming office in 2006, traveled to Venezuela, where he met with Pres. Hugo Chávez.

Popular disaffection with the Castro government came to the fore in January following the release of a videotape that showed computer science student Eliécer Ávila at a town hall forum sharply questioning government policies in an encounter with the National Assembly president, Ricardo Alarcón. Shortly thereafter, Cuban blogger Yoani Sanchez surged to worldwide attention with her ironic and critical musings about the Cuban reality on her popular blog Generation Y. Internet access on the island remained tightly controlled, however. In August, Cuban punk rocker Gorki Aguila was arrested for the crime of "social dangerousness," sparking an

outcry among the country's youth. The number of political prisoners dipped slightly, from 234 to 219, during the year. (DANIEL P. ERIKSON)

CYPRUS

Area: 9,251 sq km (3,572 sq mi) for the entire island; the area of the Turkish Republic of Northern Cyprus (TRNC), proclaimed unilaterally (1983) in the occupied northern third of the island, 3,355 sq km (1,295 sq mi)

Population (2008 est.): island 1,076,000; TRNC only, 271,000 (including Turkish settlers and Turkish military)

Capital: Nicosia (also known as Lefkosia/Lefkosa)

Head(s) of state and government: Presidents Tassos Papadopoulos and, from February 28, Dimitris Christofias; of the TRNC, President Mehmet Ali Talat

The political situation on the divided island of Cyprus showed signs of improvement in 2008. Dimitris Christofias (see BIOGRAPHIES) of AKEL, the communist Progressive Party of the Working People, was inaugurated as the Greek Cypriot president on February 28 and called for immediate and meaningful meetings with Mehmet Ali Talat, his Turkish Cypriot counterpart. The two presidents initially agreed to rejuvenate 13 moribund working groups and technical committees. Christofias and Talat later agreed on a single sovereignty and a single citizenship. Major negotiations continued at year's end.

The negotiators faced many problems, particularly the issue of land ownership, but they met in an atmosphere of lessened tension. The border was increasingly porous, with goods and people crossing in both directions. Despite progress, tensions remained. Vandals damaged Turkish-Cypriot property in the bicomunal village of Pyla, and the two regimes differed on foreign policy. For example, while Turkish Cyprus recognized Kosovo's independence, the Greek zone did not share the enthusiasm. Meanwhile, the UN peacekeeping forces celebrated their 60th anniversary, and the UN force in Cyprus continued the 44th year of its mission.

On January 1, Greek Cyprus adopted the euro, and the Cyprus pound ceased to be legal tender a month later. The economy was muted island-wide, with inflation slightly up and tourism down slightly. The lack of natural resources and a rapidly growing population caused serious problems. Cyprus was totally dependent on imported energy, and drought forced both sides to import water and increase desalination.

The island's rich archaeological heritage continued to come to light, often as a by-product of construction. Two ancient shipwrecks, a 3,500-year-old Egyptian ship and a 4th-century BC Greek commercial vessel, were found and investigated.

Department of Antiquities, HO/AP

CZECH REPUBLIC

Area: 78,866 sq km (30,450 sq mi)

Population (2008 est.): 10,408,000

Capital: Prague

Chief of state: President Vaclav Klaus

Head of government: Prime Minister Mirek Topolánek

In 2008 the Czech Republic experienced rising uncertainty as the government's position weakened and the economy slowed. After six inconclusive rounds of voting, in February the parliament reelected Vaclav Klaus as president by the narrowest possible margin. Support from the senior ruling Civic Democratic Party (ODS) alone was insufficient, and Klaus scoured the entire political scene for additional backing. The junior ruling Green Party (SZ) and the opposition Czech Social Democratic Party (CSSD) supported Klaus's challenger, U.S.-based economist Jan Svejnar, who was pro-European Union (EU) and favoured more attention to the environment.

While Svejnar's presidential victory would likely have triggered the government's collapse, Klaus's success failed to bring harmony. Indeed, maintaining political stability while pushing forward with further reforms proved difficult for Prime Minister Mirek Topolánek. Following its formation in early 2007, the cabinet lacked a formal parliamentary majority and depended on defectors from the CSSD. Although four deputies had left the CSSD by June 2008, the government remained challenged by disputes within and between the three ruling parties.

While SZ chairman Martin Bursík was accused of having deviated from the party program, rival Dana Kuchtová failed to unseat him at an extraordinary congress in September. That same month controversy heightened within the ODS as party deputy Jan Morava was caught on hidden camera gathering sensitive information about some other politicians. Morava claimed to have been provoked by former finance minister Vlastimil Tlustý (a Topolánek rival), and several Tlustý allies subsequently quit the ODS parliamentary caucus. The third ruling party, the Christian and Democratic Union–Czech People's Party (KDU-

CSL), regained its footing after chairman Jiri Cunek was cleared of corruption charges and thus was allowed to return to the government in April. Some Green representatives remained skeptical of Cunek, however.

Given the country's aging population, pension and health care reforms ranked among the greatest legislative challenges. Although the ruling parties approved an outline in April for health care reforms, internal conflict persisted over several key issues, including health care fees, which were introduced at the start of 2008. In June the parliament backed the first step in pension reform, gradually raising the retirement age to 65 by 2030. The bill was approved despite criticism from the opposition and trade unions, which organized a one-hour general strike before the vote. Topolanek vowed that the government would not set a target date for the adoption of the euro without further pension and health care reforms.

During the second half of October, the Czech Republic held elections to the Senate and regional assemblies, which resulted in a landslide CSSD victory. With 27 of the 81 seats being contested in the Senate elections, the CSSD won 23, compared with just 3 for the ODS, which lost its majority in the Senate. Following a failed attempt to unseat the government in April, the CSSD held another unsuccessful parliamentary no-confidence vote in late October (the fourth since 2006).

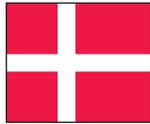

Government unity was seen as especially important, since the Czech Republic was scheduled to take over the European Union presidency in the first half of 2009. A potential embarrassment related to the ratification of the EU Reform Treaty also loomed, given the strong contingent of Euroskeptics in the parliament. In late November the Czech Constitutional Court ruled that the treaty was compatible with national law; the parliament was not expected to ratify the document until early 2009, however.

Elsewhere in foreign relations, U.S. Secretary of State Condoleezza Rice visited Prague in July to sign an agreement on the installation of an antimissile shield. In July, Russia cut back on oil supplies to the Czech Republic, ostensibly for technical reasons. Still, many Czechs saw that move as punishment for the government's agreement on the missile deal. Receiving pressure at home, in October Topolanek canceled his trip to Washington, D.C., to discuss the shield.

On the economic front, the country experienced a moderate weakening during 2008 after record-high growth rates in 2005–07. The economy was negatively affected by the global slowdown and strong koruna. Meanwhile, the fiscal reforms that took effect at the start of 2008 drove up inflation, which was boosted further during the first half of the year by high food and fuel costs. On a positive note, the Czech Republic recorded its fourth consecutive foreign-trade surplus.

DENMARK

Area: 43,098 sq km (16,640 sq mi)

Population (2008 est.): 5,494,000

Capital: Copenhagen

Chief of state: Queen Margrethe II

Head of government: Prime Minister Anders Fogh Rasmussen

In the spring of 2008, the Danish Folketing (parliament) comfortably ratified the Lisbon Treaty package to reform the EU and thereby avoided a national plebiscite on the issue. The Irish rejection of the deal in June, however, forced Prime Minister Anders Fogh Rasmussen to shelve his centre-right government's plans to hold a vote on Denmark's EU opt-outs on the euro and closer cooperation in defense and law enforcement—exemptions seen by the government as serious impediments to the country's full participation in Europe. Although enjoying solid support at home, Denmark's tight immigration policies were again subjected to international criticism when the EU Commission's General Directorate for Justice (quoting a ruling by the European Court of Justice) warned that the country was in breach of EU rules on family reunification and free movement of labour. Since 2002, strict controls on the inflow of Danes' foreign spouses to Denmark had forced thousands of mixed nationality couples to reside in neighbouring Sweden, and the revelations that such couples could legally attain Danish residence after living in another EU member country for only 2–10 weeks sparked furious outbursts against the Danish immigration authorities. The prospect of EU legal ac-

Muslim demonstrators in Copenhagen brandish flags in February to protest the decision by some Danish newspapers to reprint controversial satiric cartoons of the Prophet Muhammad.

tion against Denmark strained the Rasmussen-led Liberal-Conservative coalition's cooperation with the far-right, anti-immigration Danish People's Party, on which the coalition relied for its parliamentary majority. In the end, however, the government toed the line; a new agreement brought Danish immigration practices into accordance with EU law while at the same time imposing tight spot checks to ensure that applicants had actually been working and living in another EU country.

The Muhammad cartoon scandal that sparked virulent anti-Denmark protest across the Muslim world in 2006 reemerged in February 2008. After Danish police arrested three young people—two Tunisians and a Dane of Moroccan origin—suspected of plotting to kill one of the cartoonists behind the satiric cartoons, major Danish newspapers, in a show of support for freedom of speech, reprinted the infamous caricatures. This again sparked mass demonstrations by Danish Muslims and scattered protests throughout the Islamic world, culminating in June in a car bomb attack on the Danish embassy in Islamabad, Pak., in which six Pakistanis were killed and 30 injured. In an Internet statement, al-Qaeda took responsibility for the blast, warning that further action would ensue if Denmark failed to apologize for publishing the cartoons.

Early in the year Denmark had the dubious distinction of being the first EU country to fall into recession. On

the brighter side, the country's unemployment rate remained below 2%, and its state budget and current account showed solid surpluses, with public and foreign debt at low levels and self-sufficiency in oil and gas from North Sea offshore fields guaranteed for more than two decades. As the international credit crunch rocked markets in the autumn, the Danish central bank moved to safeguard bank deposits as part of a deal to set up a 30 billion kroner (1 kroner = about \$0.18) liquidation fund. In September, after years of negotiation, Denmark reached agreement with Germany on the construction of the Fehmarn Belt Bridge, a 19-km (12-mi) triple-span cable-stayed road-rail bridge linking the two countries. The project was due for completion by 2018 at an estimated cost of 32.8 billion kroner.

(CHRISTOPHER FOLLETT)

DJIBOUTI

Area: 23,200 sq km (8,950 sq mi)

Population (2008 est.): 506,000

Capital: Djibouti

Chief of state and head of government:

President Ismail Omar Guelleh, assisted by
Prime Minister Dileita Muhammad Dileita

Djibouti faced a tumultuous year in 2008 as it teetered on the brink of a war with Eritrea and endured another food crisis. In April, Eritrea amassed troops along the Ras Doumeira border area of Djibouti; this action resulted in border skirmishes that led to the deaths of about 20 Djibouti soldiers, which prompted Pres. Ismail Omar Guelleh to declare war on Eritrea in June. The African Union, the UN Security Council, and the Arab League roundly condemned the Eritrean incursion.

Parliamentary elections held in February were marked by the highest voter turnout (72%) in 15 years. The ruling coalition, the Union for a Presidential Majority (UMP), swept up all 65 seats as the three-party opposition alliance, Union for a Democratic Alternative (UAD), boycotted the elections.

Amid a confluence of a global rise in food prices, persistent drought, and a virtual total dependency on imports of staple goods, the country faced a food crisis beginning in March, when nearly

55,000 people required emergency food aid. The government implemented measures, including price controls on most basic commodities, in a bid to stem the food crisis. By July more than 150,000 people were facing food shortages.

(MARY EBELING)

DOMINICA

Area: 750 sq km (290 sq mi)

Population (2008 est.): 72,500

Capital: Roseau

Chief of state: President Nicholas Liverpool

Head of government: Prime Minister

Roosevelt Skerrit

Dominica surprised its Caricom colleagues in January 2008 when Prime Minister Roosevelt Skerrit declared his desire to join the Bolivarian Alternative for the Americas (ALBA), a group vigorously promoted by Venezuelan Pres. Hugo Chávez. ALBA's underlying philosophy promoted more government control over the economy and integration among Latin American and Caribbean states, to the exclusion of the U.S., which for more than a decade had backed the proposed Free Trade Area of the Americas (FTAA). After Chávez described ALBA as an "anti-imperialist military alliance," Dominica reassured the U.S. in April that it would not be part of any group that had, as its cardinal principle, hostility to the U.S. Be-

A condominium construction site in the Dominican Republic resort city of Punta Cana stands deserted on November 15 after the global economic downturn forced work to be halted on the multimillion-dollar project.

Kena Betancur/AP

sides Venezuela, ALBA's membership included Cuba, Bolivia, and Nicaragua.

In the realm of foreign affairs, Dominica and the nearby French department of Guadeloupe agreed in April to jointly undertake development of thermal resources. In June, Prime Minister Skerrit announced that Dominica would abandon its long-standing practice of automatically supporting Japan in its continuing effort to have the ban on commercial whaling lifted.

(DAVID RENWICK)

DOMINICAN REPUBLIC

Area: 48,671 sq km (18,792 sq mi)

Population (2008 est.): 9,507,000

Capital: Santo Domingo

Head of state and government: President

Leonel Fernández

Incumbent Pres. Leonel Fernández of the Dominican Liberation Party defeated his principal opposition opponent by a convincing margin in the May 16, 2008, presidential elections in the Dominican Republic. Fernández, a still relatively youthful 54-year-old, entered his third presidential term with one of the strongest records of economic growth in Latin America.

The global economic downturn, however, had a serious impact on a country that was heavily dependent on tourism, free trade, industrial zones, re-

mittances from the United States, and mining. GDP growth was more than 5%—still high by neighbouring standards—but faltering.

Existing contradictions between fiscal performance and quality of life for a high percentage of Dominicans stood out in sharper contrast in 2008. The neglect of investment in human and physical infrastructure steadily eroded President Fernández’s popularity. An international survey highlighting the decline of public education in Latin America placed the Dominican Republic in last place. Public outrage over endemic electrical outages resulted in widespread demonstrations and several deaths. The traditionally high resilience of Dominicans in the face of adversity was also stretched by Fernández’s failure to comply with his campaign commitments to take action against the entrenched culture of corruption. Drug trafficking flourished in a climate of corrupt and weak institutions. Complaints about a profligate election system persisted. On a per capita basis, campaign costs were the highest in Latin America. Despite food and fuel subsidies, inflation was running at 13%.

A skilled diplomat, Fernández continued to consolidate Dominican relations within the region and maintain close ties with Haiti, Venezuela, and the United States. A major international accomplishment was the successful mediation of a potentially incendiary crisis between Ecuador, Venezuela, and Colombia. As chair of the regional Rio Group, meeting in Santo Domingo, Fernández defused a dangerous situation precipitated by a Colombian attack in March on a Colombian guerrilla outpost inside the Ecuadoran frontier. In October the Dominican Republic, along with 13 Caribbean Community (Caricom) members, approved a cooperative trade and economic agreement with the European Union. (JOHN W. GRAHAM)

EAST TIMOR (TIMOR-LESTE)

Area: 14,919 sq km (5,760 sq mi)
Population (2008 est.) 1,078,000
Capital: Dili
Chief of state: President José Ramos-Horta
Head of government: Prime Minister Xanana Gusmão

East Timor was plunged into a political crisis in 2008 when Pres. José Ramos-Horta was shot in the back twice outside his home in Dili on February 11. He and Prime Minister Xanana Gusmão were both targeted in assassination attempts on that day, but Gusmão escaped injury. Ramos-Horta was evacuated to Darwin, Australia, for medical treatment. He returned home in April.

Maj. Alfredo Reinado, leader of a band of disaffected soldiers known as “the petitioners,” was said to have been responsible for the attack. Reinado, who was living under an agreement to give him freedom from prosecution for earlier offenses, was killed by the president’s security guards during the incident; consequently, motives were hard to determine, and uncertainty remained. At Reinado’s funeral there were demonstrations of grief from his supporters and family members, who shouted “Viva” at his grave site. The attack led to a security crisis that threatened East Timor’s precarious grip on parliamentary democracy. Australian Prime Minister Kevin Rudd responded strongly, saying that decisions would be made in the region by the ballot box and not the gun. Rudd flew to Dili to reassure the East Timorese that Australian troops would remain in that country for as long as they were invited to do so by East Timor’s government.

ECUADOR

Area: 272,045 sq km (105,037 sq mi), including the 8,010-sq-km (3,093-sq-mi) Galapagos Islands
Population (2008 est.): 13,481,000 (Galapagos Islands, about 22,000)
Capital: Quito
Chief of state and head of government: President Rafael Correa Delgado

Riding twin waves of high oil prices and strong personal popularity, Ecuadoran Pres. Rafael Correa (*see* BIOGRAPHIES) secured popular support for sweeping political change in a referendum held in September 2008. More than 60% of those who voted approved a new constitution that entrenched programs, such as social security benefits for mothers and the self-employed, and in-

creased presidential powers over economic and monetary policy. Under the new charter, Correa was bound to hold elections early in 2009; if reelected he could seek another four-year presidential term in 2013. The constitution also broke new ground by conferring legal rights on ecosystems and “natural communities,” allowing lawsuits to be filed on their behalf. Many of Correa’s political opponents and business executives cautioned that the measures were economically unsound and politically dangerous. Correa, however, said that the vote was part of a “citizens’ revolution” that would give him the power to redistribute wealth and clean up a corrupt and unstable political system.

Strong world prices for oil, Ecuador’s principal export, enabled Correa to stimulate the economy with social-spending programs that would provide seeds to farmers and building materials to would-be homeowners. Ecuador’s government was more disposed to negotiate with foreign oil firms than to nationalize them, as its counterparts in Venezuela and Bolivia had done. Several agreements were renegotiated as service contracts, and talks were held with the Canadian firm Ivanhoe Energy Inc. on development of the Pungarayacu oil field. Minister of Politics Ricardo Patiño said that foreign firms were welcome but added, “Let’s make sure their profits are normal, not a stick-up of the Ecuadoran state as in the past.”

Correa’s personal standing in Ecuador was enhanced by a confrontation in March with Colombian Pres. Álvaro

Supporters of Ecuadoran Pres. Rafael Correa cheer after hearing the early results of a constitutional referendum on September 28 in Quito.

Fernando Vergara/AP

Uribe. Colombian troops battling the rebel Revolutionary Armed Forces of Colombia (FARC) launched a raid in Ecuadoran territory, killing a top FARC commander and 20 others. Correa ordered Ecuadoran troops to the border and cut diplomatic ties with Colombia. Uribe later apologized for the incident, but Ecuador continued to demand concessions as the price of restoring relations. Correa replaced his defense minister and several senior military commanders after press reports suggested that intelligence supplied by the Ecuadoran military to the United States may have helped the Colombian forces locate the FARC unit. Meanwhile, Correa said that the lease (scheduled to expire in 2009) allowing the U.S. to conduct anti-drug-trafficking surveillance flights from the Manta air base on the Pacific coast would not be renewed. Flames and smoke rise from the People's Assembly (parliament) building in Cairo on August 19.

EGYPT

Area: 997,739 sq km (385,229 sq mi)
Population (2008 est.): 74,805,000
Capital: Cairo
Chief of state: President Hosni Mubarak
Head of government: Prime Minister Ahmad Nazif

Egypt experienced an unprecedented surge in 2008 in the political involvement of its citizens, whose activities flouted limitations imposed since 1981 by the state of emergency. This was manifested in widespread protests, ranging from food riots to confrontations about environmentally hazardous projects, and support for the breakout of the besieged population of Gaza into Egypt.

In response to public outcry, the government delayed until 2009 the submission for parliamentary approval of a draft antiterrorism law to replace the 27-year-old state of emergency. Leaked parts of the draft raised public concern and brought condemnation by human rights activists. The government-appointed National Council for Human Rights criticized police torture practices, demanded full disclosure by the Ministry of the Interior, and denounced the trial of civilians before military tribunals as unconstitutional. The report also rejected the proposed restrictions

on television satellite channels by license regulation. The independent Egyptian Organization for Human Rights accused the government of having manipulated incidents of violence to legalize the perpetuation of the state of emergency and documented in its annual report 226 cases of torture and 93 deaths in police custody in the previous seven years.

Sparring continued between the government and the banned Muslim Brotherhood, the best-organized opposition group in the country. A military tribunal handed down various prison sentences to 25 leading members of the Brotherhood on charges of having funded the group's activities. The sentencing ignited student demonstrations in five universities, as the condemned included some university professors. An administrative court, however, ruled that military tribunals did not have the jurisdiction to try civilians. In the meantime, the Interior Ministry began the release in March of some 500 pro-Islamic detainees; compensation also started to be paid to another 800 of an estimated 15,000 detainees who had won monetary awards after having endured years in detention.

A strike on April 6 by textile workers in the Nile delta city of Al-Mahallah al-Kubra marked a watershed in civil political action. An estimated 25,000 workers and thousands of irate supporters staged a preannounced strike to protest

the government's failure to honour a promise it had made in September 2007 for an improved compensation package. Antiriot squads in full gear supported by thousands of security forces clashed with demonstrators as they went on a rampage, burning tires and pelting shops, vehicles, public transport, security forces' trucks, and a police station. Teargas bombs, rubber bullets, and batons were used to break up the demonstrations, which had been organized through Internet announcements. An estimated 111 persons were injured, including 41 security personnel, and a 15-year-old schoolboy was killed by stray bullets. In December an emergency State Security court sentenced 22 persons to prison terms of three to five years and acquitted 27 others. Poverty, rising food prices, scarcity of subsidized bread, unemployment, the poor quality of health services and education, and charges of nepotism and rampant corruption were among the many grievances in a country in which inflation reached 25.6% (food price inflation 35%) in August, unmitigated by a 30% increase in the salaries of public workers and 7% GDP growth. In October inflation was revised downward to 21%.

Nationwide elections were organized on April 8 to fill 52,000 local council seats. The ruling National Democratic Party (NDP) won 44,000 seats uncontested. The Muslim Brotherhood boycotted the elections, and a minority of party-affiliated or independent candidates filled other seats.

In August the historic Shura (Consultative) Council building (constructed in the mid-19th century in downtown Cairo) was gutted by fire, which was attributed to an electrical short circuit. Some documents were destroyed by the blaze, which also partially damaged the neighbouring People's Assembly (parliament) building. Another fire, also reportedly ignited by a short circuit, destroyed the National Theatre, built in 1921. In September a 1,000-ton loose boulder from the Muqattam plateau, east of Cairo, fell and crushed part of the shantytown below, killing 107 persons and setting off clashes between angry crowds and government security forces.

In a surprise development, 11 European tourists and 8 Egyptian guides were kidnapped on September 19 while on a little-trodden desert trek at Jebel Oweinat in southwestern Egypt. Unidentified kidnapers asked for a ransom of €6 million (\$9 million). Ten days later all hostages were safely released by their kidnapers. (AYMAN M. EL-AMIR)

EL SALVADOR

Area: 21,041 sq km (8,124 sq mi)
Population (2008 est.): 5,794,000
Capital: San Salvador
Head of state and government: President
 Elías Antonio Saca González

At the start of 2008, the final full year of Pres. Elías Antonio (Tony) Saca González's term in office, El Salvador enjoyed a modest rate of economic growth. Rising foreign trade and remittances from Salvadorans in the United States accounted for much of this success, however. Although the Central America-Dominican Republic Free Trade Agreement (CAFTA-DR) had not provided all the benefits that the government promised, it had increased trade with the U.S. and the Dominican Republic. Separate trade agreements with Chile, Mexico, Panama, and Taiwan had further expanded Salvadoran trade, and negotiations with the Caribbean Community (Caricom), Canada, Israel, and the European Union promised additional growth. The U.S. economic downturn, however, slowed the growth in imports and exports as well as remittances, which had reached record levels in 2007.

President Saca received the Path to Peace Award from an international Roman Catholic foundation that cited his leadership in consolidating peace, strengthening democracy, and reducing delinquency and poverty. Statistically, poverty levels had fallen, but there remained a vast gulf between the rich and the poor in El Salvador. Thus, some Salvadoran Roman Catholic organizations, notably the Christian Base Communities, criticized the granting of the award to Saca and complained that his draconian measures in fighting crime and violence had led to frequent civil rights violations.

El Salvador continued to be plagued by violence, much of which emanated from the Mara 18 and Mara Salvatrucha gangs—which numbered their membership in the thousands—but was also related to drug trafficking and organized crime. In 2007 the murder rate reached 64 deaths per 100,000 population, one of the highest in the world. Violence and poverty also fed the continuing exodus of the population, but

the rising number of illegal immigrants deported from the U.S. contributed to the growth of the gangs. In March the Los Angeles Police Department signed an agreement with the El Salvadoran police to exchange officers in an effort to study and observe methods of dealing with these gangs.

For the El Salvadoran presidential election scheduled for March 2009, the popular TV newscaster and political moderate Mauricio Funes gave his opposition Farabundo Martí National Liberation Front (FMLN) a more centrist image. He held a substantial lead in the polls over the Nationalist Republican Alliance (ARENA) candidate Rodrigo Ávila. The U.S. accused Venezuelan Pres. Hugo Chávez of trying to influence the outcome of the Salvadoran election by supporting the FMLN candidate. Although Chávez supplied cheap oil to Salvadoran towns dominated by the FMLN, he denied intervening directly in the electoral campaign.

(RALPH LEE WOODWARD, JR.)

EQUATORIAL GUINEEA

Area: 28,051 sq km (10,831 sq mi)
Population (2008 est.): 616,000
Capital: Malabo
Chief of state and head of government:
 President Brig. Gen. Teodoro Obiang Nguema Mbasogo, assisted by Prime Ministers Ricardo Mangué Obama Nfubea and, from July 8, Ignacio Milam Tang

Though Equatorial Guinea Pres. Teodoro Obiang Nguema Mbasogo ruled Africa's third largest oil producer (after Nigeria and Angola) dictatorially, in May 2008 parliamentary and local elections were held; the governing Democratic Party and its allies won an overwhelming victory, taking all but one of the 100 parliamentary seats. New attention was focused on Equatorial Guinea when British mercenary Simon Mann—who was accused of having led a coup in 2004 to topple Obiang Nguema and replace him with exiled opposition leader Severo Moto—was extradited secretly from Zimbabwe, where he had served four years in prison. Mann, a former officer in the British Special Air Service, was put on trial in Malabo, and the proceedings were broadcast internationally. He expressed remorse and revealed new details about the failed coup attempt, implicating the son of former U.K. prime minister Margaret Thatcher and claiming that Spain, South Africa, and the United States knew of the plot and approved it. Mann was sentenced on July 7 to 34 years in prison. In addition to his prison sentence, Mann was fined some \$24 million.

In July 2008 Nguema replaced Prime Minister Ricardo Mangué Obama Nfubea, whom he accused of graft and security failings relating to the 2004 coup attempt, and installed Ignacio Milam Tang. A pressing issue for the new government was the maritime border dispute with Gabon over the island of Mbanie in the Gulf of Guinea, where oil had been discovered. The UN appointed a Swiss legal expert to try to resolve the dispute.

(CHRISTOPHER SAUNDERS)

Daniel Flynn—Reuters/Landov

ERITREA

Area: 121,144 sq km (46,774 sq mi)

Population (2008 est.): 5,028,000

Capital: Asmara

Head of state and government: President Isaias Afwerki

Eritrea entered into another frontier dispute in 2008, this time with its neighbour Djibouti. In June regular soldiers of the two countries clashed at a small area along their undemarcated border, leading to more than 20 deaths and the wounding of dozens.

The fighting came as the UN prepared to disband a mission aimed at preserving a fragile cease-fire between Eritrea and Ethiopia. The UN, which had earlier complained that Eritrea had cut off fuel supplies to the mission (which had arrived in December 2000 to keep the peace after a deal was reached to end a two-year war in which 70,000 lives were lost), completed the pullout of its peace-keeping troops from the tense border in July. The border between the two countries remained volatile throughout the year, however, as both countries massed soldiers on their respective sides.

While the new tensions simmered at the Djibouti border, Eritrean Pres. Isaias Afwerki's government quarreled with the international community. The regime refused to cooperate with a UN Security Council panel investigating the problem, which had roots in frontier ambiguities first created during the 19th-century partition of Africa by European powers.

Hunger and hardship continued to afflict many Eritreans. In September an international humanitarian organization warned that 17 million people in the Horn of Africa, a region that included Eritrea, urgently needed food and other types of humanitarian aid because of a long-running drought, human conflict, and global escalation of food prices.

On the economic front, Eritrea made little improvement on a large scale, but, in an effort to attract investors, the country announced the creation of a new export zone at its port of Massawa. The World Bank in June approved \$29.5 million in new financing for Eritrea to help it pay for a power-distribution and rural-electrification project and fund early-childhood-development

programs. In August a Canadian mining company, Nevsun Resources Ltd., disclosed that it had abandoned its mining operations in Mali to spearhead development of a \$250 million gold-mining project in Bisha, Eritrea. The company would operate the mine in partnership with an Eritrean government-controlled corporation.

(PATRICK L. THIMANGU)

ESTONIA

Area: 45,227 sq km (17,462 sq mi)

Population (2008 est.): 1,340,000

Capital: Tallinn

Chief of state: President Toomas Hendrik Ilves

Head of government: Prime Minister Andrus Ansip

On Feb. 24, 2008, Estonia marked the 90th anniversary of its declaration of independence, and the celebration continued in various forms throughout the year, including plans for a contested Freedom Monument in central Tallinn. Prime Minister Andrus Ansip's three-party coalition managed to retain power, but internal divisions among its partners grew as the country faced increasing economic hardship. While Ansip's Reform Party played the leading role in the national government, Tallinn Mayor Edgar Savisaar and his Centre Party, the main opposition in the parliament, held majority control in the city council of the capital.

Dismal economic news dominated domestic life. After nearly a decade of rapid growth, Estonia suffered a sharp economic downturn and the onset of a recession, further magnified by the global financial crisis late in the year. The overheated economy stopped growing as the real-estate bubble burst, and domestic demand and exports fell. Because of a shortfall in revenue, the government was forced to make midyear budget cuts, increase the value-added tax on certain items, and postpone a projected income-tax reduction. At the same time, the inflation rate reached double digits, which made adoption of the euro—a key government goal—unlikely before 2011.

Relations with Russia continued to be chilly following the 2007 imbroglio

over the relocation of the Bronze Soldier monument. In June 2008, at the fifth World Congress of Finno-Ugric Peoples in Khanty-Mansiysk, Russia, Estonian Pres. Toomas Hendrik Ilves walked out to protest an attack made by a Russian State Duma official on the Estonian government's policies. In August Estonia condemned Russian actions in Georgia, and President Ilves quickly joined other Baltic and Eastern European leaders in Tbilisi in a show of solidarity with Georgia. At the end of 2007, Estonia joined the Schengen Convention, which eliminated border controls with most other European countries, and in November 2008 visa-free travel to the United States became a reality.

(TOIVO U. RAUN)

ETHIOPIA

Area: 1,127,127 sq km (435,186 sq mi)

Population (2008 est.): 78,254,000

Capital: Addis Ababa

Chief of state: President Girma Wolde-Giyorgis

Head of government: Prime Minister Meles Zenawi

After several years of political turmoil following the 2005 national and regional elections in Ethiopia, domestic politics returned somewhat to normal in 2008. Most of the political detainees (mainly members of opposition political parties and several journalists), who in June 2007 had been tried and found guilty of various crimes, had since been pardoned and released. Civil society activists Netsanet Demissie and Daniel Bekele submitted a pardon request and were freed in March 2008.

The Ethiopian economy was projected to grow at the vibrant rate of 8.4% in 2008, though this was down from 11.4% in 2007. Most exports came from the agricultural sector, particularly coffee (exports grew by 40% in 2008), tea, spices, cereals, pulses, oilseeds, flowers, fruits, and vegetables. Whereas tourism and other aspects of the economy continued to grow in 2008, inflation and rising prices on consumer goods strained the government's ability to meet local demand. Urban citizens continued to particularly experience the impact of rising prices on sta-

Anita Powell/AP

A three-year-old Ethiopian child, weighing less than 4 kg (9 lb), awaits care at an emergency feeding centre in southern Ethiopia in May.

ples such as grains, cereals, and cooking oil, which led the government to introduce some price controls.

The World Bank and many bilateral donors resumed assistance to Ethiopia, though donors remained concerned about human rights and regional conflicts. It was a difficult year for Ethiopia's poor, at least 5 million of whom were considered chronically food insecure and expected to need food assistance; an additional 10 million people were suffering temporary food insecurity owing to droughts and floods. Violence at the local level and serious incidents of human rights abuses were noted throughout 2008, especially, as in previous years, in the Oromiya and Somali regions.

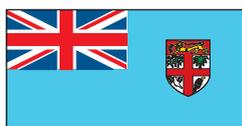

Long-delayed local elections were held in April. The ruling Ethiopian People's Revolutionary Democratic Front (EPRDF) won the vast majority of the seats. By-elections were also held for seats that had been won in 2005 by the opposition but never filled (members had refused to take them). Most of these seats were also won by the EPRDF. Credible reports of harassment and intimidation of candidates and voters in key constituencies and the absence of impartial monitors led most to consider the elections lacking in legitimacy. In addition, after the release from prison in 2007 of most of the political leadership, the various political opposition parties fragmented substantially. Caretaker governments in the two largest cities, Addis Ababa and Dire Dawa, were replaced by permanent elected administrations. A restrictive

press law was passed by the parliament over objections by members of the opposition, and a highly controversial law regulating civil society organizations was tabled as well.

The border dispute with Eritrea continued throughout 2008 with little change. The UN Security Council ended its peacekeeping mission (UN-MEE) in July, but some feared the possibility of a return to war. In December 2006 Ethiopia had launched a coordinated air and ground war inside Somalia, and thousands of Ethiopian troops were estimated to still be inside Somalia supporting the Transitional Federal Government against insurgents. Eritrean and Ethiopian support to opposing sides in Somalia continued unchecked.

FIJI

Area: 18,272 sq km (7,055 sq mi)
Population (2008 est.): 839,000
Capital: Suva
Chief of state: President Ratu Josefa Iloilovatu Uluivuda
Head of government: Prime Minister Voreque Bainimarama (interim)

A standoff between Fiji's interim government and its Pacific neighbours continued throughout 2008. At the

heart of the tension was the timing of an election originally scheduled for early 2009. Interim prime minister Voreque Bainimarama continued to insist that the objectives of the 2006 coup—the elimination of corruption in public and private institutions and the adoption of a People's Charter for a new Fiji—should precede general elections and the return of an elected government. To that end, the National Council for Building a Better Fiji continued to work on the People's Charter for Change, Peace and Progress and by August was circulating a draft charter for public comment.

The Pacific Islands Forum (PIF) appointed a working group to assist the interim government in its preparations for elections. Technical difficulties arose from the interim government's determination to replace existing communal rolls with a single consolidated electoral roll, which proved more complicated than anticipated. The electoral process was further delayed when the recent appointment of a new supervisor of elections was overturned. Fiji withdrew from the PIF's working group in July and in August chose not to attend the PIF's annual meeting. Bainimarama further indicated that criticism by the PIF might lead Fiji to withdraw from that body, but Fiji did not act on that threat.

(CLUNY MACPHERSON)

FINLAND

Area: 338,417 sq km (130,664 sq mi)
Population (2008 est.): 5,310,000
Capital: Helsinki
Chief of state: President Tarja Halonen
Head of government: Prime Minister Matti Vanhanen

Eero Heinälouma, the head of Finland's Social Democratic Party (SDP), announced in February 2008 that he would not run for the position again in the June convention owing to the party's unfavourable election results in the 2007 general election. As his replacement, SDP members elected Jutta Urpilainen, a primary-school teacher who was elected to Parliament in 2003 and became vice-chair of the SDP floor group in 2007. She beat her main con-

tender, Erkki Tuomioja, a former foreign minister and 1960s student radical, by a margin of 218–132 in the second round of voting.

Minister for Foreign Affairs Ilkka Kanerva lost his office after the stripper to whom he had sent some 200 text messages went public early in 2008. The National Coalition (Conservative) Party chairman, Jyrki Katainen, decided to dismiss Kanerva, as the veteran politician had been warned before for similar indiscretions. The move inspired some debate, as Kanerva's "affair" had never been sexual, and some saw in the case a worrying sign of "American-style puritanism" gaining ground in Finnish politics. Kanerva was replaced in April by Alexander Stubb, a member of the European Parliament from the Conservative Party.

Party Secretary Jarmo Korhonen of the Centre Party was implicated in a scandal over unannounced campaign contributions. Five prominent businessmen had invested €406,000 (about \$556,000) in an association, founded the year before, financing mostly Centre Party politicians but also Conservative and SDP candidates. It appeared that the businessmen had received preferential treatment for their projects in municipalities of politicians whom they had supported. Unannounced campaign contributions, though illegal, carried no penalty, however, and Korhonen was reelected in June after apologizing to party supporters.

In the municipal elections on October 26, two clear winners emerged. The Conservatives became the largest party for the first time, with 23.5% of the vote, and the tiny True Finns jumped to 5.4% from 0.9% in 2004. The latter's success was explained by the mainstream media's reluctance to discuss the adverse effects of immigration, an issue often raised by the True Finns. The biggest losers were the Social Democrats (21.2%) and the Centre Party (20.1%), which dropped to third place. The Greens increased their popularity 1.6 points to 8.9% and bumped the Social Democrats from second to third place in Helsinki, where the Conservatives remained the leading party. Voter turnout was 61.3%, up 2.7 points from 2004. The number of women councilors grew slightly to 36.7% from 36.4%.

Former president (1994–2000) and career diplomat Martti Ahtisaari in October was awarded the 2008 Nobel Prize for Peace. (See NOBEL PRIZES.) Ahtisaari received the prize in honour of his

life's work of successful mediation for peace, notably in Namibia, the Aceh province of Indonesia, Kosovo, Northern Ireland, the Horn of Africa, and, most recently, Iraq. (SUSANNA BELL)

FRANCE

Area: 543,965 sq km (210,026 sq mi)

Population (2008 est.): 62,028,000

Capital: Paris

Chief of state: President Nicolas Sarkozy

Head of government: Prime Minister François Fillon

The year 2008 was one in which French Pres. Nicolas Sarkozy showed his capacity to act—on the domestic front and as president of the European Union for the second half of the year—and to surprise his fellow citizens as he presented them with extensive political and economic reforms as well as more exposure to a French president's private life than they were used to, or perhaps wanted. Sarkozy bounced back from low opinion poll ratings and election setbacks at the start of the year to push through a strengthening of France's weak Parliament, to steer France more toward NATO, and to get the EU to

agree on a response to the international economic crisis as well as a more ambitious climate-change program aimed at negotiating a global accord in 2009 with incoming U.S. Pres. Barack Obama's administration.

Domestic Affairs. Elected in May 2007 on a reform platform, Sarkozy made little progress in his first few months, and the things that he did accomplish came at some cost; for example, he brought about an end to special pension privileges for railway workers, but it was achieved at the price of an autumn rail strike and a hike in basic rail pay. As 2007 passed, his popularity rating sank rapidly in the opinion polls. By February 2008 one survey had rated his popularity 11 points below that of Prime Minister François Fillon, who held an office that seemed almost designed to take the flak for problems that the president would be expected to float above.

Two reasons were offered for this reversal. Sarkozy evidently displeased many French with the extended publicity that surrounded his private life: the quick divorce from his second wife, Cécilia, in late 2007 and his whirlwind romance with Italian-born model-turned-singer Carla Bruni, whom he married on Feb. 2, 2008. Many French felt that Sarkozy's apparent encouragement of the boundless media coverage of his personal life verged on the vulgar and that the president was paying too much attention to Bruni and not enough to

French Pres. Nicolas Sarkozy, accompanied by his wife, Carla Bruni-Sarkozy, waves from the Élysée Palace during Bastille Day ceremonies in Paris on July 14; Sarkozy married the model-turned-singer in February.

As part of a protest against declining farm incomes in France amid the global economic crisis, a shepherd leads his herd of sheep past the Eiffel Tower in Paris on November 13.

his job. The second reason was Sarkozy's unusual involvement in the details of government, effectively supplanting Fillon and sometimes even individual ministers, as when he superseded his education minister in negotiations with university unions or when he insisted on going to an EU finance ministers meeting.

This style of governing created some unease about Sarkozy's otherwise sound constitutional reforms in July. By only one vote, the Senate and the National Assembly together gave the necessary 60% majority approval to reforms that would give the Assembly more power, including the right to be informed within three days of any foreign military operation and the right of veto over any such operation lasting more than four months. The reforms also limited the president's tenure to two five-year terms. Although the main Socialist opposition lacked the votes to prevail, they particularly objected to the president's new right to address the National Assembly directly, on the grounds that this violated the separation of powers and undermined the office of prime minister. Notwithstanding, Fillon loyally welcomed this change.

Sarkozy's centre-right Union for a Popular Movement (UMP) lost ground in the March local council elections, though the overall vote tally in the sec-

ond round on March 16 was close. The UMP and its allies won 48% of the vote, versus 49% for the Socialists, with their Green and left-wing allies. The UMP kept control of Marseille, the country's second biggest city, but could not win the largest, Paris, and the third largest, Lyons, from the Socialists, who gained Toulouse and Strasbourg.

Nevertheless, Sarkozy pushed on with his economic reforms, even as France began to feel the international credit crunch's effect. Legislation was passed to encourage people to work more (by allowing more overtime beyond the standard 35-hour workweek) and longer (by offering incentives for older people to stay in the workforce). The government later recapitalized French banks with some €10.5 billion, though it had to satisfy EU rules to ensure that Paris was not being overly generous to basically sound banks. It also loaned €22 billion to small businesses to help them weather economic recession.

Foreign Affairs. French foreign and defense policies during the year were marked by some passing difficulties with EU partners and a further shift toward the U.S. and NATO. German Chancellor Angela Merkel took exception to the way that Sarkozy initially couched one of his flagship projects, the Union for the Mediterranean, to exclude the EU's non-Mediterranean members while using their money.

Sarkozy eventually made the Union more inclusive, and he launched it with fanfare at a Bastille Day summit in Paris in mid-July. Predictably, Germany was also irked by Sarkozy's criticism of the European Central Bank for having too restrictive a monetary policy.

The improvement in relations with Washington, begun during Sarkozy's successful 2007 trip to the U.S., continued as the French president kept to his tough line toward Iran and friendly tone to Israel and as a result of his decisions on NATO and Afghanistan. Sarkozy broadly endorsed a high-level military commission's recommendations in June for big troop and base cuts (with financial savings going into better equipment), more stress on intelligence, and the reintegration of French forces into NATO's military command. There was political resistance, however, to the proposals to cut troop numbers by 54,000 and to close or relocate 116 bases and units, and Sarkozy made France's reintegration into NATO conditional on parallel improvement in EU military cooperation. France was the only European member of NATO to send reinforcements (800 troops) to Afghanistan in 2008, but in mid-August, 10 French soldiers were killed in one ambush, the worst French combat casualty toll in 25 years. Sarkozy flew immediately to Afghanistan to express France's continued commitment there.

Sarkozy seemed to relish every challenge thrown at him during France's EU presidency. After the Irish voted down the Lisbon Treaty, he negotiated a deal in December that provided enough changes and reassurances to persuade Ireland to schedule a vote again in 2009 but without invalidating treaty ratification elsewhere. In August Sarkozy took on a brokering role in the conflict between Russia and Georgia. He was criticized by some, including the U.S., for failing to end Russia's presence in Georgia's Abkhazia and South Ossetia enclaves, but by using the leverage of EU partnership negotiations with Moscow, he persuaded Russia to pull back its forces from almost all of the rest of Georgia. Faced with ever-worsening credit and economic conditions, Sarkozy found it easier to get support for European policy proposals at the international financial conference held in Washington, D.C., in November than for any coordinated EU stimulus to the European economy. The EU summit on December 11–12 left it largely to member countries to do

as much or as little as they wanted. At the same meeting, however, Sarkozy pulled off the remarkable feat of getting the 27 EU member countries to agree (albeit with considerable concessions to recession-hit industries) on reforms that would take their climate-change policies beyond Kyoto, up to 2020.

(DAVID BUCHAN)

GABON

Area: 267,667 sq km (103,347 sq mi)

Population (2008 est.): 1,486,000

Capital: Libreville

Chief of state: President Omar Bongo Ondimba

Head of government: Prime Minister Jean Eyeghe Ndong

On Jan. 9, 2008, Interior Minister André Mba Obame suspended the four groups of nongovernment organizations (NGOs), which were accused of having interfered in Gabon's national politics after criticizing the government's use of public funds. Two days later the government announced that in an effort to reduce expenses cabinet ministers would no longer be provided with official cars. The NGO suspension was lifted on January 15 on the condition that the organizations respect the laws governing their activities.

Against a fragmented opposition, Pres. Omar Bongo's Gabonese Democratic Party (PDG) retained control of more than half of the seats in the district and municipal councils in the April 27 elections. The Gabonese Union for Democracy and Development (UGDD), led by Zacharie Myboto, came in second and secured 160 municipal seats.

On February 19 the African Development Bank agreed to loan €10 million (about \$14.7 million) to help finance the expansion of Gabon's rubber and palm oil plantations. The government announced on May 19 that it would donate \$500,000 to aid Beijing in its massive earthquake-relief effort in Sichuan province. Just a week later the Gabon government and Comibel, a Chinese mining corporation, signed an agreement for the development of rich iron deposits in Gabon's northeastern region.

Under the auspices of UN Secretary-General Ban Ki-moon, diplomats from Gabon and Equatorial Guinea met in New York City on June 11 to negotiate a long-standing dispute over ownership of oil-rich Mbanie Island. The UN reported on July 23 that progress had been made in preparing the case for adjudication by the International Court of Justice.

(NANCY ELLEN LAWLER)

GAMBIA, THE

Area: 11,300 sq km (4,363 sq mi)

Population (2008 est.): 1,754,000

Capital: Banjul

Head of state and government: President Col. Yahya Jammeh

In early 2008 the economy of The Gambia grew by more than 6%, and the IMF and the World Bank in March said that the country had met the requirements for full debt relief. When rising world food and oil prices began to have a serious impact on the economy, however, Pres. Yahya Jammeh called on Gambians to work for food self-sufficiency. This declaration was well received, unlike his statement in May, when Jammeh said that homosexuals should leave the country within 24 hours. He reportedly threatened to have them beheaded if they did not depart, though he later denied this.

Human rights monitors also continued to express concern about numerous infringements of press freedom. A number of journalists were detained, and one was severely beaten. In June the Court of Justice of the Economic Community of West African States declared illegal the arrest and detention of a journalist and ordered Gambian authorities to release him. In September, Abdul Hamid Adiamoh (the publisher and editor of *Today*, a privately owned Banjul-based newspaper) was arrested for the fourth time, put on trial for publishing "with seditious intent," and charged with tax evasion. The Gambia had also come into the news in August when the head of the navy of Guinea-Bissau, who was alleged to have been involved in a failed coup attempt there, was arrested as he arrived by sea.

GEORGIA

Area: 57,612 sq km (22,244 sq mi), excluding the disputed areas (from the early 1990s) of 8,640 sq km (5,336 sq mi) in Abkhazia and 3,900 sq km (1,506 sq mi) in South Ossetia

Population (2008 est.): 4,360,000, excluding the roughly approximated populations of Abkhazia, 200,000, and South Ossetia, 270,000 (as estimated prior to the August 2008 war)

Capital: Tbilisi

Head of state and government: Presidents Nino Burjanadze (acting) and, from January 20, Mikheil Saakashvili, assisted by Prime Ministers Lado Gurgenidze and, from November 1, Grigol Mgaloblishvili

In a preterm presidential ballot held in Georgia on Jan. 5, 2008, Mikheil Saakashvili of the United National Movement (UNM) defeated six rival candidates to win reelection, garnering 53.47% of the vote. Second-place finisher Levan Gachechiladze of the nine-party opposition National Council claimed that the official results were rigged.

On March 21, Saakashvili scheduled a preterm parliamentary election for May 21. The outgoing parliament enacted amendments to the election law that the opposition protested were intended to preserve the UNM's majority. Parliament Speaker Nino Burjanadze withdrew her candidacy on April 21, citing disagreements with official policy. In the balloting the UNM won 119 of the 150 mandates, followed by the United Opposition-National Council-New Rightists bloc, which took 17 seats; the Christian Democrats and the Labour Party, with 6 seats each; and the Republican party, with 2 seats. The National Council and most Labour deputies rejected the results as rigged and announced a boycott of the new Parliament, of which Foreign Minister David Bakradze was elected speaker. On September 26 human rights ombudsman Sozar Subari criticized Georgia's leaders as authoritarian, and on September 30 he formed a new opposition party—Public Forum for Liberty and Justice—with which Gachechiladze and other prominent opposition leaders aligned themselves. President Saakashvili announced on October 28 that he was replacing Prime Minister Lado

Shakh Aivazov/AP

A woman holds a portrait of her missing son at a funeral ceremony in Tbilisi for unknown Georgian soldiers killed during fighting with Russian and Ossetian rebel forces that erupted in August.

Gurgenidze with Grigol Mgaloblishvili, a little-known diplomat.

Earlier in the year, tensions between the Georgian government and the breakaway republics of Abkhazia and South Ossetia increased following an April 16 edict by Russian Pres. Vladimir Putin on intensifying cooperation with them. Abkhazia rejected new peace proposals unveiled by Saakashvili on March 28 and those put forward on July 17 by German Foreign Minister Frank-Walter Steinmeier. (See BIOGRAPHIES.)

Following several weeks of sporadic exchanges of gunfire between Georgian troops and rebel forces in South Ossetia, Saakashvili ordered Georgian troops into the republic on August 7, just hours after having announced a cease-fire. In response, Russian tanks and troops advanced into South Ossetia on August 8; bombed Gori, the port of Poti, and several military bases on August 9; and occupied Gori on August 11. In western Georgia, Russian and rebel forces expelled Georgian troops from the Kodori gorge. Several hundred servicemen and civilians died during the fighting, and tens of thousands were forced to flee their homes. Talks on August 12 between Russian Pres. Dmitry Medvedev (see BIOGRAPHIES) and French Pres. Nicolas Sarkozy yielded a cease-fire agreement that was augmented on September 8. Following the deployment of some 200 EU observers, Russian troops withdrew from the conflict zones by the October 10 deadline.

President Saakashvili announced on August 12 that Georgia would quit the Commonwealth of Independent States to protest the Russian incursion. Three days after Russia formally recognized Abkhazia and South Ossetia as independent states on August 26, Tbilisi severed diplomatic ties with Moscow. Georgia was not offered a membership action plan either at the NATO summit in April in Bucharest, Rom., or at the NATO foreign ministers' meeting in December. (ELIZABETH FULLER)

GERMANY

Area: 357,093 sq km (137,874 sq mi)

Population (2008 est.): 82,143,000

Capital: Berlin; some ministries remain in Bonn

Chief of state: President Horst Köhler

Head of government: Chancellor Angela Merkel

Chancellor Angela Merkel's 2008 New Year's speech was an optimistic reminder that Germany in 2007 had seen economic improvement and that 2008 was promising a continuation of this trend. Internal political strife, increased violence among teenagers, and the international credit crunch were counter-

balanced by further decreases in unemployment, an expansion of early-education programs, and a serious step forward in alleviating cross-border tax evasion.

Domestic Affairs. Domestic events in early 2008 shocked many Germans as the year began with reports of a retiree admitted to the hospital because of an unprovoked attack by a group of teenagers. This alleged incident was a continuation of events that occurred in late 2007; in general, the past two years had seen six instances across Germany in which groups of teenagers committed random violent acts on people walking on the street or in parks at unusual hours. This left many people reconsidering for the first time their understanding of physical safety in modern Germany.

In the political arena these occurrences fed into the identity crisis of the Christian Democratic Union (CDU), which had already faced problems in 2007 related to redefining the party's conservative agenda and uniting voters and party members under the same umbrella in respect to terrorism and domestic security. The apparent willingness of groups of teenagers to commit acts of violence as a recreational activity induced Minister for the Interior Wolfgang Schäuble of the CDU to call for tougher jail sentences. The debate reached monumental dimensions in those states with elections in 2008: Hesse, Bavaria, and Lower Saxony. Even within the CDU there was dissent, as many members agreed with the opposition Social Democratic Party (SPD) that instead of harsher prison sentences, there was a need for intervention before a teenager became violent. The debate was not helped by police and social service workers who opposed any attempts to increase prison sentences for teenagers. Statistically, they argued, the number of violent acts committed by teenagers was on the decrease, though the individual acts had become more violent. The fact that violence committed by nonnational teenagers had increased was particularly worrying.

Germans had grappled with integration issues for years, and there was little agreement among the parties in 2008 as a new law that required immigrants to demonstrate that they could speak rudimentary German came into force. Both the new law and the recent increase in violence opened the doors for serious discussions of what integration should mean—a debate that as yet remained without a solution.

This debate caused even more problems for the SPD, which was struggling to redefine its identity within the political spectrum. As the new centre-left party the Left argued that immigrants needed more help and the Christian Democrats demanded more social integration, the Social Democrats seemed to have a hard time defining where their position lay between these two disparate stances. In 2007 the Social Democrats had agreed to a new party program, but they were unable to win any of the state elections in Hessen, Bavaria, and Lower Saxony, while the Left increased its vote totals and won seats in two of the three state parliaments. Embattled SPD leader Kurt Beck suddenly resigned in September and was replaced in October by his predecessor, former vice-chancellor Franz Müntefering. At the same time, it was announced that Foreign Minister Frank-Walter Steinmeier (see BIOGRAPHIES) would stand against the CDU's Merkel as the SPD's official candidate for the chancellorship in the 2009 elections to the Bundestag (the lower house of parliament). Although it was believed that the SPD and the Left would work together in coalition should they achieve enough seats in 2009, the two parties were likely to field their own candidates in the presidential campaign to challenge Pres. Horst Köhler of the CDU.

The CDU's push for an increase in free child-care facilities and the attendant encouragement of fathers to take on more child-care responsibilities (and thus allow mothers to return to work sooner) was going well. An increase in births in 2007 and 2008, the first rise in 10 years, was considered an indication that the policy was working. Other CDU initiatives were less successful. The laws allowing the state to gather data by using private e-mail and phone conversations without actual proof of wrongdoing failed in the Constitutional Court, as did a widespread smoking ban. The use of biometric data on passports and increased rights for police to fight terrorism were expected to be debated in the court over the course of the next year.

The Constitutional Court itself saw a new development in 2008 when, for the first time, a judge appointed to the Constitutional Court, University of Würzburg law professor Horst Dreier of the

SPD, publicly failed to garner approval from the other parties. Twice before in German history had a judge failed to achieve acceptance by the opposition, but this was the first time that the debate had been carried out publicly rather than internally between the two main parties in government.

Foreign Affairs. Internationally 2008 saw Germany take a stand on several contentious issues, especially when Chancellor Merkel, as a protest against human rights infringements in China, announced in March that she would not attend the opening ceremony of the Olympic Games in Beijing in August. The announcement that U.S. presidential candidate Barack Obama (see BIOGRAPHIES) planned to present a major speech in front of the Brandenburg Gate during his July visit to Berlin met with widespread puzzlement in Germany, where many people were still unfamiliar with his name. When he gave the speech, however, it met with approval from the huge crowd that turned out to hear him. In the weeks following Obama's visit, Germany's relationship with the U.S. was in the forefront of political debate.

During the year Germany followed the lead set by the U.K., France, and the U.S. in recognizing Kosovo as an indepen-

dent state, providing Myanmar (Burma) with emergency aid, and playing a role in the EU's dealings with Iran. In the conflict between Georgia and Russia, however, Germany was slightly more proactive and visible as it led the EU investigation groups being sent to Georgia. These situations brought to the surface one of the greatest issues relating to Germany's role in the world as other Western countries, such as the U.K. and the U.S., demanded that Berlin take on more military responsibility in international conflicts. After World War II it was clear in the collective German mind that there would never again be a German military presence, and by 2008 younger Germans found it difficult to even contemplate that military force might be a solution in any conflict. Moreover, the suggestion that Germany should provide troops, as opposed to giving financial aid or noncombatant support within the remit of a peacekeeping force, triggered immediate public disapproval. Political leaders not only shared that view but also recognized that any German politician who agreed to provide combat soldiers would automatically lose public support. In October, after months of pressure from NATO, the Bundestag agreed to send 1,000 additional troops to Afghanistan and to extend the mission there by 14 months, but Berlin still resisted transferring German forces from the relative peace in northern Afghanistan to the war-torn south.

The Economy. From an economic point of view, 2008 started positively, with a budget surplus of some €7.3 billion (about \$10.8 billion) in the first half of the year. A budget that would leave Germany debt free by 2011 was approved, and unemployment was on a steady decrease throughout the year, from almost 4 million to 3.2 million out of work. The international credit crunch that followed the U.S. banking crisis, however, pushed Germany into recession in November, and the government abandoned the balanced budget in favour of a €50 billion (about \$70 billion) stimulus package.

In the spring a financial scandal involving Liechtenstein took on aspects of an espionage novel when German tax officials acquired a CD-ROM through secret service contacts. This CD con-

Members of a German engineering and metal workers' union stage a demonstration in Cologne in November to demand a wage increase of 8%.

Wolfgang Rattay—Reuters/Landov

In October German Foreign Minister Frank-Walter Steinmeier (left) and former vice-chancellor Franz Müntefering (right) celebrate Müntefering's election as leader of the Social Democratic Party and Steinmeier's nomination as the party's candidate for chancellor in the 2009 general elections.

tained information on German tax evaders who had used Liechtenstein as a tax haven. (See *Liechtenstein*, below.) German officials hoped to use the data to convict some 600 tax evaders, including the Deutsche Post minister, who resigned after his name was found on the CD. Other persons whose names were found on the CD sued the state for compensation on the basis that the information had not been come by legitimately. The court case, as well as the whole affair, was likely to keep German officials occupied for years and could cast a long shadow over relations with Liechtenstein.

Spring 2008 also saw the threat of strikes in the rail industry. The increased price of oil and a rising environmental consciousness had led to a greater use of commuter trains by German workers. The threat of a strike was averted, but high oil prices remained a problem through much of the year. Nevertheless, the euro remained steady in the face of decreasing value of the U.S. dollar and the British pound.

German automobile manufacturers had not moved with the times, counting on a perennial desire among consumers for ever-faster cars, and had sacrificed fuel economy and environmental friendliness for speed. The industry was therefore hit hard by the EU Commission's plans for stricter rules governing automotive CO₂ emissions. The banking failures affecting the U.S. economy added another component to the economic problems in Germany, which had to provide state loans to some of its own

banks that had been undermined by the repercussions of the subprime mortgage crisis in the U.S. In September a German mortgage provider, Hypo Real Estate, showed weakness for the first time. A rescue packet was designed and prepared by other financial institutes initially, but national measures throughout Europe soon followed.

(NICOLA CORKIN)

GHANA

Area: 238,533 sq km (92,098 sq mi)

Population (2008 est.): 23,383,000

Capital: Accra

Head of state and government: President John Agyekum Kufuor

The general election on Dec. 7, 2008, dominated politics in Ghana as citizens looked forward to a peaceful turnover of power. The ruling New Patriotic Party (NPP) had effectively kicked off the campaign on Dec. 23, 2007, by nominating Nana Akufo-Addo, a former foreign minister, as its presidential candidate. The NPP faced tough competition from the former ruling party, the National Democratic Congress (NDC), and seven other parties. A presidential run-off was forced after no candidate received more than 50% of the vote in the

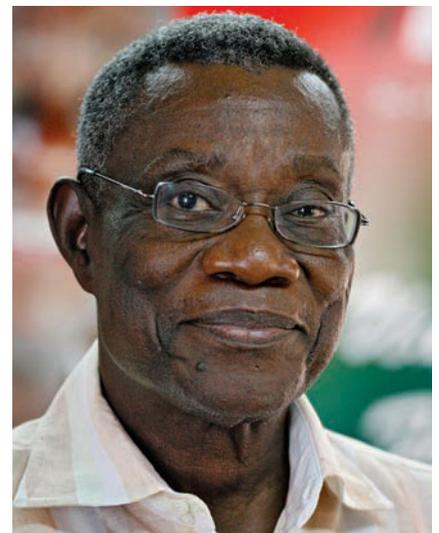

initial round of voting. Opposition leader John Atta Mills of the NDC narrowly won the run-off on December 28, taking 50.23% of the vote to Akufo-Addo's 49.77%. This was Mills' third bid for the presidency. Despite sporadic outbursts of ethnic tensions and fierce campaigning, the polling proceeded mostly peacefully and was heralded as a model for African democracy.

Although Ghana enjoyed unhampered prosperity owing to an economic boom, reigned as the world's second largest cocoa producer and Africa's second largest gold producer, and was looking forward to the start of offshore oil production in 2010, there was rising public anger over the inflation in the price (about 17%) of food and fuel imports. Additional concerns involved disputes over land rights and sporadic ethnic clashes, especially in the northern region.

On February 20, U.S. Pres. George W. Bush visited Ghana as part of his six-day tour of Africa. Journalists voiced open skepticism about the president's AIDS initiative as well as suspicion about U.S. plans to establish its African military command (AFRICOM) headquarters on the continent.

Ghana hosted (January 20–February 10) the 2008 Africa Cup of Nations, in which 16 countries participated at four venues. Ghana placed third in the event. (LARAY DENZER)

Ghanaian opposition leader John Atta Mills is pictured in his office in Accra on December 9, two days after the first round of voting took place in Ghana's presidential election; Mills went on to win the presidency with a narrow victory over Nana Akufo-Addo in the second round.

GREECE

Area: 131,957 sq km (50,949 sq mi)

Population (2008 est.): 11,239,000

Capital: Athens

Chief of state: President Karolos Papoulias

Head of government: Prime Minister
Konstantinos Karamanlis

Throughout 2008 the government of Greek Prime Minister Konstantinos (Kostas) Karamanlis was shaken by a series of scandals that undermined the ruling New Democracy (ND) party's public standing and led to dissatisfaction within the ND, including among prominent politicians. The suicide attempt in late December 2007 of former Culture Ministry secretary-general Christos Zachopoulos stayed in the news in the early months of 2008. Zachopoulos had tried to commit suicide after allegedly being blackmailed by his former assistant Evi Tsekou over their extramarital affair. The prime minister's office and a newspaper had received copies of incriminating video footage. There were also accusations by prosecutors that Zachopoulos had let a number of illegal deals go through that allowed protected archaeological sites to be developed. Tsekou and several others were arrested but were later released on bail.

In the context of the bribery scandal surrounding German electronics giant Siemens, evidence suggested that over a 17-year period the German company paid more than €100 million (€1 = about \$1.40) in bribes to secure Greek state contracts. During a trial in Munich, a former Siemens executive testified that Greek politicians and senior executives received an 8% commission on such deals. In addition, documents suggested that Siemens had paid the two main parties some €17 million between 1998 and 2005.

On September 12, Merchant Marine Minister Georgios Voulgarakis resigned and was succeeded by Anastasios Paligouras. Voulgarakis had come under pressure for co-owning with his wife—and during his tenure as a government minister—at least two real-estate companies that were transferred offshore and for having appointed the manager of one of them head of the Seamen's Pension Fund. His wife was also the notary in a controversial land exchange be-

tween the state and the Vatopedi monastery. In this and other land deals between the two sides, the monastery's land was apparently overvalued while the state land was undervalued. In September the monastery's assets were frozen, and one of the deals was revoked. Two deputy prosecutors investigating the land deal resigned on October 14, claiming that their work was hampered by superiors, but their resignations were not accepted. On October 22 the parliament unanimously voted to set up an inquiry commission to investigate the deal. Theodoros Roussopoulos, a minister of state and the government spokesman, resigned the following day, saying that he wanted to be free to fight allegations of corruption. On December 15 the parliamentary parties presented separate reports on the inquiry.

The killing of a 15-year-old boy, Alexandros Grigoropoulos, by a police officer in central Athens on the evening of December 6 triggered the worst riots in decades in Athens and other cities, which lasted for several weeks and caused considerable damage to property. The police officer who fired the shots was charged with murder, and a fellow officer was charged as an accomplice.

In March the Panhellenic Socialist Movement (PASOK) held its eighth party congress. Following the congress, many leading politicians were dropped from PASOK's Political Council, including Evangelos Venizelos and Kostas Skandalidis, who had challenged the

party chairman, Georgios Papandreou, in the 2007 leadership vote. Ioannis Ragoussis was elected the new party secretary. At the party congress of the Coalition of the Radical Left, 33-year-old Alexis Tsipras was elected its new chairman on February 10; he succeeded Alekos Alavanos, who did not seek reelection.

In January, Karamanlis became the first Greek prime minister since 1959 to pay an official visit to Turkey, where both sides pledged to "open a new page" in their relations. Foreign policy was dominated, however, by the ongoing dispute with Macedonia over that country's name. Before the NATO summit in Bucharest, Rom., in April, intense negotiations failed to produce results, and Greece was prompted to veto Macedonia's accession to NATO. Talks later in the year were characterized by both sides' immobility, with Macedonia also trying to raise issues of language, ethnicity, and the restitution of property of Greek Civil War refugees.

The Greek economy continued to improve, although at a slower pace than in previous years. GDP growth was expected to drop below 3%, with inflation climbing toward 5%. The budget deficit was expected to remain just below 3%. In March the government pushed through Parliament a pension-reform package that was strongly opposed by the opposition and by trade unions, which staged large-scale strikes. A no-confidence vote tabled in

Young people riot in the centre of Athens in December following the fatal shooting of a teenager by police.

Petros Giannakouris/AP

connection with the reforms was rejected. In August the government approved new measures aimed at curbing tax evasion. Under this legislation self-employed people would pay a 10% tax on the first €10,500 of their income, which was previously exempt from taxation.

Archbishop of Athens and All Greece Christodoulos died on January 28 at the age of 69. (See OBITUARIES.) On February 7 the Holy Synod elected Metropolitan Ieronymos of Thebes as his successor. Ieronymos pledged to avoid interfering in politics and to improve relations with the Ecumenical Patriarchate. (STEFAN KRAUSE)

GRENADA

Area: 344 sq km (133 sq mi)
Population (2008 est.): 108,000
Capital: Saint George's

Chief of state: Queen Elizabeth II, represented by Governors-General Sir Daniel Williams and, from November 27, Carlyle Glean

Head of government: Prime Ministers Keith Mitchell and, from July 9, Tillman Thomas

In February 2008 the government of Grenada appointed a receiver to take over the operations of Capital Bank International. The government explained that this step was necessary because of the bank's "failure" to accede to withdrawal requests by customers, raising questions about its solvency. In March the World Bank approved a no-interest \$1.9 million loan to Grenada to support efforts to improve the local business environment through private sector-led growth. Key government responsibilities such as customs, tax administration, and investment and export promotion were to be modernized.

A commission of inquiry concluded in May that it could find no evidence that Prime Minister Keith Mitchell had accepted bribes from Grenada's Ambassador-at-Large Eric Resteiner, as a condition for appointing him to the post and providing him with a diplomatic passport. Mitchell insisted that the \$15,000 under investigation was for expenses incurred by him as prime minister for official travel abroad, which Resteiner had agreed to fund. The opposition National

Democratic Congress (NDC) rejected the commission's findings.

In the general election held in July, the NDC ousted Mitchell's New National Party administration, with an 11-4-seat majority in the House of Representatives. NDC leader Tillman Thomas was sworn in as prime minister.

Thomas announced in September that a commission had been established to delimit the maritime boundary between Grenada and Trinidad and Tobago. The commission was part of the NDC's policy of increased cooperation between Grenada and its Caribbean neighbours. (DAVID RENWICK)

GUATEMALA

Area: 109,117 sq km (42,130 sq mi)
Population (2008 est.): 13,002,000
Capital: Guatemala City

Head of state and government: Presidents Óscar Berger Perdomo and, from January 14, Álvaro Colom Caballeros

Following his inauguration on Jan. 14, 2008, Guatemalan Pres. Álvaro Colom launched an ambitious program of social reform. A Council of Social Cohesion, headed by his wife, Sandra Torres de Colom, coordinated educational and economic benefits for the rural poor. By July, Colom had improved access to drinking water, health care, and education, and he had initiated renewable sources of energy with hydroelectric and thermal projects. In March, however, Guatemala rejected daylight saving time in a move to prevent workers and children from having to walk in the early-morning darkness, when crime was highest.

Inflation in food and energy prices increased living costs. Guatemala reduced its dependence on the U.S. economy by opening trade with India and China and negotiated new trade agreements with the EU, Brazil, and other Latin American countries. Remittances from Guatemalans abroad (mostly in the United States) remained very important; in 2007 they reached a record \$4.13 billion. President Colom paid a state visit in April to Brazilian Pres. Luiz Inácio Lula da Silva.

Government efforts to reduce the high rates of violent crime were hampered

Rodrigo Abd/AP

A narcotics agent in Guatemala City stands guard over packages of cocaine that are to be incinerated.

by the degree to which organized crime and drug traffickers had infiltrated law enforcement. In September, Colom fired his security chief after discovering seven unauthorized listening devices and cameras in the presidential office and residence; the surveillance presumably had been engineered by organized crime. Guatemala was also a transit point for Colombian cocaine destined for the United States. Aid provided by the U.S. to suppress the drug traffic had failed to stem the tide of violence, exacerbated by gangs, police corruption, and overcrowded prisons. U.S. Deputy Secretary of State John Negroponte visited Guatemala in June to promote the Mérida Initiative, designed to "help Mexico and Central America combat narco-trafficking, transnational youth crime, and terrorism." A UN commission cooperated with the Guatemalan government to investigate judicial corruption and to reform its court system. Former Guatemalan president Alfonso Portillo, who had fled to Mexico in 2004 with some \$15.7 million in embezzled public funds, was extradited in October.

Guatemala's new National Adoption Council was brought into compliance with the Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption. The council tightened regulations involving foreign adoptions and revealed that babies had been stolen amid wide-

spread corruption in the former system, which was run by private lawyers. In February, following a six-year moratorium, the death penalty was reinstated in Guatemala; President Colom vetoed the legislation the following month, however.

(RALPH LEE WOODWARD, JR.)

GUINEA

Area: 245,836 sq km (94,918 sq mi)

Population (2008 est.): 9,572,000

Capital: Conakry

Head of state and government: Presidents Gen. Lansana Conté until December 22 and, from December 24, Moussa Dadis Camara, assisted by Prime Ministers Lansana Kouyaté and, from May 20, Ahmed Tidiane Souare

The powerful National Confederation of Guinean Workers called for a general strike on Jan. 10, 2008, to protest the firing of Communications Minister Justin Morel Junior (a key aide to Prime Minister Lansana Kouyaté), who was removed from office by Pres. Lansana Conté. The move followed months of conjecture that Conté was acting to reassert control over the government. The indefinite postponement of the 2007 parliamentary elections, coupled with rising food prices, added to popular discontent. On May 20 Conté sacked Kouyaté, reneging on a

Supporters of Pres. Lansana Conté of Guinea rally in the Kaloum neighborhood of Conakry on May 30 to call an end to an army mutiny.

Alexandre Foulon/AP

deal that was struck in 2007 with the opposition. Riots erupted in the capital, with at least one death reported.

After a weeklong army mutiny, in which protesting troops held Gen. Mamadou Sampil prisoner, the government announced on May 27 that it would pay salary arrears dating back to 1996. That same day newly appointed Prime Minister Ahmed Tidiane Souare promised that no punitive actions would be taken by the government against the mutineers and that all remaining soldiers imprisoned for participating in the 2007 mutiny would be freed. A presidential decree announced the firing of Defense Minister Gen. Mamadou Bailo Diallo. In mid-June soldiers of low rank were given mass promotions and about \$1,000 in back pay. Later that day police demanding higher salaries, promotions, and a rice subsidy went on strike, seizing the police chief and other high officials. On June 17 the army clashed with the striking policemen; casualties were reported on both sides. Soldiers looted the police camp in Conakry, and all shops in the capital were closed.

After what was described as a long illness, Conté died on December 22. (See OBITUARIES.) A military coup, led by Moussa Dadis Camara, quickly followed, prompting international condemnation. In a state radio broadcast, coup leaders vowed to hold presidential elections in 2010.

(NANCY ELLEN LAWLER)

GUINEA-BISSAU

Area: 36,125 sq km (13,948 sq mi)

Population (2008 est.): 1,503,000

Capital: Bissau

Chief of state: President João Bernardo Vieira

Head of government: Prime Ministers

Martinho Ndafo Kabi and, from August 6, Carlos Correia

Guinea-Bissau experienced a measure of political stability (March 2007–July 2008), with the three leading political parties working together in a coalition government. The IMF, which had withdrawn from the country in 2001, resumed investment activities in January 2008, and in July it released almost \$3 million in emergency assistance. The legislative election due to be held in

March was postponed until November. The African Party for the Independence of Guinea and Cape Verde (PAIGC) captured 67 of the 100 seats in the National Assembly. Voter turnout was strong at 82%, and international observers described the election as largely peaceful and orderly.

In late July, the country was plunged into political instability when the PAIGC withdrew from the government after Prime Minister Martinho Ndafo Kabi sacked four high-ranking officials. Pres. João Bernardo Vieira dissolved the parliament and replaced Kabi with veteran politician Carlos Correia, who had served as prime minister in the 1990s. A failed coup followed, and its alleged leader, the head of the country's navy, escaped by sea but was soon arrested in The Gambia. Another apparent coup attempt followed the November legislative election, with Vieira surviving an attack at his home by mutinous soldiers.

Guinea-Bissau was again in the grip of a cholera epidemic. It had also become a major hub for the transshipment of cocaine from South America to Europe. (CHRISTOPHER SAUNDERS)

GUYANA

Area: 214,999 sq km (83,012 sq mi)

Population (2008 est.): 736,000

Capital: Georgetown

Chief of state: President Bharrat Jagdeo

Head of government: Prime Minister Sam Hinds

Following the settlement of Guyana's maritime boundary dispute with Suriname in 2007, the Guyana Geology and Mines Commission announced in May 2008 that the world's largest oil company, ExxonMobil, had begun exploration work in its offshore Stabroek block. Guyana did not produce any oil of its own.

In June, Guyana's Customs Anti-Narcotics Unit (CANU) lost its leader when, according to the government, he failed a lie detector test. Other CANU officials suffered a similar fate. The U.S. government had previously claimed that CANU—the country's leading drug-enforcement agency—was "corrupt and inefficient."

Prime Minister Sam Hinds announced in June that the proposed 100-MW Amaila Falls hydroelectric power project would go ahead in Guyana. Construction would begin by year's end 2008 and the plant was expected to be ready to produce its first power in 2012. Florida-based Synergy Holdings was the developer of the project.

The security forces in August finally caught up with the notorious Rondell Rawlins gang, which had unleashed a reign of terror in rural Guyana for more than a year, murdering at least 23 people and coming close at one stage to destabilizing society. Rawlins and one of his accomplices were killed in a shoot-out with a team of police and army personnel.

(DAVID RENWICK)

HAITI

Area: 27,700 sq km (10,695 sq mi)

Population (2008 est.): 9,751,000

Capital: Port-au-Prince

Chief of state and government: President René Prével, assisted by Prime Ministers Jacques-Édouard Alexis and, from September 5, Michèle Pierre-Louis

Optimism that Haiti was rebounding from decades of conflict, instability, and economic decline gave way in 2008 to eroding confidence in the country's future. Global trends of skyrocketing food and fuel prices hit Haiti hard, owing to dependence on costly imports in a country where 78% of the population lived on less than \$2 a day. National demonstrations against the high cost of living in early April deteriorated into vandalism and violence. Subsequently, the Haitian Senate dismissed Prime Minister Jacques-Édouard Alexis, causing the postponement of a donor's conference expected to support the government's poverty-reduction strategy and renewing festering political schisms.

Parliamentary rejection of Pres. René Prével's first two prime ministerial replacement nominations left the country with a caretaker government unable to initiate new programs. Resilient crime, especially urban kidnapping, and the government's inability to improve material conditions of the population, including those under 25 years of age (who constituted 60% of all Haitians), dampened hopes of a brighter future.

The new coalition government led by Michèle Pierre-Louis, a respected educator and social activist, confronted a country ravaged by two tropical storms and two hurricanes within a 23-day period (August 16–September 7). Rainfall

rushing down hillsides with less than 3% forest cover destroyed settlements in river deltas and floodplains, displacing hundreds of thousands of people and leaving 800 dead. Prével, citing the hurricane that devastated New Orleans in 2005, characterized the storms as "our Katrina."

Flooding also wiped away public investments made earlier to improve crop production, leaving massive food deficits and setting back national efforts to address dependence on costly imported rice. International relief efforts (complemented by resource mobilization among Haitians living overseas and within Haiti) helped the survivors and demonstrated hopeful signs, especially in Haiti, of solidarity. The renewal in mid-October of the one-year mandate of the UN Stabilization Mission in Haiti (MINUSTAH) offered additional relief, particularly in view of its capabilities in disaster response and in reinforcing public safety.

Still, as 2008 ended, Haiti faced continuing food shortages and rising prices and the daunting prospect of rehabilitating its natural environment and rebuilding physical infrastructure. Making matters worse were anticipated reversals, because of food and fuel price increases and the destruction brought about by storms, in modest GDP growth trends and the inflation decline experienced since 2005. Remittances, reaching \$1.83 billion, or 30% of GDP, in 2007, were expected to stagnate or decline owing to the impact of global economic problems on Haitians living overseas.

would be put into a trust for national development. To promote economic development, Honduras signed an agreement with Brazil's Petrobras to construct a plant to produce lubricants and oils; Tegucigalpa also entered into agreements that would allow Hondurans to apply to work in Canada and Spain legally. Honduras launched a new campaign to increase tourism, "Honduras, everything is here." The Toncontín Airport in the capital was closed to international flights for five weeks, however, after a TACA Airlines plane with 136 people aboard crash landed in May; 5 people were killed.

The main focus of politics was the selection of candidates for the upcoming 2009 general elections. On November 30 the Supreme Elections Tribunal oversaw primaries for all parties with internal factions. The primaries were significant because they represented only the second time that parties had held primaries for all offices (prior to 2005, primaries were held only to select presidential candidates). The most important presidential pre-candidates in both major parties, and in two of three small parties, selected female vice presidential candidates. Another political landmark was the implementation of the Transparency

Law, which was passed at the end of 2006 and required government offices to share information when requested by a citizen. Pres. Manuel Zelaya brought Honduras into the Bolivarian Alternative for the Americas, an organization promoted by Venezuelan Pres. Hugo Chávez to counter the influence of the U.S. and of international financial institutions. This move was highly controversial, with opposition from the Congress, the business community, and Honduran immigrants in the U.S. Another issue that made continuous headlines and shaped presidential pre-candidates' campaigns was the country's ongoing crime wave, including an increase in female homicides.

(MICHELLE M. TAYLOR-ROBINSON)

Socialist Party (MSzP) and the SzDSz–Hungarian Liberal Party, who squabbled over strategies to reduce the country's budget deficit (9.2% of GDP in 2006 and 3.4% in 2008)—a key criterion for qualifying the country for membership in the euro zone.

Tax and price hikes, coupled with spending cuts and a radical health care package, prompted widespread social discontent and calls by the opposition for early elections. Following the 2007 passage of a bill promoted by the Liberals to overhaul the health sector—which was to restructure hospitals and allow for private investment in a new system of multiple health insurance funds—the opposition Fidesz–Hungarian Civic Alliance (widely known as Fidesz) called for a referendum to mobilize the electorate against the reforms.

In the March referendum, voters were asked whether newly introduced fees for doctor and hospital visits and those for university tuition should be abolished. An overwhelming 82% of the electorate voted for the abolishment of the fees; voter turnout (50%) exceeded the percentage (46%) for the 2003 vote on Hungary's bid for EU membership. In the wake of the referendum, the popularity of both governing parties fell to a record low; the Socialists scored 15–20%, while the Liberals (at about 2%) were significantly below the 5% that was needed to qualify for representation in the National Assembly. Meanwhile, the centre-right Fidesz repeatedly attained at least 40% in polls measuring voter support.

The loss in the referendum threw the coalition into disarray. A few weeks later the Socialists backtracked on the health reform program, and Gyurcsany fired the health minister nominated by the Liberals, who withdrew two other ministers and moved into opposition. They nevertheless pledged to support the Socialists' minority government in sponsoring reforms that were necessary for Hungary to join the euro zone within four years. Fidesz called on Gyurcsany to resign or make way for new elections, and the Liberals joined the call for his dismissal.

Prior to the new National Assembly session in September, Gyurcsany sought to relaunch his austerity program by publishing an essay calling for tax cuts financed largely from a clampdown on the gray economy. The plan—a sketch of a political program as opposed to a comprehensive reform plan—failed to find supporters outside the MSzP and was seen by the opposi-

HUNGARY

Area: 93,030 sq km (35,919 sq mi)

Population (2008 est.): 10,032,000

Capital: Budapest

Chief of state: President Laszlo Solyom

Head of government: Prime Minister Ferenc Gyurcsany

International stock market speculation against Hungary's currency, the forint, and the drying up of credit markets led in the autumn of 2008 to a crisis of investor confidence and a weakening of the forint, which triggered the most serious budget crisis the country had seen since the fall of communism in 1989. In October 2008 the government received an international rescue package of €20 billion (\$26 billion) from the IMF, the European Union, and the World Bank. The financial crisis hit Hungary at a time when the economy was already shrinking and public discontent with Socialist Prime Minister Ferenc Gyurcsany's economic-stabilization program was on the rise. In addition, tension was high between coalition partners the Hungarian

tion as a last-ditch effort by a lame-duck prime minister. On the proposal of another opposition party, the Hungarian Democratic Forum (MDF), the National Assembly began its first session with a vote on self-dissolution. The Socialists and the Liberals voted to keep the parliament in session, and Gyurcsany pledged to step down if his tax proposals and eventual budget failed to win parliamentary backing.

The combined effect of the Hungarian austerity program and the global financial meltdown kept GDP growth at 1.9%, only slightly higher than that of the previous year (1.3%). Soaring fuel and food prices pushed inflation up to 6.6%, inducing a fight between the Hungarian central bank and the government on how to manage interest-rate policy. The investment climate was also weakened by a series of violent street demonstrations against the government by some right-wing and antiestablishment groups. (ZSOFIA SZILAGYI)

ICELAND

Area: 103,000 sq km (39,769 sq mi)
Population (2008 est.): 315,000
Capital: Reykjavik
Chief of state: President Ólafur Ragnar Grímsson
Head of government: Prime Minister Geir H. Haarde

Iceland's economy experienced an unsettling period of extreme turbulence in 2008. The country's currency slipped sharply, with the exchange rate plunging by year's end to more than 119 krónur to the dollar, compared with 62 krónur at the beginning of the year. The main cause was the persistent deficit on the current account of the balance of payments, which stood at 15–16% of GDP in both 2007 and 2008. High domestic interest rates attracted speculative international issues of krónur bonds that overappreciated the exchange rate, causing a commensurate currency depreciation when many such bond issues matured during the year. Following several

years of rapid expansion, the economy slowed to basically zero growth in 2008. At the same time, the depreciation of the currency accelerated inflation to 15%, the highest annual rate in more than a decade.

The rapid growth in the Icelandic banking system had brought its total balance sheet to about nine times Iceland's GDP. This called into question the ability of the central bank to act as a lender of last resort to the banking system. In May the central banks of Norway, Sweden, and Denmark formed a currency-swap agreement with the central bank for €500 million (about \$778 million) each. These difficulties were exacerbated by the turmoil in international financial markets that culminated in October. As Iceland was running out of foreign currency, the British government seized the assets of Icelandic banks in the U.K. The Icelandic government took over the country's three largest banks; foreign-currency trading was halted; and the stock market was suspended. In early November the IMF loaned \$2 billion to Iceland, followed by assistance from several other European countries.

Despite these problems, longer-term prospects remained good. Iceland possessed abundant hydropower and geothermal resources, and international demand for clean energy was attracting many foreign investors to the country to make use of these resources. Two major aluminum smelters were on the drawing board, and other energy-intensive industries were looking for development opportunities. The Icelandic government was in the process of open-

ing for bids for oil exploration licenses in the Dreki, or Dragon, area northeast of Iceland. (BJÖRN MATTHÍASSON)

INDIA

Area: 3,166,414 sq km (1,222,559 sq mi)
Population (2008 est.): 1,147,996,000
Capital: New Delhi
Chief of state: President Pratibha Patil
Head of government: Prime Minister Manmohan Singh

Domestic Politics. Terrorism, internal security threats, and concerns about the civil nuclear cooperation agreement between India and the United States dominated attention in India in 2008. In late November the country was rocked by multiple terrorist attacks in Mumbai (Bombay). (See Special Report on page 192.) In political developments, India's ruling coalition, the United Progressive Alliance (UPA), found itself in a minority with its main ally (the Left Front) withdrawing support and the main opposition, Bharatiya Janata Party (BJP), and a clutch of other regional parties taking a critical view of the civil nuclear cooperation agreement. While the Left Front allies opposed what they alleged was a "strategic alliance" with the United States, the BJP opposed the nuclear agreement on the grounds that it would restrict India's ability to conduct nuclear tests in the future and limit India's nuclear options in a future race with China. The UPA government was confronted with a potential defeat in the parliament when the Samajwadi Party (SP), an ally of the Left Front, broke ranks with the Left and affiliated itself with the UPA. Emboldened by SP's changed tack, Prime Minister Manmohan Singh sought and won a vote of confidence in the lower house of parliament, the Lok Sabha, and stabilized his coalition. Another important development was the emergence of Mayawati Kumari, chief minister of Uttar Pradesh and leader of the Bahujan Samaj Party (BSP), as a key political figure

Icelanders concerned over the government's handling of the country's financial crisis attend a rally in Reykjavik in October.

Arni Torfason/AP

likely to play a decisive role in future coalition building.

Winning the vote of confidence in the parliament boosted the sagging morale of the ruling UPA coalition, which had faced a series of defeats in elections to provincial legislatures. The Congress Party, which was defeated in India's largest state of Uttar Pradesh, encountered another loss in elections in May in the state of Karnataka, where the BJP scored a historic win and formed its first majority government in a southern state. The Congress also lost to the Left Front in the small north-eastern state of Tripura but did narrowly manage to form governments in two other small northeastern states—Meghalaya and Nagaland.

The Economy. The global economic slowdown, accompanied by a spurt in energy and food prices, took a toll on the Indian economy. India's rate of growth in 2008 was expected to drop to about 7.5%, compared with an average annual rate of growth of 8.8% in 2003–07. Nonetheless, India remained the world's second fastest growing economy. Because the country's tolerance to increased levels of domestic inflation was historically low, a sudden increase in the headline inflation rate from an average of 3–4% in the previous five years to more than 7% in early 2008 (with a steeper rise in consumer prices, especially energy prices) brought inflation management to the top of the government's policy priorities. The central bank hiked interest rates, maintained a tight monetary policy, and squeezed growth to bring prices down. A normal monsoon season and improved food production softened food-price inflation. India, which did not experience the food riots that were prevalent in many other less-developed economies, used food imports to keep domestic prices in check. The headline inflation rate remained in the double-digits, however, well into the third quarter of 2008.

India's deliberate gradual liberalization in the financial sector helped the country escape the full impact of the financial meltdown that took place in the U.S. and Europe. The global economic slowdown, however, was expected to hurt export growth and, combined with the impact of high oil prices, contribute to a higher current account deficit. The National Manufacturing Competitiveness Council formulated a National Strategy for Manufacturing, which sought to restore momentum to India's laggard manufacturing sector. The strategy was devised to push manufac-

turing-sector output growth, whose share in national income had remained stuck at about 17% for more than a decade. In addition, India successfully negotiated a free-trade agreement with the Association of Southeast Asian Nations (ASEAN) and was engaged in discussions for a free-trade agreement with the European Union.

Foreign Policy. Securing an unconditional waiver for the resumption of commerce in civil nuclear energy from the Nuclear Suppliers' Group (NSG) became the single-most-important foreign-policy objective for India in 2008. Indian diplomats toured the world to secure the support of the 45-nation member NSG. The final vote in favour of the measure came on September 6, shortly before Prime Minister Singh's visit to the U.S., where he met with U.S. Pres. George W. Bush, French Pres. Nicolas Sarkozy, and other leaders. A bilateral agreement with the U.S. was signed in October, opening the doors for increased trade in nuclear and high-technology areas. India and France signed a bilateral agreement in Paris on September 30. India signed a civil nuclear cooperation agreement with Russia in early December. In October India also elevated its status as a space power by launching an unmanned spacecraft, Chandrayaan-1, that would orbit the Moon.

Another foreign-policy preoccupation was with developments in the immedi-

ate neighbourhood, where democratic governments came to power in Bhutan (for the first time), Nepal (after the end of the monarchy), and Pakistan (after the stepping down of Gen. Pervez Musharraf). A terrorist attack on the Indian embassy in Kabul drew India more actively into the war on terrorism in Afghanistan. Despite growing concern in India about Pakistan's inability to control cross-border terrorism, the democratic transition in Pakistan helped to improve the climate for more bilateral cooperation. India and Pakistan agreed to increase trade across the international border between the two countries and to begin trading across the Line of Control in Jammu and Kashmir. The latter occurred on October 21.

Two other priority areas for India in foreign policy were relations with East Asian economies and with Africa. The India-ASEAN free-trade agreement paved the way for closer interaction between India and the East Asian Community. Prime Minister Singh visited Beijing in January and participated in the Group of Eight summit in Japan in August. India hosted the India-Africa Summit in March, marking a major step forward in the country's regional economic diplomacy with African countries. New Delhi offered duty-free access and tariff preferences to a range of African exports and extended credit and investment facilities.

(SANJAYA BARU)

INDONESIA

Area: 1,860,360 sq km (718,289 sq mi)

Population (2008 est.): 234,342,000

Capital: Jakarta

Head of state and government: President Susilo Bambang Yudhoyono

Maneuvering for the 2009 legislative and presidential elections shaped much of what occurred in Indonesian politics in 2008. Elections for national and regional parliaments were scheduled to take place simultaneously in April 2009, and the first round of the presidential elections was to occur in July.

Pres. Susilo Bambang Yudhoyono (commonly known as SBY) declared in September 2008 that he would seek re-election. Since his election in 2004, he had mostly enjoyed high public approval. In early 2008, however, a number of respected surveys showed a sharp slide in his standing; several opinion polls indicated that SBY was running second to former Indonesian president Megawati Sukarnoputri.

SBY's falling popularity was attributed to the government's decision to reduce fuel subsidies by an average of almost 30%. The rising cost of these subsidies—some \$19 billion annually, or about one-fifth of total budget outlays—had become unsustainable, especially as the cost of crude oil imports spiraled upward. Though welcomed by most economists, the fuel price rises sparked public protests, some of them violent, as well as condemnation from many political parties and nongovernmental organizations (NGOs), which claimed that the policy would worsen inflation and poverty. The government sought to offset the impact of price rises on the poor by introducing a direct payment of 100,000 rupiah (about \$10) per month to low-income households. Initially criticized as financially inadequate and prone to corruption, the direct payments appeared to be winning cautious approval from both grassroots communities and welfare groups.

Despite the backlash on fuel prices, SBY's economic record remained good. The overall economy continued to grow more strongly than most others in the region, recording an annual increase of 6.4%, though inflation was relatively

Demonstrators in Jakarta march and shout slogans during a public protest against fuel price hikes in Indonesia.

high, at 12.2%. Unemployment levels fell slightly, from 9.75% in early 2007 to 8.46% in early 2008 (about 10 million people). Poverty also fell modestly.

Megawati's improving political stocks owed much to her status as a leading opponent of SBY. She had sharpened her criticism of his government over the past year and had been more active in campaigning at the community level. Her party, the Indonesian Democratic Party of Struggle (PDI-P), was the only major party without representatives in the cabinet, and it served as the unofficial opposition in the parliament. As the popularity of SBY and his coalition government dropped, Megawati's and the PDI-P's climbed.

Other prominent candidates for the presidency included former generals Wiranto and Prabowo Subianto, both of whom established their own parties (Hanura and Gerindra, respectively) and were funding expensive advertising and community-mobilization campaigns. Unlike many of the other new parties formed since 2004, Hanura and Gerindra appeared to be well organized and well staffed, with retired military officers holding many key positions. The popularity of both men rose sharply, owing largely to their heavy promotional campaigns, but they both needed to overcome lingering public suspicion of generals with "tough" images.

Another candidate who had captured considerable public attention was Hamengkubuwono X, the sultan of Yo-

ogyakarta. He enjoyed strong support among his fellow Javanese, Indonesia's single-largest and most politically influential ethnic group, and he also had the backing of powerful sections of Golkar, currently the largest party in the parliament. Although untested at national-level politics, Hamengkubuwono was thought to be a possible compromise candidate capable of attracting broader political support.

The presidential race was likely to remain very fluid until the results of the April legislative election were known. In what appeared to be an increasingly volatile electoral environment, most parties were reluctant to commit themselves to particular candidates until the makeup of the new parliament became clear. Thirty-four parties (10 more than in 2004) were expected to take part in the elections in 2009. Most of the smaller, newer parties had poor prospects, and a number of major parties might also struggle, having been dogged by internal disputes and leadership problems. These included three of the larger Islamic parties: the United Development Party (PPP), the National Mandate Party (PAN), and the National Awakening Party (PKB). Indeed, the only Islamic party in Indonesia with good prospects was the Justice and Prosperity Party (PKS).

The year 2008 was also notable for the extensive and successful anticorruption campaign led by the Corruption Eradication Commission (KPK), which resulted in the investigation of a

string of high-profile figures. Two cabinet members—the ministers for forestry and national planning—were under investigation for taking bribes, though SBY refused to stand them down until they had been proved guilty. One parliamentarian was jailed for graft, and a number of others faced similar charges. Revelations about MPs' having received regular payments from government departments to pass legislation also filled the newspapers for much of the year. The former governor of Bank Indonesia, the central bank, was sentenced to imprisonment for five years for corruption; four of his senior officials were awaiting trial; and dozens of regional heads and legislators were jailed for a variety of corruption offenses. According to opinion polling, these cases helped to make the KPK the most-trusted institution in the country. It was unclear whether the wave of antigraft investigations would have a lasting impact on Indonesia's entrenched culture of corruption, but a 2008 Transparency International survey lifted the country's corruption ranking to 126 out of 180 (from 143 of 179 countries in 2007). (GREG FEALY)

IRAN

Area: 1,648,200 sq km (636,374 sq mi)

Population (2008 est.): 72,269,000

Capital: Tehran

Supreme political and religious authority:

Rahbar (Spiritual Leader) Ayatollah Sayyed Ali Khamenei

Head of state and government: President Mahmoud Ahmadinejad

Elections to the eighth Majlis (parliament) took place in Iran on March 14, 2008, with a second round occurring in April for the seats for which candidates did not secure at least 25% of the vote in the first round. Although the voter turnout was 65% overall, it was only 40% in Tehran; in the second round, turnout was estimated at a mere 25%. In the balloting the conservative Islamic groups (led by the ruling United Fundamentalist Front) won the majority of the seats. The Inclusive Fundamentalist Coalition, loosely aligned with conservative Ali Larijani (who in May became speaker of the Majlis), was

also well supported. Reformists took some 17% of the poll, and independents garnered 14%.

The election results were a setback for Pres. Mahmoud Ahmadinejad. Opposition to his policies gathered strength, and senior members of the regime, including former president (1989–97) Hashemi Rafsanjani, concentrated their criticism on the government's poor economic performance. There was constant upheaval in the appointment and dismissal of cabinet ministers in a bitter struggle between the Majlis and Ahmadinejad. The influential Council of Guardians, which barred most reformists from the election, and the Expediency Council remained dominated by former president Rafsanjani.

President Ahmadinejad's alleged continuing preoccupation with obtaining nuclear weaponry was opposed by the U.S. and the European countries, which continued to deny Iran the capability for the manufacture of nuclear warheads. On March 3 the UN Security Council passed Resolution 1803, the third in a series of minor sanctions against Iran. In the noncontinuous dialogue with UN Security Council members and Germany, Iran was given more incentives to dissuade it from enriching uranium; the talks, however, only delayed events and enabled Iran to press ahead.

After Iran tested long-range missiles in July, the Security Council warned Tehran on July 31 to comply with its resolution or face further sanctions. On September 8 the Revolutionary Guard and the army undertook war games. There was no compliance by Iran in curbing its nuclear activities, and at the end of September the UN Security Council imposed conditional sanctions on the import-export of sensitive nuclear materials, including a ban on trade in missile weapon carriers, and a freeze on Iran's financial assets. Meanwhile, the International Atomic Energy Agency reported on September 15 that Iran had increased the number of uranium-enrichment centrifuges (from 3,300 to 3,820) and was poised to install an additional 2,000 at the Natanz enrichment plant. In late November Iran claimed that it had "more than 5,000 centrifuges" at Natanz and reiterated that it had no plans to suspend uranium enrichment.

Iranian intervention in Iraqi affairs, which apparently began in 2007 with the supply of weapons and logistic support to Shi'ite groups in Basra, Iraq, particularly the Mahdi army of Muqtada al-Sadr, was vehemently denied by

President Ahmadinejad. In March he made a historic trip to Baghdad (the first such visit by an Iranian president) and established a "new page" in Iran-Iraq relations during talks with Iraqi Prime Minister Nuri al-Maliki. Trade and travel opened up significantly between the two countries. Relations with other Arab states were maintained, though difficulties remained. Iran threatened to close the Persian Gulf waterways in the event of a U.S. attack and continued to pursue its territorial claims to the Abu Musa and Tumb islands. The Iranian axis with Syria was sustained, and Syrian Pres. Bashar al-Assad visited Tehran in August. Meanwhile, Ahmadinejad continued his fiery rhetoric against the U.S. and Israel. On September 23, during his speech to the UN General Assembly in New York City, Ahmadinejad predicted that Israel was on the verge of collapse and that Zionists were dominating the U.S. in a "deceitful, complex, and furtive manner."

The political atmosphere hinged increasingly on economic performance. Under Ahmadinejad's management, corruption flourished, and the random adoption of projects was based on demands by regional committees. Little effort was made to privatize state businesses, and large-scale industrialization was eschewed. A debate on consumer subsidies, particularly for foodstuffs and petroleum, continued; the Majlis opposed any sharp reduction in the \$100 million annual cost. A gasoline-rationing system prevailed to contain imports of refined products. Shortages of electric power also led to rationing in the form of blackouts in Tehran.

In the 2007–08 Iranian fiscal year, imports were estimated at \$53,728,000 and exports at \$82,900,000. Despite high oil revenues and a current-account balance of payments that stood at \$23,855,000 at year's end 2007, foreign reserves were down. An IMF report concluded that the economy was heavily distorted by both high oil income and short-term expansionary policies, which were responsible for an estimated 30% boost in inflation. In addition, unemployment rose to more than 11.2%, and GDP growth trailed at 4.6%. Productivity in agriculture continued to falter, while the government had great difficulties in disposing of large industries through privatization. The proposed March 2008–09 budget caused considerable discontent owing to its reliance on the drawing down of foreign exchange holdings.

(KEITH S. MCLACHLAN)

IRAQ

Area: 434,128 sq km (167,618 sq mi)
Population (2008 est.): 29,492,000 (including nearly 2,300,000 Iraqi refugees, of which about 1,400,000 are in Syria and about 500,000 are in Jordan)
Capital: Baghdad
Head of state: President Jalal Talabani
Head of government: Prime Minister Nuri al-Maliki

Despite acts of violence, including kidnappings and suicide bombings, the security situation improved noticeably in Baghdad and elsewhere in Iraq in 2008. The decline in violence was due in large part to the “surge” of U.S. forces and the commitment of U.S.-backed Sunni militias—the Awakening Councils—who in 2006 had turned against al-Qaeda. These militias, known as “Sons of Iraq,” numbered about 100,000. On October 1 the Shi’ite-dominated Iraqi government, eager to assert its control, took command of the Sunni Awakening Councils from the U.S., pledging to pay their salaries and to integrate them into the armed forces or the civil service.

The overall performance of the Iraqi government in providing services, such as electricity, clean water, and fuel, and fostering a reduction in unemployment, remained well below government promises. Inflation remained high—at 16% in May, though it eased to 12.9% in September.

In March, Prime Minister Nuri al-Maliki personally directed military operations in Basra to bring to heel the militias that had controlled the city, terrorized the population, and prevented the normal flow of oil from terminals in Basra to the rest of the country. The Mahdi Army of Muqtada al-Sadr was the main target. After a long week of fighting, the city came under the control of government forces when Sadr ordered his militia off the streets of Basra. Despite Sadr’s call for a renewal of the six-month cease-fire in February, fighting by some Mahdi militia elements spread in March and April to other Shi’ite cities, such as Amarah and Kut, and Sadr City district within Baghdad. It was not until the end of May that Iraqi government forces, with help from the U.S., were able to pacify Sadr City.

Shi’ites in Baghdad protest the Iraqi government offensive in March against the Mahdi Army of Shi’ite cleric Muqtada al-Sadr and other militias in Basra.

These actions gave a boost to the Maliki government. Another shift toward national reconciliation occurred when Iraq’s largest Sunni bloc, the Iraqi National Accord (INA), ended a nearly yearlong boycott and, on July 19, rejoined the cabinet, retaking six cabinet ministries. The INA had left Maliki’s cabinet in 2007 at the height of violence between Sunni and Shi’ite Arabs.

After months of debate and delay, the Iraqi parliament on September 24 passed a crucial election law that was signed by the Presidency Council in October. The law aimed at organizing the important provincial elections to be held on Jan. 31, 2009, except for the three provinces in the Kurdish region (which were to schedule elections later) and Kirkuk. Passage of the law fulfilled a major benchmark requested by the U.S. and marked an important advance in the political sphere. Much of the delay had been caused by the controversial Kirkuk issue and the debate over who should control the oil-rich province. Kirkuk was excepted from the election, and the issue was given to a committee for further study. Although Kurds claimed the province as part of their autonomous region (and wanted an election to cement their control), resistance to this claim came from Arab and Turkmen inhabitants of the province and a large part of the Arab Iraqi population, Shi’ite or Sunni.

The Chaldean archbishop of Mosul, Faraj Rahho, was kidnapped February 29 and found murdered on March 13.

By October, Iraqi Christians had become a clear target of harassment. Hundreds living in Mosul were threatened and forced to leave their homes and flee the city. The threats came from as-yet-unidentified groups. During the year Mosul was the focus of intensive joint U.S.-Iraqi operations against al-Qaeda in Iraq.

Arab Sunnis in Iraq and many of Iraq’s Sunni-led Arab neighbours continued to show concern over growing Iranian influence in Iraq; this concern was shared by U.S. officials, who claimed that Iran was involved in training and funding a “shadow” army of Shi’ite militias aimed at removing U.S. forces from Iraq. The Iraqi government publicly said that it had no evidence of Iran’s having trained Iraqi militias.

Though Iraq’s long-awaited oil law was stalled in the parliament at year’s end, this did not prevent Royal Dutch Shell from concluding a natural gas agreement with the state-run Southern Oil Co. on September 22 and setting up an office in Baghdad. It was the first major international oil and gas firm to return to Iraq since the nationalization of the Iraqi oil industry in 1972.

On August 11 King Abdullah II of Jordan paid a historic visit to Iraq. He was the first Arab head of state to visit Iraq since the 2003 U.S.-led invasion. With the encouragement of the U.S., Abdullah’s visit was followed by those of other high-level Arab officials. Several Arab countries (including Syria) sent ambassadors to Iraq, signaling an

Arab thaw toward the Shi'ite-led government in Baghdad. Although Kuwait sent an ambassador to Baghdad in October, a planned visit by Kuwaiti Prime Minister Sheikh Nassar Muhammad al-Ahmad al-Sabah did not occur.

During the year Iraq engaged in crucial negotiations and hard bargaining with the U.S. over a security agreement that would decide the future of U.S. forces in Iraq. The final accord, known as the Status of Forces Agreement, called for U.S. forces to leave Iraqi towns and villages by June 2009 and for a total withdrawal of U.S. forces from Iraq by the end of 2011. Iraqi authorities were granted extensive power over the operations of U.S. forces, and Iraq was given the right to prosecute U.S. soldiers and defense contractors in cases of serious crimes committed off duty and off bases. The agreement was approved by the cabinet on November 16 and went to the parliament, where a vigorous debate took place. Parliamentary approval came on November 27, with a vote of 149 out of 198 deputies present, despite criticism from some Shi'ite hard-liners, especially Sadrists, who demanded unconditional U.S. withdrawal from Iraq. The deal was passed only after the Shi'ite-led government agreed to a mainly Sunni demand for a popular referendum on the agreement to be held no later than July 30, 2009. A second Strategic Framework Agreement covered future bilateral relations between the U.S. and Iraq.

(LOUAY BAHRY)

IRELAND

Area: 70,273 sq km (27,133 sq mi)

Population (2008 est.): 4,467,000

Capital: Dublin

Chief of state: President Mary McAleese

Head of government: Prime Ministers
Bertie Ahern and, from May 7, Brian Cowen

In 2008 the sudden resignation in April of Prime Minister Bertie Ahern and the selection of Finance Minister Brian Cowen (see BIOGRAPHIES) as his replacement, the problems of the construction sector, the unexpected rejection of the EU's Lisbon Treaty, and the effects of the international credit crunch dominated a year of surprises

in Ireland. The end of a decade of growth in housing construction had been flagged in 2007, but there were hopes of a "soft landing." When it came, however, the landing provided quite a shock. In the first 11 months of 2008, average house prices fell by 8.3%, with a year-on-year drop of 9.6%. (The figures reflected only completed deals, taking no account of an excess of unsold stock.) Builders offered price cuts of up to 25%, particularly on apartments, but first-time buyers were the only beneficiaries as unemployment, which had fallen steadily during the boom years, began to climb again. The seasonally adjusted "live register" measure of unemployment increased from 260,300 in October to 277,000 in November, taking the annual rate to 7.8%. The rise in unemployment owed much to the drop in construction output, down by 12.2% in the second quarter of 2008 compared with the same period in 2007.

A €7 billion (€1 = about \$1.40) shortfall in annual tax revenues, due to the construction slump and slowing consumer spending, appeared likely in September, up from €3 billion in June. The annual budget was brought forward to October 14 from the first week in December. It envisaged a current account deficit of €4.7 billion and included spending cuts, tax increases, and voluntary pay cuts for government

ministers. Reductions in health and education spending triggered strong resistance, and two deputies withdrew support from the government. By November unemployment had risen to 7.8% from 4.9% in January. One positive was the halving of the inflation rate to 2.5% by the end of November. By year's end the government reported an €8 billion shortfall in tax receipts for 2008.

On June 12 the Irish electorate rejected the Lisbon Treaty, voting 862,415 against and 752,451 in favour, on a relatively high referendum turnout of 53%. This caused serious embarrassment to Prime Minister Cowen and all of the major political parties, which had backed the measure to update European Union institutions and procedures following the EU's expansion to 27 members. Opposition from Sinn Fein and a hitherto-unknown extraparlimentary group called Libertas (funded by businessman Declan Ganley) upset the pro-European consensus, and it appeared that the EU-wide adoption of the treaty had been halted by the only country to hold a referendum on it. The results of a government-commissioned opinion poll showed that about a third of voters believed (wrongly) that the treaty included a policy for conscription into a European army and the elimination of Ireland's ban on abortion, while

Members of the European Parliament show their support for Ireland's rejection of the EU's Lisbon Treaty during a debate in France on June 18.

Christian Lutz/AP

more than 40% thought that it meant an end to Ireland's low corporate tax regime, despite assurances to the contrary. Some 42% who voted "no" cited a lack of information, knowledge, or understanding of the treaty as the main reason.

The year's greatest shock was the international banking crisis in the autumn. In September concerns spread to Irish-based financial institutions. Finance Minister Brian Lenihan first raised the state guarantee protecting savers' deposits with Ireland-based banks from a limit of €20,000 to €100,000, but this measure was not enough. The failure of at least one Irish bank appeared imminent, and Lenihan introduced emergency legislation to make the guarantee unlimited for a period of two years. In December he introduced plans to inject €5.5 billion into the country's three largest domestic banks.

There was a changing of the guard among those with responsibility for the Anglo-Irish peace process that had delivered power sharing in Northern Ireland. After Ahern announced his resignation on April 2, Cowen took office on May 7. British Prime Minister Tony Blair had already stepped down in June 2007, and Northern Ireland First Minister Ian Paisley retired in May 2008. This meant that three of the four principals who set up the power-sharing executive in 2007 had left the political stage, with only Sinn Fein leader Gerry Adams still on the scene.

Peter Robinson (*see* BIOGRAPHIES), Paisley's long-serving Democratic Unionist Party (DUP) deputy, succeeded Paisley as first minister. Difficulties between the DUP and Sinn Fein over devolution of policing responsibilities from London to Belfast emerged over the summer. This led to the cancellation of executive meetings and to a degree of political stasis as important decisions were deferred. This was not resolved until mid-November. In the interim community tensions had been inflamed.

The Progressive Democrats, the smallest party in Ireland's government, with only two deputies in the Dail (lower house of parliament), decided to wind itself up on November 8, though some members resisted the closure after 23 years of existence. The party was formed in 1985 and enjoyed initial success, seeing many of its liberal economic and socially progressive policies adopted by rivals, but it was almost wiped out at the 2007 general election.

ISRAEL

Area: 21,643 sq km (8,357 sq mi), including the Golan Heights and disputed East Jerusalem, excluding the Emerging Palestinian Autonomous Areas

Population (2008 est.): 7,018,000, excluding 290,000 Jews in the West Bank

Capital: Jerusalem is the proclaimed capital of Israel (since Jan. 23, 1950) and the actual seat of government, but recognition has generally been withheld by the international community

Chief of state: President Shimon Peres

Head of government: Prime Minister Ehud Olmert

The Emerging Palestinian Autonomous Areas (the West Bank and the Gaza Strip)

Total area under disputed administration: West Bank 5,900 sq km (2,278 sq mi); Gaza Strip 363 sq km (140 sq mi)

Population (2008 est.): West Bank 2,656,000, including 2,366,000 Arabs and 290,000 Jews; Gaza Strip 1,444,000

Principal administrative centres: Ramallah and Gaza

Head of government: President Mahmoud Abbas, assisted by Prime Minister Salam Fayad

On Sept. 21, 2008, Israeli Prime Minister Ehud Olmert resigned, and Foreign Minister Tzipi Livni (*see* BIOGRAPHIES), who became leader of the ruling Kadima party in a mid-September leadership primary that Olmert did not contest, spent much of the following month trying unsuccessfully to form a new coalition government. Livni then asked Pres. Shimon Peres to call early elections, which were set for Feb. 10, 2009.

Olmert's resignation occurred after more than two years of intensive police investigations. His position became untenable in late May when Morris Talansky, a New York-based fund-raiser, in a pretrial deposition, accused Olmert of having accepted about \$150,000 in cash payments over a 13-year period. With Olmert under suspicion of bribery, breach of trust, and violation of election-campaigning laws, Defense Minister Ehud Barak threatened to pull the Labour Party out of the coalition unless Kadima chose a new leader. This announcement triggered the process that led to Olmert's ouster.

Six days before his resignation, Olmert leaked details of a far-reaching peace offer made to the Palestinians. In return for peace, Israel would hand over the equivalent of 100% of the West Bank, set up a temporary joint regime for Jerusalem's holy basin, and agree to the return to Israel proper of 2,000 Palestinian refugees annually over a 10-year period.

After a Mideast summit that was hosted by the U.S. in Annapolis, Md., in November 2007, Israel and the Palestinians launched intensive peace talks on two tracks. The aim was to conclude by the end of 2008 a final Israeli-Palestinian peace deal, a "shelf" agreement that would be implemented as soon as conditions permitted.

The U.S. and the international community invested a great deal of energy in the process. U.S. Secretary of State Condoleezza Rice made several trips to the region to facilitate negotiations; former British prime minister Tony Blair, special envoy of the international "Quartet" (the U.S., the EU, the UN, and Russia), raised more than \$7 billion to boost the Palestinian economy; and U.S. Gen. Keith Dayton trained Palestinian forces to take over security in West Bank cities, starting with Nablus, Jenin, and Hebron.

Hamas categorically rejected any peacemaking with Israel and in the first half of the year fired thousands of rockets and mortar shells at Israeli civilians in towns and villages bordering the Gaza Strip. In an attempt to pressure Hamas, Israel maintained a land and sea blockade, causing a degree of humanitarian suffering for which it was widely criticized.

In late January Hamas militiamen blew up the border fence at the Rafah crossing point, and hundreds of thousands of Palestinians poured into Egypt in symbolic defiance of Israel's blockade. The Egyptians, however, quickly resealed the border, and over the next few months, fighting between Israel and the militants escalated. In early March, after Hamas fired long-range Grad rockets at the city of Ashkelon, Israel conducted a five-day land incursion into Gaza, in which more than 100 Palestinians were killed. Partly out of concern that the Gaza violence might overflow into Egypt, Cairo mediated a truce that went into effect on June 19. On December 19, Hamas refused to renew the truce as long as border crossing points remained closed and five days later fired more than 70 rockets and mortar shells

Israeli soldiers and tanks prepare for a land operation against Hamas militants in the Gaza Strip on December 30, three days after Israel began air strikes to put an end to rocket fire from Gaza into Israel.

Ariel Schalit/AP

at civilian targets in Israel. Israel's response was harsh. On December 27, in an initial strike that lasted just 3 minutes and 40 seconds, more than 60 warplanes and helicopters destroyed dozens of Hamas government buildings and installations, killing about 150 people, most of them militiamen. By year's end, despite international calls for a cease-fire, the confrontation showed every sign of escalating, with Israeli air raids and Hamas rocketing continuing unabated, and Israeli ground troops poised to move into Gaza.

After a breakdown of Israeli-Syrian peace talks in 2000, both sides put out feelers in 2007 to resume the process; an announcement on May 21, 2008, led to the renewal of indirect peace talks, which would be mediated by Turkey. Following four sessions of fruitful talks, the Israelis and the Syrians were on the brink of launching direct peace talks but decided to wait until the formation of new administrations in Israel and the U.S. There were two key questions: would Syria be prepared to detach itself from the Iranian axis, and would a new U.S. administration be ready to offer Syria sufficient economic and political inducement to do so?

Israel's main strategic concern was Iran's suspected plan to manufacture a nuclear bomb. Throughout the year Israel made strong diplomatic representations in an effort to block an Iranian nuclear weapons program. During visits to Israel in January and May, U.S. Pres. George W. Bush was shown the latest Israeli intelligence data. In a festive address to the Knesset (parliament) marking Israel's 60th anniversary, Bush reaffirmed U.S. determination to pre-

vent "the world's leading sponsor of terror" from possessing "the world's deadliest weapon." In June the Israeli air force reportedly carried out large-scale maneuvers that simulated an aerial attack on Iranian nuclear installations, and Transport Minister Shaul Mofaz warned that if Iran continued its alleged weapons program, Israel would be left with no option but to attack. In late September Israel's military intelligence told the government that Iran already had one-third of the fissionable material needed to produce a bomb.

On July 16, two years after the outbreak of the war in Lebanon between Israel and the Iranian-backed Hezbollah, the latter group returned the bodies of two Israeli soldiers who were kidnapped in the incident that had led to war. As part of the prisoner exchange mediated by Germany, Israel returned a Lebanese held since 1979 after particularly brutal terrorist murders, four Hezbollah fighters captured in the war, and the bodies of 199 Lebanese and Palestinian militants.

The final report of the Winograd Commission's investigation of the war was published in late January, further undermining Olmert's position as prime minister. Although the report was scathingly critical of his performance, it did not recommend that he resign, nor did it find, as his detractors claimed, that he had launched the inconclusive land operation in the final 60 hours of the war to improve his sagging political fortunes. On the contrary, it stated that the decision was "almost inevitable," and Olmert claimed that the report had lifted a "moral stigma."

The international credit crisis found

the Israeli economy faltering, but not as badly as the economies in the U.S. or the EU. Though first-quarter growth registered at 5.6%, as the international crisis deepened, the growth rate was ratcheted down to about 3% for the year, and the Bank of Israel forecast the 2009 rate at 2.7%. Israeli banks were not heavily involved in subprime lending, and there was no need for a government rescue plan. Nevertheless, the Tel Aviv stock exchange tumbled and by mid-October had lost about one-third of its value from the beginning of the year. (LESLIE D. SUSSER)

ITALY

Area: 301,336 sq km (116,346 sq mi)

Population (2008 est.): 59,760,000

Capital: Rome

Chief of state: President Giorgio Napolitano

Head of government: Prime Ministers Romano Prodi and, from May 8, Silvio Berlusconi

Politics, a garbage pileup in the city of Naples, and an ongoing debate over immigration laws all competed for attention in Italy during 2008. After a two-year hiatus, billionaire Silvio Berlusconi returned to power in May at the head of a new centre-right party called the People of Freedom. His success in the April parliamentary elections followed the disintegration of the precarious centre-left alliance that Prime Minister Romano Prodi had presided over since 2006. As the national election campaign took shape early in the year, Italy's attention turned to Naples, where the closure in late 2007 of waste-disposal incinerators and local mismanagement attributed to organized crime gradually led to the accumulation of tens of thousands of tons of garbage in city streets, provoking local outcries and censure from the European Union. In January government officials estimated that some 50,000 tons of uncollected waste had accumulated in the Campania region, including both Naples and the Amalfi Coast, a popular tourist destination. Later the city's association of physicians openly expressed fears that the increase in rats and insects might lead to the spread of infectious diseases. An agreement to

pay Germany to help with the garbage disposal led to the transport of some 160,000 tons of trash to Hamburg and other German cities for incineration, but this was recognized as a temporary solution.

Berlusconi used the Naples crisis as a campaign watchword. He also pledged to make cuts in property taxes. Prodi's Union alliance, which held a narrow majority in the parliament throughout its existence, unraveled definitively in February when former justice minister Clemente Mastella, the head of a small Roman Catholic party, rancorously pulled out of the Prodi coalition as a way of protesting his innocence against corruption charges. Prodi's efforts to woo back Mastella failed, and the embattled prime minister soon lost a confidence vote. He had lost a similar vote in 2007 and managed to form a second government, but this time divisions within the left made regrouping impossible.

Instead, Italy faced a runoff between two new political entities, Berlusconi's People of Freedom and the Democratic Party (PD) headed by Rome Mayor Walter Veltroni, Prodi's political heir. Veltroni's call for the creation of an interim nonpartisan government to oversee electoral reform ahead of voting was successfully resisted by Berlusconi and his ally Umberto Bossi, the head of the xenophobic Northern League. Those two leaders sought to capitalize immediately on a tide of public disenchantment with the left. The presence of the new parties reflected efforts on both political sides to assemble ideologically similar forces under the same roof to avoid the parliamentary splintering caused by Italy's system of proportional voting.

The People of Freedom and the Northern League together amassed nearly 47% of the national vote versus 37.5% for the PD, a dizzying defeat for the centre-left and Veltroni, a self-styled political modernist and an outspoken supporter of U.S. Democratic presidential contender Barack Obama. (See BIOGRAPHIES.) Significantly, the election results all but erased dozens of splinter parties. For the first time since World War II, political heirs to the former Italian Communist Party failed to win a parliamentary seat. Meanwhile, the Northern League, known for its anti-immigration stance, made significant inroads, doubling its most recent vote totals in what was widely considered a bare-knuckled protest against the growing presence of illegal immigrants in the Italian blue-collar workforce. Over-

A woman and child walking in Naples in January pass some of the tens of thousands of tons of garbage piling up in the streets since the closing in late 2007 of local trash incinerators.

all, Berlusconi's forces won 344 seats in the 630-seat lower house, the Chamber of Deputies, and 174 seats in the 315-strong Senate, a commanding majority that assured the centre-right of broad legislative power. The 71-year-old Berlusconi was sworn in as prime minister on May 8.

Berlusconi repeatedly traveled to Naples, but the long-standing garbage crisis remained largely unresolved. Efforts to reopen a suburban incinerator that had been promised to urban renewal provoked repeated clashes with police. Berlusconi insisted that he would reopen the facility by January 2009 and pledged to build two new sites. Government officials ruefully admitted that the crisis was nourished in part by the Camorra, an organized crime syndicate (similar to the Mafia) that earned billions by illicitly controlling the waste-disposal industry. The release in May of the film *Gomorra*, from a book by journalist Roberto Saviano, galvanized public opinion against organized crime. Saviano's ongoing exposés of Camorra influence in Naples had already earned him 24-hour police protection.

The Northern League's impressive electoral showing led Berlusconi to name one of its key officials, Roberto Maroni, as interior minister. Maroni swiftly produced aggressive and controversial legislation intended to rein in clandestine immigration, widely seen as a source of blue-collar crime. In July, Italy declared a state of emergency to

limit the country's rising Roma (Gypsy) population. A plan to fingerprint all Roma in nomad camps as part of a census effort was decried by UNICEF as a violation of the UN convention on the Rights of Children, but the EU did not object. New immigration and crime legislation also called for stricter accounting of foreign residents in Italy, including proof of income and residence for stays of more than 90 days. Maroni made further headlines when he announced that a limited number of Italian troops would be deployed in Italian cities as a part of an experimental law-and-order measure. More than 500 such personnel were earmarked for Naples, again identified as a hot spot for drug violence and racially motivated crimes. At the same time, Berlusconi recommended the implementation of a satellite tracking system to help deter potential immigrants at their point of origin, most often from Balkan and North African seaports.

The focus on immigration was in part a response to Italy's weak economy, which teetered on the brink of recession. According to official data, Italy's second-quarter GDP fell 0.3% from the previous quarter and was 0.1% down on the year. The European Commission said that it expected the economy to stagnate through the end of 2008. A World Bank's rating of national competitiveness rated Italy 65th in the world. In October the IMF predicted that Italy would undergo two years of

recession, and prognosticators believed that the economy was likely to shrink.

The fate of debt-ridden Italian national airline Alitalia paralleled both the rising costs of aviation fuel and the residual intransigence of the labour unions. Two rescue packages intended to save the beleaguered airline, one foreign and one domestic, collapsed when union leaders vetoed extensive job cuts, and in August Alitalia filed for bankruptcy protection. A compromise deal, finalized in December following internal feuding, kept the airline afloat and in Italian hands. Berlusconi, who opposed the airline's sale to foreign interests, immediately claimed this as a personal victory.

As always, Italians looked to sports for solace. At the Olympic Games in Beijing, Italian competitors captured 28 medals (8 gold), notably victories by fencers Matteo Tagliariol and Valentina Vezzali and swimmer Federica Pellegrini. The country's strong showing at the Olympics partially offset a forgettable performance by the national team at the European association football (soccer) championships held in Austria and Switzerland. Italy was eliminated by Spain in the quarterfinals, which led to the dismissal of coach Roberto Donadoni and his replacement by former trainer Marcello Lippi. Inter Milan won its third consecutive Serie A title in Italy's top soccer league, and fan violence that had marred the sport in 2007 appeared to abate domestically. In October, however, Italian fans rioted during a World Cup qualifying match in Sofia, Bulg., shouting insults and injuring local police. Italian political authorities vowed to intensify the vetting of fans bound for away matches.

JAMAICA

Area: 10,991 sq km (4,244 sq mi)

Population (2008 est.): 2,688,000

Capital: Kingston

Chief of state: Queen Elizabeth II, represented by Governor-General Kenneth Hall

Head of government: Prime Minister Bruce Golding

The new Jamaica Labour Party (JLP) government announced in January

2008 that it would proceed with the decision of its predecessor, the People's National Party (PNP), to adopt liquefied natural gas (LNG) as the preferred fuel diversification option for the country. Prime Minister Bruce Golding said that discussions on LNG supplies were "under way" with unnamed countries; these talks occurred following the inability of either Trinidad and Tobago or Venezuela to provide promised LNG within an acceptable time frame.

The Office of Utilities Regulation in April began soliciting proposals for the provision of 73 MW of renewable energy such as wind, biomass, solar, and hydrogen. The takeover by Brazil's Infinity Bio-Energy of Jamaica's five sugar factories was confirmed in July, with the company stressing its intention to use sugar as the basis of a significant ethanol industry in the country.

Prime Minister Golding in May called on the U.S. to lift its decades-old economic embargo on Cuba and for both countries to undertake "constructive engagement" to resolve differences. He suggested making efforts similar to those that the U.S. had adopted in reestablishing ties with China, Vietnam, and North Korea.

Former prime minister Portia Simpson Miller defeated rival Peter Phillips for the leadership of the PNP in party elections held in September. After her reelection Miller insisted that she would work harder to restore the PNP to power in Jamaica.

JAPAN

Area: 377,915 sq km (145,914 sq mi)

Population (2008 est.): 127,674,000

Capital: Tokyo

Symbol of state: Emperor Akihito

Head of government: Prime Ministers Yasuo Fukuda and, from September 24, Taro Aso

Domestic Affairs. In 2008, just one year after having assumed the post of prime minister and well before the end of his term as party leader or the end of the legislative term of the Diet (parliament), Yasuo Fukuda surprised Japan's political establishment and others around the world by announcing that he was stepping down. He made the an-

nouncement on September 1, almost exactly a year after his predecessor, Shinzo Abe, had made a similarly unexpected announcement. Though Abe had explained his decision as resulting from his gastrointestinal problems, Fukuda was not able to point to any health problems as a reason for stepping down. He simply chose to move aside, he explained, in order to help accelerate a policy-making process that had been moving at a snail's pace for the entire period of his prime ministership. Fukuda was succeeded on September 24 by Taro Aso (*see* BIOGRAPHIES), a fellow member of the long-ruling Liberal Democratic Party (LDP). Aso assumed the post of prime minister after having been selected by the LDP as party leader in a special LDP election scheduled to choose Fukuda's successor.

Fukuda's frustration was driven by the difficulties he had working with a "twisted Diet," the Japanese term for divided control of the legislature. The opposition Democratic Party of Japan (DPJ) held a majority of the seats in the upper house, while the LDP, together with its coalition partner, the New Komeito party, held a two-thirds majority in the more powerful lower house of the Diet. The DPJ had won control of the upper house in July 2007—the first time that a party other than the LDP had won majority control of either house of the Diet in the post-World War II period. Abe's resignation, his reports of stomach problems notwithstanding, was largely a result of that election loss.

It thus fell to Fukuda to deal with an awkward legislative situation that was new to Japan. Under the leadership of DPJ head Ichiro Ozawa, the party's upper-house delegation remained united in refusing to compromise with the prime minister. In his first four months in office, Fukuda was able to usher through the Diet only a single significant piece of legislation: the renewal in January of antiterrorism legislation authorizing the Japanese navy to resume its mission in the Indian Ocean that involved refueling U.S. ships engaged in the war in Afghanistan.

In the spring term of the Diet, Fukuda was able to pass the budget on schedule by using the ruling coalition's control of the lower house. In March, however, the opposition took advantage of the fact that the appointment of governors and deputy governors of the Bank of Japan (BOJ) required the approval of both chambers of the Diet. The DPJ

blocked Fukuda’s efforts to appoint Toshiro Muto the new central bank governor, delaying the selection of a new chief until after the term of the outgoing governor, Toshihiko Fukui, had expired on March 19. The post thus stood vacant for several weeks—with Masaaki Shirakawa (see BIOGRAPHIES) serving as acting chief—as an important meeting of the Group of Seven economic officials approached. Only the potential embarrassment of having Shirakawa attend this meeting as a mere “acting” governor compelled the DPJ to stand aside and allow him to assume the post of governor with Diet approval. Nevertheless, the drama continued when the DPJ announced that it would oppose Fukuda’s nominee for the open deputy governor’s slot. Over the remaining months of his tenure as prime minister, Fukuda was forced to abandon a series of proposed candidates. The standoff over this issue appeared to have been one of the headaches that pushed Fukuda to step down. A new deputy was approved on October 24.

Fukuda was involved in one final legislative showdown with the DPJ over the renewal of the “temporary” gasoline-tax surcharge. The surcharge, which had been in place since the oil-crisis years of the mid-1970s, had been repeatedly renewed because it produced an annual stream of tax revenue totaling an estimated ¥2.6 trillion (about \$27.2 billion) that was used to fund road projects. The DPJ, citing the

public’s concern over rising gas prices, refused to approve renewal ahead of the March 31 expiration date. Fukuda countered by proposing to redirect the gas-tax revenue from road projects to a fund used for general purposes. This plan was eventually approved on April 30, though Fukuda’s proposal was modified to reflect the demands of rank-and-file LDP members that the gas tax support road projects for one more year, after which such revenue would be directed to general-purpose use starting in 2009. This represented a major change in policy that former prime minister Junichiro Koizumi had failed to achieve earlier in the decade.

The DPJ orchestrated one final effort to embarrass the prime minister. In June, just prior to a meeting of the Group of Eight (G-8) hosted by Japan, the upper house passed a motion of censure against the prime minister. While ostensibly designed to press Fukuda to call early elections for the lower house, the motion was (as expected) overridden by a vote of the LDP-dominated lower house, which under Japan’s constitution had the power to select the prime minister. Nevertheless, the vote was yet another reminder that Fukuda had only partial control of the legislature.

More worrisome for the LDP, however, was the prospect that the party would have to face the voters in lower-house elections by September 2009. Given the standing of the party and the prime minister in public-opinion polls,

the LDP and its New Komeito allies looked certain to lose their two-thirds majority in that chamber in the next elections. Anything short of the two-thirds control that the party had wielded since the 2005 elections threatened to make the job of managing the Diet even more complicated, since that supermajority had been critical to Fukuda’s ability to push through legislation on several occasions during his tenure in office. A bare majority would leave the LDP completely dependent on opposition cooperation until at least the 2010 upper-house elections—and probably beyond that to 2013.

Having found the existing situation difficult enough, Fukuda decided to leave the task of leading the LDP into a general election to a successor. The party promptly focused on Aso as the man best situated to take on this challenge. After he assumed the party presidency on September 22, Aso was quickly approved by the lower house as the new prime minister. His approval rating immediately after taking office stood at 49% in most polls—higher than Fukuda’s at the end of his tenure but below where Fukuda’s had stood when he assumed office a year earlier. By November, Aso’s support had fallen to just 40% as it became clear that the economy was slowing sharply and that the financial crisis was driving the stock market to record lows. Asked which party they preferred, respondents in the November poll taken by the national newspaper *Yomiuri* preferred the LDP to the DPJ by just a single percentage point, 32% to 31%. Elections were likely to be held in the spring of 2009 if political conditions improved for the ruling coalition but possibly as late as the summer if Aso decided to wait until close to the September 2009 deadline.

The Economy. In late July the International Monetary Fund (IMF) reported that the Japanese economy was showing “resilience to recent external shocks” and that “activity remained robust through the first quarter of 2008.” By October, though, it was apparent that the worldwide economic slowdown that began in the U.S. after the collapse of the housing bubble was hitting Japan hard. During the second quarter, Japan’s economy contracted by 0.7%, or at an annual rate of 3%. Further contraction in the third quarter pushed the Japanese economy into recession in the fall.

Growth was affected by the rise in Japan’s import bill as the country paid

record-high prices for imported oil, combined with a slump in exports, which were hit by declining growth in the U.S. and Europe. The slowdown was also a product of developments at home, where both private residential investment and public investment declined sharply. As a result of the recession, projections for Japan's growth during 2008 and 2009 were downgraded. Whereas the IMF's midyear projections suggested that Japan would grow at a rate of about 1.5% during 2008–09, the projections it issued in September called for growth to slow to 1% in 2008 and 1.1% in 2009. Just two months later, after taking into account the effects of the spreading global financial crisis, the IMF lowered its projections for Japanese growth again.

The contraction of credit and the associated unwinding of the yen-carry trade, which led the yen to strengthen to 94 yen to the U.S. dollar on October 27 and to strengthen even more sharply against the euro and many other currencies, dealt a severe blow to Japanese automakers and other exporters. Automakers slashed projected sales in the U.S. and other markets and predicted much lower levels of profits. These developments fed a sharp decline in the Japanese stock markets; the Nikkei 225 Stock Average fell to a 26-year low in late October before recovering slightly at year's end. The unemployment rate moved up to 4.2% in August after starting the year at 3.8% but fell back to the 3.7–3.9% range in the autumn.

In response to the slowdown, the government passed a fiscal stimulus package valued at ¥1.8 trillion (about \$18.8 billion) in October and immediately began working on a second package. The latter became the top priority of the new cabinet inaugurated under Prime Minister Aso, who announced on October 30 that the package would be valued at ¥5 trillion (about \$52.3 billion). The next day, the BOJ announced that it was lowering interest rates from 0.5% to 0.3%, the first time the central bank had cut rates in seven years. Additional measures designed to inject public funds into banks, along with a major economic stimulus package, worked their way through the Diet in late 2008.

The fiscal and monetary policies adopted late in the year caused the Japanese government to backtrack from efforts to “normalize” interest rates, which had been at 0.5% or lower for the entire decade, and from efforts

to reduce the country's fiscal deficit to a level where it achieved a “primary balance” by fiscal year 2011. Private-sector forecasters predicted that Japan could reach this goal only if it raised the consumption tax, but such a tax hike was not even on the agenda as Japan faced both a recession and elections in 2009.

Foreign Affairs. The foreign policy issue that preoccupied senior Japanese officials in 2008 was the effort to persuade North Korea to give up its nuclear weapons program and take responsibility for past violations of international law—especially the kidnapping of Japanese citizens in the 1970s and '80s. The good news was that the U.S. and North Korea agreed during the year on several steps that were aimed at resolving these issues. North Korea disabled its nuclear reactors in June after it reached a tentative agreement with the U.S. on a verification regime. This step was to be followed by the U.S. removal of North Korea from the list of countries that it considered state sponsors of terrorism and by the provision of one million tons of fuel to North Korea by South Korea, China, Russia, the U.S., and Japan—all participants in six-party talks on North Korean denuclearization. Because the tentative agreement on verification did not resolve all of the concerns on the U.S. side or address Japan's kidnapping concerns, these moves were delayed into the fall, which thus caused North Korea to resort once again to brinkmanship by barring inspectors from its nuclear facilities at Yongbyon, threatening to resume production of plutonium, and moving toward another nuclear test. Hoping to avoid this, the U.S. announced on October 11 that it was indeed removing North Korea from its list of state sponsors of terrorism in exchange for verbal compromises by Pyongyang on the terms of the verification regime.

The bad news was that these compromises were not enough to reassure Japan, which announced that it was not willing to approve the deal. Japan insisted that it would agree to provide fuel oil only when details of the verification regime were put into writing and accepted by all participants in the six-party talks. Japan further demanded that the North Koreans carry out another investigation into the fate of the kidnap victims. Japanese officials blamed the U.S. for failing to adequately consider their concerns, and Aso went so far as to question the U.S.

decision to make a deal with ailing North Korean leader Kim Jong Il, who, Aso claimed, was “incapable of making important judgments.”

This deterioration in relations with the U.S. amid continuing concerns about North Korea came during a time when Japan was able to improve its relations with China and Europe. Chinese Pres. Hu Jintao traveled to Japan in May—the first visit by a Chinese head of state since 1998. His trip—which came after several years in which visits by Japanese heads of state to the Yasukuni Shrine (where both Japanese war dead and 14 Class A war criminals were enshrined) and anti-Japanese demonstrations in China had aggravated relations between the two neighbours—marked a milestone in improving ties. Nevertheless, the two countries continued to face difficulties dealing with issues such as the Chinese tainted-food scandal, which caused problems throughout Asia and elsewhere during the year.

In July, Japan hosted the G-8 summit, which was held in Toyako on the island of Hokkaido. Much effort was devoted prior to the summit in working with the Europeans to nudge the U.S. toward taking a more productive role on climate-change negotiations. The summit's crowning achievement was a commitment by the group—including the U.S.—to halve greenhouse gas emissions by 2050. The group also pledged to work to bring China and India and other large emitters of greenhouse gases into a new post-Kyoto Protocol climate-change-mitigation regime.

JORDAN

Area: 88,778 sq km (34,277 sq mi)

Population (2008 est.): 5,844,000 (including about 1,900,000 Palestinian refugees, most of whom hold Jordanian citizenship; excluding roughly 600,000 Iraqi refugees)

Capital: Amman

Head of state and government: King Abdullah II, assisted by Prime Minister Nader Dahabi

Confronted in 2008 by the rising cost of living spurred by unbridled increases in world oil and cereal prices, Jordan

embarked on a plan to cushion the impact of inflation. Though subsidies were eliminated, the salaries of public- and private-sector employees were raised. Despite mounting inflation, which was a risk factor for social upheaval, the government seemed firmly in control of the domestic security situation as it also tried to cope with its 750,000 Iraqi refugee population.

The consumer price index rose over 15% in the first nine months of the year (compared with 5.4% in 2007) as a result of the increase in oil prices, elimination of fuel and some food subsidies, and the escalation in prices of imported cereals (31%), fuel and electricity (55%), dairy products (36%), transport (24%), and meat and chicken (10%). The government's 2008 budget of \$7.3 billion marked an increase of \$1.2 billion over 2007, with an expected deficit of \$1 billion (5.6% of GDP), compared with the previous year's deficit of \$535.2 million. The government's economic liberalization program troubled opposition parties and the population at large. Public opinion surveys indicated that 55% of Jordanians considered themselves poor on the basis of the fact that their living conditions had worsened in the past three years. Only 13% of the population believed that their situation had improved. The Jordanian economy was growing at an estimated annual rate of 6%, compared with 4% in 2006, but government offi-

cials considered rates of unemployment and poverty high.

Two attacks against foreign tourists occurred in Amman during the year. In March a Jordanian stabbed a German tourist, and in July a shooting incident near the Roman amphitheatre resulted in some injuries. The political situation remained fairly stable, despite the Iraqi refugee problem, the lack of progress in the Palestinian-Israeli negotiations, and the country's restive mood following the removal of subsidies.

In July, Jordanian, Palestinian, and Israeli officials concluded negotiations in Amman with World Bank representatives for a feasibility study of a \$3 billion project to build a canal that would connect the Red Sea to the Mediterranean via the Dead Sea, where the water level had reached a critical low. Described as a scheme to foster increased cooperation between Israel and its Arab neighbours, the project was criticized by experts as a revival of the 1993 plan offered by Israeli Foreign Minister Shimon Peres at the 1993 Arab summit in Casablanca, Mor.; at that time the project was considered an attempt to effectively separate the Palestinian West Bank from the Gaza Strip and was viewed as a threat to the Egyptian Suez Canal and marine life in the Gulf of Aqaba. The plan was again rejected at the 2002 World Summit on Sustainable Development in Johannesburg.

KAZAKHSTAN

Area: 2,724,900 sq km (1,052,090 sq mi)

Population (2008 est.): 15,655,000

Capital: Astana

Head of state and government: President Nursultan Nazarbayev, assisted by Prime Minister Karim Masimov

The political leadership in Kazakhstan spent 2008 seeking to prove its worthiness to head the Organization for Security and Co-operation in Europe (OSCE); at its annual meeting in 2007, the foreign ministers of the OSCE participating countries had agreed that Kazakhstan should chair the organization in 2010, on condition that the country met certain requirements in the areas of political reform and human rights guarantees. In return, Kazakhstan promised to bring its national legislation into line with international standards during 2008. The decision gave a boost to Kazakh Pres. Nursultan Nazarbayev's "Road to Europe" program, which was hailed in February 2008 by visiting U.S. Assistant Secretary of State Richard Boucher as helping Kazakhstan to become a "really modern country." The same month, however, Nazarbayev notably passed over the issue of political reform in his annual state of the nation address.

The president defended his own party's dominance of Parliament as necessary to facilitate "crucial reforms," comparing the situation in Kazakhstan to such one-party-dominated countries as Japan, Sweden, and Singapore. In February, Prime Minister Karim Masimov imposed a moratorium on state inspections of small businesses in order to give a boost to the free-market economy. In September, President Nazarbayev told the new EU representative in Astana that Kazakhstan wanted to expand cooperation with the EU, already a major trading partner, in an effort "to attract European technologies, investments, experience and to develop the cooperation within the framework of Kazakhstan's chairmanship of the OSCE in 2010."

Kazakhstan's relations during the year with major foreign investors were more troubled. In January the Agip KCO consortium, after serious disputes with Kazakh government agencies, handed a

majority share in the huge Kashagan oil field to state-owned KazMunaiGaz. After a blast killed 30 miners in January in a mine owned by ArcelorMittal, the Kazakh government accused the company of having neglected to improve safety and meet environmental requirements, which were somewhat nebulous. In April, Standard & Poor's dealt a blow to the government's development program, reducing Kazakhstan's credit rating from stable to negative, owing to the country's foreign-currency obligations.

Kazakhstan showed less willingness in 2008 to meet international standards in the sphere of human rights protection. The government was sharply criticized by the international human rights community for handing Uzbek asylum seekers over to Uzbek security services on what were widely believed to be trumped-up charges. Despite President Nazarbayev's well-publicized commitment to promoting religious tolerance, members of minority religious communities, such as unregistered Baptists and Hare Krishna adherents, continued to experience harassment from local officials.

(BESS BROWN)

KENYA

Area: 582,646 sq km (224,961 sq mi)

Population (2008 est.): 37,954,000

Capital: Nairobi

Head of state and government: President Mwai Kibaki, from April 17, assisted by Prime Minister Raila Odinga

The sporadic fighting that had occurred in 2007 in the Mt. Elgon region of the western Rift Valley province between Kalenjin ethnic groups and Kikuyu tenant farmers became politicized and much more violent in 2008 after the disputed presidential election in December 2007. The clashes occurred between Kalenjin ethnic groups who claimed traditional ownership of the land and the mainly Kikuyu tenant farmers who had settled in the area that was occupied by white farmers prior to independence. Although the Orange Democratic Movement (ODM), which had its stronghold in the west, gained the largest number of seats in

Khalil Senosi/AP

People residing in an internal displacement camp in Nakuru in the Rift Valley province in May are among some 300,000–600,000 who were forced from their homes by violence that exploded after the disputed Kenyan presidential election at the end of 2007.

the National Assembly, its leader, Raila Odinga (see BIOGRAPHIES), accused the government of having rigged the presidential election when incumbent Mwai Kibaki of the Party of National Unity (PNU) was hurriedly sworn in as president before an official result was announced. Odinga's call for a mass protest demonstration in Nairobi fueled the discontent still further, and violence by his supporters in the west and on the coast was countered by Kikuyu attacks on western ethnic-group settlers in more-central regions. More than 1,000 people were killed, and estimates of the number of displaced persons varied from 300,000 to 600,000. The transportation of goods from Mombasa to Nairobi and onward to Uganda and Rwanda was brought to a halt.

Laborious negotiations between the contending parties—mediated by Kofi Annan, former UN secretary-general; Jakaya Kikwete, president of Tanzania and chairman of the African Union; and other African dignitaries—eventually resulted on February 28 in an outline agreement to form a power-sharing government and to create the new post of prime minister. Kibaki remained president, and Odinga became prime minister.

Bargaining continued over the distribution of offices, and the composition of the cabinet was not announced by Kibaki until April 13. In an effort to accommodate all the aspirations of the different groups, 42 cabinet ministers and 52 assistant ministers were named. Worries over footing the bill for

the salaries of these new appointees led to an immediate outcry and a demonstration in Nairobi. Nevertheless, the cabinet was sworn in on April 17.

Another feature of the agreement was the appointment of a commission, under the chairmanship of South African Judge Johann Kriegler, to inquire into the conduct of the presidential elections. The commission reported in September that the elections had been so badly affected by corruption on all sides that it was impossible to discover the victor and recommended that the Electoral Commission be fundamentally reformed or, preferably, replaced by a better-qualified body. An additional inquiry was launched in May to investigate how the postelectoral chaos came about.

Economic recovery followed an uneven course. In August the giant mobile telephone company Zain established its headquarters in Nairobi. In September, however, the government was urgently requested to take action to reduce the cost of fuel to avoid large-scale unemployment. There were also lingering concerns over corruption. In July, Finance Minister Amos Kimunya resigned in the wake of an investigation into the sale of the state-owned Grand Regency Hotel in Nairobi, which was sold below market value. At the same time, an investigative journalist claimed that two cabinet ministers and a number of senior politicians and officials were among the beneficiaries of land set aside for the resettlement of displaced persons.

(KENNETH INGHAM)

KIRIBATI

Area: 811 sq km (313 sq mi)
Population (2008 est.): 97,200
Capital: Government offices on three islets of South Tarawa
Head of state and government: President Anote Tong

In 2008 Kiribati confronted serious challenges to its long-term future from accelerating climate change, a prolonged drought, and rising sea levels, which some analysts predicted could leave the low-lying island country uninhabitable by the end of the century. Pres. Anote Tong, in New Zealand in June for World Environment Day, used the opportunity to express his fears that the drought—exacerbated by widespread erosion and the infiltration of salt water into freshwater sources—could force the evacuation of Kiribati even sooner and to secure a commitment from New Zealand to resettle Kiribati’s population as it became necessary to do so.

He also procured assistance to expand the Marine Training Centre and thereby provide more skilled merchant marines, who in 2008 returned some 15% of Kiribati’s national income. Workers from the islands were offered seasonal work in New Zealand horticultural and viticultural industries, and Australia proffered opportunities for Kiribas workers to take part in a parallel scheme to start later in the year. President Tong, in praising the plans for overseas jobs, stated that “We don’t want to come begging. We want to come with dignity, we want to work.”

Ironically, the sea that threatened the country might also contain mineral wealth that was becoming increasingly sought after in a resource-hungry world, and mineral-exploration giants were offering Pacific islands significant sums for the right to prospect in these potentially mineral-rich zones. By 2008 Kiribati was working with specialists from the United Nations Environmental Programme on claims—under Article 76 of the UN Convention on the Law of the Sea—for recognition of a huge submerged continental shelf area beyond the country’s 370-km (200-nautical-mile) exclusive economic zone.

(CLUNY MACPHERSON)

KOREA, DEMOCRATIC PEOPLE’S REPUBLIC OF

Area: 122,762 sq km (47,399 sq mi)
Population (2008 est.): 23,867,000
Capital: Pyongyang
Head of state and government: Chairman of the National Defense Commission Kim Jong Il

In 2008 North Korea lived up to the traditional nickname for the Korean peninsula, “the Hermit Kingdom,” by dragging its feet in nuclear talks and imposing a news blackout surrounding the health of its reclusive leader, Kim Jong Il. Meanwhile, relations with South Korea entered a deep freeze, and ties with the United States warmed slightly. The country’s food situation remained precarious.

The ongoing international negotiations to rid North Korea of nuclear weapons and related programs made halting progress. Though no breakthrough occurred, in October the U.S. removed North Korea from the list of countries sponsoring terrorism. The most promising development came in June when the North blew up the cooling tower used at its main nuclear facility, one day after Pyongyang had made a long-awaited declaration of its nuclear

assets. The document, however, made no mention of the country’s nuclear arsenal, its suspected uranium-enrichment program, or the growing evidence of nuclear-related transfers to Syria. During December negotiations the parties failed to agree on a verification protocol.

One possible threat to denuclearization efforts was the questionable health of Kim Jong Il. Kim disappeared from public view in August and failed to attend an event marking the founding of his father’s regime 60 years earlier. It was rumoured that Kim had suffered a stroke but had at least partially recovered. Unverified photographs released throughout the autumn purported to show Kim at factories, sporting events, and military bases. The 67-year-old Kim’s illness underscored the fact that he had yet to name a successor.

Despite a decade of engagement between the countries, relations between North and South Korea deteriorated after conservative Lee Myung-bak became the South Korean president in February. Public tours of North Korea, one of the pillars of North-South cooperation, were suspended indefinitely after a North Korean soldier shot and killed a tourist from South Korea who had wandered into a restricted zone. Another cooperative venture, the industrial complex at Kaesong, was also threatened by the incident. In contrast, some musical diplomacy took place in February when the New York Philharmonic gave a performance that was broadcast throughout the country.

Conductor Loren Maazel of the New York Philharmonic rehearses with North Korea’s State Symphony Orchestra on February 27, one day after he conducted the Philharmonic in North Korea’s first concert by a major American orchestra.

Kyodo/AP

Life for the average North Korean remained difficult. The UN Food and Agriculture Organization estimated that a third of the North Korean population would experience hunger in 2009 unless there was a new wave of humanitarian assistance. Heartbreaking stories appeared in the media on the horrific conditions inside North Korea's gulags. Defections to China and South Korea continued. (PETER M. BECK)

KOREA, REPUBLIC OF

Area: 99,678 sq km (38,486 sq mi)

Population (2008 est.): 50,187,000

Capital: Seoul

Head of state and government: Presidents Roh Moo-hyun and, from February 25, Lee Myung-bak, assisted by Prime Ministers Han Duck-soo and, from February 29, Han Seung-soo

South Korea, a country heavily dependent on foreign trade and investment, was hit hard by the global economic downturn in 2008. (See Special Report on page 170.) To make matters worse, paralyzing demonstrations during the spring gave way to political deadlock in the fall. The only bright spot for the country was its better-than-expected showing at the Olympic Games in Beijing. (See Special Report on page 194.)

Despite having strengthened its economy in the wake of the 1997 Asian financial crisis, South Korea still found itself in the vortex of the 2008 global financial storm. Once again, foreign investors panicked and headed for the exits. The stock market plummeted nearly 40% for the year, while at one point the local currency lost half of its value against the U.S. dollar. Korea also experienced a trade deficit for the first time since 1997. Amazingly, the unemployment rate remained low (3.3% in November), and economic growth was positive for the year, but Pres. Lee Myung-bak warned that the economy could shrink in 2009.

Fortunately, the crisis did lead to something that two successive nuclear standoffs with North Korea had failed to accomplish, the first-ever summit between South Korea, China, and Japan, which took place on December

Ahn Young-joon/AP

South Korean police on June 28 use water hoses and a barricade of lined-up buses in an attempt to break up a protest rally against the importation of American beef, which many believe to be unsafe to eat.

13. China and Japan agreed to provide South Korea with a badly needed foreign-currency swap, and the three countries agreed to make their gathering an annual occurrence.

President Lee took office in February but within weeks faced his first political crisis as demonstrators protested his sudden decision to reopen the Korean market to American beef, prompting concerns about the potential importation of beef infected with bovine spongiform encephalopathy, or "mad cow" disease. The public's health concerns proved to be unfounded, and the popularity of U.S. beef bounced back, but the political damage had been done: President Lee's approval rating remained low for the rest of the year. Although Lee's Grand National Party won nearly two-thirds of the seats in National Assembly elections held in April, the party failed to pass any major legislation during the fall session, and the year closed out with a series of partisan brawls in the Assembly.

Relations with North Korea deteriorated dramatically in 2008 in the wake of the election of a more conservative president in Seoul (see NORTH KOREA), but ties with the United States experienced an upswing. In March Lee was invited by U.S. Pres. George W. Bush to stay at Camp David, and he became the first South Korean president to do so. The withdrawal of Korean troops from Iraq appeared to cause little friction. At the height of the Iraq war, South Korea had been second only to the United Kingdom in terms of the number of non-U.S. troops serving in Iraq.

In the culture and sports realms, there was a mix of tragedy and triumph for South Korea. One of the country's most beloved actresses, Choi Jin-sil, committed suicide at the age of 39 in October. The award-winning star of nearly 40 movies and television dramas, Choi had gone through a bitter public divorce and had battled depression for several years. Choi's death was a painful reminder that South Korea had one of the highest suicide rates in the world. Earlier in the year, an arsonist destroyed a top national treasure, the 600-year-old Great South Gate (Namdaemun). Authorities vowed to rebuild it. On a brighter note, at the Olympics South Korea won a record number of gold medals (13) and placed seventh overall in the medal count, exceeding all expectations.

KOSOVO

Area: 10,908 sq km (4,212 sq mi)

Population (2008 est.): 2,143,000

Capital: Pristina

Chief of state: President Fatmir Sejdiu

Head of government: Prime Minister Hashim Thaci

On Feb. 17, 2008, Kosovo formally declared its independence from Serbia.

Encyclopædia Britannica, Inc.

Just a month earlier (on January 9), Hashim Thaci (*see* BIOGRAPHIES) had been elected prime minister by a majority vote in the parliament. The United Nations Mission in Kosovo reported that there was progress in the development of viable government institutions and that Kosovo was consistent in reaching international standards with regard to human and minority rights. Though major violence was avoided, divisions between the majority Albanians and minority Serbs widened. Despite opposition by Kosovo's leaders, Serbs advocated the partition of the country. Most of the tension centred on the ethnically divided northern town of Mitrovica, where Serbia's influence on Kosovo's Serbs remained significant. In May Serbia organized elections in Kosovo that established parallel municipal authorities in Serb areas.

The country's constitution also ensured the rights and freedoms of minorities, including the Serbs, living in Kosovo. A report by the EU noted, however, that legislation adopted to deal with cultural and minority rights required more "effective monitoring" and that the rights of women and children were only "partially guaranteed." A report by the Organization for Security and Co-operation in Europe stated that about one-third of the roughly 40,000 Roma (Gypsies), Ashkali, and

This map illustrates the ethnic distribution in newly independent Kosovo.

Egyptians residing in Kosovo were prevented from voting and that they were widely underrepresented in Kosovo's government.

Organized crime, drug trafficking, and a thriving black market continued to be chief concerns amid an unemployment rate of more than 40%. For those under age 25, who accounted for about 50% of the population, unemployment was approximately 60%. Kosovo's per capita income remained

among the lowest in Europe; the average monthly wage stood at about €185–€210 (€1 = about \$1.40). In July an international donors conference pledged €1.2 billion in aid to help rebuild Kosovo's economy.

By year's end, 53 countries (including all of the neighbouring states except Serbia) recognized Kosovo's independence. In October the UN agreed to ask the International Court of Justice (ICJ) for a nonbinding advisory opinion on the legality of Kosovo's declaration of independence from Serbia. The ICJ was expected to respond by mid-2009.

(MILAN ANDREJEVICH)

KUWAIT

Area: 17,818 sq km (6,880 sq mi)

Population (2008 est.): 3,530,000

Capital: Kuwait

Head of state and government: Emir Sheikh Sabah al-Ahmad al-Jabir al-Sabah, assisted by Prime Minister Sheikh Nassar Muhammad al-Ahmad al-Sabah

Relations between the Kuwaiti government and the parliament continued to deteriorate in 2008, with the latter insisting on more government accountability. This tension led to the dissolution of the parliament by Emir Sheikh Sabah al-Ahmad al-Jabir al-Sabah and a new general election, held on May 17. The opposition, composed of Islamists, liberals, and nationalists—scored a resounding victory, winning 33 of 50 seats. Women failed to gain representation, which indicated that Kuwait was still a conservative Islamic society.

The elections, however, failed to quell concerns in the National Assembly about the way in which the government was handling the development of the economy and presumed irregularities in the construction and financing of a gigantic new oil refinery. More important, some deputies insisted on calling Prime Minister Sheikh Nassar Muhammad al-Ahmad al-Sabah before the parliament for questioning.

Declining economic conditions in Kuwait for foreign workers, who made up two-thirds of the population, led in July to a strike by hundreds of them. Disturbances continued for three days, resulting in clashes with the security

Kosovars of Albanian ethnicity wear traditional costumes as they wave U.S. and Albanian flags to celebrate Kosovo's formal declaration of independence from Serbia on February 17.

Bela Szandelszky/AP

force and the deportation of hundreds of workers (mainly Bengalis). In an attempt to address the problem, the government announced plans to raise the workers' minimum wage, revise work contracts, and improve living conditions. Kuwaiti nationals also protested the rise in food and commodity prices. In response, the government twice increased the salaries of Kuwaitis working in the public sector by 170 Kuwaiti dinars (about \$643). In other news, on May 13 Sheikh Saad al-Abdullah al-Salim al-Sabah, ruler of Kuwait for a short period (Jan. 15–29, 2006), passed away. (See OBITUARIES.)

Relations between Kuwait and Iraq saw a noticeable improvement during the year. On July 18 Kuwait announced the appointment of an ambassador in Baghdad, the first since Iraq's 1991 invasion of Kuwait. Kuwait had not yet forgiven Iraqi debts estimated at \$16 billion–\$17 billion, and at the popular level, bitterness between the Kuwaiti and Iraqi people continued to exist.

(LOUAY BAHRY)

KYRGYZSTAN

Area: 199,900 sq km (77,182 sq mi)

Population (2008 est.): 5,281,000

Capital: Bishkek

Head of state: President Kurmanbek Bakiyev

Head of government (appointed by the president): Prime Minister Igor Chudinov

Despite large amounts of international assistance to the development of its economy, Kyrgyzstan continued in 2008 to flounder both politically and economically. According to the country's National Statistical Committee, by September more than \$1 billion had been poured into Kyrgyzstan in the form of foreign investment and grants. Increasing numbers of Kyrgyzstani citizens were searching for work abroad, and in February the National Migration Agency reported that 250,000 Kyrgyz were employed in Russia—a figure that did not include the number working in Kazakhstan and other neighbouring countries. The World Bank noted that remittances from labour migrants made up 37% of Kyrgyzstan's GDP.

Popular dissatisfaction with life in Kyrgyzstan was exacerbated by the per-

ception that the “Tulip Revolution” of 2005 had led to worse conditions rather than to an improvement in any area of life. Despite government commitments to fighting corruption, little was achieved in practice, and Pres. Kurmanbek Bakiyev continued to appoint his relatives to prominent posts. In January, Miroslav Niyazov, former head of the National Security Council, warned that the security situation in the country was deteriorating because the opposition had no legal means of political struggle, there was a growing distrust of the authorities in the population at large, steep rises in the price of basic commodities were worsening social vulnerability, and religious extremism was increasing.

Throughout the year the fragmented political opposition appeared to agree on one issue—the need to remove President Bakiyev. In June, Bakiyev signed legislation that mandated that the broadcast media (which had asked him to veto the bill on the grounds that it violated the country's democratic policies) produce at least 60% of the programming in Kyrgyzstan. Opponents warned that the legislation flouted the rights of viewers to choose what they wanted to watch or hear.

In January and February, Kyrgyzstan, along with the rest of Central Asia, experienced the coldest winter in decades. While the consequences were not as severe as in neighbouring Tajikistan, fears for the 2008–09 winter mounted, especially as an unusually dry summer reduced the amount of water that could be stored for winter power generation. Inhabitants of Kyrgyzstan were warned to expect major power shortages that might result in the closure of the country's hospitals. In September, in an effort to save resources for winter, Minister of Energy Saparbek Balkibekov proposed a cutback in the supply of electricity to 14 hours daily. (BESS BROWN)

LAOS

Area: 236,800 sq km (91,429 sq mi)

Population (2008 est.): 5,963,000

Capital: Vientiane

Chief of state: President Choummaly Sayasone

Head of government: Prime Minister Bouasone Bouphavanh

Laos, which spent much of 2008 preparing to host the 2009 Southeast Asian Games, saw the event as heralding the country's further integration into the group of Southeast Asian countries. The regime's desire for regional recognition, however, bore a cost that the country could not manage alone. Thus, in exchange for a 50-year concession of 1,640 ha (4,052 ac) of wetland in the north of the capital, a Chinese-led joint venture agreed to build a sports complex on the outskirts of Vientiane in preparation for the Games. This agreement between the government and Chinese investors was received very poorly by the population living in the capital; residents of the affected area, as well as some Lao officials, expressed their concerns over the Chinese plans to construct a residential, commercial, and industrial complex that would be located in close proximity to That Luang, the Buddhist monument that was the country's national symbol. Faced with public discontent—relayed and amplified by foreign nongovernmental organizations and media—Deputy Prime Minister Somsavat Lengsavad gave a rare news conference in February in an attempt to clarify the terms of the agreement. Although work had yet to begin on That Luang marsh, the size of the area also became unclear (some unofficial reports indicated that the area had been reduced to 200–1,000 ha (about 494–2,471 ac).

Land concessions had emerged as a serious and complex issue over the past few years in Laos. Though such concessions officially involved long-term leases of state land to investors, they often covered village lands, owing to poorly defined and enforced regulations governing land rights. The most controversial aspect of land concessions concerned the lease of vast areas of cultivable land to foreign investors (mainly from Vietnam, Thailand, and China) for the commercial production of crops (notably rubber and cassava). Violent protests in early 2007 involving villagers in Salavan and Champasak provinces, whose lands and crops had been encroached upon by a commercial tree plantation, resulted in the government's proclaiming (May 9, 2007) an indefinite moratorium on large land concessions for industrial trees, perennial plants, and mining. This unprecedented decision might help to slow down the development of large-scale commercial agricultural schemes and to lessen their impacts on farmers'

livelihoods; it was unlikely, however, that the government would cease to pursue its strategy of attracting foreign investment by facilitating access to the country's "unexploited" natural resources. (VATTHANA PHOLSENA)

LATVIA

Area: 64,589 sq km (24,938 sq mi)
Population (2008 est.): 2,266,000
Capital: Riga
Chief of state: President Valdis Zatlers
Head of government: Prime Minister Ivars Godmanis

Domestically 2008 was a year of discontent in Latvia, as evidenced by demonstrations, referenda, and strikes, especially in the autumn. Dissatisfied with the performance of the parliament, the public demanded that the constitution be amended to facilitate the holding of early elections.

In 2008 Latvia's economy, which had enjoyed a GDP growth of 10.3% in 2007, was indirectly affected by the international financial crises and contracted to a trickle. Though the gov-

ernment of Prime Minister Ivars Godmanis could not curb inflation of 16.5% (compared with 6.5% in 2006 and 10.1% in 2007), prevent the 30–40% rise in the cost of natural gas and electricity, and keep earlier promises to raise pensions and the salaries of medical personnel and the police, it remained in power. By November the economy had contracted so severely that the parliament approved the much-criticized budget for 2009 that had been proposed by Godmanis and asked the IMF for financial assistance. A broader perspective on the country's current concerns was provided by the numerous festivities marking the 90th anniversary of Latvia's proclamation of independence.

In the realm of foreign affairs, Latvia deplored Russia's invasion of Georgia; Riga increased its assistance to that country and supported the EU's peace-fostering efforts there. The invasion of Georgia also raised security concerns in the Baltic states. Undeterred by Moscow's criticism of Latvia's stand on Georgia and Russia's delays in arranging the visit of Pres. Valdis Zatlers to Moscow, Riga focused on forging specific bilateral agreements with Russia. Latvia remained concerned about Russia's power politics abroad, not only militarily but also economically, as shown by Moscow's use of energy resources to obtain concessions abroad.

In December Latvians protest against the increase in the country's standard value added tax (VAT) from 18% to 21%. The new rate was to go into effect on Jan. 1, 2009.

Ilmars Znotins—AFP/Getty Images

These factors influenced Latvia to opt for the construction of a new electrical power plant that would use coal and biomass, rather than gas, which would have to be imported from Russia. Energy and trade were also the principal topics on the agenda when President Zatlers made official visits in October to Kazakhstan, Uzbekistan, and Turkmenistan. Latvians welcomed the news on October 17 that they would enjoy visa-free travel to the U.S.

(DZINTRA BUNGS)

LEBANON

Area: 10,400 sq km (4,016 sq mi)
Population (2008 est.): 4,142,000 (including registered Palestinian refugees estimated to number about 400,000)
Capital: Beirut
Chief of state: Presidents Fouad Siniora (acting) and, from May 25, Michel Suleiman
Head of government: Prime Minister Fouad Siniora

On May 25, 2008, following an 18-month political standoff between various Lebanese factions and a brush with civil war between the Sunnis and the Shi'ites two weeks earlier, a new president was elected. in Lebanon. Gen. Michel Suleiman, who was considered a consensus candidate, won 118 of the 128 parliamentary votes. The election of a new president was made possible by the Qatari-brokered Doha accord, which entailed important concessions on the part of the pro-Saudi, pro-Western Sunni-dominated government whereby the majority consented to turn a blind eye toward Hezbollah arms stockpiles and agreed to give veto power to the opposition. They also gave the Christian opposition, through a reenactment of the 1960 electoral law, the political strength to elect their own representatives without the need to enlist the votes of the Muslims. Ironically, the Christian opposition (led by Gen. Michel Aoun) cemented its alliance with the Hezbollah-Iran-Syria axis, while the Christian loyalists continued to be part of the March 14 movement, which comprised political organizations—including the Future Movement (led by Sunni leader Saad al-Hariri)—

Hussein Malla/AP

Gen. Michel Suleiman was sworn in as president of Lebanon on May 25.

opposed to a Syrian presence in Lebanon and which had good relations with Saudi Arabia and the U.S.

After the cabinet tried in March to assert its authority in security affairs, Hezbollah launched a militia-type attack in Beirut on the Future Movement offices and strongholds. The clashes ended with Hezbollah having the upper hand and the army standing idle. This was reflected later in the political arena when Hezbollah secured veto power in the cabinet and effectively controlled all major decisions. In August, Israel threatened to target "the entire Lebanese state, including Lebanese cities" in another war if greater legitimacy was given to Hezbollah. Nevertheless, a month earlier Israel and Hezbollah had participated in a prisoner-of-war exchange.

The security situation remained unstable, especially in the north of the country. Though Syria hinted at a possible military intervention in that area, major powers, including the U.S. and France, warned against any such move. A visit in August by President Suleiman to Damascus resulted in an agreement to establish diplomatic relations between the two countries. All other outstanding issues (i.e., political, economic, border demarcations, and humanitarian relations) were referred to joint committees. Syria was expected to regain part of its influence in

Lebanon owing to the West's recognition of its regional role. Suleiman also visited the UN and Washington, D.C., but he was disappointed that Washington did not give a definite promise to rearm the Lebanese army with technologically advanced weapons, which would keep Hezbollah in a more powerful position than the army.

The political bickering took a heavy toll on the Lebanese economy. The gross national debt reached \$43.2 billion after the first quarter of the year. The economy also relied more heavily on remittances from Lebanese working in the Arab Gulf states, Africa, or the U.S. The balance of trade was negatively affected because of the international rise in the prices of imported food and oil. In addition, the gap in electricity production and subsidies to this economically and politically important sector drained \$2 billion annually from the Lebanese budget. On the positive side, the summer season proved very good for the economy. About 1.6 million visitors arrived in Lebanon; hotel occupancy rates neared 100%; and tourism was expected to generate \$4.43 billion in direct and indirect revenue. There was a 26% rise in construction activity, but inflation pushed the government to increase the minimum wage by two-thirds. Lebanon, however, was one of the few countries that was not negatively affected by the worldwide financial crisis that occurred in October 2008.

(MAHMOUD HADDAD)

LESOTHO

Area: 30,355 sq km (11,720 sq mi)

Population (2008 est.): 2,020,000

Capital: Maseru

Chief of state: King Letsie III

Head of government: Prime Minister Bethuel Pakalitha Mosisili

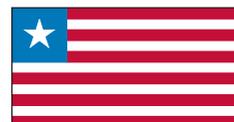

In the Lesotho drought of 2007, one of the worst on record, some 400,000 people needed food aid, and when by September 2008 there was again no sign of rain, another humanitarian crisis was feared. More than 70% of Lesotho's food was imported, and the steep rise in food and fuel costs put food out of the reach of many. In the period March

2007–mid-2008, the price of the national staple, corn (maize), increased by more than 50%, and cooking oil climbed by more than 100%. The World Food Programme provided free meals to more than 80,000 children at primary school, especially in the rural, mostly mountainous, interior; but a survey carried out by the government and UNICEF in December 2007 found that half the children in the Thaba-Tseka district were chronically malnourished. Most Basotho depended on family members working in towns or in South Africa to send money for their support.

While Lesotho citizens were not particularly targeted in the outbreak of xenophobic violence in South Africa in early 2008, the outbreak aroused much concern in Lesotho. The country's HIV prevalence rate of 23.2% remained one of the world's highest; life expectancy fell to only 35 years; and more than 100,000 children had been orphaned by AIDS. The World Bank forecast a reduction in Lesotho's GDP by almost one-third by 2015 as a result of HIV/AIDS. On a brighter note, it was announced in September 2008 that one of the largest diamonds ever found had been discovered at the Letseng mine. In addition, after years of delay the feasibility study on the second phase of the giant Lesotho Highlands Water Project was finally completed.

(CHRISTOPHER SAUNDERS)

LIBERIA

Area: 97,754 sq km (37,743 sq mi)

Population (2008 est.): 3,543,000

Capital: Monrovia

Head of state and government: President Ellen Johnson-Sirleaf

Liberia's socioeconomic development achieved limited progress in 2008. The country ranked among the least developed in the world; almost 80% of the population lived below the national poverty line; unemployment stood at 80%; life expectancy was only 42 years; and electricity and potable water were in short supply. Widespread poverty and endemic corruption, coupled with political instability in neighbouring Guinea and Côte d'Ivoire, threatened national security. Consequently, the

mandate of the UN Mission in Liberia (UNMIL) was extended to September 2009, retaining a force of about 13,000 peacekeepers in the country.

On February 21, U.S. Pres. George W. Bush ended his five-country, six-day tour of Africa in Liberia; he was the third U.S. president to visit. Although government officials warmly welcomed him, many Liberians harboured deep resentment that the United States had ignored their plight during the 1989–2003 civil war. They also called for “more trade, less aid.” Disregarding widespread suspicion at home and on the continent about U.S. expansion in Africa, the Liberian government expressed its willingness to host the headquarters of the new and controversial U.S. Africa Command (AFRICOM).

In January 2008 the Truth and Reconciliation Commission, established to investigate war crimes committed during the civil war, began proceedings. Modeled on South Africa’s postapartheid body, the seven-member commission heard testimony from people around the country, including gruesome accounts of shattered lives, child-soldier recruitment, severed limbs, and rape. Former rebel commander Milton Blahyi (also known as General Butt-Naked) testified about taking part in human sacrifices. Meanwhile, international attention turned to two important war crimes trials: the first was that of former president Gen. Charles Taylor in The Hague, and the second was that of his son Charles (Chuckie) Taylor, Jr., in the United States, which in October resulted in a conviction on charges of torture and related war crimes; sentencing was set for January 2009.

LIBYA

Area: 1,759,540 sq km (679,362 sq mi)
Population (2008 est.): 5,871,000
Capital: Tripoli (policy-making body intermittently meets in Surt)
Chief of state: (de facto) Col. Muammar al-Qaddafi; (nominal) Secretaries of the General People’s Congress Zentani Muhammad al-Zentani and, from March 3, Muftah Muhammad Kaiba
Head of government: Secretary of the General People’s Committee (Prime Minister) Al-Baghdadi Ali al-Mahmudi

Mahmud Turkia—AFP/Getty Images

Libyan leader Col. Muammar al-Qaddafi (right) poses with Italian Prime Minister Silvio Berlusconi during the latter’s official visit to Libya in August.

Five years of fence mending between Libya and Western countries culminated in a visit to Tripoli in September 2008 by U.S. Secretary of State Condoleezza Rice—the first direct contact by a high-ranking U.S. official since 1957, when Vice Pres. Richard M. Nixon visited the country. Rice’s trip marked a major thaw in relations between the two countries and paved the way for trade and investment by American corporations, particularly in the energy sector, and negotiations for U.S. arms deals. Although in late October Libya completed the compensation payments to the families of the victims of the December 1988 Pan Am disaster over Lockerbie, Scot., the moneys due to the families of the victims of the 1986 Berlin disco bombing, for which Libya took responsibility, were yet to be paid. The U.S. Congress blocked the establishment of formal diplomatic relations and the exchange of ambassadors until this had been settled. Libya’s record of human rights and persecution of dissidents also remained contentious.

During his August visit to Libya, Italian Prime Minister Silvio Berlusconi offered a formal apology for Italy’s years of colonial rule as well as \$5 billion in compensation for having occu-

pied (1911–43) the country. In return for this, Italy was expected to receive favourable concessions in the energy sector and cooperation by Libyan authorities in combating illegal boat immigrants who sailed from Libyan territorial waters.

Despite differences with Egypt over French Pres. Nicolas Sarkozy’s proposed Union for the Mediterranean, Libya maintained warm relations with Cairo. Libyan leader Col. Muammar al-Qaddafi opposed the proposal because it conflicted with both Arab and African unity, but Egypt agreed to chair the southern Mediterranean coalition of the partnership. During talks in July and September with Pres. Hosni Mubarak, Qaddafi discussed bilateral, Arab, and African relations. An announcement revealed that Libya was to pump \$10 billion into Egyptian industrial, commercial, and agricultural projects. In a goodwill gesture, Libya released 128 Egyptians who had been serving jail sentences for various criminal offenses. (AYMAN M. EL-AMIR)

LIECHTENSTEIN

Area: 160 sq km (62 sq mi)
Population (2008 est.): 35,500
Capital: Vaduz
Chief of state: Prince Hans Adam II
Head of government: Otmar Hasler

Even prior to the global banking crisis in 2008, Liechtenstein found itself in trouble with its own banking practices. In February German prosecutors investigating the giant Swiss bank UBS AG uncovered ties with LGT Group, the bank owned by the Liechtenstein royal family. The probe began when a former bank clerk at LGT, Heinrich Kieber, offered Germany’s Federal Intelligence Service a CD-ROM with data on German clients who held secret accounts at the Liechtenstein bank as part of a cross-border tax-evasion scheme. Money smuggled out of Germany was used to set up Liechtenstein-based foundations, which were taxed very lightly and were allowed to disburse money to founders and their family members. The foundations could then open bank accounts outside Liechtenstein, where

owners could gain access to the monies without paying German taxes. Liechtenstein's banking-secrecy laws prevented tracing the owners of the foundations.

Although Liechtenstein charged that Kieber had stolen the data while he was an LGT employee, German Finance Minister Peer Steinbrück paid some €5 million (about \$7.3 million) for the disk. The scandal spread as Kieber was said to have sold three CDs containing names and account data to tax authorities in 12 countries, including the U.K., France, Italy, and the U.S. In July the U.S. Senate's Permanent Subcommittee on Investigations opened hearings on the probe of U.S. citizens holding these secret accounts. Liechtenstein claimed a violation of its sovereignty and argued that it was moving toward greater cooperation with investigators.

(ANNE ROBY)

LITHUANIA

Area: 65,300 sq km (25,212 sq mi)

Population (2008 est.): 3,358,000

Capital: Vilnius

Chief of state: President Valdas Adamkus

Head of government: Prime Minister

Gediminas Kirckilas and, from December 9, Andrius Kubilius

Lithuania encouraged international support for Georgia following the Aug. 8, 2008, incursion into that country by Russian troops. On August 13, Lithuanian Pres. Valdas Adamkus traveled to Tbilisi—together with Estonian Pres. Toomas Hendrik Ilves, Latvian Prime Minister Ivars Godmanis, and Polish Pres. Lech Kaczynski—to support Georgia's democratically elected president. In their joint declaration, the leaders unconditionally supported Georgia's territorial integrity, demanded the withdrawal of the Russian troops, and suggested that the NATO Membership Action Plan be offered to Georgia.

After Russia declared that the Baltic states would pay for their support of Georgia, Lithuanian Foreign Minister Petras Vaitiekunas emphasized the seriousness of the threat. On September 29, President Adamkus met in Washington, D.C., with U.S. Pres. George W. Bush, who reiterated the U.S. commit-

ment to invoke Article V of NATO's charter, proclaiming that the assaults against one member constituted an attack on all member states. In October, Adm. Michael G. Mullen, the U.S. chairman of the Joint Chiefs of Staff, reassured the Baltic countries that they could rely on NATO in the advent of a Russian attack.

The October 12 general election was followed by a runoff on October 26. In the parliamentary balloting, the opposition Homeland Union (TS) took 45 seats, followed by the Lithuanian Social Democratic Party (25); the National Revival Party (16), founded in 2007 by television quiz-show host Arunas Valinskas; the For Order and Justice Party (15); the Liberal Movement (11); the coalition of the Labour Party and Youth (10); the Liberal and Centre Union (8); the Union of Peasants and People (3); Lithuanian Poles' Electoral Action (3); New Union (1); and 4 independent candidates. The TS, led by former prime minister Andrius Kubilius, agreed to form a centre-right coalition with both Liberal parties and the National Revival Party.

Despite the slowdown in the global economy, GDP growth in Lithuania was 3.1% in the third quarter compared with the same period of the previous year. On Jan. 1, 2008, foreign direct investment reached nearly \$15 billion, and it was up to nearly \$16 billion on July 1. (DARIUS FURMONAVIČIUS)

LUXEMBOURG

Area: 2,586 sq km (999 sq mi)

Population (2008 est.): 488,000

Capital: Luxembourg

Chief of state: Grand Duke Henri

Head of government: Prime Minister Jean-Claude Juncker

Luxembourg's diversified economy continued to provide an extraordinarily high standard of living in 2008, with a GDP per capita ranked second in the world, after Qatar. Although the meltdown in the world's financial markets was expected to slow the rate of growth of Luxembourg's economy during the year, its growth was still projected to continue above the European average.

With most of the country's banks for-

eign owned, Luxembourg was spared the brunt of the global crisis in banking. Instead, the country was able to help prop up some failing institutions. On September 28 Belgium, Luxembourg, and The Netherlands pumped €11.2 billion (€1 = about \$1.40) into the Benelux banking group Fortis NV and agreed to nationalize 49% of the bank's operations within each respective country. Two days later Luxembourg joined with Belgium and France to inject almost €6.4 billion into the French-Belgian banking group Dexia, which had seen its U.S. bond insurer FSA suffer amid the collapsing U.S. mortgage market. After French Pres. Nicolas Sarkozy called for Luxembourg's support for a structural reform of global finances, Prime Minister Jean-Claude Juncker responded that Luxembourg "will not give up its banking secrecy tomorrow morning, but we will take part in any discussions on improving transparency on financial markets." (ANNE ROBY)

MACEDONIA

Area: 25,713 sq km (9,928 sq mi)

Population (2008 est.): 2,039,000

Capital: Skopje

Chief of state: President Branko Crvenkovski

Head of government: Prime Minister Nikola Gruevski

Macedonia's bid to join NATO was vetoed on April 2, 2008, by Greece during the alliance's summit meeting in Bucharest, Rom. Prior to the summit, a round of intense UN-mediated talks between Skopje and Athens over Macedonia's name had failed to produce any results. Though talks continued later in 2008, both sides stuck to their previous positions.

In March the Democratic Party of Albanians (DPA/PDSh) left the government to protest the refusal of the main ruling party, the Internal Macedonian Revolutionary Organization-Democratic Party for Macedonian National Unity (VMRO-DPMNE), to recognize Kosovo's independence and to demonstrate disagreement on interethnic issues; this left the government without a parliamentary majority. On April 12 the parliament voted to dissolve itself and called new elections.

Ognen Teofilovski—Reuters/Landov

Prime Minister Nikola Gruevski of Macedonia salutes his supporters at a parliamentary election rally in May.

In the June 1 elections, the VMRO-DPMNE of Prime Minister Nikola Gruevski allied with 18 small parties and emerged as the victor by capturing 47% of the vote and winning 63 of the 120 seats in the new parliament. The Sun Coalition for Europe, led by the Social Democratic Union of Macedonia (SDSM), received 23% of the vote and 27 seats. Among the ethnic-Albanian parties, the Democratic Union for Integration (DUI/BDI) won 12% and 18 seats, and the DPA/PDSH captured 8% and 11 seats. One seat went to the Party for a European Future (PEI). Election day was overshadowed by violence in ethnic-Albanian areas, which left one person dead. As a result of the violence and other irregularities, the polls were partially invalidated, and repeat elections were held on June 15 in 187 precincts. Another round of balloting was held on June 29 in 15 precincts where the June 1 and June 15 rounds were invalidated. On October 20, nine ethnic Albanians were sentenced to terms of between five and six and a half years in prison for their role in the violent incidents.

On July 4, Gruevski and DUI/BDI leader Ali Ahmeti reached an agreement that would also include the PEI. On July 11, Gruevski presented his new government to the parliament, which approved it without debate, owing to a temporary boycott by the SDSM and the PDSH.

On July 17, Pres. Branko Crvenkovski (of the SDSM) announced that he

would not seek another term in 2009, citing disagreement with the government on many policy issues. In September the SDSM held its eighth party congress, at which Radmila Sekerinska was replaced as party leader. Strumica Mayor Zoran Zaev was elected acting party chairperson until May 2009, when Crvenkovski's presidential term ended. Although Zaev was arrested in the summer of 2008 on charges of having misappropriated €8 million (about \$10.1 million) in public funds, Crvenkovski pardoned him.

On July 10 the International Criminal Tribunal for the Former Yugoslavia acquitted former interior minister Ljube Boskovski of having taken part in war crimes during the 2001 interethnic conflict. His co-defendant, former police officer Johan Tarculovski, was found guilty and sentenced to 12 years' imprisonment.

Macedonia's GDP was expected to grow about 5% in 2008. Inflation, however, was expected to rise to 7%, and unemployment was anticipated to remain high. In November the European Commission noted progress in some

areas in Macedonia, but did not give the green light for the start of EU accession talks.

On December 9, former prime minister Vlado Buckovski and former chief of staff Metodi Stamboliski were sentenced to three and a half years in prison for abuse of power and corruption. Nikola Kljusev, who was Macedonia's first postindependence prime minister (Jan. 27, 1991–Aug. 17, 1992), died on January 16 at the age of 80.

destroyed. The south of the island suffered severe drought, and the steep rise in food and fuel prices in 2008 brought further hardship to many. Rice was the country's main crop, and Madagascar had the potential to meet its needs, but more than 200,000 tons were imported—at relatively high prices. The World Bank aided the government to try to boost local production of rice above the current 3.5 million metric tons and to diversify agricultural production, especially by growing sorghum in the south. Madagascar was the world's main supplier of vanilla and accounted for roughly two-thirds of global production.

The government's poverty-reduction strategy, the Madagascar Action Plan, aimed to reduce the proportion of people living on less than \$2 a day to 50%. In 2008 it was estimated that 85% of the population of 20 million still fell into that category and that half of all children below the age of five suffered from chronic malnutrition.

(CHRISTOPHER SAUNDERS)

MALAWI

Area: 118,484 sq km (45,747 sq mi)

Population (2008 est.): 13,932,000

Capital: Lilongwe; judiciary meets in Blantyre

Head of state and government: President Bingu wa Mutharika

At the beginning of 2008, heavy rains and floods, which destroyed homes and crops in the 14 affected districts in Malawi, also aroused fears of food shortages. The government's assurances that there were adequate reserves from previous years failed to silence criticisms of the export in 2007 of 300,000 metric tons of corn (maize) to Zimbabwe. The food-shortage fears, however, eventually proved unfounded. The government's distribution of subsidized seed and fertilizers was so effective that it even became possible to export some of the surplus grain.

There was concern, nevertheless, over the harassment of several journalists by police in March and the arrest in May of four opposition officials accused of having plotted to overthrow Pres. Bingu wa Mutharika. The situation became sufficiently strained for the coun-

try's Roman Catholic bishops to issue a pastoral letter on May 11, calling upon all involved to create a peaceful atmosphere in order to ensure that the next elections would be free and fair.

The signing on May 12 of a memorandum of understanding with China was accompanied by a promise of generous Chinese aid; there were some misgivings, however, concerning Chinese business practices. Also offering assistance were the EU (in May) and the Commonwealth Business Council (in July). (KENNETH INGHAM)

MALAYSIA

Area: 329,876 sq km (127,366 sq mi)

Population (2008 est.): 27,027,000

Capital: Kuala Lumpur; administrative centre, Putrajaya

Chief of state: *Yang di-Pertuan Agong* (Paramount Ruler) Tuanku Mizan Zainal Abidin ibni al-Marhum Sultan Mahmud

Head of government: Prime Minister Datuk Seri Abdullah Ahmad Badawi

For the first time since Malaysia became independent in 1957, the governing National Front (BN) coalition faced the prospect of losing power in 2008. Voters' frustration with Prime Minister

Abdullah Badawi's failure to address ethnic tensions, corruption in the government and judiciary, and economic weaknesses led to unprecedented losses for the BN in general elections in March. The People's Alliance, an opposition coalition led by Anwar bin Ibrahim (see BIOGRAPHIES), a former deputy prime minister (1993–98), won control of 5 of Malaysia's 13 states and broke the BN's two-thirds majority in the parliament, an advantage that for 34 years had empowered the governing coalition to alter the country's constitution at will. In August, Anwar himself easily won election to the parliament. With support for Abdullah evaporating, Anwar recruited defectors among the BN's parliamentary bloc, and on September 18 he called for a no-confidence vote. Although Abdullah refused to reconvene the parliament, then in recess, he was forced to acknowledge growing opposition from within his own party, the United Malays National Organization (UMNO). On October 8 Abdullah announced that he would not defend the presidency of UMNO, the traditional stepping-stone to the prime ministry, in party elections in March 2009. In early November 2008, Deputy Prime Minister Najib Razak secured the party presidency by winning endorsements from a large majority of UMNO's 191 branches, which thus paved the way for his succession as prime minister.

The volatile political situation effectively immobilized a government enervated by scandal and corruption. A sen-

Malaysian opposition leader Anwar bin Ibrahim (right) chats with his wife, Wan Azizah Wan Ismail, at the People's Justice Party (PKR) conference on November 29. Wan Azizah led the PKR in the 2008 parliamentary elections and then relinquished her seat to her husband.

Zainal Abd Halim—Reuters/Landov

sational murder trial involving an aide to Razak was a continuing distraction. In late September the detention of a prominent political blogger under the country's controversial Internal Security Act was widely criticized as an attempt to stifle dissent. Previously, the government had shut down the popular opposition Web site Malaysia Today. In its January report, Human Rights Watch criticized the government's failure to investigate abuses allegedly committed by members of RELA, a large, poorly regulated paramilitary force employed by the government to help control illegal immigration.

Malaysia's economy continued its strong growth, with GDP growth of 6.7% during the first half of 2008. The country benefited from surging fuel prices, with the value of its palm-oil and crude-petroleum exports increasing by more than 50%. Overall, export values for the same period were up 17% from 2007, with electrical and electronic products leading the way. For the remainder of the year, however, economic reports were more sobering. Inflation, already on the rise, soared to 8.5% in July, the highest level in 27 years. Analysts attributed the spike to a 40% reduction in government fuel subsidies in June. In September palm-oil exports fell by almost 20%, prompting fears of a stock buildup. In early October, following the string of collapses in the U.S. on Wall Street, government officials expressed confidence that Malaysia would withstand the spreading financial crisis, but analysts warned that the impact on the country's crucial Asian export markets could have severe repercussions. change in Maldives, which on October 8 held multiparty elections for the first time in its history. Observers from the UN, the Commonwealth of Nations, and the EU monitored the balloting, in which voter turnout was registered at about 86%. A runoff poll was held on October 28, however, after none of the six candidates secured the required 50% of the vote to win. The two candidates who secured the highest percentage of the vote in the first round—incumbent Pres. Maumoon Abdul Gayoom of the Maldivian People's Party (41%) and Mohamed Nasheed of the Maldivian Democratic Party (25%)—contested the second poll. In that race Nasheed, supported by the opposition, emerged victorious with 54% of the vote; President Gayoom's defeat signified the end of his 30-year rule and heralded a new era in Maldivian politics. Nasheed was inaugurated on November 11. The constitution also fixed a maximum of two five-year terms for candidates seeking election to the presidency, strengthened the People's Majlis (parliament), and ensured the independence of the judiciary.

In December the administration of President Nasheed announced that it had initiated work toward the introduction of decentralized administration in the atolls and that it planned to establish a ferry network to connect all the country's islands. The government also intended to end import duties on essential foodstuffs and to provide a stipend to the elderly.

MALI

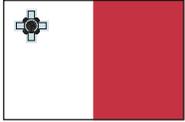

Area: 1,248,574 sq km (482,077 sq mi)
Population (2008 est.): 12,324,000
Capital: Bamako
Chief of state: President Amadou Toumani Touré
Head of government: Prime Minister Modibo Sidié

Efforts to resolve the ongoing Tuareg rebellion in the deserts of northern Mali met with mixed success in 2008. On March 7, Tuaregs led by Ibrahim Ag Bahanga released the last 22 hostages captured in August 2007. Two weeks later Tuaregs attacked a military convoy, taking at least 30 soldiers hostage and capturing eight vehicles. Libyan mediators intervened, and on April 4 a cease-fire was signed. The rebels agreed to release the hostages in return for a reduction in the number of Malian troops stationed in the area. On May 21 the truce was broken when rebels attacked an army post in Abeibara, just south of the Algerian border. Seventeen rebels and 10 soldiers were killed in the daylong fighting, with at least 30 others wounded. Each side accused the other of breaking the April 4 pact. Intense negotiations brokered by Libya resulted in the release on September 9 of 44 soldiers. The government freed all of its rebel prisoners in the hope that a lasting peace treaty would be reached. The conflict in the north led to a vast increase in the illegal-weapons trade.

In January a gunfight between customs officers and smugglers resulted in the seizure of 750 kg (1,650 lb) of cocaine. In June the High Islamic Council of Mali expressed strong opposition to a pending parliamentary bill abolishing the death penalty, stating that such a law was against Islamic principles.

Secondary-school teachers struck for seven months, refusing to grade any examinations. This left the prospect of a school year for which no credit would be awarded, although students continued to prepare to take the June baccalaureate. On July 10, as the Group of Eight meeting in Japan ended, the seventh annual People's Forum closed in Bamako, issuing a proclamation demanding the end of privatization in Mali and an end to government corruption. (NANCY ELLEN LAWLER)

MALTA

Area: 316 sq km (122 sq mi)

Population (2008 est.): 412,000

Capital: Valletta

Chief of state: President Eddie Fenech Adami

Head of government: Prime Minister
Lawrence Gonzi

In Malta's general election held in March 2008, the Nationalist Party remained in power after ruling for 10 consecutive years and most of the past 20 years. The victory margin between the two main parties was narrow, amounting to only 1,580 votes. On a voter turnout of 93% (versus 96% in 2003), the Nationalists polled 143,468 votes, while 141,888 ballots went to the Labour Party; this represented 49.34% and 48.79%, respectively, of the valid votes cast. The Nationalists secured only 31 seats, while the Labourites took 34 seats, but under Maltese electoral law the Nationalists (winners of the popular vote) were assigned an additional 4 seats to enable them to govern with a majority. Nationalist leader Lawrence Gonzi was again sworn in as prime minister on March 11.

Maltese Prime Minister Lawrence Gonzi appears with his wife, Kate, in Valletta on March 11 after being sworn into office for a second term.

Darrin Zammit Lupi—Reuters/Landov

Alfred Sant, the Labour leader, resigned his position as the party suffered its third consecutive electoral defeat under his leadership. On June 6 Joseph Muscat, a 34-year-old member of the European Parliament, was elected Sant's successor, with 66.36% of the valid votes cast. Muscat resigned from the European Parliament, and when a Labour member gave up his seat in the Maltese parliament, Muscat took that seat. He was sworn in as leader of the opposition on October 1.

On January 1, after three years of working to get the economy back on track, Malta joined the euro zone, replacing the Maltese lira, which had been in existence since Malta abandoned the British system in May 1972. Illegal immigration was on the increase throughout the year, as Frontex, the EU's border security agency, did not achieve the positive results anticipated.

(ALBERT GANADO)

MARSHALL ISLANDS

Area: 181 sq km (70 sq mi)

Population (2008 est.): 53,200

Capital: Majuro

Head of state and government: Presidents
Kessai Note and, from January 14, Litokwa
Tomeing

On Jan. 7, 2008, the parliament of the Marshall Islands elected Speaker Litokwa Tomeing, a traditional chief, to succeed Kessai Note as president. In November 2007 Tomeing had defected to the opposition party, Aelon Kein Ad (Our Islands), and the AKA defeated Note's United Democratic Party in parliamentary elections the following week.

In July President Tomeing announced a state of economic emergency. After GDP growth of 2% was reached in 2007, primarily from increases in transfers from the U.S., growth was projected to fall in 2008 to 1%. Debt as a percentage of GDP was expected to reach 75%, while debt servicing would account for some 40% of exports, and a number of loans were falling due for repayment. Revenues accounted for only 45% of total expenditure, and the government remained the largest employer, with public-sector wages ac-

counting for some 42% of government expenditure. Some observers blamed the availability of annual transfers made by the U.S. government under the amended Compact of Free Association 2004-23, which freed the Marshall Islands government from the necessity of making the kind of structural adjustments that had been forced on other small states. Meanwhile, \$8 million-\$10 million in tax remained uncollected, and there was little attempt to invest in the private sector. In two small signs of change, a tuna-loining plant reopened in early 2008, and the government was considering opening its National Telecommunication Authority to competition.

(CLUNY MACPHERSON)

MAURITANIA

Area: 1,030,700 sq km (398,000 sq mi)

Population (2008 est.): 3,204,000

Capital: Nouakchott

Chief of state: President Sidi Mohamed Ould Cheikh Abdallahi and, from August 6, Chairman of the High Council of State Mohamed Ould Abdel Aziz

Head of government: Prime Ministers Zeine Ould Zeidane, Yahya Ould Ahmed El Waghef from May 6 to August 6, and, from August 14, Moulaye Ould Mohamed Laghdaf

Mauritania's brief experiment with democracy ended on Aug. 6, 2008, when a military coup toppled Pres. Sidi Mohamed Ould Cheikh Abdallahi, the country's first democratically elected president since independence in 1960. The coup, led by Gen. Mohamed Ould Abdel Aziz, followed an unpopular cabinet reshuffle in May and a July no-confidence vote passed by the National Assembly, which President Abdallahi then threatened to dissolve. Demonstrators backing the coup clashed with supporters of the ousted government, but calm returned to the capital within a few days. New elections were promised, but no date was specified. Ignoring international condemnation of the coup, the freezing of aid from major donors, and suspension from the African Union, General Abdel Aziz formed a new government during August.

An Algeria-based group, al-Qaeda in the Islamic Maghreb (AQIM), claimed

responsibility for the deaths of four French tourists in the Mauritanian town of Aleg in December 2007. Five of AQIM's alleged members were arrested in Guinea-Bissau on Jan. 11, 2008. Subsequent security fears prompted the cancellation of the Dakar Rally. Twelve Mauritanian soldiers were ambushed in the north by AQIM on September 15; their bodies were found four days later.

The UN-organized repatriation of 24,000 Mauritanian refugees who had been living in Senegal for nearly 20 years began in January. By July some 4,000 had returned to Mauritania, but the program came to a virtual standstill as the refugees awaited the policy of the new government.

(NANCY ELLEN LAWLER)

MAURITIUS

Area: 2,040 sq km (788 sq mi)

Population (2008 est.): 1,269,000

Capital: Port Louis

Chief of state: President Sir Anerood Jugnauth

Head of government: Prime Minister Navin Ramgoolam

The ongoing court battle between the British government and exiles from Diego Garcia, who had lived for 40 years in Mauritius, continued through much of 2008. Following a series of government appeals to prevent island resettlement, British lawmakers in July argued that the islanders and their descendants should be allowed to return immediately. Some 2,000 residents of the Chagos Islands had been forced to leave the Indian Ocean archipelago, a British protectorate, when the British government brokered a deal with the United States to lease the largest island, Diego Garcia, as an air base. Diego Garcia was used more recently as a base for U.S. military forces engaged in the Afghanistan and Iraq wars. The British High Court in 2000 and the Court of Appeals in 2007 had ruled in favour of the Chagossians' right to return, but in October 2008 that ruling was overturned in the House of Lords.

In a bid to strengthen trade ties with China, the Mauritian government agreed to a \$730 million project, the country's largest foreign direct invest-

ment, to build a trade-development zone that would house several Chinese businesses. Mauritius's two main economic sectors, sugarcane and textiles, had suffered downturns since the lifting in 2005 of trade preferences, and officials hoped the deal would result in making the country a centre for regional economic development. (MARY EBELING)

MEXICO

Area: 1,964,375 sq km (758,450 sq mi)

Population (2008 est.): 106,683,000

Capital: Mexico City

Head of state and government: President Felipe Calderón Hinojosa

Although Mexican Pres. Felipe Calderón maintained favourable overall public-approval ratings, he encountered considerable difficulties in advancing his policy agenda during 2008. The most serious challenge confronting Mexico was an increasingly violent struggle against drug traffickers. Since assuming office in 2006, President Calderón had dispatched approximately 30,000 army troops and federal police to 10 different Mexican states in a high-visibility offensive against drug cartels. This initiative yielded significant results. During 2007–08 the government arrested several prominent traffickers (including Sandra Ávila Beltrán, known as the "queen of the Pacific" for her leadership of the Sinaloa cartel), and it maintained its policy of extraditing cartel leaders to the United States. Some sources judged that the rising retail price and the declining purity of cocaine sold in the U.S. reflected the effectiveness of Mexico's crackdown.

These advances, however, came at a very high price for Mexico. As shipping cocaine, methamphetamines, and other drugs into the U.S. became more difficult, traffickers began selling a higher proportion of their product in Mexico, where addiction levels rose steadily. Fragmented cartels waged war against each other for control over lucrative smuggling routes, and they increasingly turned their formidable firepower (derived from sophisticated armaments smuggled from the U.S.) against army and police personnel. In a particularly gruesome turn, they fre-

quently beheaded their victims as a macabre sign of their determination. The violence claimed victims ranging from rival cartel members to senior federal police commanders and law-enforcement personnel, innocent bystanders caught up in gunfights, and members of Mexican-style country music groups (*gruperos*), whose song lyrics often depicted the lifestyle of drug traffickers. Most disturbing, the overall incidence of drug-related violence (more than 5,600 deaths in 2008) was on the rise, with no clear indication that the Mexican government had yet gained the upper hand.

The Calderón administration's high-profile attempt to open the petroleum industry to private investment and to reform the state-owned Mexican Petroleum Co. (PEMEX) also encountered resistance. With Mexico's oil production and proven reserves steadily falling, and with oil export receipts accounting for nearly 40% of the federal government's total revenue, in April President Calderón introduced legislation that would give PEMEX greater budgetary autonomy, reform its management, permit private contractors to build and operate refineries and to distribute and store refined petroleum products, and allow PEMEX to offer performance incentives to private firms. Calderón was compelled to accept opposition legislators' demands for broad public debate of energy policy, however, because he needed multi-party congressional support for his initiative. During May and June the Senate held widely publicized hearings on the question, and in July the centre-left Party of the Democratic Revolution (PRD) sponsored a referendum in nine states and the Federal District. Although the legislation finally adopted by the Congress in October included key elements of Calderón's original plan, it barred so-called risk contracts offering incentives to private firms engaged in petroleum exploration and production. Moreover, the national debate over energy policy permitted Andrés Manuel López Obrador (the PRD's de facto leader and Calderón's main opponent in the bitterly disputed 2006 presidential election) to revive his political fortunes by leading the nationalist opposition to an expanded private-sector role in the energy sector.

Although the federal government's policy setbacks might pose problems for the ruling National Action Party (PAN) in the 2009 midterm congressional elections, the PAN's difficulties

were minor compared with those affecting the PRD. In March, Alejandro Encinas, a former governor of the Federal District and López Obrador's preferred candidate for party leader, appeared to have narrowly defeated Jesús Ortega of the more moderate New Left faction in the race for party president. Not for the first time in the PRD's 19-year history, however, the election was badly tarnished by ballot fraud and other irregularities. Months of wrangling ensued. In July interim party leaders finally agreed to annul the results and postpone the election until 2010. In November, though, the Electoral Tribunal of the Federal Judicial Branch ruled that in fact Ortega had won, opening the way for him to take charge.

In August the Supreme Court rejected appeals filed by the federal attorney general and the National Human Rights Commission against a 2007 Federal District law that decriminalized abortion during the first 12 weeks of pregnancy. In ruling that the Federal District government had not violated Congress's constitutional authority to legislate on health and penal matters, the court opened the way for Mexican state governments to reexamine abortion policy.

Mexico-U.S. relations during the year focused heavily on the challenges posed by illegal drug trafficking and undocumented migration. Following lengthy

bilateral negotiations, in October 2007 the United States announced that it would support Mexico's antinarcotics fight with a three-year technical assistance program (the Mérida Initiative), which would commit \$1.4 billion in equipment and training. The Mexican government nevertheless objected to U.S. congressional amendments that conditioned the aid on the Mexican military's human rights record, and it insisted that the U.S. government do more to control the flow of illegal firearms into Mexico. In June 2008 the U.S. Congress finally approved revised legislation that provided a \$400 million aid package to Mexico during the first year of the program.

The U.S. Congress failed to enact a comprehensive immigration reform, creating a policy vacuum that encouraged state and local governments in the United States to devise their own approaches to illegal immigration. The federal government did, however, proceed with the construction of physical barriers along major sections of the Mexico-U.S. border, an action that the Mexican government severely criticized as a major obstacle to improved bilateral understanding.

With the U.S. economy sliding into recession, Mexico's GDP grew by only an estimated 1.6% in inflation-adjusted terms during 2008. Remittances from Mexican workers residing in the United States declined. Pressures from rising

food, gasoline, and electricity prices in early 2008 pushed the annual rate of inflation up to 6.6%. The widening international financial crisis placed strong pressures on the peso-U.S. dollar exchange rate, and declining petroleum prices in late 2008 threatened to reduce future government revenues. The Calderón administration proceeded with important infrastructure projects in part to stimulate employment growth, but overall job creation in the formal sector of the economy faltered. (KEVIN J. MIDDLEBROOK)

MICRONESIA, FEDERATED STATES OF

Area: 701 sq km (271 sq mi)

Population (2008 est.): 110,000

Capital: Palikir, on Pohnpei

Head of state and government: President Emanuel Mori

The economy of the Federated States of Micronesia (FSM) continued to deteriorate in 2008 as the economy contracted by an estimated 3.5%. Meanwhile, external debt represented 25.1% of GDP, debt servicing consumed the equivalent of 6% of goods and services, GDP per capita declined (despite net emigration rates of about 2%), and budget deficits held at about 2.5% of GDP. (The fiscal situation was believed to be worse in Kosrae and Chuuk than in the other states.) The FSM remained highly dependent on U.S. government transfers, provided under the amended Compact of Free Association, which represented 65% of the FSM's revenue.

While these U.S. transfers were declining, they were being offset by payments by the U.S. to the FSM Trust Fund, which would eventually replace compact income, and by bilateral payments from China and Japan. The relative certainty of this other income freed the FSM government from pressure to initiate structural reforms, such as increased private-sector investment and greater fiscal discipline, which might produce higher economic growth rates. As a consequence, government expenditure accounted for some 40% of GDP, and the government provided 51% of the country's employment.

MOLDOVA

Area: 33,843 sq km (13,067 sq mi), including the 4,163-sq-km (1,607-sq-mi) area of the disputed territory of Transnistria (Transnistria; Pridnestrovie)

Population (2008 est.): 3,760,000 (excluding about 750,000 Moldovans working abroad but including the more than 500,000 persons in Transnistria)

Capital: Chisinau

Chief of state: President Vladimir Voronin

Head of government: Prime Ministers Vasile Tarlev and, from March 31, Zinaida Greceanii

Moldovan Pres. Vladimir Voronin met in January 2008 with his Russian counterpart, Vladimir Putin, and on August 25 with Putin's successor, Dmitry Medvedev. (See BIOGRAPHIES.) The future of the breakaway territory of Transnistria dominated the talks.

In a referendum held in 2006, 97% of Transnistrian residents had expressed a desire to join the Russian Federation, but the Russian preference was for a reunified Moldova in which the breakaway region would enjoy substantial autonomy and be able to influence the central government. Until 2007 President Voronin was willing to count on the mediation efforts of the EU and the United States as long as Russia propped up Transnistria and stationed troops there, but Western engagement failed to produce any breakthrough. Even before the Russian seizure of territory in Georgia in August, Voronin appeared to be moving away from the West and toward a reliance on Russia to broker a settlement, even if such a pact weakened Moldovan sovereignty. On April 11, for the first time since 2001, Voronin met with Igor Smirnov (the leader of the Transnistria regime), with whom he agreed to launch confidence-building measures designed to lead to reunification. This was seen as a success for Russian diplomacy, and following the meeting with President Medvedev, a new negotiating process began to take shape in which Russian priorities were clearly visible. Russia hoped that strong Transnistria representation in Moldovan institutions would prevent the country from harmonizing its laws and policies with those of the EU and pull it back into a firm Eastern orbit.

The West had been unable to offer any alternative negotiating package, and it was thought that Voronin, who could not stand for reelection in 2009, might wish to secure a place in history as the architect of reunification even if it was on terms that would boost Russian influence over the whole of Moldova. Many in the ruling Party of Communists of the Republic of Moldova, which enjoyed substantial control over the media and business life, saw a pro-Russian strategy as guaranteeing their hold on power.

(TOM GALLAGHER)

MONACO

Area: 2.02 sq km (0.78 sq mi)

Population (2008 est.): 34,300

Chief of state: Prince Albert II

Head of government: Minister of State Jean-Paul Proust

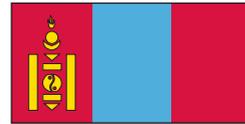

The parliamentary elections held in Monaco on Feb. 3, 2008, had a high voter turnout of 77%. The Union for Monaco (UPM), with 52.2% of the vote, won 21 of the National Council's 24 seats, and the Rally and Issues for Monaco (REM) party took the remaining 3 seats, despite having taken 40.5% of the balloting. A third party, Monaco Together, with only 7.3% of the vote, picked up no seats.

The principality was abuzz with hopes of a possible royal wedding between Prince Albert II and Charlene Wittstock, a former South African swimming champion. The couple's romance first came to notice at the 2006 Turin Winter Olympics. Since then, although there had been no publicly announced engagement, Wittstock had appeared at many official functions with Albert and with his sister Princess Caroline. A government source said of the prince, who turned 50 in March, "Albert has never settled down in the past, but knows that the time is now right to produce the next ruler of Monaco."

Monaco's plan to reclaim more land from the sea continued to move forward during the year. The current land-reclamation project would increase Monaco's area by approximately 10 ha (about 25 ac).

(ANNE ROBY)

MONGOLIA

Area: 1,564,116 sq km (603,909 sq mi)

Population (2008 est.): 2,652,000

Capital: Ulaanbaatar

Chief of state: President Nambaryn Enkhbayar

Head of government: Prime Minister Sanjaagiin Bayar

The Mongolian political scene in 2008 was dominated by the June 29 elections to the Mongolian Great Khural (Hural; national assembly) and the subsequent riot over the results. A total of 311 party candidates and 45 independents registered in 26 constituencies to contest the 76 seats. The Mongolian People's Revolutionary Party (MPRP) and the Democratic Party (DP) each fielded 76 candidates, and 36 stood for the Citizens' Alliance (CA), which was formed by the new Citizens' Movement Party in alliance with the Mongolian Green Party and the Mongolian Social Democratic Party.

On the basis of preliminary results, MPRP Chairman Sanjaagiin Bayar thanked the Mongolian people on June 30 for reelecting the MPRP, but DP Chairman Tsakhiagiyn Elbegdorj demanded a recount. On July 1 crowds gathered in central Ulaanbaatar, and young rioters stoned and set fire to the headquarters of the MPRP. Five people were killed, four by gunshot wounds. Pres. Nambaryn Enkhbayar then declared a state of emergency; armoured cars patrolled the central streets, a night curfew was enforced, and media censorship was imposed, but there was no further violence, and on July 4 the state of emergency was lifted. CA leaders Jalbaasurengiin Batzandan and Otgonjargalyn Magnai and Republican Party Chairman Bazarsadyn Jargalsaikhan were arrested on charges of incitement.

Partial election results released on July 14 by the General Election Committee (GEC) confirmed the election of 66 candidates (the MPRP, 39; the DP, 25; the Civil Will Party, 1; and Independents, 1). President Enkhbayar decreed the opening of the new Great Khural on July 23, but the DP members staged a boycott to protest the GEC's failure to produce full results. Eventually, the DP members agreed to attend the Great Khural on August 28, when the confirmed members took the oath.

Gerry Shih/AP

A young man flees a violent confrontation between police and rioters in the Mongolian capital of Ulaanbaatar on July 1.

Elbegdorj then resigned the DP chairmanship and was replaced by Norovyn Altankhuyag.

MPRP Chairman Bayar then proposed the formation of a "joint" government with the DP, and the two parties concluded a formal agreement to share posts. On September 11, Bayar was reelected prime minister, and Altankhuyag became chief deputy prime minister. The new cabinet of 15 ministers (11 ministries) included 6 DP members. By year's end the official election results for the last four seats, in Ulaanbaatar Bayangol constituency, remained undeclared.

(ALAN J.K. SANDERS)

MONTENEGRO

Area: 13,812 sq km (5,333 sq mi)

Population (2008 est.): 626,000

Capital: Podgorica (Cetinje is the old royal capital)

Chief of state: President Filip Vujanovic

Head of government: Prime Ministers Zeljko Sturanovic and, from February 29, Milo Djukanovic

Montenegro's marked improvement in the economy continued to attract foreign investors in 2008. The biggest gains were attributed to a rise in

tourism and construction. The World Travel and Tourism Council ranked Montenegro as a top tourism destination, with growth estimated at 10% annually through 2016. The country's central bank estimated that foreign direct investment increased 7% over that of 2007, and per capita investment of some \$2,200 was regarded as among the highest in Europe. The GDP was about 7%; inflation fell from 6.7% in 2007 to 4%; and unemployment rates dropped from 12.2% to 11%. At the beginning of 2008, full private control of the country's banking and telecommunications sectors and oil industry was achieved as the num-

ber of majority-owned enterprises by the state declined to about 54%.

In April Montenegro concluded a World Trade Organization agreement with the EU and attended a major NATO conference in Bucharest, Rom. In 2006 Montenegro had officially entered NATO's "Partnership for Peace," and in 2007 the country had signed the Stabilization and Association Agreement with NATO.

In October the country recognized Kosovo's independence. Western observers regarded the action as a snub to Serbia, Montenegro's traditional ally, and pro-Serbian opposition parties staged protests demanding the withdrawal of recognition. Montenegrin officials explained that by not recognizing Kosovo, it could slow its own efforts toward European integration. Montenegro formally applied for EU membership on December 15.

A progress report by the European Commission noted some marked improvements in the country over the previous two years but cautioned that Montenegro needed to implement judiciary reforms and to show "greater political will" in combating corruption and organized crime. The report also stated that Montenegro showed progress in addressing human rights concerns and the protection of minorities, though some ethnic tensions remained that contributed to "uneven regional economic development."

In February, Prime Minister Zeljko Sturanovic resigned owing to ill health, and the parliament elected Milo

Djukanovic, former Montenegrin president (1998–2002) and prime minister (1991–98 and 2003–06), as head of the government. Presidential elections were held in April, and incumbent Pres. Filip Vujanovic was elected for a second five-year term, winning 52% of the vote. (MILAN ANDREJEVICH)

MOROCCO

Area: 710,850 sq km (274,461 sq mi), including the 252,120-sq-km (97,344-sq-mi) area of the disputed Western Sahara annexation

Population (2008 est.): 32,103,000, of which Western Sahara 497,000 (excluding 90,000 Saharawi refugees living near Tindouf, Alg., from 1975)

Capital: Rabat

Head of state and government: King Muhammad VI, assisted by Prime Minister Abbas al-Fassi

In 2008 Morocco suffered as a result of the global economic crisis that precipitated high energy and food prices. Consumer prices rose by 5.4%, and inflation climbed to 3%; in the first half of the year, food imports were up by 66%, and energy imports increased 62.5%. As a result, consumer subsidies rose by about \$5.2 billion, compared with an annual budget allocation of about \$2 billion. In addition, imports were expected to rise by \$4 billion to \$33 billion during the year. Foreign direct investment, however, continued to be strong, at \$3 billion, and remittances reached \$3.5 billion by June.

The political scene remained gloomy after the September 2007 legislative elections. Muhammad al-Yazghi, the leader of the left-wing Socialist Union of Popular Forces (USFP), which had experienced a drop in voter support, resigned in the wake of the elections. Despite having failed to elect a replacement at its mid-June congress, in mid-November the USFP chose veteran politician Abdalwahid al-Radi as its new leader. Though the Justice and Development Party (PJD) also did worse than anticipated and was expected to choose more radical leadership, the Islamist PJD in July instead selected as its leader veteran moderate and palace loyalist 'Abd al-Allah Benkirane. Former deputy interior minister Fouad Ali al-

Himma, a close associate of King Muhammad VI, announced in July that he would form a new party, the Authenticity and Modernity Party, just as the king indicated that he wanted parties to coalesce into larger groups to improve political activities.

The security situation continued to be worrying, especially following the March 2007 suicide bombing of an Internet cafe in Casablanca; 47 people were convicted (one was sentenced to up to 30 years' imprisonment) in October 2008 for having taken part in the blast. In June, 29 persons from Tetouan were sentenced for having recruited Moroccan fighters for terrorist attacks in Iraq. The uncovering of a major terrorist ring—led by 'Abd al-Qadir Belliraj, a former member of the 1970s extremist group al-Shabiba al-Islamiya (Islamic Youth)—led to 35 arrests in February.

Despite direct negotiation between Morocco and the Polisario Front over the disputed region of the Western Sahara, a solution was not found. Though King Muhammad VI supported French Pres. Nicolas Sarkozy's initiative for the establishment of a Union for the Mediterranean, he failed to attend the inaugural conference in July in Paris, owing to his irritation over French overtures to Algeria (where Polisario camps housed Saharawi refugees).

(GEORGE JOFFÉ)

MOZAMBIQUE

Area: 799,379 sq km (308,642 sq mi)

Population (2008 est.): 21,285,000

Capital: Maputo

Head of state and government: President Armando Guebuza, assisted by Prime Minister Luisa Diogo

Heavy rains in January 2008 caused severe flooding in the Zambezi Valley, but prompt action by the government and aid workers enabled thousands of people to be relocated in camps on higher ground. Some of the camps were threatened by rain in February, and by the end of that month, 100,000 people were still homeless and more than 200,000 needed humanitarian assistance. An additional 55,000 people were driven from their homes in early March when a cyclone struck the northern coast.

Mozambique's reputation for economic and political stability stood the country in good stead. Aid for a variety of projects in the fields of education, science, technology, agriculture, and management training was made available by The Netherlands, Cuba, Vietnam, Japan, Portugal, and South Korea, and the pipeline carrying natural gas to South Africa promised to offer future benefits for 25 years.

In spite of these initiatives, the effect of the floods meant that the country faced shortages of corn (maize) and rice, and there was a shortfall too on the import of wheat. The country's GDP was falling, and the balance of trade was worsening. Riots erupted in Maputo in February over the sharp rise in fares on public transport, and early in the year criminals were lynched in various locations. Pres. Armando Guebuza responded by dismissing the transport minister and the justice minister; the latter's department having been subjected to frequent criticism for its inefficiency. The environment minister was dismissed owing to anxiety over deforestation and illegal logging, and the foreign minister was demoted.

Following the unexpected return in May of thousands of Mozambicans from South Africa, a state of emergency was called. The local population in South Africa had turned on the Mozambican immigrants, who, they believed, were taking work from South African nationals.

These various setbacks did not affect the ruling Mozambique Liberation Front's (Frelimo's) hold on power. Despite a reshuffle of senior officials in January, the main opposition party, Mozambique National Resistance/Electoral Union (Renamo/UE), faced a number of challenges after the party's leader, Afonso Dhlakama, withdrew his support in August from Daviz Simango, the popular and successful mayor of Beira. As a result, Simango said that he would stand as an independent candidate in the municipal elections in November. The National Council of Renamo responded by expelling him from the party. The action caused considerable resentment in Beira; two senior party advisers resigned, and other members voiced similar disquiet. Overall, Frelimo won an overwhelming victory in the municipal elections; Simango was reelected mayor of Beira, but without any party support his task would prove difficult.

(KENNETH INGHAM)

MYANMAR (BURMA)

Area: 676,577 sq km (261,228 sq mi)

Population (2008 est.): 47,758,000

Capital: Naypyidaw (site near Pinyinana)

Head of state and government: Chairman of the State Peace and Development Council Gen. Than Shwe, assisted by Prime Minister Thein Sein (acting)

The year 2008 marked the 20th anniversary of the nationwide pro-democracy uprising in Myanmar that sparked a brutal military crackdown. In February the ruling junta announced its decision to push ahead with its "road map to disciplined democracy" by holding a referendum on a military-sponsored draft constitution in May, to be followed by multiparty elections in 2010. The new constitution enshrined a leading role for the military in any future government. The 2010 elections would be the first since 1990, when the military ignored the results of a landslide victory for opposition leader Aung San Suu Kyi's National League for Democracy.

Suu Kyi had been under house arrest for more than 13 of the past 19 years. In 2008, however, for the first time, she refused to meet the few officials permitted to see her, including Labour Minister Aung Kyi and the UN special envoy to Myanmar, Ibrahim Gambari. Her refusal to see Gambari underscored her opposition to his apparent backing of the junta's "road map" process. After rejecting food supplies in August and September, Suu Kyi managed to wrest modest concessions from the military. In a move in late September apparently aimed at easing international pressure, the military junta granted amnesty to some 9,000 prisoners, though only a small number of them were political prisoners.

Tragedy struck in early May when Cyclone Nargis swept across Myanmar's Irrawaddy Delta. The storm, which left more than 138,000 dead or missing, caused more than \$4 billion in damages. (See DISASTERS.)

The economy remained weak, with real GDP growth estimated at 0.9% in 2008. According to the Economist Intelligence Unit, inflation averaged 27.7%, owing partly to the surge in food prices in the wake of the cyclone.

Khin Maung Win—AFP/Getty Images

Families displaced by Cyclone Nargis, which swept across Myanmar's Irrawaddy Delta in May, take shelter in makeshift huts.

The fiscal deficit was about 4% of GDP, the highest in Asia. On the positive side, foreign exchange reserves doubled to \$2 billion in 2008, and export revenues were buoyant at \$3.5 billion, largely as a result of exports of oil, natural gas, and gems.

On the diplomatic front, China continued its substantial financial and political support for Myanmar's beleaguered regime. During the April visit to India of Gen. Maung Aye (the second-ranking general in the junta), he concluded an agreement for an India-funded multinodal transportation corridor that would link northeastern India with Myanmar's Sittwe port through the Kaladan River. Myanmar and North Korea engaged in several high-level contacts that raised new concerns about nuclear proliferation. The EU called for the imposition of an international arms embargo on Myanmar.

(MOHAN MALIK)

NAMIBIA

Area: 824,116 sq km (318,193 sq mi)

Population (2008 est.): 2,089,000

Capital: Windhoek

Chief of state and head of government:

President Hifikepunye Pohamba, assisted by Prime Minister Nahas Angula

The Rally for Democracy and Progress (RDP), a new party that had been launched in Namibia in November 2007 by Hidipo Hamutenya, previously a leading figure in the ruling South West Africa People's Organization (SWAPO), did not do well in a constituency by-election held in early 2008; the RDP accused SWAPO of having rigged the election. Tensions increased between the two parties, with each accusing the other of pandering to ethnic loyalties. In May an RDP rally in the township of Katutura, in Windhoek, was called off in the face of SWAPO threats.

Though SWAPO founder Sam Nujoma had bowed out as president of the party in December 2007 (following SWAPO's fourth congress, held in November), as "father of the nation" he retained much influence. In the cabinet reshuffle in April 2008, the most significant aspect was the return to government, after a six-year absence, of Hage Geingob, the deputy president of SWAPO and former prime minister, who became minister of trade and industry. Though the next presidential and parliamentary election was not due until late 2009, there was much jockeying between factions in SWAPO, with some hoping that Geingob would succeed Pres. Hifikepunye Pohamba. Meanwhile, the treason trial continued in the High Court in Windhoek for those who in 1999 had taken up arms for the secession of the Caprivi. A strike at TransNamib crippled road and rail transport before the Labour

Court ordered the striking workers to return to work. In other news, in April a 16th-century Portuguese trading ship that had lain undisturbed for hundreds of years on Namibia's "Skeleton Coast" was unearthed in mining operations.

(CHRISTOPHER SAUNDERS)

NAURU

Area: 21.2 sq km (8.2 sq mi)

Population (2008 est.): 10,200

Capital: Government offices in Yaren district

Head of state and government: President Marcus Stephen

On Jan. 31, 2008, Nauru celebrated 40 years of independence from Australia, with Taiwanese Vice Pres. Annette Lu attending the ceremony as guest of honour. Meanwhile, constitutional wrangling caused political deadlock in Nauru. Rules banning any MP with dual citizenship were passed in late March during an Easter Saturday session of Parliament attended only by opposition MPs (Chief Justice Robin Millhouse later declared the session invalid). Pres. Marcus Stephens responded by dissolving Parliament and calling a snap election, from which he emerged with an increased majority of 12 seats in the 18-seat Parliament.

In February a group of Sri Lankan refugees left Nauru for Australia. They were the last asylum seekers to be detained at Australia's controversial offshore processing centre. Nauru's economy was badly affected by Australia's decision to close the establishment. Finance Minister Kieren Keke (who held dual Nauruan-Australian citizenship) predicted that the closure would cut economic activity on the island by 20%. In Nauru each individual, he explained, supported a number of families in a kinship system, so the loss of 100 jobs would probably have an impact on 1,000 people, or 10% of the population. Former president René Harris, who negotiated the original processing-centre deal with Australia, died in July. (See OBITUARIES.) On a brighter note, Keke announced in September that Nauru was again making money from phosphate mining, as the global food crisis had driven up the price of fertilizer.

(A.R.G. GRIFFITHS)

NEPAL

Area: 147,181 sq km (56,827 sq mi)
Population (2008 est.): 28,757,000
Capital: Kathmandu
Head of state: Prime Minister Girija Prasad Koirala (interim head of state) and, from July 23, President Ram Baran Yadav
Head of government: Prime Ministers Girija Prasad Koirala and, from August 18, Pushpa Kamal Dahal (also known as Prachanda)

Nepal held an internationally supervised election for its new 601-member Constituent Assembly (CA) on April 10, 2008, with the Communist Party of Nepal (Maoist) emerging as the largest single party, securing 220 seats. Of 54 parties that contested the election, 25 secured enough votes to be represented in the CA. At its first meeting, on May 28, the CA dissolved the 240-year-old monarchy. On July 21 the CA elected Ram Baran Yadav the first president of Nepal. Pushpa Kamal Dahal—popularly known as Prachanda—of the Communist Party of Nepal (Maoist) was elected prime minister. (See BIOGRAPHIES.)

In other news, Tibetan refugees in Nepal staged multiple anti-Chinese demonstrations that provoked sharp responses from China. Prachanda, meanwhile, attended the closing ceremony of the Olympic Games in Beijing on August 24. He paid official visits to India and to the United Nations in September. Violence in Nepal’s southern region and disputes over the integration of Maoist combatants into the national army prompted a visit by UN Secretary-General Ban Ki-moon on October 31.

In early December the United Nations announced at a news conference in Kathmandu that Prime Minister Pushpa Kamal Dahal had agreed to a date whereby nearly 3,000 Maoist child soldiers would be released from military camps. In coordination with the UN, the combatants would be discharged at the end of February 2009.

A breach in the Kosi River barrage in August displaced nearly 100,000 people in eastern Nepal (and more than 2,000,000 people in adjacent Bihar state, India). The heavy rainfall that occurred in western Nepal also affected some 160,000 people. On October 8 a small aircraft crashed in Lukla, killing 18 passengers. (KESHAB POUDEL)

NETHERLANDS, THE

Area: 41,543 sq km (16,040 sq mi)
Population (2008 est.): 16,433,000
Capital: Amsterdam; seat of government, The Hague
Chief of state: Queen Beatrix
Head of government: Prime Minister Jan Peter Balkenende

The Netherlands strengthened its ties with other members of the European Union in September 2008 when the Dutch parliament ratified the Treaty of Lisbon, which had been signed by the heads of the member countries on Dec. 13, 2007. The parliament voted in July to extend the Dutch contribution to the NATO training mission in Iraq, as well as to maintain troops in the EU’s mission in Bosnia and Herzegovina. The Netherlands also continued its “Defense, Development and Diplomacy” mission in Afghanistan.

Early in the year, right-wing parliamentarian Geert Wilders remained firmly in the news for a number of weeks as he threatened to unveil a film entitled *Fitna* that he said would warn of the “dangers of Islam.” Various Dutch groups and individuals, concerned that the film might inflame fear and misunderstanding, sought to distance themselves from Wilders’s point of view. When *Fitna* was finally released on the Internet in March, its reception remained relatively muted, as the message presented in the film was Wilders’s well-known and widely contested view that Islam is incompatible with Dutch democratic values. The country breathed a collective sigh of relief at the relatively calm reception.

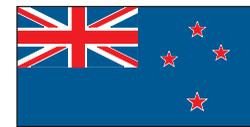

The economy of The Netherlands was reasonably stable in 2008, though its strongly international orientation made it vulnerable to the worldwide turbulence in the autumn. Unemployment was low at 2.6%; the national pension system and social security funds remained healthy. In an effort to curb inflation, Prime Minister Jan Peter Balkenende’s government rescinded previous plans to raise the value-added tax (VAT) by 1%. In light of the aging population and high standards for social services, the government sought to stimulate productivity and to encourage older citizens to work. Financial incentives were

offered to individuals who would continue to work after age 62 and to employers who would hire seniors as well as to employers who offered positions to the long-term unemployed or those who were partially disabled. The Netherlands saw the first three-month decrease in the prices of homes in 18 years; the sales volume also dropped dramatically.

In response to the international crisis in the banking and financial markets, the government attempted to shore up the markets and various companies. It acquired all Dutch operations of the Belgian-Dutch financial service group Fortis, which made the state responsible for Fortis Bank Nederland, Fortis Insurance, and the Fortis segment of ABN AMRO. Subsequently, in consort with other EU member states, The Netherlands set aside €200 billion (€1 = about \$1.40) in guarantees for interbank lending. It also injected €10 billion into ING, the largest company in the country, having set aside €20 billion in support of troubled Dutch companies. By year’s end it was not clear what the long-term effect of the financial crisis would be.

(JOLANDA VANDERWAL TAYLOR)

NEW ZEALAND

Area: 270,692 sq km (104,515 sq mi)
Population (2008 est.): 4,268,000
Capital: Wellington
Chief of state: Queen Elizabeth II, represented by Governor-General Anand Satyanand
Head of government: Prime Ministers Helen Clark and, from November 19, John Key

After nine years in office, the Labour-led government of Prime Minister Helen Clark was defeated in New Zealand’s triennial elections held on Nov. 8, 2008, losing control of the unicameral House of Representatives to an administration led by National Party leader John Key. (See BIOGRAPHIES.) Polling 44.93% of votes under the MMP (mixed-member proportional) electoral system, National won 58 seats; Labour received 33.99% (43 seats), and the Green Party took 6.72% (9 seats). The Maori and ACT New Zealand parties each won five seats, and United Future took one. The latter three parties reached an accord, including ministerial posts, to support the Key ad-

Sandra Mu/Getty Images

National Party leader John Key addresses a press conference in Auckland, N.Z., on November 9, one day after leading his party to victory in the country's general elections; Key took office as prime minister on November 19.

ministration, which assumed office on November 19. In conceding Labour's defeat, Clark and Deputy Prime Minister Michael Cullen also resigned their roles as party leader and deputy leader, respectively, and were replaced in a caucus ballot three days later by Phil Goff and Annette King—previously trade minister and justice minister, respectively.

On the new Parliament's commencement in early December, Key initiated a 100-day action plan that included tax cuts to begin in April 2009; a line-by-line review of departmental spending; enhancement of the country's infrastructure; tougher laws to combat violent youth crime, criminal gangs, and the drug trade; a transitional relief package for those individuals worst hit by job losses; and a reassessment of the effects of the global economic crisis. The Clark administration had earlier agreed to underwrite retail and wholesale deposits in New Zealand-registered banks.

New Zealand First party leader Winston Peters was censured by Parliament in a 62–56 vote on September 23 after the Privileges Committee ruled by majority that he had knowingly failed to declare a \$NZ 100,000 (about U.S.\$70,000) donation to his party in 2005. Clark dismissed Peters as foreign affairs minister, and his party subsequently lost all its seven seats in Parliament.

The May 22 budget projected expenditure for fiscal 2008–09 of \$NZ 78.8 billion (about U.S.\$62 billion), up 8.7%, and revenue of \$NZ 80.1 billion (about U.S.\$63.1 billion), up 4%; the 2007–08 surplus was forecast to shrink. The main budget allocations were for social secu-

rity and welfare, health, education, economic and industrial services, law and order, and defense. A deal was signed on June 30 allowing the government to repurchase for \$NZ 665 million (about U.S.\$506 million) the rail network and interisland ferry service that was sold by the former National government to a private consortium in 1993 for \$NZ 328.3 million (about U.S.\$177.5 million).

In April New Zealand became the first Organisation for Economic Co-operation and Development member country to conclude a comprehensive free-trade agreement with China, in a deal calculated to boost New Zealand's annual exports to China, currently valued at some \$NZ 2 billion (about U.S.\$1.5 billion), by up to \$NZ 400 million (about U.S.\$300 million). New Zealand would ultimately concede tariff-free access to China for 96% of its products by 2019. In tandem with the deal were legally binding agreements on labour and the environment. New Zealand also agreed to a closer economic partnership agreement with Japan, made progress on free-trade negotiations with India, and commenced preparatory talks on a free-trade deal with South Korea.

New Zealand lost two historically significant figures early in the year. Explorer Sir Edmund Hillary, who first conquered Mt. Everest in 1953 with Sherpa Tenzing Norgay, died on January 11. Maori poet Hone Tuwhare, who in 1999 became New Zealand's second poet laureate, died on January 16. (See OBITUARIES.) (NEALE MCMILLAN)

NICARAGUA

Area: 130,373 sq km (50,337 sq mi)

Population (2008 est.): 5,667,000

Capital: Managua

Head of state and government: President Daniel Ortega Saavedra

In 2008 Nicaraguan Pres. Daniel Ortega neared the completion of his second year in office. The coalition between the Constitutionalist Liberal Party (PLC) and the Nicaraguan Liberal Alliance, which held the majority of seats in the National Assembly, collapsed, leading the PLC to renew its pact with Ortega's Sandinista National Liberation Front (FSLN). The Supreme Electoral Coun-

cil, which administered and monitored Nicaragua's elections, decertified the minority Conservative Party, the Sandinista Renewal Movement, and two indigenous parties, thereby stripping them of public electoral financing. Despite the renewed PLC-FSLN pact, the Supreme Court was unable to convene because of conflicts between the two parties over the distribution of judges across the court's four chambers.

Following local elections on November 9, in which the FSLN was declared the winner in at least 91 contests, supporters of opposition political parties, alleging widespread fraud, took to the streets November 10–19 and clashed with police. In December the U.S. suspended an aid program and demanded an inquiry into the allegations.

Nicaragua's budget for 2008 expanded social expenditures but remained within the guidelines of the International Monetary Fund. Ortega claimed \$520 million in Venezuelan aid; however, this remained off the official budget and without state oversight. Much of this aid was intended for the Sandinistas' Citizen Power Councils, which had organized many of the FSLN's governmental social programs.

The central bank of Nicaragua worked to increase foreign reserves and to return to more orthodox monetary policies aimed at controlling inflation. Nonetheless, high food and oil prices dampened economic growth, which was projected to slow to 3%, while raising inflation to a projected 21%. The government increased the minimum wage by 18%. Exports grew strongly, owing to rising coffee prices and expansion in the U.S. market. Despite a close relationship with Venezuela and an often conflictive one with the U.S., Nicaragua remained committed to the Central America–Dominican Republic Free Trade Agreement, which Venezuela opposed. Nicaragua sought to reduce its dependence on oil by bringing wind turbines and other renewable-resources projects online and signing an agreement with Brazil to build a 160-MW hydroelectric plant.

Claiming the need for self-defense, particularly in regard to recent disputes with Colombia, Ortega pulled back from his 2007 offer to destroy more than half of Nicaragua's arsenal of SAM-7 missiles. In October the Nicaraguan government faced criticism from the UN Human Rights Committee for its comprehensive ban on abortion, which prohibited even therapeutic abortions.

(JUSTIN WOLFE)

NIGER

Area: 1,189,546 sq km (459,286 sq mi)

Population (2008 est.): 14,731,000

Capital: Niamey

Head of state and government: President Mamadou Tandja, assisted by Prime Minister Seyni Oumarou

The Tuareg rebellion in northern Niger escalated during 2008. On January 8 a land mine exploded in a residential district of Niamey, where many army officers lived, and on January 21 Movement of Nigerians for Justice (MNJ) members killed 7 policemen in Tanout, 900 km (550 mi) northeast of Niamey, and kidnapped 11 others, including the mayor. On June 26 the MNJ released 4 French miners (who had been abducted three days earlier) from the uranium diggings near Arlit. One of the MNJ's main objectives was to secure for the Tuareg people a greater share of the profits from the mineral wealth in northern Niger. The government said that 17 rebels had been killed on June 27 in fighting near Tezirzait, but the MNJ claimed that 26 soldiers had also died. On July 18 the government halted all operations of the French branch of the aid organization Doctors Without Borders, insisting that it had links with the rebels. The MNJ announced on August 19 that it would welcome talks with the government but denied reports that it was prepared to surrender its firearms. During a government showcase disarmament ceremony on August 24, dozens of land mines accidentally exploded while a number of former Tuareg rebels were handing in their weapons; at least one man was killed, and 40 were injured.

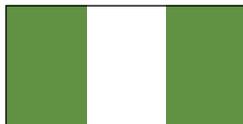

The government released two French television reporters on January 18. They had been arrested a month earlier for having interviewed Tuareg leaders. Two local journalists, arrested on the same charge of having endangered state security, remained in prison. On June 26 former prime minister Hama Amadou was arrested and charged with having embezzled nearly \$240,000 in public funds.

The government announced in June that the China National Petroleum Corp. would invest \$5 billion to develop Niger's oil resources following comple-

tion of a new refinery. Production was scheduled to begin in 2009. The news, however, was met with furious opposition from unions and civil rights groups, which demanded to know how the deal was struck and how the money would be distributed.

(NANCY ELLEN LAWLER)

NIGERIA

Area: 923,768 sq km (356,669 sq mi)

Population (2008 est.): 146,255,000

Capital: Abuja

Head of state and government: President Umaru Musa Yar'Adua

During 2008 Nigeria's economy was severely affected by the global financial crisis that forced the central bank to revise financial policy and caused Nigerian industrialists to panic and begin withdrawals from their local and overseas accounts. The price of crude oil, the country's major export, underwent wild fluctuations—beginning the year at \$95, peaking at \$147 in July, and then plunging below \$70 in October. Earlier in the year Nigeria's prospects had looked hopeful to achieve the Millennium Development Goals and realize its Vision 2020: the average growth rate was about 6.9%; external reserves amounted to about \$63 billion; the naira (national currency) had appreciated significantly against leading currencies; and the non-oil sector showed strong performance. By mid-October, however, the government had completely depleted \$14.6 billion in windfall oil profits. Meanwhile, fears that the world oil price might fall below Nigeria's benchmark figure of \$62 a barrel necessitated a rethinking of budgetary priorities for 2009.

Pres. Umaru Musa Yar'Adua, who had come to power in May 2007 after a flawed election in April, consolidated his position, though he was criticized for his gradual ap-

proach in implementing campaign promises and was nicknamed "Baba-go-slow." In February his election as president was upheld by a tribunal, which freed him to assert his independence from former president Olusegun Obasanjo. Yar'Adua instituted a reform of the oil sector, tightened his grip on the military, and reduced corruption; he faced daunting problems, however, in repairing the electricity grid. In August worries about his health surfaced owing to his prolonged 19-day trip to Saudi Arabia for religious and medical reasons, but his vigorous return to public life allayed these fears.

Transparency International (TI), a global watchdog organization in the fight against corruption, acknowledged "significant improvement" in Nigeria's status, moving it up on TI's corruption index from 147 (in 2007) to 121 of 180 countries (in 2008). The Economic and Financial Crimes Commission (EFCC) was praised for some high-profile arrests but was also ridiculed as a tool for attacking the government's political enemies. The EFCC claimed that it had obtained about 250 convictions and recovered about \$4 billion in confiscated assets and fines. Nevertheless, powerful interests obstructed its activities. Some state governors arrested under EFCC charges of corruption had also been generous contributors to Yar'Adua's presidential campaign. They joined other implicated members of the political elite to force the dismissal of the first EFCC director and turned the spotlight

Members of the Movement for the Emancipation of the Niger Delta arm themselves in preparation for an operation against the Nigerian army in September.

Pius Utomi Ekpei—AFP/Getty Images

in the direction of former president Obasanjo and his family. In mid-October, however, the EFCC dismissed the charges against Obasanjo and 31 state governors for lack of sufficient evidence.

Violence in the Niger delta surged to new levels, pushing the region to the verge of anarchy and resulting in the loss of billions of dollars in oil revenue. A volatile mix of armed militias, criminal gangs, unemployed youths, greedy politicians, corrupt police and military officers, and intransigent oil companies competed for a share in oil profits. In June and again in September, the Movement for the Emancipation of the Niger Delta (MEND) spearheaded two well-organized, sophisticated armed operations against the oil companies and the federal army, which succeeded in disrupting production and forcing Royal Dutch Shell to suspend production temporarily. In some areas oil production fell from 20% to 50% of capacity. Unilateral cease-fire declarations demonstrated the militants' strength and discipline and reinforced their demand to participate in a "stakeholders' summit" to discuss local autonomy and a more equitable distribution of oil revenue. Rather than address the socioeconomic roots of unrest, the Joint Task Force launched military attacks on rebel camps and arrested hundreds of suspected militants, while the Senate passed legislation criminalizing organized violence and acts of terrorism. Meanwhile, ordinary people lived in poverty on devastated land with little hope of relief in the near future.

(LARAY DENZER)

NORWAY

Area: 385,199 sq km (148,726 sq mi), including the overseas Arctic territories of Svalbard (61,020 sq km [23,560 sq mi]) and Jan Mayen (377 sq km [145 sq mi])

Population (2008 est.): 4,762,000

Capital: Oslo

Chief of state: King Harald V

Head of government: Prime Minister Jens Stoltenberg

Norway's economy remained strong in 2008, despite turbulence in the global financial market and slower economic growth in most of Europe. Oil prices

Visitors walk along the sloping roof of the newly constructed Norwegian Opera and Ballet in Oslo on April 12, the opera house's opening day.

Albert Nieboer—dpa/Landov

reached new heights in the summer before retreating in the autumn, and exports of fish and industrial products continued to expand. Meanwhile, inflation reached 3.5%, and a tight labour market induced the central bank to raise the key policy rate to 5.7% in the spring. Housing loans also became more expensive, at around 7%, and during the summer the heated housing market slowed down. During the global financial crisis that began in September, the Government Pension Fund experienced big losses in its investments in international financial instruments. Economists, seeking to bring calm, proclaimed that such a large fund with long-term investments could handle short-term losses, and the public seemed to trust these reassurances. Norwegians had experienced high growth in personal income during the previous years, and economists from the Organisation for Economic Co-operation and Development anticipated that Norwegian consumers would have 2.6% higher purchasing power for the year.

Although analysts predicted a soft landing for the economy, eight municipalities suffered in the financial crisis. During 2001–06 they were advised by the company Terra Securities to invest their future hydropower-related income in high-risk American hedge funds. In November 2007 it became clear that both the investments and the future incomes were lost. Prolonged trials against Terra and the bank consortium Acta filled newspaper headlines in 2008 and triggered debates about community investments and financial advisers.

The red-green coalition government of Prime Minister Jens Stoltenberg presented several important initiatives during the year. On Svalbard, in the far

north, a Global Seed Vault was opened in the spring, with some 268,000 distinct samples of seeds from all over the world placed into secure cold storage. Even under the worst scenario of global warming, the seeds would remain frozen for 200 years. (See ENVIRONMENT: Sidebar.) Norway also invested \$1 billion in Brazil's Amazonas Fund to prevent deforestation and global warming. In the autumn the Storting (parliament) ruled that in the future Norway's hydroelectric plants would be publicly held enterprises. The government was the target of harsh criticism for its low investments in railroads and for planning offshore oil drilling in the vulnerable fisheries off Lofoten islands in the North Sea.

A gala performance on April 12 opened Norway's first opera house, the newly constructed Norwegian Opera and Ballet overlooking Oslo Fjord. The architecture firm Snøhetta designed the sparkling white marble and glass building, for which groundwork had begun in 2003. The gala, which was broadcast to a national television audience, included the opera building workers singing Giuseppe Verdi's "Slave Chorus" among many other highlights. Walks on the building's sloping roof quickly became a popular activity. Among the numerous festivals held, both inside and on the roof, was a commemoration on June 17 of the 200th anniversary of the birth of the national poet Henrik Wergeland.

King Harald and Queen Sonja celebrated their 40th wedding anniversary with an Adriatic and Mediterranean cruise in 2008. The royal pair also visited Portugal in May and attended the Olympic Games in Beijing in August.

(HILDE SANDVIK)

OMAN

Area: 309,500 sq km (119,500 sq mi)
Population (2008 est.): 2,651,000
Capital: Muscat
Head of state and government: Sultan and Prime Minister Qaboos bin Said (Qabus ibn Sa'id)

In 2008 Oman retained its role as the global guardian of the Strait of Hormuz, a strategically vital route for much of the world's daily hydrocarbon exports. Simultaneously, Oman continued to view with concern repeated U.S. and Israeli threats to use whatever means necessary—including armed force—against Iran, the sultanate's most important maritime neighbour (located directly across the strait), in the event that Iran refused to cease its uranium-enrichment program. While realizing the necessity of cordial relations with both Tehran and Washington, D.C., the sultanate remained reliant upon the 1980 Facilities Access Agreement, which allowed the U.S. military provisional use of Oman's defense facilities in the event of an actual or imminent threat of attack by Iran or any other state. The challenges implicit in this situation were among other prominent issues and matters of policy that Oman had under consideration as it hosted the Gulf Cooperation Council's annual ministerial and heads of state summit, which was held in Muscat on December 27–29.

Petroleum prices remained the key determinant of Oman's economy, which grew 6% during the year. Energy exports again produced ample funding for the ongoing expansion of the sultanate's burgeoning tourism and transportation sectors. Three new airports were opened to better accommodate the influx of tourists. Meanwhile, the ports of Sohar and Salalah continued to grow, with Salalah gaining the distinction of being the only port between Europe and Singapore that could handle the world's largest container vessels. Bolstering the country's appeal to foreign visitors was *Vogue* magazine's declaration of Oman as the top travel destination for 2008.

(JOHN DUKE ANTHONY)

PAKISTAN

Area: 796,096 sq km (307,374 sq mi), excluding the 85,793-sq-km (33,125-sq-mi) Pakistani-administered portion of Jammu and Kashmir
Population (2008 est.): 161,910,000 (excluding nearly 4,795,000 residents of Pakistani-administered Jammu and Kashmir as well as about 2 million Afghan refugees)
Capital: Islamabad
Head of state and government: Presidents Gen. Pervez Musharraf, Mohammadmian Soomro from August 18, and, from September 9, Asif Ali Zardari, assisted by Prime Ministers Mohammadmian Soomro and, from March 25, Yousaf Raza Gillani

The successors of former prime minister Benazir Bhutto, who was assassinated while campaigning in December 2007, took control of Pakistan's government in February 2008 following the legislative electoral victory of Bhutto's Pakistan People's Party (PPP). The new legislature assumed its responsibilities in March and elected PPP stalwart Yousaf Raza Gillani prime minister and Fehmida Mirza its first female speaker. The first truly civilian government since Pres. Pervez Mushar-

A Pakistani gunman—who was later arrested and identified as Mohammad Ajmal Amir—walks through the Chhatrapati Shivaji railway station in Mumbai (Bombay) on November 26, at the outset of a nearly three-day terrorist siege in parts of the Indian city.

Sebastian D'souza—Mumbai Mirror/AP

raf took power in a 1999 coup anticipated a period of normalcy, but infighting between key political personalities, severe economic dislocation, and sustained acts of terrorism offered no hiatus. Asif Ali Zardari (*see* BIOGRAPHIES), Bhutto's widower, who succeeded her as PPP leader, launched a reconciliation process that for a brief period allowed former prime minister Mohammad Nawaz Sharif's Pakistan Muslim League (PML) to join the ruling coalition. The two principals differed on a range of issues, however, notably the reinstatement of judges dismissed by President Musharraf in 2007. Under threat of impeachment, Musharraf relinquished the presidency in August, but his departure only intensified the Sharif-Zardari rivalry. Sharif broke with Zardari in late August and joined the opposition. On September 6 the legislature elected Zardari Pakistan's new president. The previous day three dismissed judges were reinstated by the Supreme Court, which had been expanded from 16 to 29 members. Former chief justice Iftikhar Mohammed Chaudhry was not among those reinstated. Suicide bombings, assassinations, and military operations against entrenched terrorists remained the top preoccupation of Pakistan's government. In late September Islamabad cited 88 suicide attacks since the Red Mosque assault in July 2007, causing 1,188 deaths, including 847 civilians. The 15-month toll was twice as high as in the previous five years.

The war on terrorism intensified over the year, commencing with the killing in January of Abu Laith al-Libi, a senior al-Qaeda commander, by a U.S. CIA drone. Despite protestations, numerous U.S. drone attacks throughout the year claimed an increasing number of al-Qaeda and Taliban operatives. In Waziristan, Baitullah Mehsud, leader of a Pakistani Taliban coalition, threatened attacks on the country's major cities, and many metropolitan areas were repeatedly assaulted. In February a suicide bomber killed the army's surgeon general, Lieut. Gen. Mushtaq Baig, and in November retired major general Amir Faisal Alvi, former commander of the Special Services Group, was murdered. Earlier, Maj. Gen. Javed Sultan, commander of the Kohat region,

who was overseeing the hunt for Taliban militants, died with two brigadier generals when their helicopter crashed in South Waziristan.

On the diplomatic front, India released more than 150 Pakistani prisoners, the Asian Development Bank transferred a substantial part of its \$1.9 billion annual assistance package to bolster Pakistan's budgetary position, and in May Pakistan was readmitted to the Commonwealth of Nations after a six-month suspension. NWFP negotiators and pro-Taliban militants in the Swat valley signed a 15-point peace agreement in May, but in that same month a U.S.-directed drone attack on Damadola in the Bajaur tribal area killed more than 20 people. Fighting involving U.S.-led coalition forces in Afghanistan spilled over into Pakistan in mid-June. U.S. warplanes struck retreating guerrillas, and Islamabad charged the U.S. military with the deaths of 11 regional paramilitary members. A subsequent U.S. report that active and former officials in Pakistan's Inter-Services Intelligence (ISI) agency remained committed to the Taliban was denounced by Islamabad as a "smear campaign," but efforts in July to place the ISI under Ministry of Interior control fizzled under army pressure. Nevertheless, a shake-up in the ISI occurred in late September when Lieut. Gen. Ahmad Shujaa Pasha, director general of military operations, was named the new ISI head, and in November the ISI's political wing was officially disbanded.

With anti-American sentiment intensifying, top U.S. and Pakistani military leaders met secretly in August aboard a U.S. aircraft carrier near the Persian Gulf. A U.S. raid into South Waziristan in September, however, brought a stern rebuke from Islamabad, while U.S. Pres. George W. Bush's administration revealed that U.S. Special Forces had been authorized to operate across the Pakistan border. Islamabad declared that U.S. penetrations would be resisted. In September, U.S.-Pakistan military skirmishes punctuated talks between Zardari and Bush at the UN headquarters in New York City, and in November the new U.S. chief of central command, Gen. David Petraeus, met with Pakistani military and political leaders in Islamabad.

Denmark's Islamabad embassy was bombed in June, killing six people. Militants blocked the road between Kohat and Peshawar, and a rash of bombings followed extremist threats aimed at shop owners. The Kohat fighting in-

tensified late in the year. To assist Pakistan's frontier forces in combating mounting acts of terrorism, a small contingent of U.S. counterinsurgent trainers took up their duties in late October. Militants were not subdued, however. Islamabad's Marriott Hotel was demolished when a truck bomb detonated, killing at least 54. In late November Pakistan-based terrorists, allegedly members of Lashkar-e-Taiba (LeT), struck multiple targets in Mumbai (Bombay), killing more than 170. (See Special Report on page 192.) The latter event forced Pakistani authorities to strike at LeT's charitable extension, Jamaat-ud-Dawa, sealing its offices and mosques and arresting its officers.

In June the National Assembly passed the new government's first budget. Pegged at 2.01 trillion rupees (about \$30 billion) for 2008-09, it represented the country's largest budget bill ever. With Pakistan facing unparalleled economic distress, the country's inflation rate rose to about 25%, and cuts in food, fuel, electricity, and fertilizer supplies especially affected the poor. A major drop in GDP, declines in agriculture and manufacturing, double-digit inflation, ineffective fiscal and monetary policy, and diminished exports contributed to substantial failures in all economic sectors. In October Islamabad implored the IMF to make available between \$3 billion and \$6 billion in emergency funds.

(LAWRENCE ZIRING)

PALAU

Area: 488 sq km (188 sq mi)
Population (2008 est.): 20,300
Capital: Melekeok (on Babelthup)
Head of state and government: President Tommy Remengesau, Jr.

Palau's economy, already damaged by the world financial turmoil, was further injured in May 2008 when Far Eastern Air Transport (FAT) stopped flying to Palau from Taiwan, Palau's largest source of tourist income. China Airlines offset the damage to some extent by its decision to fly charter flights to Palau four times a week.

Anxiety about the fall in tourist revenue was increased by the gloom caused by rising local fuel prices. The

increase in the world market price of oil—and the rise in electricity charges by the Palau Public Utilities Corp. to meet a potential budget shortfall of \$700,000—saw the country facing what Sen. Santy Asanuma (chairperson of the Palau Resources, Commerce, Trade and Development Committee) described as a grave crisis. Pres. Tommy Remengesau met the challenge by recommending that the legislature initiate legislation to borrow \$3 million from an existing Taiwan Infrastructure Fund. Palau also pursued possible oil and gas resources in northern Palau and in the area of Kayangel state.

In August public health officials declared a dengue fever epidemic. A national campaign to get rid of dengue mosquito breeding areas improved conditions somewhat by October.

In Palau's November 4 general elections, Johnson Toribiong claimed the presidency by a mere 216 votes over Elias Camsek Chin. Remengesau was unable to run because of term limits. Toribiong would take office in January 2009.

(A.R.G. GRIFFITHS)

PANAMA

Area: 75,173 sq km (29,024 sq mi)
Population (2008 est.): 3,310,000
Capital: Panama City
Head of state and government: President Martín Torrijos

Politically, the year 2008 in Panama marked the beginning of the campaign cycle that would culminate with the May 2009 general elections. The country's two largest parties, the ruling Democratic Revolutionary Party (PRD) and the Arnulfista Party (PA), held primaries to select their standard-bearers in the presidential contest. The PRD chose a woman, Balbina Herrera, a former minister of housing and mayor of the populous district of San Miguelito. The PA picked Juan Carlos Varela, a businessman and political novice. A third major presidential candidate also emerged: wealthy businessman Ricardo Martinelli, leader of the Democratic Change party. Early polls pointed to a close contest between Herrera and Martinelli.

In July, Pres. Martín Torrijos issued a series of controversial executive decrees

aimed at reforming the police and security institutions. After the U.S. invasion of Panama in 1989, Panama abolished the military and created a series of civilian-led police and security agencies, but Torrijos argued that these had become incapable of meeting the security challenges facing the country in the 21st century. Among other changes, his decrees mandated the creation of a National Frontier Service to strengthen border security, the merging of the National Air Service and the National Maritime Service into a National Aeronaval Service, and the establishment of a National Intelligence and Security Service. As part of the move to strengthen the country's defenses, Panama also rejoined the Inter-American Defense Board. The new measures sparked significant protests from opposition political parties and civil-society organizations that had fought the military dictatorship of the 1980s; these groups claimed that the decrees would remilitarize Panama's security apparatus.

Panama's economy, benefiting from a continued boom in the construction sector, was expected to grow at an annual rate of 8.5% in 2008. The economy had experienced growth ranging from 7% to 9% in the previous three years. Most economists, however, expected the rate of growth to slow in 2009 as a result of the global financial crisis.

(ORLANDO J. PÉREZ)

PAPUA NEW GUINEA

Area: 462,840 sq km (178,704 sq mi)

Population (2008 est.): 6,474,000

Capital: Port Moresby

Chief of state: Queen Elizabeth II, represented by Governor-General Sir Paulias Matane

Head of government: Prime Minister Sir Michael Somare

Papua New Guinea (PNG) held celebrations in 2008 commemorating Prime Minister Sir Michael Somare's 40 years in politics, which had made him one of the longest-serving parliamentarians in the world. Despite pressure from opposition leaders, Somare, who had led the country intermittently since before independence in 1975, did not name a date for his retirement.

During the year the prime minister focused on such issues as reducing the carbon emissions derived from excessive logging. Somare sought out opportunities for PNG, which was home to one of the world's most significant tropical rainforests, to receive funds in return for not cutting down the forests. Australian Prime Minister Kevin Rudd visited Port Moresby in March and signed an agreement to help PNG reduce carbon emissions from deforestation. A proposed copper mine near the historic Kokoda Trail challenged the relationship between Australia and PNG. In addition to disturbing local landowners, who were seeking compensation, development of the area raised concerns about the significance of the track to Australians.

After an agreement between the PNG government and a consortium comprising ExxonMobil, Oilsearch, Santos, AGL, and Nippon Oil, a multibillion-dollar gas deal was launched with the intention of strengthening the PNG economy. During September, Somare opened what was expected to be PNG's largest liquid natural gas project. The LNG processing plant was scheduled to create 5,000 jobs in the construction phase and add 15% to the country's GDP.

(A.R.G. GRIFFITHS)

PARAGUAY

Area: 406,752 sq km (157,048 sq mi)

Population (2008 est.): 6,238,000

Capital: Asunción

Head of state and government: Presidents Nicanor Duarte Frutos and, from August 15, Fernando Lugo

Former Roman Catholic bishop Fernando Lugo (*see* BIOGRAPHIES) won a stunning victory in Paraguay's presidential election on April 20, 2008, putting an end to the Colorado Party's 61-year hold on power. Lugo defeated Blanca Ovelar, the first woman presidential candidate in Paraguayan history, by a popular vote margin of 41% to 31%. The outgoing president, Nicanor Duarte Frutos, tried to resign in late June to take a seat in the Senate, a maneuver that would guarantee him legal immunity from any subsequent investigations; after some turmoil, however,

Newly inaugurated Paraguayan Pres. Fernando Lugo makes a victory salute after taking the oath of office in Asunción on August 15.

the Senate ruled that the move was unconstitutional. Lugo, who promised to redistribute land and attack entrenched patronage and corruption, was inaugurated on August 15 for a five-year term.

Lugo faced massive challenges in a country in which Colorado Party functionaries still occupied nearly all posts in the judicial and administrative systems—and in which 1% of the population controlled more than three-fourths of the arable land, while 42% of the population lived in poverty. Between Lugo's election and his inauguration, peasant groups staged dozens of land invasions, particularly of soybean farms. The groups targeted soybean producers because of concerns over their use of toxic pesticides. By promising land relief, Lugo persuaded most peasant leaders to halt the invasions. Lugo's administration said it would redistribute some 8 million ha (20 million ac) allegedly seized by former dictator Alfredo Stroessner and handed out (1954–89) to his cronies.

In February Paraguay experienced its first outbreak of yellow fever in 34 years. The outbreak claimed at least nine lives and led to riots and massive movement across the country by people seeking vaccinations, which were not available. With the help of neighboring countries, France, and the United Nations, Paraguay eventually imported more than three million doses of vaccine. The failure of Duarte's administration to be prepared for the outbreak became a major electoral issue.

In September an appeals court overturned the manslaughter convictions of Juan Pío Paiva and his son, Daniel Paiva, the owners of the Ycuá Bolaños shopping mall in Asunción where an August 2004 fire claimed at least 374 lives. Doors ordered locked to prevent looting had prevented many victims from escaping the shopping mall. A lower court had convicted the owners in February. In August an appeals court also cleared former general and presidential candidate Lino Oviedo of charges that he had planned the 1999 assassination of the country's vice president, Luis María Argaña.

(ROBERT ORTEGA)

PERU

Area: 1,285,198 sq km (496,218 sq mi)

Population (2008 est.): 28,534,000

Capital: Lima

Head of state and government: President Alan García

The year 2008 saw Peru's economy advance strongly. The country reached 9% GDP growth, with significant increases across the board in mining, agriculture, construction, manufacturing, and the entire service sector. Accompanying this growth were high public expenditures (along with increased tax revenues), strong consumer credit growth, and expanding domestic and international investment. Indeed, one notable sign of overall economic well-being emerged during the year when Peru's debt was moved up to investment grade status by major international brokerage houses such as Standard & Poor's and Fitch Ratings.

Despite these achievements, Pres. Alan García's approval ratings were at their lowest point since his inauguration in July 2006. They stood at just 19% overall in September, down from 35% in July 2007. Moreover, some deep and significant disparities existed in García's poll numbers. For example, while he received the approval of 24% of Lima's population, he registered an abysmal 7% in the southern highlands, which was Peru's poorest and most isolated region.

This extraordinary disconnect between robust macroeconomic indica-

tors and popular perception had several causes and as many repercussions. First, while some parts of the country were booming (especially Lima but also the coast in general and the northern coast in particular), many residents of southern and highland Peru, where many of the country's indigenous peoples lived, continued to see themselves as left out. Government claims that poverty had declined significantly over the past few years fell on deaf ears. Work in the informal sector often provided only part-time employment, poor wages, and no benefits. Many Peruvians, especially in the cities, were also alarmed at the emergence of inflation that—while still relatively moderate—rekindled memories of the late 1980s and its 7,600% hyperinflation. Thus, Peru's recent economic good fortune remained as much a challenge as a good thing. Maintaining the country's impressive economic performance while distributing its benefits more equitably was a clear and necessary goal; whether it could be achieved, and how quickly, remained very much in question.

The general discontent felt in many parts of the country contributed to a large number of protests during the year. These included demands by workers in the southern region of Moquegua for the greater sharing of burgeoning mining royalties, numerous clashes between local communities and mining operations over environmental concerns, and a national strike by public-sector doctors over stalled wage increases. The inhabitants of Peru's central-southern coast around the towns of Pisco and Ica complained that reconstruction following the magnitude-8.0 earthquake that struck in August 2007 had proceeded too slowly. In addition, a variety of institutional shortcomings remained as challenges. For example, plans to decentralize Peru's unitary government and to devolve power to regional and local levels had been slowly and unevenly implemented and were plagued by claims of unpreparedness and corruption of local authorities.

A major scandal developed in October when high-ranking government officials were accused of partaking in kick-back schemes involving oil-exploration contracts. As a result, García's entire cabinet resigned, and Yehude Simon, a regional governor who was not a member of García's American Popular Revolutionary Alliance, was named head of a new cabinet. The scandal revelations only damaged García's public image further.

On the international front, a maritime-boundary dispute with Chile continued to drag on with no resolution in sight, and work on the completion of a highway between Peru and Brazil was running behind schedule. More alarming, the UN Office on Drugs and Crime released a report in June confirming an increase in coca cultivation in Peru as well as in neighbouring Colombia and Bolivia. According to UN and Peruvian government estimates, plots of coca bushes covered some 51,000 ha (127,000 ac) in Peru, an increase of about a third since 1999.

On April 15 the Supreme Court upheld former president Alberto Fujimori's December 2007 conviction of having once authorized an illegal search. Fujimori's trial on a variety of other charges, including alleged human rights abuses, continued.

PHILIPPINES

Area: 300,000 sq km (115,831 sq mi)

Population (2008 est.): 90,227,000

Capital: Manila (some government offices and ministries are located in Quezon City and other Manila suburbs)

Head of state and government: President Gloria Macapagal Arroyo

An attempt to end decades of conflict in the southern Philippines collapsed in August 2008, and this led to intensified fighting between government forces and Muslim insurgents who sought to strengthen an autonomous Islamic state. In July the government of Philippines Pres. Gloria Macapagal Arroyo reached an ancestral domain agreement with the Moro Islamic Liberation Front (MILF). The agreement provided for an expanded homeland with greater autonomy for some four million Muslims in 700 towns and villages on the southern island of Mindanao. On August 4, however, officials from the Roman Catholic areas of Mindanao obtained a Supreme Court order temporarily blocking the formal signing of the agreement. The officials feared that the agreement would mean Muslim encroachment into their territory, and they argued that it would split the country. MILF guerrillas angrily reacted to the

Christian and Muslim children in Quezon City join adults in October to call for an end to violence in the southern Philippines, where fighting between government forces and Muslim insurgents intensified during the year.

order by launching attacks on government forces and villages in Mindanao.

On August 21 the government announced that it had canceled the ancestral domain agreement. Intensified fighting in Mindanao caused nearly 100 deaths, and some 500,000 people fled their homes. A government offensive captured three MILF commanders blamed for the upsurge in fighting. On October 14 the Supreme Court ruled 8 to 7 that the agreement was unconstitutional. The MILF said that it would take its case to the UN as well as to the Organization of the Islamic Conference. Meanwhile, both the MILF and the government indicated that they would resume observing a cease-fire they had signed in 2003.

The head of Arroyo's security staff announced that a plot to assassinate the president and other officials and to bomb foreign embassies was uncovered in early February. The plot was blamed on the Islamic militant group Abu Sayyaf, which had been accused of having orchestrated many past bombings, kidnappings, and beheadings. The plot was disclosed shortly before protests against Arroyo were to be held in Manila and 14 other cities. Demonstration organizers charged that the government's report on the plot was simply intended to discourage and distract from the protests. Marking the anniversary of a popular uprising that

ousted former president Ferdinand E. Marcos in 1986, the demonstrators demanded the ouster of Arroyo, who for several years had faced accusations of having been involved in corruption and of having improperly influenced vote counting in her presidential election victory in 2004.

After having achieved a 7.3% expansion in 2007—its fastest rate of growth in three decades—the Philippine economy suffered in 2008 from the worldwide financial crisis. Inflation soared by midyear to 11.4%, the highest rate in nine years, with a particularly worrisome surge in food prices. With the country's population growing at more than 2% annually, the government reported in March that the proportion of people living in poverty had risen from 30% in 2003 to 32.9% in 2006. Arroyo had promised to reduce poverty by 17–20% by 2010.

The interisland ferry *Princess of the Stars* capsized in a typhoon on June 1. (See DISASTERS.) An inquiry blamed the boat's captain for having failed to judge the storm danger correctly. Of more than 800 people aboard, only 60 survived. Because the vessel had been carrying five highly toxic pesticides as cargo, the government was forced to halt efforts to recover victims' bodies for fear that pesticides in the water could harm divers involved in the recovery effort. POLAND

Area: 312,679 sq km (120,726 sq mi)

Population (2008 est.): 38,111,000

Capital: Warsaw

Chief of state: President Lech Kaczynski

Head of government: Prime Minister Donald Tusk

Throughout 2008 Poland's coalition government of the centre-right Civic Platform (PO) and rural-based Polish Peasants Party (PSL) enjoyed strong public support. Though it faced a divided opposition—the Law and Justice party (PiS) on the right and the Left and Democrats (LiD) on the centre-left—the ruling coalition lacked a sufficient majority to override a presidential veto, which became clear in August when the government's proposals to

amend media law were stonewalled. Moreover, the government's unwillingness to pursue controversial reforms, resulting in a lack of visible achievements in its domestic policy, was often blamed on the presidential ambitions of Prime Minister Donald Tusk, the leader of the PO. Tusk's proposal to privatize the state-owned hospitals and his on-again, off-again promises of a cabinet reshuffle indicated, however, that he was trying to rectify his government's image problem.

Relations between the government and Pres. Lech Kaczynski (of the PiS) were tense from the beginning of Tusk's administration and sometimes bordered on hostility, such as Tusk's refusal to provide Kaczynski with a government airplane to fly him to the European Council meeting in Brussels in October. In January 2008 Kaczynski scorned the government's endorsement of Russia's bid to join the Organisation for Economic Co-operation and Development (OECD), and he both opposed withdrawal of Poland's military forces from Iraq and refused to sign the Lisbon Treaty on European Union (EU) organization. That these tensions went beyond foreign and security policy, in which the president's role is well defined constitutionally, into domestic matters signaled a political power struggle between the PiS and the PO. In 2008 there were also changes on the left of the political spectrum. Most notably, the Democratic Left Alliance (SLD), the largest centre-left opposition party, replaced its leader, Wojciech Olejniczak, with Grzegorz Napieralski, formerly the party's secretary-general.

From the beginning it was clear that the Tusk government's foreign policy, formulated by Minister of Foreign Affairs Radek Sikorski, would substantially differ from that of its predecessor. The foreign policy goals outlined by Sikorski in his speech to the parliament in May confirmed that the government would pursue closer cooperation with the EU (particularly with Germany) and attempt to develop a friendlier relationship with Russia by no longer opposing its negotiations with the EU on a new partnership. Sikorski also proposed a scheme for developing cooperation between the EU and Ukraine, Moldova, Georgia, Azerbaijan, Armenia, and Belarus.

The crisis in South Ossetia that in August climaxed in war between Georgia and Russia (see *Georgia*, above) inspired Kaczynski to take a strong anti-Russian stand. On August 12 he and the

presidents of Estonia, Latvia, Lithuania, and Ukraine flew to Tbilisi to express strong support for Georgia. The Polish government also took steps to demonstrate support for the Georgian state, but its actions were much more pragmatic. Indeed, it was on Tusk's recommendation that the European Council met to discuss the Georgian crisis.

Also in August, after 18 months of tough negotiations and influenced strongly by the developments in Georgia, Poland signed an agreement with the U.S. to host 10 antiballistic interceptor missiles as part of the proposed U.S. global missile defense system. The agreement remained to be ratified by the Polish parliament and signed into law by the president; there was speculation, however, that the government might decide to delay the ratification process until after the U.S. presidential election in order to ensure that the agreement had the support of the incoming U.S. administration.

In 2008 Poland's economy continued to expand briskly, with GDP growing by 5.8% in the second quarter, slightly better than expected and only a little slower than in the first quarter. Consumer price inflation in August was 4.8%, unchanged from July. The unemployment rate in July was 9.4%, 2.8 percentage points lower than at the same time the previous year. In September the government announced that Poland would join the euro zone in 2011, earlier than expected. While it was recognized that the widening international fi-

ancial crisis would likely slow Poland's economic growth in the last quarter of 2008 and in 2009, many experts believed that Poland was still a relatively safe haven in terms of economic development. (MICHAEL WYGANOWSKI)

PORTUGAL

Area: 92,090 sq km (35,556 sq mi)

Population (2008 est.): 10,649,000

Capital: Lisbon

Chief of state: President Aníbal Cavaco Silva

Head of government: Prime Minister José Sócrates

Politics in Portugal remained mostly subdued in 2008, with the Socialist Party's absolute majority in the parliament and squabbling within the main opposition Social Democratic Party (PSD) combining to facilitate the government's activities. The government continued its efforts to reduce the budget deficit while promoting growth. It was a difficult balance to achieve, however, and against the backdrop of the global financial crisis, Portuguese GDP growth stalled. While exports remained robust, they were outpaced by import growth (exacerbated by the sharp rise in fuel prices), and consumer confidence dwindled, setting the economy on track to grow less than 1% in 2008. Unemployment was essentially steady at about 7.5%, and spending cuts, combined with the weak economy, helped the budget shrink steadily, on track for a 2.2% gap for the year, well below the European Commission's 3% limit. Since Portugal's housing market had long been more stable than that of neighbouring Spain, there was little backlash from that segment, though rising interest rates over most of the year cut into consumer spending, further denting confidence. Inflation was a problem, running at just under 3% on an annualized basis, driven by the higher prices of fuel and food.

In an effort to cool inflation and boost exports, Prime Minister José Sócrates signed a series of trade agreements with Venezuela, which pledged to send crude oil to Portugal in exchange for finished goods. Galp Energia, Portugal's only oil refiner, saw its stock price soar after the Brazil-based consortium

in which it held a 10% stake made a series of potentially huge crude oil discoveries in deep waters off the Brazilian coast. The Portuguese government also launched one of the world's first wave-powered generators in the rough waters off northern Portugal.

The overall economic woes meant that Sócrates's government saw its popularity fade, which political analysts said would likely make it more difficult for the Socialists to retain their parliamentary majority in the next national election, expected in late 2009. The opposition PSD was not able to make much headway, suffering a leadership battle midway that saw former finance minister Manuela Ferreira Leite take the helm. Sócrates and his team meanwhile continued their focus on education and economic stimuli, neatly combining the two with the launch in September of a low-cost laptop computer, called the Magalhães (after the historic Portuguese maritime explorer Ferdinand Magellan). The computer was developed by a local company (JP Sá Couto) in conjunction with American chipmaker Intel and was produced entirely in Portugal. It was designed for primary-school students and would be exported to numerous countries, including Brazil, Venezuela, and Luxembourg.

The investigation into the 2007 disappearance of British toddler Madeleine McCann finally came to a controversial end as Portuguese authorities closed the case in August, more than a year after the girl went missing from a luxury resort in the southern Algarve region. The final police report cleared the parents of any culpability, reversing an earlier decision that had identified them as suspects. Another named suspect, a British citizen resident in the Algarve, was also cleared in the final report. Madeleine's parents were continuing their efforts to find her, using private investigators in Portugal and elsewhere. The case was just one factor in what many Portuguese considered to be rising crime levels in a country that prided itself on security and placid customs. Carjacking made headlines throughout the year, with one big hit netting the thieves a reported €1 million (about \$1.6 million) worth of gems from a dealer who was transporting them to a trade fair. There were also a number of highly visible bank robberies, including a €2.5 million (\$3.7 million) heist from an armoured currency-transport van and a bank holdup that turned into a televised drama as police snipers fired on the hostage takers, killing one. (ERIK T. BURNS)

QATAR

Area: 10,836 sq km (4,184 sq mi)
Population (2008 est.): 1,448,000
Capital: Doha

Head of state and government: Emir Sheikh Hamad ibn Khalifah al-Thani, assisted by Prime Minister Sheikh Hamad ibn Jasim ibn Jabr al-Thani

In 2008 Qatar played a leading role in brokering political disputes in other countries. In Lebanon, Qatari diplomats succeeded in ending the long-standing stalemate between Lebanon's Christian-led government and Hezbollah, the country's largest and most influential Shi'ite Muslim political party and militia group. In Yemen, where diplomatic efforts were ongoing, Qatar sought a cease-fire between an armed insurgency group in the northern part of the country and the government in Sanaa. The parties to the disputes in each of these cases acknowledged Qatar's goodwill, independence, and genuinely neutral stance as well as its willingness to extend financial assistance in implementing any agreement reached. Elsewhere, Qatar's quests for conflict resolution in the war-ravaged Darfur region of The Sudan, on the one hand, and between

A man inspects a golden vase during the opening day of the new Museum of Islamic Art in Doha, Qatar, on December 1.

Fadi Al-Assaad—Reuters/Landov

Eritrea and Ethiopia over a major boundary dispute, on the other, proved as elusive as had numerous efforts made by others.

Qatar's economy, which already boasted one of the world's highest per capita incomes, continued to soar as a result of increased hydrocarbon production and heightened revenues from energy exports. The country remained the world's largest producer of gas-to-liquids fuels and increasingly invested substantial surplus revenues in foreign financial institutions. In addition, in its annual Corruption Perceptions Index, the Berlin-based nongovernmental organization Transparency International ranked Qatar as the least-corrupt country in the Middle East.

Qatar's rapid economic expansion was not without its downsides. Of particular concern was a dramatic rise in inflation resulting from a combination of factors. Among the most prominent were a pronounced shortage of housing, significantly higher costs for imported skilled labour needed for new hydrocarbon and infrastructure projects, and the scarcity of construction materials, which contributed to the doubling of costs for some major development ventures. Planning authorities moved rapidly to introduce measures aimed at stemming the inflationary trends.

(JOHN DUKE ANTHONY)

ROMANIA

Area: 238,391 sq km (92,043 sq mi)
Population (2008 est.): 21,508,000
Capital: Bucharest

Chief of state: President Traian Basescu
Head of government: Prime Ministers Calin Popescu-Tariceanu and, from December 22, Emil Boc

For much of 2008 an interlocking set of political and economic groups, often simply known as "the oligarchy," enjoyed growing influence in Romania. Parties that were alarmed by the desire of Pres. Traian Basescu to detach the justice system from political interference closed ranks in parliament to remove much of the influence that he had over domestic affairs. Parliamentary votes ensured that the 2003 constitution was reinterpreted so as to

move away from a semipresidential system toward one in which parliamentary primacy was increasingly affirmed. The immunity from prosecution afforded to parliamentarians, supposedly curtailed in 2003 at the request of the EU, was restored in practice as successive votes were taken to block criminal investigation of leading political figures, including Adrian Nastase, the former prime minister (2000–04). In August the European Commission complained that the refusal of Romanian authorities to pursue high-level corruption was the main problem affecting the country's relations with the rest of the EU.

Though the EU had the power to impose sanctions on Romania for failing to bring its justice procedures into line with those of established EU members, it declined to do so. Prospects of a cleanup were set further back by the refusal in August of the justice minister to renew the mandate of Daniel Morar, the senior prosecutor whose efforts over the past three years to pursue high-level corruption had won strong praise from the EU. Nevertheless, many judges had acquitted, given derisory sentences, or postponed the cases of politicians who came before them on corruption charges.

In local elections held in June, the Social Democratic Party (PSD), the direct heir of the pre-1989 ruling communists, staged a comeback after having been written off as a serious force a few years earlier. The influence of provincial party bosses known as "the barons" contributed to the revival of the PSD.

In parliamentary elections held on November 30, no party gained an overall majority. Following prolonged talks, the two largest parties, the PSD and the Democratic Liberal Party (PDL), agreed on December 14 to form a coalition government under former prime minister Theodor Stolojan, a close ally of President Basescu. Stolojan, however, withdrew his name from consideration and Basescu appointed PDL leader Emil Boc.

The National Statistical Institute reported in September that in the second quarter Romania recorded a record 9.3% growth rate year-on-year; it was the highest pace in the 27-member EU. Much of the growth was derived from foreign investment in the property sector, however, and did not boost long-term regular employment. For the second year running, Romania was a net contributor to the EU budget despite its poverty. The €30 billion (about \$40 bil-

lion) in funding that had been allocated to Romania by the EU upon the country's entry in 2007 had not been released because Romania had failed to line up enough infrastructure projects to make good use of the funds.

Following the occupation by Russian forces of parts of Georgia in August, President Basescu visited five countries in the Black Sea region, including Georgia. He emphasized that the principle of collective rights for minorities was disrupting international relations since it undermined state boundaries.

RUSSIA

Area: 17,075,400 sq km (6,592,800 sq mi)

Population (2008 est.): 141,841,000

Capital: Moscow

Chief of state: Presidents Vladimir Putin and, from May 7, Dmitry Medvedev

Head of government: Prime Ministers Viktor Zubkov and, from May 8, Vladimir Putin

Domestic Politics. On March 2, 2008, Dmitry Medvedev (see BIOGRAPHIES) was elected Russia's president. He was the handpicked successor of outgoing president Vladimir Putin, who was, after two consecutive terms in office, obliged by the constitution to stand down. Putin's longtime aide and protégé, Medvedev had never before run for elected office, but Putin's endorsement ensured that he was elected in the first round of balloting. He garnered about 70% of the vote, though the fairness of the election was disputed. Europe's largest vote-monitoring body, the Organization for Security and Co-operation in Europe, canceled plans to observe the election, saying that the Russian authorities had placed unacceptable limitations on the size and duration of its mission. At the same time, there was little doubt that the majority of the Russian population supported Medvedev's candidacy. As soon as he was sworn in as president on May 7, he named Putin prime minister—a popular move.

Putin had been a hugely popular president, credited with rescuing Russia from the virtual economic disintegration of the 1990s and ensuring the country's stability and territorial integrity. High world energy prices had boosted

Russia's economy and enabled its population to grow more prosperous. Above all, Putin had restored Russians' pride in their country and put Moscow back on the map as a power with which to be reckoned. On the other hand, Putin had also concentrated power in the Kremlin, muffled the political opposition, and tightened state control over the mass media. Corruption, a perennial problem, had grown during his presidency, as had state intervention in key areas of the economy.

There was much speculation about how the Putin-Medvedev tandem would work. In the past, power-sharing governments in Russia had not lasted long and had usually resulted in a ruthless struggle for political control. According to Russia's constitution, the prime minister was significantly less powerful than the president and was confined to running the economy. The president, by contrast, was head of state and commander in chief of the armed forces, with extensive powers to determine domestic and foreign policy. Moreover, the constitution empowered the president to dismiss the prime minister and government virtually at will.

Medvedev, aged 43, was the first Russian leader who had not held office in the Soviet system, and there were hopes among some that he might turn out to be a more liberal president than Putin had been. Initially, Medvedev made a series of high-profile statements that seemed to confirm that image. Campaigning for election in Krasnoyarsk in February, for example, Medvedev set out a liberal-sounding agenda that included calls to tackle corruption, reform the judiciary, and reduce the role of the state in the economy. Following the handover of power, however, it soon became clear that Putin retained the dominant role in the relationship and that Medvedev was playing the role of apprentice. Putin was not only leader of the United Russia party, which dominated the Duma (lower house of parliament), but was also Russia's most popular politician and remained the only person able to balance the competing factions within the elite. While Medvedev formally led on foreign policy—as the constitution required—events suggested that Putin was overseeing foreign and security policy as well as the economic decision making traditionally entrusted to the government. Indeed, the new foreign policy strategy that Medvedev approved in July explicitly created a new role for the government, giving it responsibility for the implementation of foreign policy.

Entrusting the government with executing foreign policy, though not forbidden by the constitution, suggested that, at least for the time being, Medvedev would defer to Putin in the realm of foreign as well as domestic policy.

Once appointed prime minister, Putin lost no time in announcing his new government. While very few of these political appointees could be identified as Medvedev's confidants, Putin kept his inner circle intact, moving many of his closest associates from the Kremlin (headquarters of the presidency) to the White House (headquarters of the government). The main centre of decision making was accordingly seen as having moved from the former to the latter. On November 5, in his first state of the nation address, Medvedev called for extending the presidential term from four to six years. There was speculation that the move, which received parliamentary approval, might be intended to prepare the ground for Putin's eventual return to presidential office.

August saw the death and state funeral in Moscow of Nobel Prize-winning Russian writer and historian Aleksandr Solzhenitsyn. December 5 marked the death of the head of the Russian Orthodox Church, Patriarch Aleksey II of Moscow and All Russia. (See OBITUARIES.)

The Economy. Russia in 2008 recorded its 10th year of strong economic growth, with GDP projected to climb by about 7%—though a fall from the 8.1% growth recorded in 2007. At the start of the year, government leaders asserted that Russia would be immune from the financial crisis gripping other parts of the world. Russia had the advantage of a massive budget surplus and large financial and foreign-exchange reserves. In December, however, the deputy economy minister announced that Russia was in a recession and that economic growth would be lower than predicted. Putin as prime minister stressed continuity and said that his government would implement "Putin's Plan," which he had mapped out in a series of speeches over the preceding months. This scheme promised to modernize and diversify Russia's overly energy-dependent economy in an effort to turn it into one of the world's leading economies by 2020. By the autumn, however, it was clear that Russia would not escape the global financial crisis. The economy was already slowing down by midyear; a decline in manufacturing output was recorded in August; and oil and gas output also fell. Inflation, estimated at about 13% for 2008, was a source of concern. A crisis

of confidence in financial markets provoked a rapid outflow of funds from the Russian stock market, forcing it to close temporarily in September and October. In part, this was attributable to the global financial crisis, but Russia suffered more than other emerging markets, owing to a decline in world oil prices and a heightened perception of political risk in Russia following Putin's public criticism in July of the Mechel Steel Co. and Russia's conflict with Georgia in August. (See *Foreign and Security Policy*, below.) Medvedev was left trying to reassure the business community that economic policies were not changing at a time when Russian business had lost billions of dollars from its market capitalization. In October the government set out a package of anti-crisis measures, which resembled those adopted in Western Europe and the U.S. Amounting to about \$220 billion, or some 13% of GDP, this was a larger package relative to GDP than in any other Group of Eight country. The ruble was also repeatedly devalued late in the year.

Commentators described the government formed by Prime Minister Putin as effectively containing two "inner cabinets." One "cabinet," which was headed by First Deputy Prime Minister Igor Shuvalov (who was seen as a relative liberal), was responsible for overseeing external economic relations and foreign-trade negotiations on Russia's (still-delayed) entry to the World Trade Organization and developing small businesses (one of Medvedev's declared priorities). Also included among the relative liberals was Finance Minister Aleksey Kudrin. The other "cabinet" was headed by Putin himself and his close associate Deputy Prime Minister Igor Sechin and was seen as focussing on nurturing "national champion" companies, deemed by the leadership to be of strategic importance for national security, particularly in the energy sector. Conflict between these two camps bubbled under the surface. The arrest and detention of Deputy Finance Minister Sergey Storchak at year's end 2007 was widely interpreted as an attack by the Sechin camp on the Kudrin-Shuvalov camp; Storchak's release on bail in autumn 2008 was accordingly seen as a victory for the liberals.

In October, Russia, Iran, and Qatar announced plans to coordinate their natural gas industries in what some observers called a potential "gas OPEC." These three countries together controlled about 55% of the world's known gas reserves, but it remained to be seen

Georgian soldiers, blindfolded and guarded by Russian troops, are paraded atop an armoured personnel carrier in the Georgian city of Poti on August 19.

how the new organization would develop in practice.

The year saw a continuation of a trend that began in 2007—that is, a sharp increase in the number of industrial protests by Russian workers. The strikes were led by "alternative" trade unions, organizations that were not affiliated with Russia's officially approved unions. This activity was significant; it came after a period of 15 years during which Russian workers had been quiescent. Pointing out that Russia's demographic crisis had begun to reduce the number of working-age males in the population, commentators suggested that the resultant shortage of skilled labour was for the first time making Russian workers conscious of their worth.

Foreign and Security Policy. Under Putin's leadership, Russia had become an assertive and self-confident player on the international stage. Tensions over Russia's demand for *droit de regard* in former Soviet territory culminated in August in five days of armed conflict with neighbouring Georgia. Moscow's relations with Tbilisi had been fraught ever since the collapse of the U.S.S.R., the flashpoint being Russia's support for Georgia's secessionist provinces, Abkhazia and South Ossetia. Tensions erupted when on August 7 the Georgian military launched a ground and air attack against the South Ossetian capital, Tskhinvali. Russia, which had peacekeepers stationed in the region, sent additional armed forces into South Ossetia and launched bombing raids against Georgia proper. The Russians went on to eject the Georgian forces from South

Ossetia and occupy one-third of the territory of Georgia proper, halting not far short of Tbilisi itself. The conflict caused substantial loss of civilian life and displaced more than 100,000 people.

This was the first time that Russia had sent troops outside its territory since the U.S.S.R. occupied Afghanistan in 1979. Moscow protested that it had been compelled to act in order to protect the lives both of its peacekeepers and of those residents of South Ossetia who possessed Russian citizenship. Moscow accused Georgia of genocide and ethnic cleansing and said that it had evidence to back up its claims. After five days of fighting, the EU brokered a cease-fire on August 12, though each side subsequently accused the other of having breached the terms of the accord. The international community condemned the actions of both Georgia and Russia. The EU—Russia's largest trading partner—responded by temporarily suspending talks with Russia on a new Partnership and Cooperation Agreement (PCA), the activities of the NATO-Russia Council were also temporarily suspended. Although Medvedev announced on August 26 Russia's formal recognition of both South Ossetia and Abkhazia as independent states, Russia failed to persuade any other country—with the sole exception of Nicaragua—to recognize the breakaway provinces. Moscow also signed friendship treaties with Abkhazia and South Ossetia that included pledges of military assistance as well as diplomatic and economic cooperation. In October, following the conflict, Moscow withdrew most of its

forces, though Russian troops remained in Abkhazia and South Ossetia and in two regions of Georgia proper. On November 18 French Foreign Minister Bernard Kouchner stated that while Russia had implemented 90% of what it had pledged in EU-brokered agreements between Moscow and Tbilisi, it had not yet withdrawn its troops from 10% of the territory of South Ossetia and from part of Abkhazia. The situation remained unchanged at year's end.

Commentators interpreted the conflict as a proxy war waged by Russia to warn NATO not to grant the Membership Action Plans being sought not only by Georgia but also by Ukraine—even more sensitive from Moscow's point of view. The Georgian government accused Moscow of having aspirations to annex the two regions. Russia denied any imperial ambitions, however, and complained that NATO enlargement was intended to isolate and encircle Russia by potentially hostile states. At the end of August, following the Georgian conflict, Medvedev announced five foreign-policy priorities that would, he said, guide Russia's policy. First, Russia recognized the fundamental principles of international law. Second, the world should be multipolar; domination by any one state or bloc of states represented a threat to global stability. Third, Russia was not seeking confrontation and had no intention of isolating itself from the rest of the world. Fourth, Russia claimed the right to protect the lives and dignity of its citizens and Russia's business interests, "wherever they may be," and would respond whenever those interests were threatened. Finally, Russia, "just like other countries in the world," had "regions where it has privileged interests."

In speeches in Berlin in June and Évian-les-Bains, France, in October, Medvedev outlined Russia's plans for a "new European security architecture" stretching from Vancouver to Vladivostok. Saying that existing international institutions did not meet the needs of the moment, Medvedev called for a pact that would include "a clear affirmation of the inadmissibility of the use of force—or the threat of force—in international relations." Such a treaty would, Medvedev maintained, affirm the principle of the territorial integrity of independent countries and prevent "the development of military alliances to threaten the security of other members of the treaty." Commentators interpreted this as a reference to NATO enlargement.

Moscow continued to object to U.S. plans to deploy a missile defense system in Poland and a radar station in the Czech Republic, describing the installations as intended to weaken Russia's military capability. In his state of the nation address on November 5, Medvedev announced that if the U.S. went ahead with the planned antimissile shield, Moscow would respond by deploying short-range missiles in Russia's Kaliningrad region, situated between Poland and Lithuania. He also said that Russia would electronically jam the U.S. antimissile system.

In September Medvedev announced far-reaching plans to rearm and modernize Russia's armed forces. The Georgian conflict had served as a reminder that the Russian military lacked modern equipment and was weighed down by a top-heavy military bureaucracy. Moscow announced that by 2012 the number of personnel in uniform would fall from the current 1.13 million to 1 million. The officer corps would be reduced from 400,000 to 150,000; the posts of hundreds of generals and colonels would be cut, while the number of junior officers would increase, bringing the Russian military more closely into line with the way in which the armed forces were structured in other countries.

In October Russia ended a decades-long border dispute with China by handing over a stretch of island territory along the Amur River. Skirmishes over the territory in the 1960s caused a bitter rift between Moscow and Beijing. The ending of the dispute symbolized the warming of relations between the two countries and, in particular, their desire to establish closer economic ties.

In other news, in May Russia won the Eurovision Song Contest for the first time. Dima Bilan's performance of the rhythm-and-blues ballad "Believe" secured the prize.

(ELIZABETH TEAGUE)

RWANDA

Area: 26,379 sq km (10,185 sq mi)

Population (2008 est.): 10,009,000

Capital: Kigali

Head of state and government: President

Maj. Gen. Paul Kagame, assisted by
Prime Minister Bernard Makuza

Rwanda made strides toward building political unity and reconstructing its economy in 2008. Pres. Paul Kagame took every opportunity to drive home the message of "one Rwanda, one people, one future." A record 98.5% of the electorate participated in the September 15–18 general election, in which the Rwandan Patriotic Front-led coalition won a landslide victory, claiming 42 of the 53 directly contested seats in the 80-member Chamber of Deputies. A 2003 law mandated that the remaining 27 seats be indirectly elected and that, of these seats, 24 were to go to women and 3 to youth and the disabled. Women secured 45 parliamentary seats in all, which meant that the election produced the world's first national legislative body with a female majority. International observers agreed that the election was fair and well-organized.

Significant progress was made in realizing a series of ambitious economic reforms. Government goals aimed to transform the landlocked country, which lacked oil and minerals, into a trade and technology centre. The EU, the Clinton-Hunter Development Initiative, and various international agencies sponsored poverty-reduction and development programs in Rwanda. Other advances included the establishment of a securities exchange in Kigali and a cell-phone assembly plant, the first of its kind in Africa.

As economic and political conditions improved, the local gacacas ("traditional courts"), which had been convened in 2002 to help alleviate the backlog of cases involving Rwanda's 1994 genocide, worked toward concluding the genocide trials by year's end. By the beginning of 2008, some 1,000,000 people had gone before these courts, of whom 800,000 had been tried. On December 18 the International Criminal Tribunal for Rwanda (ICTR) issued its first convictions for the organization of the genocide. Former army colonel Théoneste Bagosora was sentenced to life imprisonment for having masterminded the killings. Two codefendants, former military commanders Anatole Nsenyumva and Aloys Ntabukuze, also received life sentences. Altogether the ICTR had convicted 34 persons and acquitted 6; still awaiting trial were 9 detainees. Meanwhile, the UN extended the mandate of the ICTR to Dec. 31, 2009.

In February, U.S. Pres. George W. Bush made Rwanda his third stop on his six-day Africa tour. In an emotional

Jim Watson—AFP/Getty Images

U.S. Pres. George W. Bush relaxes with members of the entertainment committee after the February inauguration of the new U.S. embassy in Kigali, Rwanda.

address, Bush compared the violence taking place in the Darfur region of The Sudan to the 1994 genocide. He promised \$12 million in military assistance to train an additional 2,400 Rwandan peacekeeping troops to augment the already-existing force of 7,000 in Darfur. Bush also signed a bilateral investment treaty, pledged to help fight AIDS in Rwanda, and announced the return of an active Peace Corps program to the country. (LARAY DENZER)

SAINT KITTS AND NEVIS

Area: 269 sq km (104 sq mi)
Population (2008 est.): 51,300
Capital: Basseterre
Chief of state: Queen Elizabeth II, represented by Governor-General Sir Cuthbert Montraville Sebastian
Head of government: Prime Minister Denzil Douglas

Like most other Caribbean territories that were not hydrocarbon producers, Saint Kitts and Nevis was actively pursuing nontraditional energy sources, and in January 2008 a company called West Indies Power launched a drilling program in Nevis to access geothermal energy. The company expected to drill five wells, which were forecast to provide enough steam to produce the 50

MW of power that Nevis needed.

Prime Minister Denzil Douglas insisted in January that Saint Kitts and Nevis had no intention of severing diplomatic relations with Taiwan in favour of those with China. A new embassy was opened in Taipei the same month. In 2008 Saint Kitts and Nevis was one of the few Caribbean states that continued to recognize Taiwan in preference to China.

In April the government described as “outrageous and unjustifiable” the call by the U.S.-based organization People for the Ethical Treatment of Animals (PETA) for tourists to boycott the country. PETA claimed that the local Ross University School of Veterinary Medicine “deliberately” mutilated animals as part of the teaching process, but the government insisted that the school violated no laws governing the treatment of animals.

In September, Saint Kitts and Nevis celebrated the 25th anniversary of its independence from the U.K. That same month, the government issued a statement that it remained determined to carry out court-ordered sentences of death by hanging. The first execution took place on December 19. (DAVID RENWICK)

SAINT LUCIA

Area: 617 sq km (238 sq mi)
Population (2008 est.): 171,000
Capital: Castries
Chief of state: Queen Elizabeth II, represented by Governor-General Dame Pearlette Louisy
Head of government: Prime Minister Stephenson King

The government of Saint Lucia announced in January 2008 that it was holding discussions with American oil company Hess Corp. to add a refinery

to its long-standing oil-transshipment terminal in the country. (In July 2007 the 30-year-old license for the latter had been extended for 50 years.)

Commerce Minister Guy Mayers announced in March that the government had accepted a Cuban proposal that Saint Lucia become the hub for the transit of Cuban-made goods to the eastern Caribbean. Transportation between the two countries would be upgraded, and Air Cubana would convert some of its older aircraft to cargo planes for airlifting the mostly light goods involved.

In July the World Bank approved an additional \$3 million to help lessen Saint Lucia’s vulnerability to natural disasters by means of improved disaster preparedness and mitigation planning. The next month, Saint Lucia decided not to participate in Operation Airbridge, a U.K.-funded drug-eradication and interdiction program, on the grounds that it would put “severe pressure” on the country’s prison and justice system. Mayers, who had taken over as home affairs national security minister in a June cabinet reshuffle, argued that any successful campaign to intercept drug traffickers could increase the already-overburdened prison population by about 25%. (DAVID RENWICK)

SAINT VINCENT AND THE GRENADINES

Area: 389 sq km (150 sq mi)
Population (2008 est.): 106,000
Capital: Kingstown
Chief of state: Queen Elizabeth II, represented by Governor-General Sir Frederick Ballantyne
Head of government: Prime Minister Ralph Gonsalves

A Saint Vincent and the Grenadines High Court judge in March 2008 upheld the decision of the director of public prosecutions (DPP) not to proceed with rape and indecent assault charges against Prime Minister Ralph Gonsalves. Attorneys representing a 36-year-old policewoman said that they would appeal the ruling. In April another sexual-assault charge against Gonsalves, this one by a Vincentian

woman living in Canada, was also dropped by the DPP.

The government defended its decision in May to increase gasoline and other transportation fuel prices because the current level of subsidy (\$600,000 a month) was “clearly unsustainable.” The prime minister in May condemned those critics who, he said, wanted to portray Venezuelan Pres. Hugo Chávez as a “monster.” Gonsalves made the comment shortly after the arrival from Venezuela of millions of dollars worth of construction equipment for the new \$200 million international airport in Saint Vincent and the Grenadines. Those “demonizing” Chávez, Gonsalves added, were not helping Saint Vincent and the Grenadines with the project. Gonsalves announced in July that another benefactor, Taiwan, would also help fund the airport. (DAVID RENWICK)

SAMOA

Area: 2,831 sq km (1,093 sq mi)

Population (2008 est.): 180,000

Capital: Apia

Chief of state: *O le Ao o le Malo* (Head of State) Tuiatua Tupua Tamasese Efi

Head of government: Prime Minister Tuila'epa Sa'ilele Malielegaoi

Samoa's economic growth slowed to 3% in 2008 as the country confronted higher fuel and food prices. Food security again became a national issue, with politicians urging Samoans to increase production of traditional staples to counter growing dependence on imported foodstuffs. Banks were encouraged to lend to the primary sector to increase local food production.

Samoa's Human Rights Protection Party government, secure with an ever-larger majority in the Legislative Assembly and a disorganized opposition, passed legislation to change the side of the road on which vehicles drive, beginning in September 2009. Prime Minister Tuila'epa Sa'ilele Malielegaoi argued that the change to driving on the left side of the road would bring Samoa's traffic laws into alignment with those in Australia and New Zealand and would allow expatriate Samoans to purchase cheaper right-

hand drive vehicles in those countries for relatives in Samoa.

Opponents of the switch, which would lead to the gradual replacement of the nation's vehicle fleet and would cost hundreds of millions of dollars, contended that it was too expensive and would lead to confusion and to an increase in road accidents and deaths. By late July public opposition to this move had spawned a new broad-based political faction, the People's Party, but it was unlikely to have significant political impact until the next national elections, to be held in 2011.

(CLUNY MACPHERSON)

SAN MARINO

Area: 61.2 sq km (23.6 sq mi)

Population (2008 est.): 31,000

Capital: San Marino

Heads of state and government: The republic is governed by two *capitani reggenti*, or coregents, appointed every six months by a popularly elected Great and General Council.

There was mixed news in 2008 about San Marino's full compliance with stringent legislation on money laundering. During recent years San Marino had sought to apply European Union standards of transparency and equivalent United Nations requirements. The country also adhered to the relevant Council of Europe conventions, with good results. A report in May, however, by the European Committee on Crime Problems, was not entirely favourable in its assessment.

The financial markets' good bill of health was matched by continued economic growth. GDP increased by more than 6% in one year, an extraordinary result, considering the sluggish economy of European countries in general. San Marino's robust economic performance translated into high levels of remuneration and solid employment rates, with fewer than 300 workers reported unemployed. This excellent short-term performance was accompanied by concerns regarding the future of pensions in a country with a high percentage of elderly residents. To ensure long-term sustainability, government authorities envisioned reforms that would provide more room for private retirement funds.

The ruling coalition collapsed in June, and a snap election for the 60-seat Grand and General Council was held on November 9. The Pact for San Marino—a coalition of former opposition parties, including the new progressive party Arengo and Freedom—won 54.22% of the vote and 35 seats.

(GREGORY O. SMITH)

SÃO TOMÉ AND PRÍNCIPE

Area: 1,001 sq km (386 sq mi)

Population (2008 est.): 160,000

Capital: São Tomé

Chief of state: President Fradique de Menezes

Head of government: Prime Ministers

Tomé Vera Cruz, Patrice Trovoada from February 14, and, from June 22, Joaquim Rafael Branco

New hope for political stability arose in São Tomé and Príncipe in February 2008 when the opposition Independent Democratic Action party joined the governing coalition and its secretary-general, Patrice Trovoada, became the new prime minister. Only three months later, however, the new coalition government lost a parliamentary vote of confidence after Trovoada was accused of corruption. Portugal, the country's main donor, responded by postponing its debt pardon, which the IMF had approved in 2007, and its finance minister canceled a visit to the archipelago. In December a corruption trial involving former prime minister Maria das Neves, among others, was adjourned.

Since his reelection in 2006, Pres. Fradique de Menezes had tried to secure more powers for his office; in 2008 he called for the legislative elections scheduled for 2010 to be brought forward. The armed forces, business community, trade unions, and other groups responded that an early election would be costly and could pose a risk to political stability. Bowing to pressure, Menezes asked the leader of the former ruling party, the Movement for the Liberation of São Tomé and Príncipe—Social Democratic Party, to form a new government. One of Prime Minister Rafael Branco's first acts after taking office was to sign onto a submarine cable project with Portugal Telecom.

(CHRISTOPHER SAUNDERS)

SAUDI ARABIA

Area: 2,149,690 sq km (830,000 sq mi)
Population (2008 est.): 24,780,000
Capital: Riyadh
Head of state and government: King Abdullah

Saudi Arabia's King Abdullah made international headlines in July 2008 when he convened a three-day interfaith conference in Madrid that was attended by more than 200 religious and political leaders from around the world. The conference, which marked the first time that a Saudi ruler had invited Jewish clerics to participate in a religious meeting, was aimed at developing mutual understanding and tolerance between the followers of different faiths. The conference, however, did not sit well with some local clerics in Saudi Arabia, who regarded the meeting as an attempt to equate Islam with other religions. The Saudi king attended a second interfaith meeting in November in New York City. At the beginning of June, nearly two dozen official Saudi clerics made headlines of their own when they issued a statement that strongly condemned Shi'ite Muslims and alleged that Hezbollah's true intent was to wage war not on Israel but

rather on Sunni Muslims. Although the statement was broadcast in the Saudi media, it was not signed by Saudi Arabia's grand mufti. In November Saudi authorities banned two books of the late Sayyid Qutb, a prominent figure in the religio-political organization Muslim Brotherhood, and removed his works from school libraries.

Relations between Riyadh and Washington, D.C., witnessed a degree of friction during the year. U.S. Pres. George W. Bush visited the country in January and made a return trip in May; on both occasions he urged Saudi Arabia—as well as other OPEC states—to increase oil production in order to help bring high oil prices down. The Saudis, however, dismissed the U.S. position that crude oil supplies were responsible for the surge in oil prices, instead arguing that supply was meeting demand and that the high prices thus stemmed from reasons other than market fundamentals. Saudi Arabia did agree in May to raise oil production an additional 300,000 bbl per day but maintained that the move was in response to customer demand and not to the request by President Bush. In any case, this issue receded as oil prices plummeted later in the year. In mid-August there was relief in Riyadh after a U.S. federal appeals court upheld a lower court's decision to throw out a lawsuit brought by families of victims of the Sept. 11, 2001, terrorist attacks; the lawsuit had attempted to hold the Saudi government responsible for the attacks.

On the economic front, Saudi Arabia continued to enjoy ample revenues from the sale of crude oil. A joint-exploration venture between Royal Dutch Shell and the state-owned oil company Saudi Aramco in the vast Rub' al-Khali desert reportedly yielded a new natural gas discovery in August, although some industry sources cast doubt on the significance of the find. Also in August, Riyadh announced that nonresident foreign investors would be allowed to buy shares of domestic stocks through licensed Saudi intermediaries; this move was perceived as a major step toward opening up the Saudi stock market completely. On the negative side, there were reports of widening income inequality between the various classes that made up the Saudi population. Although inflation ran at 10% during the year, the government increased wages by only 5%. (MAHMOUD HADDAD)

SENEGAL

Area: 197,021 sq km (77,070 sq mi)
Population (2008 est.): 12,688,000
Capital: Dakar
Chief of state: President Abdoulaye Wade, assisted by Prime Minister Cheikh Hadjibou Soumaré

Despite the assassination in 2007 of Samsidine Dino Némou Aïdara—Senegalese Pres. Abdoulaye Wade's peace envoy in Casamance—government officials in 2008 insisted that the peace process in that troubled region would not be stopped. Hard-liners of the separatist Movement of Democratic Forces of Casamance (MFDC) launched a raid in early May on villagers who were attempting to bring in the cashew harvest. The rebels chopped off the ears of at least 16 villagers. The army began new operations near the Guinea-Bissau border. On May 20 the MFDC ambushed a patrol in Djibidione, killing two soldiers; an unknown number of MFDC adherents also died.

Poor rains and escalating global food prices resulted in high levels of malnutrition, particularly in the northeast. President Wade attacked the Food and Agriculture Organization policy of retaining 20% of the private donations that were destined for African countries

King Abdullah of Saudi Arabia walks beside King Juan Carlos of Spain upon arriving in Madrid on July 15 for a three-day interfaith conference.

facing a food crisis. He threatened to sue the FAO for having failed in its role of preventing famine. Approximately two million Senegalese were facing food shortages.

On July 29 the National Assembly voted to extend presidential terms from five to seven years, effective from 2012. Opposition parties severely criticized the move; the extension would not affect President Wade, however, who was due to stand down that year.

(NANCY ELLEN LAWLER)

SERBIA

Area: 77,498 sq km (29,922 sq mi)
(excluding Kosovo)

Population (2008 est.): 7,352,000

Capital: Belgrade

Chief of state: President Boris Tadic

Head of government: Prime Ministers

Vojislav Kostunica and, from July 7, Mirko Cvetkovic

International relations dominated the news in Serbia for much of 2008. On February 17 the southern province of Kosovo formally declared its independence from Serbia. (See *Kosovo*, above.) The United Nations in October approved Serbia's request that the International Court of Justice rule on the legality of Kosovo's independence. By year's end 53 countries had recognized Kosovo. Meanwhile, Serbia supported Serbs in northern Kosovo who challenged the new Kosovar government.

At the same time, Serbia made increased efforts toward European inte-

gration. The Serbian parliament ratified the Stability and Association Agreement, a required step toward consideration for European Union membership. The country also cooperated with the International Criminal Tribunal for the Former Yugoslavia (ICTY); in July Serbian authorities arrested Radovan Karadzic, the former leader of the Bosnian Serb Republic whom the ICTY had indicted in 1995 for war crimes. Prime Minister Mirko Cvetkovic noted that Serbia had extradited 44 out of 46 suspected war criminals sought by the ICTY and pledged to apprehend Bosnian Serb Gen. Ratko Mladic and Goran Hadzic, former leader of Croatia's Krajina Serbs. A report by the EU, however, noted that Serbia still needed to reform its judicial system, to combat widespread corruption, and to take stronger action against money laundering, drug abuse, and human trafficking. International monitors also criticized the country's lack of comprehensive antidiscrimination laws. There was a rising tide of attacks on Serbia's minorities in the Vojvodina and

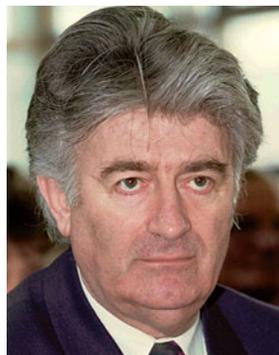

Sandzak regions. Moreover, according to the government, Serbia held 97,000 officially registered refugees—a record number for Europe—with an additional 500,000 people “facing hardships linked to refugee status.”

Pres. Boris Tadic, leader of the pro-EU Democratic Party (DS), was re-elected in February with 50.5% of the vote in the second round of polling. Tadic defeated Serbian Radical Party candidate Tomislav Nikolic, who, after being ousted by party leaders in September, went on to establish the Progressive Party. May parliamentary elections were won by the DS-led bloc For a European Serbia, which in July established a broader coalition with the Socialist Party of Serbia and several national minority parties (led by the country's Hungarians, Bosniacs, Croats, and Albanians) to form a pro-European government headed by Cvetkovic.

Observers expressed optimism that Tadic and the new coalition government would continue to push forward economic stimulus plans, which would aid the country's progress toward membership in the EU. Several economists called Serbia a “Balkan tiger” because it had its third consecutive year of growth of more than 6%. Monthly salaries and wages between January and October 2008 were 18.96% higher (4.63% higher in real terms) than they had been during the same period in 2007. Nevertheless, unemployment remained high during the year, at around 14%.

The most significant contributors to growth continued to be transportation, retail trade, and the financial, construction, and food processing industries. In August, Serbia requested €4.14 billion (about \$6.29 billion) in international loans for the development of a

Suspected war criminal Radovan Karadzic, the former leader of the Bosnian Serb Republic, is shown (left) while still in office in 1996, (centre) as a fugitive in an undated photo, and (right) while making his initial appearance before the International Criminal Tribunal for the Former Yugoslavia on July 31.

Healthy Life Magazine/AP

modern rail network. The project would extend the construction of a large motorway and rail network linking Serbia with Croatia, Hungary, Romania, and Bulgaria. Serbia also approved the sale of 51% of its major oil company, NIS, to the Russian energy giant Gazprom and agreed to host a portion of Russia's planned South Stream natural gas pipeline. Serbia's Zastava automobile manufacturer assembled its last Yugo in November, and Italy's Fiat began production in the country.

Commerce with EU countries made up more than half of Serbia's foreign trade. The privatization of state-owned companies, which were seen as financially unstable, impeded foreign trade and investment, however. The trade deficit rose 29.2% between January and November. (MILAN ANDREJEVICH)

SEYCHELLES

Area: 455 sq km (176 sq mi)
Population (2008 est.): 85,500
Capital: Victoria
Head of state and government: President James Michel

The Seychellois economy continued on its downward slump in 2008, a trend that had been exacerbated during the year by a spike in oil and commodity prices and the global food crisis. (See Special Report on page 182.) Amid growing concern over the economy's poor performance, the Seychelles government entered into a debt-restructuring program with the aim of alleviating the \$800 million debt burden, which accounted for 175% of the nation's GDP and was one of the highest in the world. Pres. James Michel represented the group of Small Island Developing States before the UN General Assembly in September; he appealed to the Assembly to reprioritize global environmental and trade agreements in order to reverse the developmental stumbling blocks many small island nations faced.

In late January, after having served more than 30 years on the bench, Vivekanand Alleear resigned his post as chief justice of the Supreme Court. Alleear was appointed to the island nation's highest judicial position in 1994. President Michel confirmed the

appointment of Judge Andrew Ranjan Perera as chief justice on August 5 upon the recommendation of the Constitutional Appointments Authority, the body responsible for proposing candidates for the vacant position. In other news, a spate of piracies off the Somalian coast beginning in January forced some 50 commercial and passenger ships to seek refuge in the Seychelles. (MARY EBELING)

SIERRA LEONE

Area: 71,740 sq km (27,699 sq mi)
Population (2008 est.): 5,969,000
Capital: Freetown
Head of state and government: President Ernest Bai Koroma

The economic situation in Sierra Leone remained grim in 2008. More than 70% of the country's population lived below the poverty line; the UN ranked the country as the second least developed in the world; and an estimated two-thirds of its youth were unemployed. The country had the world's highest rate of child and maternal mortality: one-quarter of the children died before their fifth birthday, and a woman's risk of dying during pregnancy or childbirth was one in eight.

Nevertheless, there were signs of progress. Despite isolated outbreaks of civil unrest, the political situation achieved sufficient stability for a reduction in the UN peacekeeping presence from 17,000 soldiers to fewer than 300. Orderly local government elections took place on July 5. Altogether 475 councillors were elected in 394 wards, with the ruling All People's Congress making a strong showing. Women's participation increased significantly; the percentage of women councillors rose from 11% to almost 19%. The new ward councils were confronted with the challenge of delivering badly needed services and equitable representation to constituencies still coping with a ruined infrastructure, massive displacement of people, and an entrenched traditional chieftaincy system. They also faced the uphill task of reforming outmoded colonial laws inherited from the British.

Corruption remained an intractable problem. The country slipped eight

places from 2007's placement in Transparency International's annually published Corruption Perception Index, dropping to the unenviable position of 158 (out of 180). To address this, the legislature in May empowered an independent anticorruption commission to investigate corruption cases and develop policy. Pres. Ernest Bai Koroma, who had won the 2007 election on an anticorruption platform, set an example for public officials by becoming the first Sierra Leonean head of state to declare his assets to the new commission. He also suspended Transport Minister Ibrahim Kemoh Sesay in August in connection with a drug investigation in which the minister's brother had been arrested. The investigation, which involved the seizure of some 700 kg (1,540 lb) of cocaine, with an estimated value of \$54 million, followed warnings from both the U.S. and the UN of collaboration in Sierra Leone between police and drug traffickers. Meanwhile, the Special Court for Sierra Leone asked the U.K. for help in locating an estimated \$650 million believed to have been looted by former Liberian president Charles Taylor, who was being tried at The Hague on charges that included the funding of rebels in Sierra Leone while he was in office. (LARAY DENZER)

SINGAPORE

Area: 707 sq km (273 sq mi)
Population (2008 est.): 4,839,000
Head of state: President S.R. Nathan
Head of government: Prime Minister Lee Hsien Loong

In Singapore 2008 would be remembered as a year with more than its regular share of memorable events. In June the city-state recorded its highest population level ever, at nearly 4.84 million. In August citizens rejoiced when three Singaporean table tennis players won the women's team silver medal at the Beijing Olympic Games. They were Singapore's first Olympic medalists since 1960. In another first, Prime Minister Lee Hsien Loong delayed by 24 hours the telecast of his annual state of the nation address rather than compete for viewers with the televised final

match. The next month the island republic became the site of auto racing's first Formula 1 Grand Prix night race.

On a more controversial note, February saw the escape of Jemaah Islamiyah terrorist Mas Selamat Kastari from the Whitley Road Detention Centre. It was the first time that anyone had escaped from the centre, which housed those detained under the Internal Security Act. A national uproar ensued, and there were calls for the resignation of the home affairs minister and for a detailed accounting of the event. A commission of inquiry was set up and reported its findings to Parliament in April.

Equally controversial was the Ministry of Health's introduction of a law, likely to be passed in 2009, to allow the monetary "reimbursement" of kidney transplant donors. The compensation would cover the donor's costs but would not be enough to induce donations.

Inflation surged in the first half of the year to a peak of almost 7%, a 25-year high. As the prices of basic foodstuffs such as rice and cooking oil escalated sharply, some hoarding began to take place. By the later part of the year, however, recession had replaced inflation as the biggest worry. Singapore became the first country in Southeast Asia to record a technical recession (defined as two fiscal quarters of contraction) in 2008; its extremely open and trade-dependent economy made it vulnerable to economic slumps in the

Spanish race car driver Fernando Alonso speeds past the Old Court House in Singapore on September 28 en route to winning the first Formula 1 Grand Prix race ever held at night.

Wong Maye-E/AP

United States and Europe. The government responded with characteristic swiftness and on November 21 announced a S\$2.3 billion (about U.S.\$1.5 billion) package to help save jobs and ease access to credit for companies. The measures were also characteristically hard-headed; grants for affected workers would be conditional on the workers' enrollment in courses to learn new skills. Even then the grants would be awarded on a discretionary, case-by-case basis. (CHUA LEE HOONG)

SLOVAKIA

Area: 49,034 sq km (18,932 sq mi)

Population (2008 est.): 5,401,000

Capital: Bratislava

Chief of state: President Ivan Gasparovic

Head of government: Prime Minister Robert Fico

The most important development for Slovakia in 2008 was the approval of the country's entry into the euro zone as of Jan. 1, 2009. Despite skepticism over Slovak inflation prospects, European Union authorities backed the move mid-year, and the final conversion rate was set at 30.126 koruna per euro, a much stronger rate than was originally expected. Although many Slovaks also feared that euro adoption could negatively affect inflation, the accession was a source of pride. Slovakia would be the second EU state in the former communist bloc—after Slovenia—to be admitted to the euro zone.

In February, Prime Minister Robert Fico received yet another boost from abroad when the Party of European Socialists (PES) readmitted his party, Smer ("Direction"). The PES, an umbrella group for left-wing parties within the EU, had suspended Smer's membership after the 2006 elections, when Fico formed a coalition government with

two parties—the Slovak National Party (SNS) and the People's Party—Movement for a Democratic Slovakia (LS-HZDS)—that were seen as outside the European mainstream. According to the PES, the decision to restore Smer's membership was based on Fico's demonstrated social-democratic orientation and commitment to minority rights. Hungary, however, continued to see the SNS's presence in the Slovak cabinet as a threat to Slovakia's ethnic Hungarians, and bilateral tensions flared in late 2008.

From a political standpoint, Slovakia was quite stable in 2008; the three ruling parties continued to register strong public support, while the opposition struggled to find its voice. The government was not without scandal, though; three ministers were replaced, and calls were made for the resignation of several others. Still, the opposition had few tools to use against the ruling coalition, particularly since the economy continued to perform relatively well, benefiting from reform measures taken during the 2002–06 term.

One issue of particular concern was a controversial press bill that the opposition believed would limit pluralism. The opposition parties vowed to block the ratification of the EU's Lisbon Treaty as long as the government insisted on the passage of the press bill. After several months of wrangling, however, the opposition's tactics failed; the parliament backed both documents in April, and one of the three opposition parties ended up voting in favour of the treaty.

In the first months after the international financial crisis struck, the Slovak economy held up well; several foreign investors ramped up production, and falling unemployment and rising wages drove household demand. Nevertheless, leading companies warned that the business environment was deteriorating under Fico. (SHARON FISHER)

SLOVENIA

Area: 20,273 sq km (7,827 sq mi)

Population (2008 est.): 2,029,000

Capital: Ljubljana

Chief of state: President Danilo Turk

Head of government: Prime Ministers Janez Jansa and, from November 21, Borut Pahor

Slovenia presided over the Council of the European Union (EU) during the first half of 2008; it was the first post-communist country to hold the EU presidency. During its tenure Slovenia led efforts to ratify the Lisbon Treaty, which would streamline the workings of the EU; to renew the Lisbon Strategy, an EU economic development plan; and to establish the Ljubljana Process, which would accelerate cooperation between European research institutions. Slovenia cochaired several EU summits during its presidency, including one with the United States on June 10 in Brdo pri Kranju. The meeting addressed climate change, trade, terrorism, and the diversification of energy sources.

Relations with neighbouring states were generally positive. On March 5 the Slovenian parliament recognized the independence of Kosovo. Slovenia's border disputes with Croatia remained unresolved, however.

The centre-left Social Democrats (SD) narrowly won the September 21 parliamentary elections, edging out Prime Minister Janez Jansa's Slovenian Democratic Party (SDS) by a slim 30.45% to 29.26%. The centre-right government had been weakened by the economic downturn and an inflation rate of 6%, as well as by reports from the Finnish Broadcasting Company that Jansa and other officials had taken bribes before approving the purchase of armoured vehicles from Finnish defense contractor Patria Oyj in 2006. (The Jansa government rejected the allegations, and the reports were under investigation in Finland and Slovenia.) The SD eventually formed a four-party coalition government, and SD leader Borut Pahor was named prime minister.

The global financial crisis dominated economic news, with the Slovenian stock-exchange index SBI 20 plunging about 67% during the year. In June the Vienna Stock Exchange acquired an 81% stake in the Ljubljana Stock Exchange. Agricultural production suffered as severe summer storms damaged an estimated 20% of farmland across Slovenia.

The year saw several developments in the realm of higher education. The Euro-Mediterranean University, an international network of universities, was founded in Portoroz on June 9. On September 11 the Slovenian Bishops' Conference inaugurated the Catholic Institute, expected to evolve into Slovenia's first Roman Catholic university. The New University, a private institution based in Nova Gorica and

Brdo pri Kranju, was established on September 29.

In other news, at the Summer Olympics in Beijing, Primož Kozmus earned a gold medal in the men's hammer throw competition. It was Slovenia's first Olympic gold in a track-and-field event. (JOSEPH VALENCIC)

SOLOMON ISLANDS

Area: 28,370 sq km (10,954 sq mi)

Population (2008 est.): 517,000

Capital: Honiara

Chief of state: Queen Elizabeth II, represented by Governor-General Sir Nathaniel Waena

Head of government: Prime Minister Derek Sikua

Solomon Islands Prime Minister Derek Sikua's new government enjoyed rare stability in 2008, with 38 of the 48 MPs agreeing to support his development program and to refrain from no-confidence votes. In an indication of growing support for both his broad-based political program and his personal leadership style, Sikua's government easily defeated its first no-confidence motion in August.

The Regional Assistance Mission to Solomon Islands (RAMSI) continued to guarantee the country's security. RAMSI also provided technical assistance to rebuild the Solomons' governance structures, civil service, and economy, all of which were proceeding well. Relations between Australia, a major aid donor, and the Solomon Islands government improved in 2008 as new governments assumed power in both countries. Structural-adjustment policies promoted by aid donors were beginning to create difficulties, as the new schemes would require a greater degree of fiscal discipline on the part of government agencies that were unaccustomed to such restraint.

In early September former prime minister Sir Allan Kemakeza's two-month jail sentence, handed down in late 2007 for crimes committed in 2002 while he was prime minister, was increased to six months by Chief Justice Sir Albert Palmer. Kemakeza had been convicted on charges that included "demanding with menace, intimidation

and larceny" in regard to authorizing militants to attack and seize vehicles owned by an Honiara law firm, and Palmer's ruling was in response to the prosecution's appeal that the original sentence was inadequate. Kemakeza also was stripped of his current position as minister for forestry, environment, and conservation and was deprived of his seat in Parliament. (CLUNY MACPHERSON)

SOMALIA

Area: 637,657 sq km (246,201 sq mi), including the 176,000-sq-km (68,000-sq-mi) area of the unilaterally declared (in 1991) and unrecognized Republic of Somaliland

Population (2008 est.): 8,956,000 (including roughly 3,700,000 in Somaliland); at the beginning of the year, more than 450,000 refugees were in neighbouring countries, Europe, or the United States

Capital: Mogadishu; Hargeysa is the capital of Somaliland

Head of state and government: Somalia's transitional government comprised Presidents Abdullahi Yusuf Ahmed and, from December 29, Sheikh Aden Madobe (acting), assisted by Prime Minister Nur Hassan Hussein

Though news about Somalia had largely disappeared from the headlines in 2008, the country remained wracked by violence and anarchy. In 2007 Somalia had become the focus of international attention when war broke out between the country's Transitional Federal Government (TFG) and the Islamic Courts Union (ICU), a fundamentalist Islamic movement that had seized control of much of the country. The ICU was poised to topple the TFG, but the Ethiopian army, with support from the United States, intervened and routed the ICU's militias. Ethiopian troops remained in the country, while remnants of the ICU joined forces with local clans and other armed groups to mount an insurgency. An African Union peace-keeping force, composed of 2,600 troops from Uganda and Burundi, continued to operate in Somalia, but that force had been unable to stop the fighting and was limited to providing VIP escorts and guarding the presidential residence, airport, and seaport in Mogadishu, the country's capital.

Off the coast of Somalia in October, pirates and their hostages wait on the deck of a captive Ukrainian cargo ship following a request by the U.S. Navy to check on the hostages' health.

Jason R. Zalasky, HO—U.S. Navy/AP

The fighting produced a massive humanitarian disaster. Most of the violence was concentrated in Mogadishu, where mortar fire, roadside bombs, and armed ambushes became a daily occurrence and there were occasional suicide bombings. An estimated 20,000 residents fled the city monthly, and as many as one person in eight in the southern and central regions of the country was a refugee. In March 2008 the International Committee for the Red Cross reported that many of the refugee families were surviving on less than one meal a day. Food prices in Somalia were soaring, partly owing to the emerging global food crisis and partly because the country, which was heavily dependent on agriculture, was in the midst of a severe three-year drought. International and Somali aid workers suffered increasing attacks from combatants on all sides. Somalia was one of the most dangerous humanitarian operations in the world.

Somalia had been without a functioning government since the collapse in 1991 of Mohammed Siad Barre's dictatorship, and prospects for restoring law and order in the country remained bleak. In August 2008 the TFG and representatives of the insurgency signed the Djibouti Agreement, a UN-brokered peace treaty calling for a cessation of hostilities, withdrawal of Ethiopian forces, and implementation of a UN peacekeeping force. Factions on both sides strongly opposed the agreement, and in September the UN Security Council voted against sending peacekeepers to Somalia. Although an October accord sought to resuscitate prospects for peace, it was hampered by weak language and strong opposi-

tion among some insurgency factions. As part of an internal power struggle, Pres. Abdullahi Yusuf Ahmed in December attempted to replace Prime Minister Nur Hassan Hussein. The TFG parliament sided with Nur, however, and on December 29 Yusuf resigned and was replaced as acting president by Sheikh Aden Madobe, speaker of the parliament.

The United States initially supported the Ethiopian occupation out of fear that Somalia might become a haven for terrorists. That strategy apparently backfired as the ongoing violence led to rising radicalism and anti-Western sentiment among a populace that increasingly blamed Ethiopia and its U.S. backers for the continuing strife. All of these developments gained little attention in the international press, which instead focused its coverage of Somalia primarily on an increase of piracy off the Somalian coast, which resulted in the hijacking of several international shipping vessels. (EBEN KAPLAN)

SOUTH AFRICA

Area: 1,220,813 sq km (471,359 sq mi)

Population (2008 est.): 48,783,000

Capitals (de facto): Pretoria (executive); Bloemfontein (judicial); Cape Town (legislative)

Head of state and government: Presidents Thabo Mbeki, Ivy Matsepe-Casaburri (acting) on September 25, and, from September 25, Kgalema Motlanthe

Domestic Affairs. South Africa struggled with "two centres of power" in the country in 2008, following the election of Jacob Zuma (*see* BIOGRAPHIES) as president of the African National Congress (ANC) to replace South African Pres. Thabo Mbeki at the ANC's 2007 conference in Polokwane. The situation was brought to a dramatic end in September 2008, however, when President Mbeki was forced by a decision of the ANC national executive committee (NEC) to resign.

In July Kgalema Motlanthe, the deputy president of the ANC, was appointed to the cabinet. The move was widely seen as preparing for the transition in 2009 from an Mbeki to a Zuma presidency and establishing a new candidate for president should Zuma be unable to assume the position because of his legal difficulties.

In September the Natal High Court, while not pronouncing on the merits of the case against Zuma on charges of corruption and fraud, decided that the prosecution had acted unconstitutionally in not consulting Zuma before recharging him and also significantly upheld Zuma's claims that there had been political interference from the presidency in the prosecuting process. Zuma supporters took this as a mandate for the closure of the corruption case against Zuma and were incensed when the national prosecuting authority declared its intention to appeal. Hence the NEC decision. Mbeki stepped down from the presidency, and on September 25, Motlanthe was elected by Parliament to act as head of a caretaker government until the elections, scheduled for 2009.

A majority of Zuma supporters had been elected in January to the 28-member national working committee of the ANC. In July the premiers of the Western and Eastern Cape, Mbeki supporters, were replaced by Zuma supporters. Several members of Mbeki's cabinet resigned with him in September and were not reappointed by Motlanthe. Mbeki also appealed the decision of the Natal High Court, on the grounds that it had been made without giving him an opportunity to state his case. Former defense minister Mosiuoa ("Terror") Lekota and former Gauteng province premier Mbhazima Shilowa formed a breakaway party from the ANC, the Congress of the People, in November. Lekota was elected party leader in December.

Prior to consideration of Zuma's case by the Natal court, the atmosphere around it had become highly charged,

Simphiwe Nkwali/AP

An anti-immigrant mob, armed with hand-carved weapons, runs riot in a squatter settlement south of Johannesburg on May 18.

with attacks by Zuma supporters on the judiciary and the ANC Youth League president declaring that “we are prepared to kill for Zuma.” Post-Polokwane ANC policy decisions generally reflected the views of the Zuma camp, including that the Tripartite alliance (which included the Congress of South African Trade Unions [COSATU]) and the South African Communist Party (SACP) rather than the ANC should be the “strategic centre” of decision making and emphasizing a more interventionist state. It remained unclear, however, whether SACP-COSATU economic policies—such as abandoning inflation targeting, allowing Parliament to amend money bills, abandoning budget surpluses, removing the value-added tax (VAT) on basic foods, limiting the role of the treasury to financial management rather than broader planning, and imposing a moratorium on privatization and outsourcing—would prevail.

In January the country was afflicted with severe power outages, which forced the cessation of underground work at all mines for five days. The country’s main power supplier, Eskom, which had run out of reserve capacity because government policies in the 1990s had prevented construction of new power stations, continued its planned “load shedding” (cutting demand by shutting off power). The government called for a 10% national cutback in the use of electricity, and there was talk of rationing its use, but in early May Eskom suddenly abandoned load shedding.

In his state of the nation speech in February, Mbeki apologized for the

power outages and promised to focus on building the country’s infrastructure. He also set a target of providing digital broadcasting for half the population by the end of the year and pledged to make improvements in poverty eradication. Though Mbeki used the phrase “business unusual,” opposition parties said that the thrust of the speech was business as usual.

Disputes between supporters of Zuma and those of Mbeki affected the key institutions of the new South African democracy: the police force, the National Prosecuting Authority, the South African Broadcasting Corp., and the judiciary. Early in January the commissioner of police, Jackie Selebi, was arrested on corruption charges. He unsuccessfully attempted to preempt this by asking the court to set aside the warrant. Selebi, who was granted an extended leave of absence, also resigned as head of Interpol. This action produced renewed questioning of the removal by Mbeki in 2007 of National Prosecuting Authority head Vusi Pikoli, who claimed that he was dismissed to prevent the arrest of Selebi. During the year Frene Ginwala, former speaker of the House, conducted an investigation into whether Pikoli was fit to hold office. The state accused him of having obtained plea bargains from criminals, which constituted a threat to national security, and of having suffered a breakdown of relations with the justice minister.

In October the Scorpions, a specialized crime-busting unit attached to the National Prosecuting Authority, was

dissolved. The ANC claimed that the unit was largely staffed by former apartheid security police. The Scorpions, which were merged into the police force, had come under criticism for the handling of corruption investigations of Zuma and Selebi.

In May a spree of violence broke out in Johannesburg and other South African cities, where immigrants (mainly from Zimbabwe) were beaten, stabbed, shot, or burned alive by mobs. The ANC was deeply embarrassed by the outbreak, especially since many apartheid victims had sought shelter in neighbouring countries during that period of South Africa’s history.

Meanwhile, Nelson Mandela, who ushered in democracy in South Africa, celebrated his 90th birthday on July 18. A rock concert in celebration was held in London on June 27, together with numerous other events.

Economy. South Africa’s GDP growth in the second quarter of 2008 was 4.9%. This was a huge improvement over the first quarter’s 2.1%, which resulted from Eskom’s load shedding, but it represented a decline from 2007 (5.1%). In the third quarter growth fell to 0.2%. Manufacturing fell by 0.1%, while the unemployment rate remained steady at about 23% through September. In October Finance Minister Trevor Manuel predicted that South Africa’s GDP growth, which had averaged about 5% annually since 2003, would drop to only 3.7% in 2008 and closer to 3% in 2009.

The midyear spike in world oil prices drove up the price of gasoline by 42.7% in the 12 months to July. This—combined with the hike in food prices (17% in the 12 months to May) and electricity (27.5% January to July)—pushed inflation to 10.1% in March, 11.6% in June, and 13.6% in August. The national current account deficit surged to 8.9% in the first quarter before retreating to 7.3% in the second. In November Motlanthe headed the South African delegation that attended the emergency Group of 20 summit in Washington, D.C., to discuss the global financial crisis that began in September.

Foreign Relations. President Mbeki attempted to mediate between Zimbabwean Pres. Robert Mugabe and the opposition in the establishment of a national government. Mbeki came under attack at home and abroad, however, for his apparent bias toward Mugabe. In April South African dockworkers refused to unload arms bound for Zimbabwe from a Chinese ship.

(MARTIN LEGASSICK)

SPAIN

Area: 505,990 sq km (195,364 sq mi)

Population (2008 est.): 45,661,000

Capital: Madrid

Chief of state: King Juan Carlos I

Head of government: Prime Minister José Luis Rodríguez Zapatero

Almost exactly four years after the terrorist attacks on Madrid that helped to bring the Socialist Workers' Party to power in 2004, Spanish Prime Minister José Luis Rodríguez Zapatero won a second term in the general elections held on March 9, 2008. The Socialists claimed 43.6% of the vote and 169 of the 350 seats in the Congress of Deputies. Many commentators attributed their convincing win to negative as much as positive voting. While many voters were convinced by the Socialists' good record on the economy and the promotion of civic and social rights, as well as by Zapatero's consensual style of political leadership, others voted above all against the conservative Popular Party (PP) and its very aggressive form of opposition. Nonetheless, the PP and its leader, Mariano Rajoy, could take some solace from the increase in the party's share of the vote to 40.1%, up from 37.6% in 2004, and in the number of its parliamentary seats from 148 to 153.

In light of the election results, Zapatero forswore the option of negotiating stable parliamentary alliances with the regional nationalist parties and the United Left, choosing instead to form a minority government dependent on ad hoc agreements with individual parties to legislate. While continuity was the predominant note in policy terms, one exception was a tougher line on immigration. This was exemplified by the introduction of a scheme designed to encourage unemployed migrants to return to their countries of origin—a policy shift that immigrant organizations branded as mere pandering to voters' concerns about unemployment.

Electoral defeat brought even more significant changes in the PP. Almost overnight, Rajoy affirmed his commitment to the "reformist centre" and exhibited a newfound willingness to engage in bipartisan policies. Despite vociferous opposition from far-right-wing members of the party and their al-

Mohammed Zaatari/AP

lies in the media, Rajoy was reelected leader of the PP at a national congress in June, when he took advantage of the occasion to oust those figures most closely associated with the party's hard-line past.

The new, less-confrontational tone of Spanish political life soon brought tangible results. In September, after a nearly two-year deadlock, the two main parties finally reached an agreement on the renewal of the judiciary's governing body. Even more significant, the Socialists and the PP also found common ground in the fight against the Basque separatist organization Euskadi Ta Askatasuna (ETA). The return to a cross-party antiterrorist policy was made possible not just by the PP's tactical shift but also by the Socialists' heightened resolve to defeat rather than negotiate with ETA following the end of the organization's 14-month cease-fire in June 2007. In December 2007, 47 people were sentenced to up to 20 years in prison in the largest-ever trial of ETA suspects. Two months later two political parties associated with ETA were suspended (followed later by their illegalization) and thereby prevented from standing in the March general elections. French police detained the alleged top leader of ETA in May, the organization's alleged military chief in November, and, just weeks later, the man reported to have succeeded as mil-

itary chief. The arrests confirmed the benefits of closer cooperation between French and Spanish authorities that was facilitated by a meeting between Zapatero and French Pres. Nicolas Sarkozy at the beginning of 2008.

For the first time in years, however, the economy replaced terrorism as the main concern among Spaniards. This was hardly surprising, given the speed and depth of the slump, which saw GDP growth rates of 0.3% in the first quarter and 0.1% in the second give way to negative GDP growth (-0.2%) in the third quarter. By the end of the year, after another quarter of negative GDP growth and with unemployment running at nearly 13%, Spain was officially in a recession. The European Commission predicted year-on-year growth of just 1.3% for the Spanish economy in 2008 and -0.2% in 2009. Unlike in many other countries, the epicentre of Spain's crisis was not in the financial sector—which was spared in part by close regulation by the central bank—but in construction. With the collapse of the real-estate bubble, the sector was expected to shrink by more than 5% over the course of the year, forcing many construction companies and developers into receivership and putting hundreds of thousands of employees out of work. Virtually the only good news on the economic front was a sharp fall in inflation toward the

end of the year from 4.5% in September to an estimated 2.4% in November.

Sports provided some much-needed cause for celebration. The summer saw Spain's surprise association football (soccer) triumph in Euro 2008 as well as tennis ace Rafael Nadal's triumphs at the French Open, Wimbledon, and the Olympic Games in Beijing. Nadal attained the world number one tennis ranking in August. (JUSTIN BYRNE)

SRI LANKA

Area: 65,610 sq km (25,332 sq mi)
Population (2008 est.): 19,394,000
Capitals: Colombo (executive and judicial); Sri Jayawardenepura Kotte (legislative)
Head of state and government: President Mahinda Rajapakse, assisted by Prime Minister Ratnasiri Wickremanayake

Sri Lanka's civil war, which began in 1983 and had claimed more than 70,000 lives and caused untold suffering, intensified in 2008, making the 2002 cease-fire agreement between the government and the rebel Liberation Tigers of Tamil Eelam (LTTE) a dead

Internally displaced ethnic Tamils in the LTTE-held town of Kilinochchi protest the imminent departure of international aid agencies on September 12, four days after the Sri Lanka government ordered the agencies to leave all rebel-held territories.

AP

letter. The government launched a renewed offensive and captured extensive areas of formerly rebel-controlled territory in the north and northeast of the country. The LTTE fought back fiercely by executing yet another wave of suicide bombings throughout Sri Lanka and by carrying out attacks on government naval forces. By late in the year, the government was claiming (to widespread acclaim in the Sinhalese south) that final military victory was near, while skeptics contended that only a political settlement could provide a lasting solution. Settlement involving substantial devolution of power to the regions seemed unlikely. Military setbacks not only weakened the position of the LTTE but made it even less likely that the organization would soften its long-standing demand for complete independence.

Pres. Mahinda Rajapakse strengthened his grip on Sri Lankan politics during the year. His United People's Freedom Alliance (UPFA) won three provincial elections, whereas the opposition United National Party (UNP) appeared to be in disarray. Although the UPFA did not command a majority in Parliament, it continued to receive support from its Marxist ally, the People's Liberation Front (JVP).

Although Sri Lanka had maintained reasonably high rates of economic growth throughout the civil war, the rate was much lower than what could have been expected in the absence of conflict. Economic growth in 2008 was anticipated to exceed 6%. Exports of garments were flat, but tea production enjoyed an unexpectedly good year, and remittances were up from Sri Lankans working abroad. As a result of large government deficits and rising world prices for petroleum as well as rice and other food, inflation rose past 20%. There remained a large balance-of-payments deficit and a low rate of private investment, and the rupee was under pressure. In an effort to win the loyalty of residents in areas recently freed from LTTE control, development of the Eastern province was advocated.

(DONALD SNOGRASS)

SUDAN, THE

Area: 2,505,810 sq km (967,499 sq mi)
Population (2008 est.): 39,445,000, including more than 200,000 refugees in Chad
Capital: Khartoum
Head of state and government: President and Prime Minister Lieut. Gen. Omar Hassan Ahmad al-Bashir

Just prior to the beginning of 2008, the UN formally assumed the peacekeeping role in The Sudan's western province of Darfur in conjunction with the African Union force already present in the region. (See Sidebar.) The new force, UN-AMID, was intended to be heavily reinforced, but owing to the reluctance of UN member states to supply personnel and equipment, its numbers had reached only about 12,400 by the end of the year, inadequate for the mission's purpose. Moreover, the Sudanese government restricted the movements of the new force. Raids by government aircraft and militia ground forces on suspected rebel bases—as well as on camps for displaced persons and even on the peacekeeping troops themselves—continued throughout the year. Pres. Idriss Déby of Chad, The Sudan's western neighbour, also accused the Sudanese government of supporting Chadian rebels who in early February laid siege to Chad's capital city, N'Djamena.

The tables were briefly turned in May when members of a Darfur rebel group, the Justice and Equality Movement, staged a daring raid on the town of Omdurman, on the outskirts of Khartoum. Sudanese Pres. Omar al-Bashir (see BIOGRAPHIES) accused Chad of supporting the attack and severed diplomatic relations with his neighbour, though they were restored later in the year. The following month the International Criminal Court (ICC) declared the Sudanese government responsible for the situation in Darfur, and on July 14 the ICC's chief prosecutor recommended that an arrest warrant be issued for Bashir for crimes against humanity in the war-torn province. There was a huge protest demonstration in Khartoum in response to the recommendation, and when the issue was raised in the UN General Assembly in September, virtually all African countries supported

Combating the Crisis in Darfur

In 2008, five years after conflict broke out in the Darfur region of The Sudan, the prospect seemed dim for a political settlement to end the war that had killed as many as 300,000 people. In early 2003, soon after local rebel groups took up arms against the Khartoum-based regime of Sudanese Pres. Omar al-Bashir (see BIOGRAPHIES), long-standing tensions in Darfur erupted into what the U.S. government later described as the first genocide of the 21st century. The rebels felt marginalized by their government, saw that other rebels in southern Sudan were likely to be granted major economic and political concessions as their own civil war against Khartoum ran down, and realized that they themselves were being left out in the literal and figurative desert with no hope of similar concessions or improved conditions. An oil-fueled economic boom was producing skyscrapers in Khartoum, while Darfur continued to exist largely without roads, hospitals, or a sufficient education system and was suffering through a brutal drought.

Following a few initial conventional battles with new rebel groups in Darfur, the Khartoum regime switched tactics and began to fight a hate-fueled counterinsurgency war in Darfur by funding, arming, and unleashing proxy militias known as Janjaweed—made up of fighters from nomadic groups who identified themselves as “Arab”—on villages whose people identified themselves as “African.” This strategy depended on exploiting this self-proclaimed racial divide in Darfur, and it worked, despite the fact that both “Arab” and “African” Darfurians were predominantly Muslim, spoke Arabic, and shared the same skin tone. The result was an undisciplined paramilitary campaign that targeted men, women, and children.

In addition to the hundreds of thousands killed since the beginning of the campaign, approximately 2.5 million more were forced from their homes and into the Sahara. Horrific stories of mass rape, murder, and unspeakable atrocities became commonplace. Survivors gathered in camps for internally displaced persons throughout Darfur and in refugee camps across the border in eastern Chad and in the Central African Republic. (See MAP on page 468.)

For its part, the international community reacted to different aspects of the crisis with varying degrees of success. The biggest bright spot was the Herculean effort put forth by governmental and nongovernmental aid agencies, providing food, medicine, shelter, and basic services to the millions of Darfurians in need. More than 13,000 international and Sudanese aid workers built the world’s largest humanitarian life support system in Darfur, saving countless lives that otherwise would have been lost to starvation and disease.

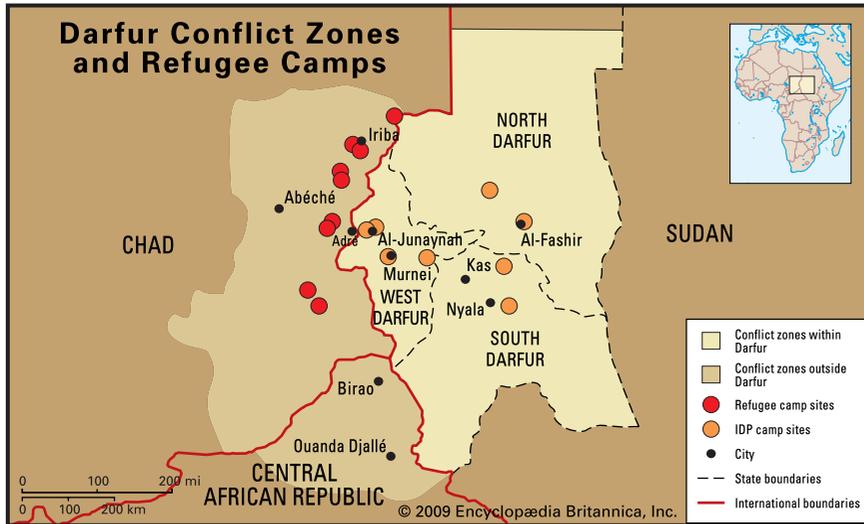

Less successful were international efforts to reduce the threat of physical violence to Darfuri civilians and to achieve a lasting political solution to end the conflict. To achieve the former, the African Union (AU) in 2004 deployed a 7,400-strong peacekeeping force, the African Union Mission in The Sudan (AMIS). When AMIS went into Darfur, the rest of the international community stood by and watched; once troops had been deployed, they helped protect women from rape, but it soon became clear that AMIS lacked the

manpower, equipment, funding, and mandate to truly protect civilians and help restore order to an area as large as Darfur (roughly the size of France). On Aug. 31, 2006, the UN Security Council authorized the generation and deployment of a large peacekeeping force with Resolution 1706.

The Sudanese government, however, rejected Resolution 1706, effectively putting the UN between a rock and a hard place: in the entire history of the UN, no peacekeeping mission had ever failed to deploy once authorized by the Security Council. On the other hand, only one mission—the “police action” better known as the Korean War—had ever been deployed over the objection of a sovereign host government. A compromise was sought to bridge the impasse, and the result was a joint peacekeeping force known as the hybrid United Nations/African Union Mission in Darfur (UNAMID), authorized by the Security Council on July 31, 2007. While initial command and control elements of UNAMID began augmenting AMIS in the fall of 2007, UNAMID did not formally take over for AMIS and assume responsibility for peacekeeping in Darfur until Dec. 31, 2007. President Bashir initially agreed in writing to accept the new force, but reports soon began to emerge of efforts by the Sudanese government to obstruct the deployment of UNAMID troops and to limit their movements in the province. Also posing an impediment to progress in the region was the fact that the vast majority of the proposed 26,000 UNAMID peacekeepers and police were not yet on the ground, with the force’s troop and military personnel level reaching 12,374 by the close of 2008.

Efforts to arrive at a lasting political solution have arguably fared worse. Several cease-fires were adopted, celebrated, promptly violated, and thus rendered moot. More frustrating still were the nearly 20 months of peace talks that took place in Abuja, Nigeria, culminating on May 5, 2006, in the partial signing of the Darfur Peace Agreement, or DPA. The Sudanese government and only one of what were then just three rebel factions signed the agreement, and with the exception of a few initial concessions to the one rebel signer, almost none of the agreement was implemented. After the signing and subsequent collapse of the DPA, the original three rebel factions split into more than a dozen. The international community, operating through a combined UN-AU effort, regrouped, pooled their efforts, and organized new peace talks that began in Surt, Libya, on Oct. 27, 2007, but these stalled after representatives of several leading rebel factions refused to participate in the talks. A similar effort in late 2008 to resume peace talks in Doha, Qatar, has thus far yielded no tangible results. Meanwhile, as the international community moved forward, albeit slowly, on fully deploying UNAMID, the violence in Darfur continued, including attacks by rebels and, in some instances, government forces on UNAMID peacekeepers, government and Janjaweed attacks on villages thought to support rebels, and interrebel fighting. As always, Darfuri civilians have been caught in the middle, with the humanitarian life-support system that sustains them growing ever more fragile and the memories of their former, peaceful lives growing ever more faint.

(ALEX MEIXNER)

This map shows the extent of the Darfur conflict within The Sudan and neighbouring countries, as well as the locations of camp sites for refugees and internally displaced persons (IDPs).

Bashir's effort to halt the proposed indictment against him. Nevertheless, the ICC persisted with its investigations, and in December the chief prosecutor urged all members of the UN Security Council to be prepared to act in unison in response to a possible early decision by the ICC judges to call for arrests. In the meantime, Bashir undertook a peacemaking mission in Darfur, although antirebel attacks continued, and in August a powerful incursion by government troops in northern Darfur was launched to prepare the way for oil exploration by Chinese prospectors.

While international attention was largely focused on Darfur, events in the border region between northern and southern Sudan proved an equally serious threat to the country's stability. In particular, armed northern nomads began to prevent southerners displaced during the civil war from returning to their homes in the border area. This was interpreted as a northern plot to distort a census scheduled for April in order to enhance the north's claims to the oil-rich border region and especially to Unity state. On the south's insistence, the census was postponed, but in May the border town of Abyei was devastated by an attack by a brigade of troops loyal to the northern National Congress Party. A few days later the residents of Abyei reassembled to assert their loyalty to the south. Meetings between representatives of both northern and southern Sudan to find a solution to the conflict proved unavailing.

(KENNETH INGHAM)

SURINAME

Area: 163,820 sq km (63,251 sq mi)
Population (2008 est.): 516,000

Capital: Paramaribo

Head of state and government: President Ronald Venetiaan, assisted by Prime Minister Ram Sardjoe

Although GDP growth figures were lowered during the final quarter of 2008, Suriname enjoyed a modestly successful year in both political and economic terms. Pres. Ronald Venetiaan, an experienced political navigator, managed to keep his querulous seven-party coalition intact. Tensions were eased following the decisions by two former leaders of the country—dictator and accused murderer Dési Bouterse and the infamously inept president Jules Wijdenbosch—to withdraw from the presidential campaign, opening the door for the opposition parties to coalesce into a new coalition, the National Democratic Platform. Bouterse's trial was again delayed.

The external debt ratio was the third lowest in the Caribbean area. Production from onshore oil fields reached the level of domestic consumption. Agriculture, with the exception of the troubled rice industry, performed well. Investment in the key mining sector was mixed. BHP Billiton, the world's largest

mining company, withdrew its major plan to develop bauxite extraction from western Suriname. This might be offset, however, by a potential new investment by the Canadian-based enterprise IAMGOLD Corp. Despite the work of a competent justice minister, long-entrenched narcotics-empowered organized crime and illegal gold mining maintained their grip on the underground economy.

In the realm of foreign affairs, friction persisted with neighbouring Guyana over a long-standing border dispute regarding the Courantyne River. The level of tension had been reduced significantly, however, following the settlement in 2007 of a more contentious maritime zone dispute with Guyana.

(JOHN W. GRAHAM)

SWAZILAND

Area: 17,364 sq km (6,704 sq mi)

Population (2008 est.): 1,018,000

Capitals: Mbabane (administrative and judicial); Lozitha and Ludzidzini (royal); Lobamba (legislative)

Chief of state: King Mswati III, assisted by Prime Ministers Absalom Themba Dlamini, Bheki Dlamini (acting) from September 18, and, from October 23, Barnabas Sibusiso Dlamini

Poverty, hunger, unemployment, the HIV/AIDS epidemic, and political uncertainty remained the major challenges in Swaziland in 2008. Progressive political groups continued to demand a transition to a multiparty democracy but were disregarded by the government. The cost of living was high, and energy and food prices increased over the previous year. In June, King Mswati III summoned the Swazi people to a national meeting in Ludzidzini to discuss possible solutions to the economic challenges. The nation's poverty, exacerbated by extravagant spending by the king and his wives, was also the subject of several protests in August and early September prior to lavish government-held celebrations of the king's 40th birthday and the 40th anniversary of the country's independence.

Parliamentary elections—the first to be held under the 2006 constitution—took place on September 19. They re-

Siphiwe Sibeko—Reuters/Landov

King Mswati III reviews his honour guard at the beginning of a ceremony on September 6 marking his 40th birthday and the 40th anniversary of Swaziland's independence.

portedly met international standards, but official observers cast doubt on the credibility of the results because of the country's restrictions on political activity. In other news, Prime Minister Barnabas Sibusiso Dlamini announced on November 14 that the Suppression of Terrorism Act of 2008 would be enforced to uproot terrorist elements in the country.

Swaziland's per capita GDP was \$2,903. The 2008–09 budget projected a deficit of 1.4% of GDP and indicated that inflation would rise beyond 12% in 2008. Almost 70% of the population was living below the poverty line. The rate of HIV/AIDS infection was reported to be 26% among Swazi adults aged 15–49 and 19% overall.

(NHLANHLA DLAMINI)

SWEDEN

Area: 450,295 sq km (173,860 sq mi)

Population (2008 est.): 9,214,000

Capital: Stockholm

Chief of state: King Carl XVI Gustaf

Head of government: Prime Minister Fredrik Reinfeldt

In 2008 Sweden began the year with a period of high and sustained economic growth but later experienced a marked

slowdown in line with the global economic and financial downturn. The decline could be seen over the whole economy, with a sharply lower stock market, falling housing prices, diminishing pension funds, rising unemployment, and a weakening currency. In the period 2004–07 GDP on average had grown more than 3% annually—well above the European average—but Finance Minister Anders Borg cut the growth forecasts to a meagre 1% for 2008. Predictions pointed toward even lower future growth, with the central bank assuming zero growth for 2009.

The tougher times ahead could also be perceived in

the rising number of Swedes who lost their jobs during the autumn. It came as a shock for the entire country when automobile manufacturer Volvo (a subsidiary of the American Ford group) in October notified 3,300 blue- and white-collar workers that their jobs were being eliminated. Unemployment in Sweden reached 6%, and forecasters such as the trade union confederation (LO) expected the figure to rise to 7–8% in the coming years.

The global financial crisis forced the Swedish government in October to present a rescue package for the banking system amounting to no less than 1.5 trillion kronor (about \$200 billion). The package was designed to guarantee bank borrowing and to create a government fund to take direct stakes in the banks. Some of the banks, including Swedbank and SEB, were singled out as potential recipients of state aid because of their large exposure to loans in the Baltic states, where credit losses were expected to mount. All four major Swedish banks showed surprisingly good profits in their reports for the first nine months of 2008, however, and it was unclear how much—if any—public money would be spent in the end.

Housing prices fell 10–20% in 2008, depending on location and price, and further declines were widely expected. The Swedish stock market plunged some 40%, a historically high figure on top of the 7% slide in 2007. These developments made millions of Swedes feel the economic pain, as more than 50% of Swedish households owned

their homes, and 75% of the population owned shares either directly or through mutual funds. Almost all pension schemes—state-sponsored and private—would also be affected by the financial downturn.

The centre-right coalition government under Prime Minister Fredrik Reinfeldt continued to fall in the polls, receiving 15–20% less support than its political opposition—the Swedish Social Democratic Party (SAP), with its allies in the Green Party (MP) and the Left Party (VP). According to one poll published in the autumn, more than 60% of the electorate anticipated a new government in the next election, due in 2010. SAP leader Mona Sahlin declared a willingness to form a coalition government with the MP and to include the VP if they could agree on economic policies. This was the first time in more than 50 years that a social democratic leader had favoured the idea of a coalition government.

The government tried to rally its supporters, launching a public relations campaign that highlighted its legislative program and showing a desire to fortify the four-party coalition. The government pursued its reforms of the tax system, cutting both income and corporate taxes. Reinfeldt, who had been criticized for being too absent from the public forum, spent most of his time focusing on the domestic political arena. The government's handling of the financial crisis won it public approval, and the gap in the polls narrowed to about 5% at the end of the year. Reinfeldt was expected to be more visible in European politics in the second half of 2009 after Sweden assumed the rotating presidency of the EU. (MARTIN HAAG)

SWITZERLAND

Area: 41,284 sq km (15,940 sq mi)

Population (2008 est.): 7,617,000

Capital: Bern

Head of state and government: President Pascal Couchepin

The legendary stability of the Swiss banking system was shaken in 2008 when the government had to intervene in October with a package of nearly \$60 billion to rescue the country's biggest

bank, UBS AG. Both UBS and the second largest bank, Credit Suisse, were hard hit by bad loans originating in the United States. UBS Chairman Marcel Ospel resigned in April after the bank reported a first-quarter net loss of 12 billion Swiss francs (about \$12 billion). The other 300-odd banks in Switzerland were less affected, thanks to strong deposits. With a high rate of gross national savings—more than one-third of GDP—non-EU-member Switzerland looked set to weather the global economic turmoil better than many European neighbours.

The government defended banking-secrecy laws against EU attempts to uncover the identity of tax evaders who had stashed their money in Swiss accounts, but Bern continued to hand over “ill-gotten gains” from dictators and other corrupt foreign officials, including \$74 million paid to the Mexican government from bank accounts linked to the brother of former Mexican president Carlos Salinas de Gortari.

Switzerland's consensus style of governance became more harmonious after the December 2007 ouster of Christoph Blocher of the right-wing Swiss People's Party (SVP) from the ruling four-party coalition. The SVP—which won the most votes in the 2007 general election—was left without a seat in the seven-member cabinet until December, when a close Blocher ally was narrowly elected. The SVP agitated from the sidelines, backing referenda, such as one to ban the construction of minarets from Islamic prayer houses. Voters in June rejected proposals by the SVP to make it harder for foreigners to gain citizenship. A November referendum backed government proposals for a permanent program to distribute controlled quantities of heroin at approved centres to 1,300 addicts who had failed other therapies. The heroin scheme started as an experiment in 1994 and had helped rehabilitate addicts and cut crime, as addicts no longer needed to steal to finance their habit.

Finance Minister Hans-Rudolf Merz, who was due to take over the rotating presidency in 2009, suffered a serious heart attack in September. Defense Minister Samuel Schmid announced his resignation, ostensibly on health grounds. He came under pressure after he lost his power base by leaving the SVP. The parliament rejected Schmid's proposals for an armaments package, and he was accused of having covered up allegations of sexual harassment against armed forces chief Roland Nef,

who resigned in July. The head of the Swiss air force also quit after five airmen drowned during a team-building exercise in June.

A Swiss energy company and Iran's state-owned National Iranian Gas Export Co. in March signed a multibillion-dollar deal for the provision of natural gas. This prompted protests from the World Jewish Congress that Iran might use the funds to buy weapons for use against Israel. The U.S. also voiced concern, but the Swiss government replied that it was a neutral country with an independent foreign policy.

Libya halted oil shipments and withdrew its money from Swiss banks in fury at the July arrest of Muammar al-Qaddafi's son at a luxury Geneva hotel on allegations that he had beaten two servants. Hannibal al-Qaddafi returned home after his release on bail, but the incident fueled a diplomatic crisis.

In February four Impressionist paintings (by Monet, van Gogh, Cézanne, and Degas), with a value of about 180 million Swiss francs (some \$163 million), were stolen from a Zürich art gallery. The Monet and van Gogh paintings were recovered. (CLARE KAPP)

SYRIA

Area: 185,180 sq km (71,498 sq mi)

Population (2008 est.): 19,514,000 (excluding 1,400,000 Iraqi refugees)

Capital: Damascus

Head of state and government: President Bashar al-Assad, assisted by Prime Minister Muhammad Naji al-Otari

As 2008 opened, Syria's security services arrested prominent dissidents and critics of the Ba'th Party-led regime. Among the detainees were the leaders of the Damascus Declaration for Democratic National Change, including the former parliamentarian Riad Seif and a number of Kurdish and Assyrian activists. One influential Kurdish figure, 'Usman Sulaiman, died in the hospital shortly after being released from detention in mid-February. On March 20 a crowd celebrating the Kurdish new year in Al-Qamishli skirmished with police, and three deaths resulted. Reports of unrest among Islamist and Kurdish inmates at Saidnaya prison outside the capital sur-

faced in early April. Three months later violence erupted at the facility, and two dozen prisoners were killed when guards stormed the cell blocks.

A car bombing in Damascus on February 12 killed 'Imad Mughniyyah, a key commander in the military wing of the Lebanese Islamist organization Hezbollah. One of Syria's most powerful military officers, Gen. Muhammad Sulaiman, was mysteriously assassinated on August 1. General Sulaiman's ties to both Pres. Bashar al-Assad and Hezbollah, his purported rivalry with Gen. 'Asif Shawkat, and intimations of an aborted coup d'état precipitated a variety of rumours surrounding his death. Equally puzzling was a September 27 car bomb that killed more than a dozen people at the crossroads leading to the mausoleum of Sayyidah Zainab south of the capital. Because the explosion took place outside the headquarters of one of the security services, some speculated that it represented an attack on a senior commander at the site. Others linked the bombing to the Shi'ite pilgrims who frequented the district, particularly from Iran. Government officials contended that Islamist militants based in Tripoli, Leb., had supplied the vehicle in which the bomb was placed, and large numbers of troops were subsequently deployed along the Lebanese border.

At the end of March, Syria hosted the first Arab summit meeting to convene in the country in six decades. Rising friction with Saudi Arabia set the stage for the proceedings. Saudi officials blamed Syria for the assassination of former Lebanese prime minister Rafiq al-Hariri and suspected that Damascus was allowing Saudi fighters to cross the border into Iraq. Tensions escalated when the foreign ministers of Syria, Iran, Oman, and Qatar held confidential talks three weeks before the meeting amid reports that President Assad planned to invite Pres. Mahmud Ahmadinejad of Iran to join the summit. In the end the king of Saudi Arabia stayed home, as did the king of Jordan and the presidents of Egypt and Yemen. Iran's foreign minister attended as an observer.

President Assad traveled to India in mid-June. A month later he met with French Pres. Nicolas Sarkozy in Paris and promised to set up a Syrian embassy in Beirut and to help defuse the ongoing crisis over Iran's nuclear research program. In mid-September a Syrian ambassador was appointed to Iraq for the first time in more than two decades. (FRED H. LAWSON)

TAIWAN

Area: 36,190 sq km (13,973 sq mi)

Population (2008 est.): 22,996,000

Capital: Taipei

Chief of state: Presidents Chen Shui-bian and, from May 20, Ma Ying-jeou

Head of government: Presidents of the Executive Yuan (Premiers) Chang Chun-hsiung and, from May 20, Liu Chao-shiuan

In January 2008 the Kuomintang (KMT), or Nationalist Party, and its allies won 86 seats in Taiwan's first legislative elections after a constitutional amendment reduced the number of seats from 225 to 113 and introduced single-seat districts. Adapting to the new electoral scheme, the KMT largely reabsorbed the New Party and the People First Party, both of which had split off from the KMT in the 1990s. In contrast, the Democratic Progressive Party (DPP) failed to integrate with its erstwhile ally, the Taiwan Solidarity Union (TSU). The TSU attempted to reposition itself as a centre-left party, abandoning its previous hard-line defense of Taiwanese independence. This, however, confused and alienated its base so thoroughly that the TSU failed to win a single seat. As a result, Taiwan's minor parties were effectively eliminated, and Taiwan was decisively pushed to a two-party political system.

The results of the legislative elections foreshadowed the outcome of Taiwan's fourth direct presidential election, held on March 22. The KMT's Ma Ying-jeou (see BIOGRAPHIES) easily defeated the DPP's Frank Hsieh by running on a platform that promised to fix Taiwan's stagnant economy by improving relations with China. Ma's reputation for personal integrity also contrasted sharply with that of the highly unpopular incumbent president, Chen Shui-bian, who had spent much of his last two years in office as a lame duck. Chen, who resigned the DPP chairmanship at the beginning of the year, quit the party in August after money-laundering allegations against him emerged. He was eventually detained and jailed in November on an array of charges, including money laundering, fraud, and embezzlement of public funds.

After taking office, Ma moved quickly to mend relations with China. By June

Chiang Ying-ying/AP

Some 100,000 supporters of Taiwanese independence rally in Taipei in late October to protest a visit by a senior envoy from China, one of many signs of closer cooperation between China and Taiwan.

an agreement had been reached that allowed regular weekend charter flights across the Taiwan Strait. Increasing Chinese tourism in Taiwan in an effort to help kick-start the island's economy was one of Ma's major campaign promises. Further agreements on the expansion of direct flights and trade between Taiwan and China were later signed in November.

Fears mounted that Ma's rapid rapprochement with China was undermining Taiwanese sovereignty. Pro-independence groups launched major street demonstrations in late August and again in late October—the latter to protest the first visit to Taiwan by high-ranking Chinese envoy Chen Yunlin. Nevertheless, Ma moved to reverse efforts by his predecessor to build a distinct sense of Taiwanese identity. In August the new administration changed the official name of the national postal service from Taiwan Post back to its original name, Chunghwa ("Chinese") Post. In addition, Chiang Kai-shek Memorial Hall in central Taipei was reopened, and the official system of romanization was switched from a system developed in Taiwan to Hanyu pinyin, the standard used in China. Opponents of these policies referred to them as part of the "re-sinicification" of Taiwan. In early December, Ma rejected the idea of a third visit to Taiwan by the Dalai Lama, saying that the timing was inappropriate.

Aside from improving relations with China, the new administration also declared a unilateral truce in the decades-long struggle between Taipei and Beijing over diplomatic recognition of Taiwan by other countries. In return for not seeking new diplomatic allies, Taipei hoped that Beijing would allow the island republic to maintain as allies the 19 countries that already recognized it. Moreover, Taipei abandoned its annual bid for admission to the UN after 15 successive failures and instead sought participation as an observer in UN special agencies. This attempt, however, was unsuccessful. In early October the U.S. announced \$6.4 billion in arms sales to Taiwan. In response, China strongly denounced the proposed sale as interference in Chinese internal affairs.

The first months of the new administration were marked by rapidly rising consumer prices. By the end of October, Taiwan's consumer price index had risen 2.39%, easing slightly as international oil prices declined. At the same time, unemployment rose to 4.37%, and adjusted real average earnings fell by 3.1%. Investors fared even worse. In October, as the financial crisis in the U.S. deepened and had a heavy impact on other economies, Taiwan's main stock index fell to less than 4,400 from the nearly 9,000 when Ma took office in May.. (MICHAEL R. FAHEY)

TAJIKISTAN

Area: 143,100 sq km (55,300 sq mi)

Population (2008 est.): 6,839,000

Capital: Dushanbe

Chief of state: President Imomalii Rakhmon

Head of government: Prime Minister Akil Akilov

In January–February 2008 Tajikistan experienced the most severe winter weather in 44 years. Pres. Imomalii Rakhmon estimated that the damage to the country's less-than-robust economy was at least \$1 billion. The economic growth rate declined by half, as most of the country's industries were forced to close owing to lack of power. Though the country's agricultural sector was not as severely affected as was initially feared, the price of bread and cooking oil doubled, and most other food prices rose by 50%. The number of deaths that could be attributed to the cold was not made public; infant deaths were widely believed to have numbered in the hundreds, though this was disputed by the Ministry of Health. Many families, especially in rural areas, were forced to choose between food and fuel, especially as the price for fuel kept mounting.

Tajikistan's political opposition accused the government of incompetence in handling the crisis, but popular unhappiness did not spill over into political action. The number of labour migrants, believed to exceed one-seventh of the population, reportedly increased. An IMF team confirmed in March that the amount of remittances from migrants had increased as family members working abroad sought to offset the rising price of food. President Rakhmon appealed to the Russian leadership to raise from 600,000 to 800,000 the official quota for the number of Tajiks allowed to work in Russia. In September Rakhmon told the UN General Assembly that the world food crisis posed as great a threat as terrorism, adding that in Tajikistan the crisis was affecting two-thirds of families; he also appealed to donor countries for help.

Owing to an equally severe summer drought, the country's water supply was insufficient to meet the needs of much of the Central Asian region, which depended on Tajikistan's resource. This led to international tensions, ranging from

angry disputes between Tajik and Kyrgyz villagers to pressure exerted by Uzbekistan on potential investors in large-scale Tajik hydropower projects. Uzbekistan, which feared that Tajikistan would control the region's water, urged investors to stop funding the projects.

Tajikistan's reputation with the international donor community was not improved by the announcement in March that the IMF had discovered that the Tajik National Bank falsified reports about the country's financial resources; as a result, Tajikistan was required to return \$47 million in improperly acquired loans. Tajik financial officials denied that the country's reputation had suffered, because a number of capacity-building projects financed by major donors went ahead as planned.

(BESS BROWN)

TANZANIA

Area: 945,090 sq km (364,901 sq mi)

Population (2008 est.): 40,213,000

De facto capital: Dar es Salaam; only the legislature meets in Dodoma, the longtime planned capital

Chief of state and head of government: President Jakaya Kikwete, assisted by Prime Ministers Edward Lowassa and, from February 9, Mizengo Pinda

Change at the highest level of government and allegations of corruption characterized political life in Tanzania in 2008. In January Pres. Jakaya Kikwete was elected chairman of the African Union and almost immediately played a significant role in helping to negotiate the settlement of a dispute over election results in Kenya. He had been elected president of Tanzania to battle corruption and began the year by dismissing the governor of the Bank of Tanzania over a scandal involving payment irregularities. In February President Kikwete accepted the resignations of his longtime political associate Prime Minister Edward Lowassa and two other cabinet ministers who, according to the report of a commission of inquiry, had been implicated in a case involving political influence peddling in the awarding of a contract to an American electricity company. Moreover, in spite of being paid thousands of dollars,

that company had never fulfilled its obligations. Constitutionally, the resignation of the prime minister required the dissolution of the cabinet, and on February 8 a new cabinet was appointed, with Mizengo Pinda as prime minister.

The issue of corruption was not allowed to drop at that point, however. A number of MPs demanded that several other officials be investigated, and in July the government agreed under pressure from the opposition that the parliament should debate the report of another presidential commission, this time concerning mining.

A brief visit by U.S. Pres. George W. Bush in mid-February was preceded by a demonstration in Dar es Salaam by some 2,000 Muslims denouncing U.S. foreign policy. Nevertheless, Bush's dealings with President Kikwete proved cordial, with the U.S. president announcing a compact between the Millennium Challenge Corporation and Tanzania that over five years would make available almost \$700 million to improve transportation, energy supplies, and access to clean water.

Balance of trade figures for 2007 had been favourable, with a significant rise in the value of exports; however, the cost of living rose markedly in 2008 because of an increase in food and fuel prices. It was welcome news early in the year, therefore, when the Tanzanian National Microfinance Bank, in partnership with the Alliance for a Green Revolution, launched a \$6.1 million scheme to train poor farmers and ease access to fertilizers and seed.

The awareness of endemic corruption in official circles and of the divisive potential of oil and natural gas exploitation forced the governments of both mainland Tanzania and Zanzibar to give serious consideration to methods by which they might share equitably the profits from the offshore exploration. The announcement in October of the intention to extend still further the drilling for gas in Mnazi Bay promised even richer returns. The whole subject was further complicated by the continuing problems surrounding the political status of Zanzibar. In April the opposition Civic United Front (CUF) MPs staged a walkout when they concluded that the ruling Revolutionary Party of Tanzania (CCM) was reneging on an agreement that called for a power-sharing government in Zanzibar. In July, Prime Minister Pinda gave impetus to the dispute by stating explicitly that Zanzibar was not a sovereign country. (KENNETH INGHAM)

THAILAND

Area: 513,120 sq km (198,117 sq mi)
Population (2008 est.): 64,316,000
Capital: Bangkok
Chief of state: King Bhumibol Adulyadej
Head of government: Prime Ministers Surayud Chulanont, Samak Sundaravej from January 29, Somchai Wongsawat from September 9 (acting to September 18), Chaovarat Chanweerakul (acting) from December 2, and, from December 15, Abhisit Vejjajiva

The word *turmoil* characterized Thailand in 2008. Samak Sundaravej (*see* BIOGRAPHIES) took office as prime minister in January, one month after his People Power Party (PPP) won a near majority in the country's parliamentary elections. Regarded by many critics as a proxy for deposed prime minister Thaksin Shinawatra, Samak faced a legitimacy problem from the start. His position became particularly delicate when in February Thaksin unexpectedly returned to Thailand from his 17-month exile to face corruption charges. Arrested upon his arrival at the airport in Bangkok, Thaksin was soon granted bail.

The tension burst into public view when the opposition People's Alliance for Democracy (PAD), led by media tycoon Sondhi Limthongkul and former Bangkok governor Chamlong Srimuang, organized a mass protest in May against Samak's prospective move to amend the 2007 constitution, which the military junta had put into place to prevent Thaksin's return to power. Samak faced another barrage of criticism in June when his government endorsed Cambodia's bid to have the Temple of Preah Vihear—a source of long-standing land disputes between the two countries—listed as a UNESCO World Heritage site. In addition, Samak faced a defamation charge filed by a former deputy Bangkok governor. Against this backdrop, the PAD stepped up its calls for Samak's resignation and, beginning in late August, occupied the Government House, where the offices of the prime minister and his cabinet were located. Samak and his government were forced to relocate to the old Don Muang International Airport.

Christophe Archambault—AFP/Getty Images

During an interview at the Government House in Bangkok on December 26, Thai Prime Minister Abhisit Vejjajiva urges exiled former prime minister Thaksin Shinawatra not to incite unrest in the kingdom.

Samak's fall from power came in early September, when the Constitutional Court found him guilty of having illegally accepted payment for appearing on a television cooking show and ordered him to step down. Although initially planning to renominate Samak to the post, the PPP eventually chose Somchai Wongsawat, a former civil servant and deputy PPP leader, as Samak's successor. Somchai, however, was a totally unacceptable choice to the opposition because he was Thaksin's brother-in-law. An ensuing clash between PAD protesters and government security forces resulted in an unconfirmed number of casualties in October.

In late July, Thailand's Supreme Court granted Thaksin and his wife permission to attend the opening ceremony of the Olympic Games in Beijing on condition that they returned to Thailand to stand trial on charges related to a land-purchase scandal. They failed to return, instead fleeing once again to England. On October 21 the Supreme Court gave Thaksin a two-year prison sentence. Though in exile, Thaksin remained the alleged main financier for the PPP. While many Thais, especially in the country's urban areas, were opposed to the PPP, over the course of the year they became increasingly disillusioned with the crude tactics adopted by the PAD. Meanwhile, the Thai army,

led by Gen. Anupong Paochinda, remained on the sidelines.

The Constitutional Court ruled on December 2 that vote buying had taken place, disbanded the PPP and two allied parties, and banned Somchai from political activity for five years. On December 15 the parliament elected as prime minister Abhisit Vejjajiva of the small opposition Democrat Party. At year's end protesters disrupted the scheduled opening of parliament.

(YOSHINORI NISHIZAKI)

TOGO

Area: 56,785 sq km (21,925 sq mi)
Population (2008 est.): 6,762,000
Capital: Lomé
Chief of state: President Faure Gnassingbé, assisted by Prime Ministers Komlan Malé and, from September 8, Gilbert Houngbo

Togo returned to favour among international donors in 2008. The African Development Bank, France, Germany, the EU, UNICEF, and the World Bank granted substantial sums for economic

Benjamin Boukpeti of Togo breaks his paddle in celebration of his bronze-medal-winning performance in the men's kayak slalom event at the 2008 Olympic Games in Beijing; Boukpeti was the first athlete from Togo ever to capture an Olympic medal.

Tim Wimborne—Reuters/Landov

and social projects. On October 4, the European commissioner for development and humanitarian aid, Louis Michel, congratulated the government for the progress it had made over the previous three years, calling Togo an example for the rest of Africa.

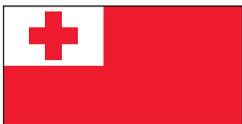

On April 15 Pres. Faure Gnassingbé took the first steps to establish a truth and reconciliation commission that was to investigate the political violence of recent years, in particular that surrounding the 2005 presidential election. On September 26 the UN reported that nearly 23,000 people had responded to a survey on how best to design the commission.

On August 6, UN and African Union representatives remarked on the human rights improvements Togo had made over the previous few years but observed that much more needed to be done. Togolese rights activists still faced major obstacles in bringing abuses to light.

Torrential rains in July and August caused massive floods that displaced thousands of people and destroyed a number of bridges, virtually cutting Lomé off from the rest of Togo. After an outbreak of avian flu on September 9, authorities took swift action to cull an estimated 17,000 poultry. In other news, Benjamin Boukpeti won Togo's first-ever Olympic medal at the Beijing Olympic Games; he took the bronze in the men's kayak slalom.

(NANCY ELLEN LAWLER)

TONGA

Area: 750 sq km (290 sq mi)
Population (2008 est.): 103,000
Capital: Nuku'alofa
Chief of state: King Siaosi (George) Tupou V
Head of government: Prime Minister of Privy Council Feleti Sevele

The rebuilding of Tonga's capital, Nuku'alofa, destroyed in November 2006 during antigovernment riots, continued in early 2008 with funds and assistance from Tonga's aid partners. In the federal election on April 24—the last ballot to be held before reforms were to be instituted to the political system in advance of the 2010 elections—pro-democracy candidates won

all nine of the people's seats in the Legislative Assembly. The appearance of a return to normalcy belied continuing strains between the pro-democracy movement and the royal family, whose appointees dominated the Assembly. Tensions were fueled by ongoing investigations into the activities of pro-democracy legislators and their supporters (during the riots) and their pending sedition trials.

Political tensions waned ahead of the August 1 coronation of King Siaosi (George) Tupou V, who had succeeded to the throne on his father's death in 2006. Members of the royal families of the U.K., Denmark, Monaco, Japan, and Thailand visited Tonga for the \$3 million event, which featured a military parade, formal balls, a fireworks display, an international rugby match, a series of feasts, and a sacred kava festival. Tensions ebbed during the coronation when the king pledged to surrender many of his royal powers, to accept a reduced role in the state, and to divest himself of business interests that he had acquired when state trading operations were privatized and that had been a source of contention for some years.

(CLUNY MACPHERSON)

King Siaosi (George) Tupou V of Tonga (right) participates in a traditional coronation ceremony—known as the taumafa kava—on July 30 in Nuku'alofa; his official coronation took place two days later.

TRINIDAD AND TOBAGO

Area: 5,155 sq km (1,990 sq mi)
Population (2008 est.): 1,305,000
Capital: Port of Spain
Chief of state: President George Maxwell Richards
Head of government: Prime Minister Patrick Manning

Trinidad and Tobago's success in discovering offshore natural gas was again evident in January 2008 when Petro-Canada announced that its Cassra-1 well (located in Block 22 north of Tobago) had identified 600 billion–1.3 trillion cu ft of new reserves. Further analysis would provide a more detailed estimate of the reserves in the four-well Block 22 project.

Prime Minister Patrick Manning in February insisted that the government would not introduce a formal state of emergency to deal with the increasing—largely drug-related—murder rate, as had been recommended by several

nongovernmental organizations. Manning argued that the circumstances “did not warrant” such drastic action.

The Trinidad and Tobago-based RBTT bank, one of the leading financial institutions in the Caribbean, was acquired by the Royal Bank of Canada for U.S.\$2.2 billion in March. More than 98% of RBTT’s shareholders voted in favour of the sale, but there was some opposition from nonshareholders to what many regarded as a national and regional asset’s falling into foreign hands. The government reported in April that it planned to vigorously pursue the goal of making Port of Spain an international financial centre along the lines of Singapore, Dublin, and Dubai, U.A.E., rather than a tax haven like many other offshore Caribbean banking centres.

Trinidad and Tobago took the lead in August in inspiring a joint declaration involving itself and three other Caribbean Community and Common Market (Caricom) countries—Grenada, Saint Lucia, and Saint Vincent and the Grenadines. The quartet agreed to work toward complete economic union, independent of the rest of Caricom, by 2011 and to establish a form of political union by 2013. (DAVID RENWICK)

TUNISIA

Area: 163,610 sq km (63,170 sq mi)

Population (2008 est.): 10,325,000

Capital: Tunis

Chief of state: President Gen. Zine al-Abidine Ben Ali

Head of government: Prime Minister Mohamed Ghannouchi

Tunisia’s electoral law was altered in July 2008 to allow party leaders of at least two years’ standing to run for president without having to make a formal request. The legislation also permitted presidential candidates to run for office whose parties did not have representation in the parliament; previously a candidate’s party had to have a parliamentary presence. The change threatened to disqualify Nejjib Chebbi, who in 2006 had stepped down as leader of the opposition Progressive Democratic Assembly (RDP)—which at the time had no parliamen-

tary seats—in order to stand as an individual candidate.

Pres. Zine al-Abidine Ben Ali, meanwhile, announced at the congress of the dominant Democratic Constitutional Assembly (RCD) that he would be the RCD presidential candidate in October 2009. The party congress had approved his five-year program and called for him to stand. On the 20th anniversary of his accession to power in November 2007, President Ben Ali had recounted his accomplishments, reporting that 99% of children aged six were in school, the average income had risen, and life expectancy had increased to exceed 74 years.

Economic growth in 2008 was expected to be 3.7%, with a budget deficit of 3.8% of GDP, because of the global economic downturn. The European Union provided 82% of Tunisia’s imports and absorbed 74% of its exports. Increased imported energy and food costs took year-on-year inflation to 4.5% in October. The value of energy imports doubled in the first half of the year, and Tunisia was expected to import more than 600,000 tons of soft

wheat. As a result, the trade deficit rose by 7.2% to \$4.25 billion. Increased domestic prices caused riots in Redayef in June and in nearby Gafsa, where unemployment reached 30% in June.

Security continued to be a concern, although less acute than elsewhere in North Africa. Of the 30 individuals arrested on charges of having threatened attacks on foreign embassies after clashes with security forces in December 2006 and January 2007, 2 were sentenced to death, but one sentence was commuted upon appeal in February 2008; the other 28 received lengthy prison sentences. Fourteen members of the Soldiers of Assad Ibn al-Furat had been killed in the clashes with police.

In late February 2008, two Austrian tourists traveling in southern Tunisia were kidnapped by an Islamic militant group as a protest against Western support of Israel. They were taken to Mali, where their captors first demanded the release of prisoners held in Tunisia and Algeria but later demanded a ransom. The tourists eventually were freed in November. (GEORGE JOFFÉ)

TURKEY

Area: 783,562 sq km (302,535 sq mi)

Population (2008 est.): 71,002,000

Capital: Ankara

Chief of state: President Abdullah Gul

Head of government: Prime Minister Recep Tayyip Erdogan

In the first quarter of 2008, Turkey’s ruling conservative Justice and Development Party (AKP), led by Prime Minister Recep Tayyip Erdogan, was threatened with closure, less than a year after it had won a second term in office with an increased majority in the parliament. On March 31 the Constitutional Court agreed to hear a petition by Turkey’s chief prosecutor, who alleged that the AKP had become a “focus of activity against the secular order” and asked that the party be closed down and that 71 of its leading members be banned from politics for five years. Although the court accepted the charge on July 30, it failed to muster the majority needed for a ban; as a result, the AKP was given a lesser penalty—a 50% cut in state funding. Erdogan remained

in office but with limited freedom of action. (See Special Report on page 190.)

The nationalist wing of the secularist opposition had in the meantime come under attack with an investigation into an alleged plot to overthrow the government. The investigation was prompted by the discovery in Istanbul in June 2007 of a store of army-issue grenades in the home of a retired officer. This triggered several waves of arrests of nationalists during 2008, with a number of high-ranking military officers among those detained. Civilian detainees included Dogu Perincek, the leader of the small nationalist Workers' Party (IP), and the managers of a nationalist TV channel. On July 25 the Istanbul criminal court agreed to initiate proceedings. The first hearing took place on October 20, and charges were brought against 86 defendants.

The high command stayed out of the legal battle. On August 28 the chief of the general staff (who functions as commander in chief), Gen. Yasar Buyukanit, retired and was replaced by the commander of the land forces, Gen. Ilker Basbug. The military continued to fight the Kurdish nationalist separatists of the Kurdistan Workers' Party (PKK), who persistently attacked security personnel and engaged in other terrorist activities. The Turkish air force repeatedly bombed PKK bases in northern Iraq, and the army launched an incursion into the area in February and claimed to have killed some 250 militants, with the loss of 24 soldiers. Attacks by the PKK continued, with 15 soldiers killed at a border post on October 3. A bomb exploded in a suburb of Istanbul on July 27, killing 17 civilians. The Constitutional Court, meanwhile, continued to examine the charge that the Democratic Society Party (DTP), which was represented in the parliament and controlled local government in some of the most important towns in south-eastern Turkey, was the political front organization of the PKK and should be closed down.

Domestic preoccupations did not prevent the Erdogan government from pursuing an active foreign policy. Following the outbreak of hostilities between Russia and Georgia in August, Turkey proposed the conclusion of a stability and cooperation pact for the Caucasus. Many

high-level visits were undertaken to promote this initiative, the most notable being that paid by Pres. Abdullah Gul to Yerevan, Arm., on September 6, when Turkey had no diplomatic relations with that country. The frontier between Turkey and Armenia remained closed pending the resolution of the Nagorno-Karabakh conflict between Armenia and Azerbaijan.

Turkey continued its efforts to mediate between Israel and Syria, with Syrian Pres. Bashar al-Assad holding talks in Turkey on August 5. Later that month Iranian Pres. Mahmoud Ahmadinejad paid a working visit to Istanbul, where he met President Gul. Turkey welcomed the resumption of talks between the presidents of the internationally recognized (Greek) Cyprus and of the Turkish Republic of Northern Cyprus (TRNC), which Turkey alone recognized.

Economic growth fell from 6.7% year-on-year in the first quarter to 1.9% in the second quarter of 2008. The rise in oil prices was largely responsible for the foreign trade deficit's widening to \$63 billion by the end of October. With net tourism revenue amounting to some \$15 billion by the end of September, and with continued foreign direct investment, the country withstood the first shock of the world

financial crisis; by year's end, however, the index of the Istanbul Stock Exchange had been halved, from 55,538 at the end of 2007 to 26,864. Meanwhile, consumer prices had risen by 11% year-on-year by the end of November. (ANDREW MANGO)

TURKMENISTAN

Area: 488,100 sq km (188,500 sq mi)

Population (2008 est.): 5,180,000

Capital: Ashgabat

Head of state and government: President Gurbanguly Berdimukammedov

The process of reform in Turkmenistan proceeded unevenly in 2008. While some features of the rigid regime imposed by former president Saparmurat Niyazov were relaxed or removed, others remained in place. Turkmenistan's isolation from the international community gradually weakened, and travel abroad for many Turkmen—if they could afford it—became easier. The influence of the security services on everyday life, however, continued to be overwhelming. In late April Niyazov's successor, Pres. Gurbanguly Berdimukammedov, asserted that Turkmenistan was completely rebuilding its society, but details of the process remained scarce.

One reform that proved to be unpopular was the introduction in February of free gasoline (water, electricity, and natural gas were already supplied free of cost under Niyazov). Whereas car owners were entitled to a certain amount of free fuel per month, they paid a steep price if additional fuel was needed.

Some of the more visible indications of Niyazov's rule were gradually dismantled. Statues and portraits of the former leader disappeared; months and days of the week that had been renamed for Niyazov had their former designations restored; and the population was given some access to the Internet through a network of Internet cafes; many Web sites, however, remained banned. One of two In-

Delegates to Turkmenistan's *Khalk Maslahaty* (People's Council), a 2,500-member superparliament, meet in Ashgabat on September 26 to approve a new constitution.

ternet cafes in the northern city of Dashoguz was closed in June because a customer had accessed a banned site. President Berdymukhammedov took a step that even Niyazov had not attempted—he ordered the dismantling of satellite dishes on the grounds that they marred the appearance of a town. This move triggered opposition, in at least some places, by local authorities themselves.

Religious groups, particularly though not exclusively minority confessions, continued to experience severe harassment by the security services. Some groups were forbidden to worship together even though they were legally registered with the authorities.

By the end of Niyazov's rule, his compendium of Turkmen history and traditional values, the *Ruhnama*, had dominated education in Turkmenistan at all levels. During 2008 this dominance was gradually eroded, but the Turkmen opposition in exile complained that no new textbooks were available to replace it; as a result, educational reform was partial at best.

Turkmenistan's huge natural gas resources continued to dominate worldwide interest in the country. Russia's energy giant Gazprom promised in July to buy increasing amounts of Turkmen gas at world market prices, while the U.S. urged Turkmenistan to diversify its gas-export routes, and a gas pipeline to China was under construction. In addition, high-level American visitors to Ashgabat lobbied Berdymukhammedov

on behalf of American firms interested in participating in the development of Turkmenistan's natural gas reserves.

(BESS BROWN)

TUVALU

Area: 25.6 sq km (9.9 sq mi)

Population (2008 est.): 9,700

Capital: Government offices in Vaiaku, Fongafale islet, of Funafuti Atoll

Chief of state: Queen Elizabeth II, represented by Governor-General Filoimea Telito

Head of government: Prime Minister Apisai Ielema

Tuvalu faced continuing threats in 2008 from rising sea levels, which were beginning to contaminate its freshwater aquifers, and from surges and unusually high tides (often called king tides), which were causing accelerated coastal degradation. The country had earlier asked Australia and New Zealand to consider taking in Tuvaluans when the low-lying islands eventually become uninhabitable, and talks with both countries continued. Some 100 Tuvaluans had settled successfully in nearby Niue, and there was dialogue on the possibility of settling more Tuvaluan refugees in Niue, which had a declining population.

In April Tuvalu became the 11th signatory to ratify the Pacific Island Countries Trade Agreement. A new twice-weekly air service from Funafuti to Fiji opened the possibility of expanding tourism, but Tuvalu was likely to derive more income from seasonal workers who worked as temporary labour in horticulture and viticulture industries in New Zealand. Although Tuvalu was not included in the parallel Australian scheme to commence later in the year, Prime Minister Apisai Ielema and Australian Prime Minister Kevin Rudd met in July and agreed to work toward a Pacific Partnership that would provide a better-coordinated approach to Tuvalu's short-term development. In August Tuvalu sent a team of three to the Beijing Olympics, a weightlifter and two track and field athletes, including the country's first woman Olympian.

(CLUNY MACPHERSON)

UGANDA

Area: 241,551 sq km (93,263 sq mi)

Population (2008 est.): 29,166,000

Capital: Kampala

Head of state and government: President Yoweri Museveni, assisted by Prime Minister Apolo Nsubambi

January 2008 witnessed streams of Kenyans—refugees from the killings that followed the disputed 2007 presidential election—pour across Uganda's southeastern border. The violence in Kenya ruptured transportation links from the port of Mombasa, prompting the Ugandan government to seek an alternative source of petroleum in Tanzania. The influx of homeless people imposed an additional burden on Ugandan aid agencies, which were already heavily committed to supplying food to thousands of people in the northeastern districts of Karamoja, Teso, and Lango affected by floods followed by prolonged drought.

In the northwest any prospect of an end to the civil war waged by the Lord's Resistance Army (LRA) appeared as elusive as ever. Discussions between representatives of the government and the LRA recommenced on January 31 in Juba, Sudan, but soon afterward an LRA spokesman said that its leader,

Joseph Kony, would sign no final agreement until the charges of war crimes and crimes against humanity brought against him by the International Criminal Court (ICC) had been withdrawn. Nevertheless, it was reported that Kony was prepared to sign an agreement on April 10. Again the signing did not take place, and in an attempt to allay Kony's fear of prosecution by the ICC or, failing that, execution by President Museveni, the Ugandan judiciary created its own war crimes tribunal as part of the High Court to try the leading LRA commanders. This did not prove sufficient inducement to Kony, and another promised deadline, this time in July, also passed without an agreement's having been signed. So too did another date at the end of November.

Another unresolved problem concerned the controversial bill to amend the 1998 Land Act that the government introduced in Parliament in February. Ostensibly aimed at protecting tenants from unfair eviction in any part of the country, the land act (amendment) bill caused confusion in all quarters and in particular led to a growing dispute between the central government and the government of the traditional Buganda kingdom, in south-central Uganda. Fears that the objective of the bill was to enable senior officials to acquire land for their own purposes appeared to have been confirmed when it was revealed that land that belonged to a hospital and was intended to be developed for medical purposes had been irregularly sold to government officials and that the Uganda Land Commission had taken no action to prevent the sale.

Pres. Yoweri Museveni's insistence that he was not and could not be a dictator was challenged in January when the Uganda Joint Christian Council (UJCC) criticized a proposal by the governing party, the National Resistance Movement (NRM), that would prevent its own members from challenging motions brought before Parliament by the NRM. The NRM replied that the UJCC was not a member of the NRM and therefore had no grounds for complaint. This issue coincided with a ruling by the police that the opposition Democratic Party could not hold a meeting in Kampala because it had not given seven days' prior notice of the event. In May, after a number of clashes with an extremely vocal independent press, the government began to draft amendments to laws aimed at controlling inconvenient criticism.

Ukrainian Pres. Viktor Yushchenko (centre) and his daughters place candles during a service in Kiev on November 22 to commemorate the 75th anniversary of the Holodomor, the 1932–33 famine in which millions of Ukrainians died.

UKRAINE

Area: 603,628 sq km (233,062 sq mi)

Population (2008 est.): 46,222,000

Capital: Kiev

Chief of state: President Viktor Yushchenko

Head of government: Prime Minister Yuliya Tymoshenko

The year 2008 in Ukraine was marked by fractious disputes between parliamentary leaders and Pres. Viktor Yushchenko. In September the parliamentary alliance between the president's Our Ukraine–People's Self-Defense bloc and the prime minister's eponymous Yuliya Tymoshenko Bloc collapsed. The ostensible reason was the divided response to the war that broke out in Georgia in August. Whereas Yushchenko condemned Russia's presence in Georgia and reportedly authorized military aid to Georgian Pres. Mikhail Saakashvili, Yuliya Tymoshenko (*see* BIOGRAPHIES) took a neutral position and met with Russian Pres. Dmitry Medvedev in Moscow on October 3. A second reason concerned efforts by Tymoshenko and rival political leader Viktor Yanukovich of the Regions Party to reduce the power of the president via a constitutional amendment. The impasse was resolved in early December by the formation of a

new parliamentary coalition that included members of Yushchenko's and Tymoshenko's blocs, as well as delegates supporting Speaker Volodymyr Lytvyn.

At the NATO summit in Bucharest in early April, membership for Ukraine was supported by U.S. Pres. George W. Bush but opposed by Germany, France, and the United Kingdom. Moreover, Russia warned that Ukrainian entry into NATO would seriously strain relations between the two countries. A second summit in Brussels in December resolved to delay further any talk of Ukrainian membership.

Apart from the NATO question, relations between Ukraine and Russia grew increasingly tense. The Russian natural-gas monopoly Gazprom demanded that Ukraine repay debts totaling \$2 billion for gas imports. After talks between the countries failed, Russia cut off gas supplies to Ukraine on Jan. 1, 2009. In November Medvedev declined an invitation from Yushchenko to attend commemorations of the 75th anniversary of the Holodomor, the 1932–33 famine in which several million Ukrainians died. Russia rejected Ukraine's characterization of the famine as a genocide carried out by Soviet authorities.

As 2008 drew to a close, the worldwide financial crisis had a devastating impact on Ukraine. In November the economy shrank by more than 14%. The metallurgical industry, which had accounted for almost 30% of GDP, suffered a 50% drop in production that month. In December it was estimated

that Ukraine's GDP had increased by just over 2% during the year—a marked slowdown. Unemployment was on the rise, and on December 23, trade unionists demonstrated in Kiev to protest wage cuts and increasing food prices.

At year's end inflation stood at 22%. Ukraine's central bank had stepped in to try to halt a dramatic decline in the value of the national currency, the hryvnya, whose exchange rate had fallen from around 5 to 7.88 hryvnias per \$1 by late December. The bank spent well over a quarter of its total currency reserves of \$37 billion to try to buoy the hryvnya. Much of the initial tranche of a \$16.5 billion loan from the International Monetary Fund also was used toward stabilizing the currency. Tymoshenko maintained that members of the president's inner circle, including gas tycoon Dmytro Firtash, had speculated against the hryvnya; she also demanded the resignation of the head of the central bank, Volodymyr Stelmakh, on similar grounds. (DAVID R. MARPLES)

UNITED ARAB EMIRATES

Area: 83,600 sq km (32,280 sq mi)
Population (2008 est.): 4,660,000, of whom about 900,000 are citizens
Capital: Abu Dhabi
Chief of state: President Sheikh Khalifah ibn Zayid Al Nahyan
Head of government: Prime Minister Sheikh Muhammad ibn Rashid al-Maktum

In response to the global recession and declining oil prices, economic growth for the United Arab Emirates (U.A.E.) slowed to an estimated 6.6% in 2008. The stock market declined, but panic was averted by an injection of \$6.8 billion into local banks. The U.A.E. economic minister acknowledged that 2009 would be a "testing year" for the local economy, which was based largely on oil and tourism revenue.

Economic turmoil notwithstanding, the U.A.E. invested heavily in its infrastructure and signed a deal with France to develop civilian nuclear technology. The \$7 billion loan to Iraq was forgiven in its entirety in an effort to build international confidence in the Iraqi government. The Emirati envoy to the UN pledged an "unlimited financial contri-

bution" to ease the suffering of the Palestinians.

The U.A.E. released its first human rights report to the UN Human Rights Council. The report described the U.A.E. as "proud" of its record but identified areas in need of improvement, including women's rights, human trafficking, and workers' rights. The U.A.E. had been criticized for the harsh working conditions experienced by immigrant labourers, who engaged in mass protests in 2008. More than 3,000 Indian immigrant labourers were detained after the protests. Fair Trials International issued a highly publicized report warning tourists about the U.A.E. drug policy that resulted in multiyear sentences for several tourists who were found with traces of contraband on their persons. (RUMEE AHMED)

UNITED KINGDOM

Area: 243,073 sq km (93,851 sq mi)
Population (2008 est.): 61,446,000
Capital: London
Chief of state: Queen Elizabeth II
Head of government: Prime Minister Gordon Brown

Domestic Affairs. The U.K.'s Labour Government, led by Prime Minister Gordon Brown, began and ended 2008 narrowly behind the Conservatives in the opinion polls. In the summer months, however, Labour's support—and Brown's personal ratings—slumped so low that some of the party's MPs started calling openly for his resignation. Brown's widely praised response to the global financial crisis in the latter months of the year earned him a reprieve as his party's fortunes recovered.

In the spring the government suffered from two linked problems. The first was the sharp decline in consumer confidence as house prices fell and general inflation rose. The second was the implementation of a policy, announced a year earlier, to scrap the 10% starting rate of income tax and reduce the standard rate from 22% to 20%. Although this change left most people better off, low-paid workers saw their tax payments increase—at precisely the time when food and energy prices were rising sharply.

Labour suffered at the nationwide local elections held on May 1. The party lost ground throughout England and Wales, including the biggest prize of all: mayor of London. Ken Livingstone was defeated after eight years as the capital's first elected mayor, to be replaced by the Conservative candidate, Boris Johnson (see BIOGRAPHIES).

Following threats of rebellion by Labour MPs, Alistair Darling, the chancellor of the Exchequer, announced on May 13 that he would increase tax allowances for every taxpayer earning up to £40,000 (about \$60,000) a year. This move, which amounted to a total tax cut of £2.7 billion (about \$5.28 billion) annually, did nothing to revive the government's fortunes. Just nine days later, Labour lost to the Conservatives a previously safe parliamentary seat in northwestern England, Crewe and Nantwich. On July 24 Labour lost what had been an even safer seat, Glasgow East, which was won by the Scottish National Party.

These losses confirmed opinion poll findings, which showed that Labour's support across Britain had fallen to just 25%. In the following weeks there were widespread reports of Labour MPs agitating for a change of party leader and prime minister. The most prominent MP to call for Brown to quit was Charles Clarke, who had previously served as home secretary and party chairman.

When Labour members met for the party's annual conference in Manchester in late September, morale was low. Brown lifted the mood with an exceptionally effective speech, the most memorable line of which was, "This is no time for a novice." The statement was ostensibly directed at David Cameron, the Conservatives' young leader, but it was also seen as a warning to Brown's own foreign secretary, 43-year-old David Miliband, who was widely regarded as having ambitions to succeed Brown. A conference "bounce" lifted Labour's support to about 30%, which was considered poor but not disastrous and not unusual for a governing party in midterm. Labour held its support through the financial crisis of the following weeks. This recovery was confirmed by a byelection in Glenrothes, Scot., on November 6, when Labour held the seat and actually increased its vote.

Brown also displayed a boldness that many thought had deserted him when he recalled Peter Mandelson to his cabinet on October 3. Mandelson had twice served in former prime minister Tony Blair's cabinets in the 1997–2001 Parliament but had subsequently left

Gareth Fuller—PA Wire/AP

British Prime Minister Gordon Brown (right) and Business Secretary Peter Mandelson field questions on the global financial crisis at a meeting with business leaders in Sittingbourne, Kent, on October 21.

British politics to serve as the European Union's trade commissioner. In the simmering conflict over the years between the Blair and Brown "tribes" within the Labour Party, Mandelson was one of the most fervent Blairites. His rapprochement with Brown signaled an end to that conflict, for the time being at least. Mandelson was succeeded as EU commissioner by Baroness Ashton, the leader of the House of Lords. At year's end the Conservatives held a narrow but steady 5–7% lead over Labour.

One of the government's major policy decisions of 2008 came in January when Business Secretary John Hutton announced support for a new generation of nuclear power stations. Hutton said that nuclear power would play an important role in the mix of low-carbon energy sources that would be needed to serve the U.K.'s long-term strategy of reducing carbon emissions. He insisted, however, that these new plants would have to be financed entirely by the private sector, as there would be no government subsidy. In October, Ed Miliband (David's younger brother), who had been appointed energy secretary in the same reshuffle that saw Mandelson return to government, announced that Britain would apply a new target, to cut carbon emissions by 80% by 2050 (the previous target had been a 60% reduction).

One major piece of government legislation was defeated in Parliament during the year. Home Secretary Jacqui Smith wanted the police to have the right, subject to defined safeguards, to hold people suspected of terrorist offenses for up to 42 days without having to file formal charges—an increase

of 14 days over the existing limit. The House of Commons voted narrowly to support her, but on October 13 the House of Lords voted 309–118 against the new extension. Smith promptly announced that she was withdrawing the proposal, though she would continue to push the counterterrorism bill of which it was a part, and the government might in future resubmit the 42-day limit in separate legislation.

Scotland's first full year of Scottish National Party rule saw the announcement of a significant new tax policy. On September 3 First Minister Alex Salmond (see BIOGRAPHIES) announced the abolition of the council tax (a local property tax) in Scotland and its replacement by a local income tax. He said that this would remove 85,000 Scots from poverty. Critics, however, said that the economy would be harmed if Scotland had a higher overall rate of income tax than the rest of the U.K.

More widely, Salmond argued consistently for Scotland to have greater control over its own economy. Under the devolution arrangements agreed to a decade earlier, Scotland's Parliament could vary the country's overall budget within very narrow limits. Brown (himself an MP for a Scottish constituency) acknowledged in a speech on September 5 that there was a case for greater economic freedom for Scotland. He asked for this issue to be explored by an independent commission, headed by Sir Kenneth Calman, that had been established in 2007.

Economic Affairs. In common with most other major countries, the United Kingdom's economy suffered from the

global financial crisis in 2008. GDP, which had risen in each quarter for 16 years, started falling in the second half of the year. By year's end, unemployment was up by 0.7% to 6.0% from a year earlier, house prices had fallen by almost 20% from their 2007 peak, and the main index of share prices was down 31%. A number of well-known companies went out of business late in the year, especially in the retail sector and most notably Woolworths, whose 800 general stores had for decades formed the heart of many high streets.

On February 17 the government announced that it would nationalize the troubled Northern Rock bank. This proved to be no more than an overture to a symphony of problems that affected banks and their customers. As house prices fell and worries about bad debts grew, mortgage lenders started taking a far tougher stance toward home buyers. Almost overnight it became impossible to borrow the full price of a home; demands for down payments of 20% or more became common. This dented the housing market still further, and the fall in prices accelerated. Even more serious for the wider economy, banks almost completely stopped lending to each other; the wholesale market in loans virtually dried up.

On July 21 the Halifax Bank of Scotland (HBOS) sought to improve its capital base by issuing £4 billion (about \$8 billion) in new shares, but investors bought only 8% of the new stock, and underwriters had to pay for the rest. The new money provided HBOS with only a few weeks' respite. On September 17 a deal was announced to sell HBOS to another major bank, Lloyds TSB. The deal, which was brokered by Brown and Darling in order to prevent HBOS's total collapse, priced the company at £12 billion (about \$21.5 billion), less than one-fifth of its value a year earlier. On September 29 the government nationalized another bank, Bradford and Bingley, taking over control of its mortgages and selling its branches and savings operation to the Spanish banking group Santander.

On October 8 Brown and Darling went even farther and announced that the government would be willing to spend up to £50 billion (about \$87 billion) to buy preference shares in Britain's banks, to help them rebuild their capital base, and would provide £200 billion (about \$350 billion) in short-term loans to revive interbank lending and £250 billion (about \$437 billion) to guarantee bank debts. This plan, which was

much bolder than had been expected, was widely admired in, and its principles were copied by, other countries. By year's end, however, it was unclear how well, or how quickly, the plan would work. In particular, having been criticized for lending too much too readily barely a year earlier, banks now faced the opposite criticism—lending too little and not doing enough to support healthy businesses and creditworthy home buyers.

If the government was credited with acting boldly over the credit crisis, it faced criticism from some quarters for its wider management of the economy. In his budget speech on March 12, Darling predicted that government borrowing in the following 12 months would rise to £43 billion (about \$86 billion), or 3% of GDP. As the year wore on, it became clear that this forecast, like his prediction of continued economic growth, was overly optimistic. One consequence was that the government broke one of its own “golden rules,” which sought to limit the U.K.'s public debt to 40% of GDP. On November 24 Darling delivered to Parliament his annual prebudget report, in which he forecast that the economy would contract by up to 1.25% in 2009, that government borrowing would climb to £78 billion (about \$116.5 billion) in 2008–09 and £118 billion (about \$176 billion) in 2009–10, and that the U.K.'s public debt would rise to more than 57% of GDP by 2014.

Meanwhile, the Bank of England (BOE) had to navigate a careful course between supporting Britain's fragile economy and preventing high inflation. The hike in global energy and food

prices caused Britain's consumer price index to rise to 5.2% in the 12 months to September, far above the 2% target set by the government. The rise in inflation during the summer made it hard for the BOE to reduce interest rates as fast as many people wanted. Even so, the BOE's benchmark rate did fall from 5.5% at the start of the year to 5.25% in February and 5% in April. The next reduction did not take place until October, when the rate was cut by another half percentage point as part of a round of reductions coordinated with other central banks around the world. Then, on November 6, the BOE lowered rates by another 1.5%, to 3%—the largest reduction in more than a quarter of a century. This was followed by a reduction in December to 2%, the lowest rate since 1951, as the BOE predicted that inflation would fall rapidly to well below the 2% target during 2009. One other consequence of the interest-rate reductions was that the value of sterling fell sharply. In the final three months of 2008, the pound depreciated by about 20% against both the U.S. dollar (ending up at £1 = \$1.46) and the euro (£1 = €1.05).

Foreign Affairs. The U.K. maintained 4,000 troops in southern Iraq to train and advise Iraq's police and armed forces. Plans to reduce the number to 2,500 were deferred in April. The U.K. also retained around 8,000 troops in Afghanistan throughout the year, mainly in Helmand and Kandahar provinces and the capital, Kabul. By June 2008 the number of fatalities among British troops (including those caused by accidents and “friendly fire”) had reached 100 since 2001.

In February news leaked that Prince Harry, the younger son of Prince Charles, had been serving in Afghanistan since the previous December as a forward air controller in Helmand province, guiding fighter jets toward suspected Taliban targets. Once this information became public, Harry was withdrawn back to the U.K.

On June 19 the bill approving the Lisbon Treaty on the future of the European Union received royal assent and passed into law. Opponents of the treaty argued that the bill should have been withdrawn following the treaty's rejection by the Irish people in a referendum a week earlier. (As EU treaties required unanimity, one country's rejection was enough to block it.) U.K. ministers responded that the treaty was in Britain's interests and that Parliament should therefore approve it—which it did with large majorities in both the House of Commons and the House of Lords.

Northern Ireland. On March 4 Ian Paisley announced that he would step down in May as Northern Ireland's first minister and leader of the Democratic Unionist Party (DUP). Paisley, who turned 82 in April, had led the DUP since its founding in 1971. His successor, Peter Robinson (*see* BIOGRAPHIES), was quickly mired in controversy following disagreement in the Northern Ireland Assembly and Review Committee over the devolution of police and justice powers to the province. This had been due to take place in May, but the DUP said that it should be postponed, as there was not yet sufficient public confidence in the proposed arrangements.

Martin McGuinness, leader of Sinn Féin and deputy first minister, said that this decision breached the 2006 agreement that restored the Northern Ireland Assembly and Executive and refused to take part in Executive meetings for the time being. As the devolution system required cross-party agreement, this meant that the Executive was suspended. In contrast to past disputes between Sinn Féin and the DUP, the two parties' leaders refrained from public abuse. The deadlock persisted, however, and no major decisions could be taken regarding the province's future.

In September 2008 the International Monitoring Council (IMC) declared that the Army Council of the Provisional Irish Republican Army (IRA) was “no longer operational.” The council had directed the IRA's terrorist campaign against British rule for three decades until the Good Friday Agreement in 1998.

UNITED STATES

Area: 9,522,055 sq km (3,676,486 sq mi), including 204,083 sq km of inland water and 156,049 sq km of the Great Lakes that lie within U.S. boundaries but excluding 109,362 sq km of coastal water

Population (2008 est.): 305,146,000

Capital: Washington, D.C.

Head of state and government: President George W. Bush

With the long-developing subprime-mortgage crisis as the proximate cause, the United States led the world into a historic economic recession in late 2008. The downturn was marked by the collapse of financial firms, a dramatic decline in equity prices, and a subsequent falloff in lending and economic activity. By September the malaise had spread to developed economies in Europe, Asia, and elsewhere, prompting Western governments to undertake extraordinary rescue measures, often by nationalizing private banks. The U.S. government abandoned traditional free-market boundaries as it struggled to fashion an effective response, providing billions in assistance to save some firms, lowering interest rates, injecting capital to encourage lending, and taking an unprecedented equity position in private companies. By year's end the heroic measures had stabilized the economy at least temporarily, but the U.S. was clearly deeply mired in a global economic slump of uncertain duration.

The economic turmoil occurred against the backdrop of a national election, and the Republican administration's controversial response to the crisis, accompanied by a public demand for policy change, helped Democrats take full control in Washington. The deteriorating economy and an overextended military also helped to ensure that the U.S. enjoyed few diplomatic successes during the year. In the ongoing war on terrorism, one bright spot for the administration was the continued firming up of the security situation in Iraq and the completion of a road map for ending U.S. combat operations there. The progress in Iraq, however, was at least partially offset by deteriorating conditions in Afghanistan that would require an increased Western troop presence.

Economic Crisis. Waning confidence in the value of securitized home mortgages and derivatives finally caught up with the U.S. economy during the year, prompting a disastrous chain reaction that eventually infected financial markets worldwide. The mortgages were packaged together and sold in bundles, backed by intricate and highly leveraged financial contracts, in a scheme designed to mitigate risk. The instruments, designed by Wall Street lawyers outside government regulatory oversight, were complicated and lacked transparency. When cracks appeared, instead of spreading and minimizing risk, the system acted to amplify unease and created a domino effect that spread across the financial system, from housing to mortgage lending, to investment banks, to securities firms, and beyond.

In January, amid gloomy news of plummeting home sales and the first annual decline in home prices in at least four decades, equity prices plummeted rapidly. In response, Congress approved an economic stimulus pack-

New York City hedge-fund operator Bernard Madoff, accused of having defrauded investors of up to \$50 billion in a giant Ponzi scheme, leaves the federal courthouse in Manhattan on December 17 after being released on bond and ordered to be placed under house arrest.

Daniel Barry—Bloomberg News/Landov

age that provided a \$600 cash rebate for most persons filing income-tax returns. The measure put \$168 billion quickly into the economy but served only to delay more serious consequences. Institutions exposed to securitized mortgages and associated instruments saw their positions continue to deteriorate. In March, Bear Stearns, a venerable New York City investment bank, neared collapse and was sold in a fire sale backed by \$30 billion in Federal Reserve funds. In July, Indymac Bancorp, the largest thrift institution in the Los Angeles area, was placed in receivership.

On July 30, Pres. George W. Bush signed a bill designed to shore up mortgage lenders by guaranteeing up to \$300 billion in new fixed-rate mortgages. The measure was ineffectual, however, and on September 7 the federal government essentially nationalized both Fannie Mae and Freddie Mac, which together owned or guaranteed half of the country's \$12 trillion mortgage market. Instead of providing reassurance, the move only heightened investor worries about the economy and financial markets.

In mid-September the dam broke. Merrill Lynch, the country's largest brokerage house, was sold to Bank of America under duress. Investment bank Lehman Brothers filed for bankruptcy, and federal regulators said that the firm owned so many toxic assets that a bailout attempt would be futile. A major money-market mutual fund, Reserve Primary, said that losses threatened its solvency; the Federal Reserve (Fed) offered \$105 billion to shore up money funds, and the U.S. Treasury offered temporary insurance to money-fund investors. The Fed also pumped \$85 billion into insurance giant AIG, which had provided backing for mortgage instruments, with the government taking a major equity position in return. Washington Mutual, the country's largest thrift institution, was seized as insolvent and sold for a fraction of its former value. By this time the contagion had spread to Europe and Asia, throwing the developed world economy into turmoil. (See Special Report on page 170.)

U.S. Treasury Secretary Henry Paulson proposed a \$700 billion rescue bill—initially written on only three pages—that was eventually approved by Congress on October 3. The Troubled Asset Relief Program (TARP) allowed federal authorities to purchase assets of failing banks and eased rules requiring

Al Behrman/AP

As U.S. unemployment figures surge above 7% in December, job seekers in Cincinnati, Ohio, use computers at an employment centre to look for work.

strict valuation of distressed securities. The week of October 6–10, however, proved to be the worst one on Wall Street in at least 75 years, with the Dow Jones Industrial Average (DJIA) down 18%. Under pressure to prevent a complete financial collapse, during October the Fed pumped more than \$2.5 trillion in emergency loans to banks and non-financial firms, lowering interest rates and working with European central banks to contain the damage.

In November, as confidence continued to erode, Paulson abandoned plans to buy troubled assets under TARP and instead launched a plan to recapitalize financial firms, mostly by purchasing preferred shares of banks. The Fed also pledged another \$800 billion to shore up distressed mortgages, provided \$45 billion in assistance to Citigroup, and vowed further cuts to already-low interest rates. Those actions, in addition to similar moves by European and Asian governments, appeared to stabilize investor confidence. The stock market hit bottom for the year on November 20, with the DJIA settling at just over half of its record level of a year earlier. Even so, all indicators were showing that the underlying U.S. economy—technically in recession since the previous December—would continue to suffer from the crisis for months to come.

Other distressed U.S. industries began petitioning Washington for assistance. After Congress refused a request from Detroit automakers for a \$14 billion package, in December the Bush administration awarded up to \$17.4 billion in loans to General Motors and Chrysler. That effectively postponed the automakers' plight until 2009 and handed the problem over to a new administration. Aides to President-elect Barack Obama (*see* BIOGRAPHIES) publicly contemplated another federal stimulus package of \$850 billion or more, including money for government infrastructure projects, as an early 2009 priority.

The wild economic year devastated the country's balance sheet. The federal deficit for the fiscal year that ended September 30 almost tripled, to \$454.8 billion, and analysts predicted that it would top \$1 trillion in 2009. Investors lost an estimated \$7.3 trillion in value from the decline in the 5,000 largest stocks alone. Overall, the year produced a 13% drop in the median home resale price, and an estimated 1 in 10 homeowners was in financial distress. Unemployment started the year at a modest 5% but stood at 7.2% in December

and was climbing. The accelerating recession at least temporarily erased fears over rising inflation, with the consumer price index up little more than 1% in 2008. At midyear, as international demand peaked, oil touched \$147 a barrel, producing gasoline prices of more than \$4 per gallon and widespread distress in American households. By year's end demand was down, crude was under \$40 per barrel, and gasoline had dropped to around \$1.60 a gallon.

The economy took a final blow in December with the arrest of Bernard Madoff, a major New York City hedge-fund operator. Madoff was accused of having run a giant Ponzi scheme, bilking his investors of up to \$50 billion in what could be the largest financial scandal in history.

War on Terrorism. Five years after leading the invasion that toppled Saddam Hussein, the U.S. negotiated with the new Iraqi democratic government for an eventual end to allied combat operations. The agreement capped a year of declining violence and increased government control in Iraq and represented a dramatic turnaround for U.S. policy, which had seemed destined for a humiliating defeat only two years earlier. It also cleared the way for redeployment of U.S. troops elsewhere, particularly into resurgent terrorist areas of Afghanistan. Outgoing president Bush hailed the Iraqi developments as a major step forward for democracy and credited the 2007 U.S. military surge, but his year-end visit to Iraq ironically was marred by dramatic political protest.

Under U.S. pressure the Iraqi parliament took several steps to accommodate Iraq's Sunni minority and achieve ethnic reconciliation. In March the Shi'ite-dominated government deployed 30,000 Iraqi troops, accompanied by U.S. air support, into Basra in a successful thrust to depose the Mahdi Army, a radical Shi'ite militia that had long controlled the port city. Iraqi troops later entered and occupied Sadr City, a renegade Shi'ite section of Baghdad, without significant resistance.

As violence ebbed markedly during the year, the Iraqi government took over increasing responsibility for its domestic security. In September Anbar province, once the cradle of the Sunni insurgency against the central government, was turned over to full Iraqi control. The following month Iraq assumed responsibility for some 100,000 (mostly Sunni) fighters; these Awakening Council forces had previously been paid and supervised by the U.S. military.

At year's end Iraq and the U.S. signed a status-of-forces agreement that called for the removal of allied troops from Iraqi cities by mid-2009 and complete withdrawal of U.S. combat troops by the end of 2011. The agreement also gave Iraqi civilian authorities criminal jurisdiction over off-duty U.S. troops who committed infractions while away from their bases. Incoming U.S. president Obama had campaigned for earlier withdrawal of U.S. forces within 16 months—or by May 2010. Obama later signaled, however, that he would listen to military advice and remain flexible on his timetable.

By year's end allied forces were withdrawing from Iraq, and the U.S. military presence was diminishing toward presurge levels of 135,000. According to the Associated Press, U.S. troop deaths in 2008 stood at 314, down from more than 900 in 2007. (A total of 4,221 U.S. soldiers had died in the conflict since it began in 2003.) Some Middle East experts suggested that the security improvements were largely the result of internal Iraqi political reconciliation. In a final visit to Baghdad on December 14, however, President Bush declared that his administration's policies deserved credit and called the surge "one of the greatest successes in the history of the United States military."

A series of images shows Iraqi journalist Muntadar al-Zeidi throwing a shoe in protest at U.S. Pres. George W. Bush at a press conference in Baghdad on December 14; Iraqi Pres. Nuri al-Maliki appears with Bush at the lectern; the journalist was temporarily jailed after the highly publicized incident.

At a press conference that same day with Iraqi Pres. Nuri al-Maliki, in a highly publicized incident, an Iraqi journalist threw two shoes at Bush as a sign of disrespect. Bush ducked the shoes; the journalist was temporarily jailed; and critics noted that such political protest would have been inconceivable in Saddam's Iraq.

The military progress in Iraq was offset by renewed violence in Afghanistan as Sunni-dominated militant groups, including the Taliban and al-Qaeda, penetrated and challenged NATO forces in more than half of the country. In tacit recognition of the threat, U.S. Army Gen. David Petraeus, architect of the Iraq surge strategy, was elevated in October to head the U.S. Central Command, effectively taking control of allied military strategy in the war on terrorism, including the aggression in Afghanistan.

The Bush administration's legal strategy toward suspected terrorists suffered setbacks during 2008. In June the U.S. Supreme Court ruled, in a 5-4 decision, that even enemy combatants held outside the U.S.—at the U.S. detention facility at Guantánamo Bay, Cuba—had a right to a review of their cases in U.S. civilian courts. The ruling declared unconstitutional parts of two laws approved by Congress after 9/11 that were designed to allow indefinite detention of suspects and their eventual trial by military commissions. It further complicated dozens of pending combatant cases that were already burdened with charges of torture, withholding of evidence, and violations of international law by the U.S. military.

Two war crimes trials were concluded during the year, the first in the U.S. since World War II. Salim Hamdan, a former driver for Osama bin Laden, was convicted in August on reduced charges of having provided "material

support for terrorism." He received a modest sentence of five and a half years and was released at year's end. A second defendant, Ali Hamza al-Bahlul, a Yemeni accused of having produced propaganda for al-Qaeda, including videos, was convicted by a military commission at Guantánamo Bay in October and given a life sentence. Neither Bahlul nor his attorney participated in his defense.

In U.S. civilian courts, federal prosecutors won convictions in two antiterrorism criminal cases. In November, after a previous trial ended in a hung jury, the Holy Land Foundation and five former organizers were found guilty in Dallas of having funneled \$12 million to the terrorist group Hamas. One observer alleged that the Muslim foundation's practice of supplying cash payments to Palestinian terrorists' families was the moral equivalent of car bombing. In December five foreign-born Muslims were convicted in New Jersey on charges that included having planned to kill U.S. soldiers at Ft. Dix. Defense attorneys claimed that the men were only talking and had planned no real violence, but prosecutors said that the convictions proved the effectiveness of the U.S. post-9/11 strategy of infiltrating violence-prone groups.

Domestic Policy. As lawmakers awaited a new administration following the historic win of Obama in the presidential contest, election-year political considerations dramatically slowed the U.S. legislative process. (See Special Report on page 176.) Despite record farm and food prices, Congress approved a \$289 billion farm bill renewal that expanded agriculture subsidies and food-assistance programs. Congress also postponed a scheduled 10.6% reduction in physician reimbursements for Medicare, paying for the measure by trimming payments to insurance companies

that provided supplemental health care programs. Bush vetoed both measures, but his vetoes were overridden both times. Two bills augmenting veterans' benefits—for housing, health care, life insurance, and family allowances—were signed into law. Another law dramatically expanded G.I. Bill education awards, essentially providing a full college education to veterans who had at least three years of service and allowing benefits to be transferred to family members.

Preparing to leave office, the Bush administration at year's end proposed several dozen regulatory changes. Among them were provisions for expanding federal land eligible for shale oil development, increasing allowable on-road hours for truck drivers, allowing health care workers to refuse to participate in procedures that violated their moral or religious beliefs, permitting the possession of licensed firearms in national parks, reducing access to Medicaid vision and dental benefits, eliminating factors such as greenhouse conditions in Endangered Species Act reviews, and slowing federal protection for workers exposed to toxic chemicals. Obama transition officials promised to review the entire list in 2009.

Foreign Policy. U.S. relations with a resurgent and energy-rich Russia deteriorated further in 2008. Effects of heightened tensions could be seen worldwide as the two countries sparred over missile defense, Latin America, Iraq, Iran, and Russia's invasion of a province of Georgia. In one example, Russia almost single-handedly blocked U.S. efforts to ratchet up UN sanction pressure on Iran over its refusal to allow nuclear inspections. By year's end some commentators were saying that U.S.-Russia relations were at their lowest ebb since the end of the Cold War nearly two decades earlier.

In April, under U.S. prodding, NATO agreed that it would eventually accept Georgia, Russia's southern neighbour, as a member—even though Russia opposed NATO's eastward expansion and viewed it as a security threat. Four months later, Russian troops invaded two rebellious Georgian provinces, South Ossetia and Abkhazia, and recognized them as independent states. NATO stepped up its military presence in the region, with U.S. warships delivering relief efforts to Georgia via the Black Sea. In what was widely viewed as a response, Russia dispatched a military flotilla to Venezuela in November in a show of support for Pres. Hugo Chávez, a critic of the U.S., and at year's end Moscow also staged a rare Russian navy visit to Cuba.

With Chávez and Cuba's Raúl Castro in the lead, Latin American leaders formed a South American union (Unasur) and took other steps aimed at reducing U.S. influence in the region. A group of 33 countries staged a summit meeting in Brazil in December, pledging internal cooperation and welcoming Cuba after having failed to invite U.S. representatives.

Efforts to prevent nuclear weapons proliferation suffered setbacks during the year. No progress was made in stopping nuclear development in either Iran or North Korea or in numerous Middle Eastern countries that were nervous about a potential threat from Iran; a number of Middle Eastern countries had initiated steps toward starting their own nuclear programs. Iran, continuing to insist that its nuclear development was solely for civilian energy purposes, persisted in stonewalling international watchdogs, even while Russia supplied Iran with uranium for enrichment and processing that could be diverted to weapons purposes. At midyear, in Geneva, U.S. authorities engaged in direct talks with Iranian nuclear negotiators for the first time and also joined major powers in offering yet another package of incentives for Iranian abandonment of its nuclear ambitions. Iran continued to obfuscate, however, and Congress tightened U.S. economic sanctions on Iran in September.

After agreeing in 2005 to scrap its nuclear weapons program in return for normalized world relations, North Korea accepted promised food and fuel assistance from the U.S. and allies. As a show of good faith, President Bush removed Pyongyang from an international blacklist as a state sponsor of terrorism. In December five countries met to persuade North Korea to accept a verification regime written by its ally, China. The talks collapsed, however, when the North Koreans refused to sign the agreement, with analysts speculating that they were waiting for more favourable terms from the new U.S. administration. Prior to the breakdown, the U.S., Russia, China, and South Korea had already delivered 500,000 tons of fuel oil promised to North Korea for its cooperation.

The U.S. continued to push for rapprochement between India and Pakistan, both to facilitate critical support for antiterrorism efforts and to counter growing Chinese influence in Asia. In October the U.S. signed an agreement to supply technological aid for India's nuclear program, even though India had tested nuclear weapons and refused to sign the Non-proliferation Treaty. In November, after Pakistan-based terrorists staged a bloody raid on Mumbai (Bombay), U.S. Secretary of State Condoleezza Rice visited the subcontinent to pressure both countries to continue normalizing relations. (See Special Report on page 192.)

(DAVID C. BECKWITH)

DEVELOPMENTS IN THE STATES 2008

The national economic recession hit U.S. states with a vengeance in late 2008, throwing budgets deeply into the red and prompting forecasts of even more financial trouble ahead. Forced to balance their books, a few states raised taxes or fees to generate new revenue. Most states, however, tightened their belts—postponing or canceling new programs, laying off state employees, and trimming spending across the board to weather the fiscal storm. The action came as state capitals continued to wrestle with a host of issues left unresolved on the federal level, including immigration, global warming, children's health insurance, and education reform. Regular legislative sessions were held in 44 states during the year, and 22 states staged one or more special sessions, often to deal with financial issues.

Eleven states held gubernatorial elections, and Democrats took over the Missouri governorship previously held by Republicans; this left the prospective 2009 governorship lineup at 29 Democrats and 21 Republicans. Legislative elections were staged in 44 states and resulted in modest gains for Democrats. Republicans won control of the Montana Senate and the Tennessee House and Senate, all previously tied or held by the other party. Democrats, however, took charge in the Delaware House, New York Senate, Nevada Senate, Ohio House, and Wisconsin Assembly. The Alaska Senate, previously Republican, and the Montana House, previously Democratic, were tied. That meant that Democrats had two-chamber control of 27 state legislatures, Republicans dominated in 14 states, and control was split or tied in 8 others. Nebraska had a nonpartisan unicameral legislature.

Structures, Powers. Voters in three states—Connecticut, Hawaii, and Illinois—rejected ballot measures authorizing conventions to write new state constitutions. Opponents said that the conventions could be hijacked by special interests—including opponents of same-sex marriage—and were an inefficient way to resolve local governmental concerns. California and New York became the first states to create a cabinet-level position to oversee volunteer and charitable activity.

Arkansas became the 45th state to authorize annual legislative sessions. South Dakota voters decided to keep its term limits for legislators. By a narrow margin, California voters endorsed a

Gary Kazanjian/AP

Protesters against Proposition 8—a ballot proposition that would overturn the California Supreme Court's decision to legalize same-sex marriage—march in a rally in Fresno on November 2.

proposal to have state legislative districts drawn up every 10 years by a citizen panel instead of by the legislature itself.

Finances. As a mid-decade housing boom turned to bust, state revenue projections declined early in 2008, sending state authorities scrambling for cost savings. The outlook turned even more bleak in the fall as the financial crisis accelerated the U.S. descent into recession and pushed most state budgets into deficit. States were particularly hit by economic slowdowns because sales taxes and property-transfer levies were adversely affected, while state spending on unemployment assistance, Medicaid, and other benefits rose quickly. Among the hardest-hit states were California, which was forced to lay off thousands of state workers, and New York, which was dependent upon Wall Street transactions for one-fifth of state revenue. (See Special Report on page 170.)

Most states were required to balance their budgets every year. Spending restrictions were enacted in some 40 states, often targeting health care and even education, the biggest items in most state budgets. The National Conference of State Legislatures reported that states found \$40 billion in cost savings or additional revenue during the year but still faced an additional \$97 billion in deficits for the 2009 and 2010 fiscal years. At year's end, governors petitioned President-elect Barack Obama

(see BIOGRAPHIES) for federal infrastructure assistance and for increased federal funds to help defray fast-rising Medicaid, unemployment insurance, and food-stamp costs.

In November balloting, Colorado voters refused to repeal the state's strict limits on increased spending. Voters in North Dakota turned down a proposal to halve the state's income tax, and Massachusetts voters rejected the abolition of the state income tax. Maine voters voided a legislative plan to increase taxes on beer, wine, and soft drinks.

Several states took steps to mitigate the mortgage crisis. North Carolina approved a foreclosure-prevention law offering state mediation assistance for borrowers. Twenty-nine

states tightened laws covering mortgage licensing, and four—Kentucky, Maryland, Utah, and Washington—established mortgage fraud as a crime. Seven others tried to curb unscrupulous foreclosure-rescue scams.

At midyear, with energy prices at record levels, the country's governors sought a doubling of the federal government's low-income heating-assistance program. Energy prices dropped markedly in the fall, however, and the anticipated crisis disappeared. New York became the first state to force online retailers to collect sales taxes; e-commerce company Amazon quickly filed suit in an attempt to void the law.

Social Issues. The Supreme Courts of California and Connecticut established same-sex marriage as a state constitutional right during the year, making those states the first to legalize same-sex unions since the top Massachusetts court authorized full marriage rights for homosexuals in 2003. The California decision, which was announced in June, was quickly challenged, however, and in the November election was overridden (52–48%) by state voters. The ballot result sorely disappointed gay rights advocates who were hoping for the first major voter ratification of same-sex marriage, and it also called into question the legality of 18,000 marriages performed in California in the five months following the court decision. New York's governor announced

that the state would recognize gay marriages performed elsewhere. Even so, voters in Arizona and Florida banned same-sex marriage in their states, and in a related measure Arkansas voters required that foster parents be a married couple. At year's end 40 states had specifically outlawed same-sex marriage, through either state law or constitutional amendment, while 11 states and the District of Columbia legally recognized some form of domestic partnerships, civil unions, or gay marriage.

Nebraska became the fourth state to ban race-based preferences in state hiring, contracting, and educational admissions decisions. A similar referendum, however, failed on a close vote in Colorado, which represented the first defeat for the anti-affirmative-action measure.

Right-to-life advocates suffered reverses during the year. Washington voters joined Oregon in approving "death with dignity" acts allowing physician-assisted suicide. Michigan voters terminated a long-standing ban on embryonic stem cell research. South Dakota voters turned down a highly restrictive proposition banning abortion except in cases of rape, incest, or danger to the mother's health. For the second time, California voted down a ballot measure requiring parental notification before a minor could obtain an abortion.

Law, Ethics. Deadlock within the federal government on immigration reform led to state legislative action, but no consistent pattern developed. The administration of Pres. George W. Bush moved to head off a growing revolt over Real ID, a 2005 federal law requiring states to verify the identity of all drivers and issue tamper-proof licenses, a measure that states said was too costly and infringing on privacy rights. Facing widespread foot-dragging and noncompliance, the administration gave all states two additional years to conform. Oregon and Texas banned illegal immigrants from obtaining driver's licenses, and California's governor vetoed a legislative measure allowing them to be licensed. In an effort to combat accidents involving undocumented immigrants, Georgia upgraded to felony status a repeat conviction of driving without a license. Georgia and Mississippi increased mandatory use of the federal E-verify system to combat the hiring of illegal immigrants, but a U.S. judge blocked a similar Oklahoma law. Arizona voters refused to amend a controversial law that cracked down on employers who

knowingly hired illegal immigrants. Oregon voters defeated a ballot measure restricting bilingual education.

Arkansas voters, seeking to fund college scholarships, approved the 43rd state lottery. Maryland legalized slot machines at racetracks. Ohio and Maine voters rejected new casinos, but Colorado and Missouri voters expanded casino games and hours of operation. Voters in Massachusetts decriminalized the possession of one ounce or less of marijuana, and Michigan became the 13th state to allow marijuana for medical use. California voters rejected a major drug-law rewrite that would have decriminalized possession of small amounts of marijuana.

Six states increased penalties for dog and other animal fighting. Massachusetts banned greyhound racing. Concealed-carry gun laws continued to expand: Florida allowed permit holders to take weapons to work (if they were left in a parked vehicle), and Georgia allowed guns in restaurants, parks, and public transit. Alaska, Indiana, Georgia, and Tennessee toughened laws against Internet predators.

The year produced numerous ethics investigations, one involving Alaska Gov. Sarah Palin (*see* BIOGRAPHIES), whom state legislators accused of having improperly fired the state public-safety commissioner. A special counsel exonerated her one day before the November election, in which she ran as the Republican vice presidential candidate. New York Gov. Eliot Spitzer was forced to resign after he admitted hav-

Embattled Illinois Gov. Rod Blagojevich, who faced federal charges of conspiracy to commit fraud and solicitation of bribery, leaves his home in Chicago on December 15.

Charles Rex Arbogast/AP

ing engaged a prostitute. Ohio Attorney General Marc Dann also resigned in a sexual-harassment scandal. In December, Illinois Gov. Rod Blagojevich was arrested by federal agents and charged with conspiracy to commit fraud and solicitation of bribery, including an alleged attempt to sell Barack Obama's vacated U.S. Senate seat.

State use of the death penalty was suspended early in the year while the U.S. Supreme Court reviewed the constitutionality of lethal injections. After executions resumed in May, the use of capital punishment continued to decline. During 2008, 37 inmates were executed, down from 42 in 2007. Florida enacted a statute setting compensation for wrongful criminal convictions; the amount was \$50,000 for every year served in prison.

Health, Welfare. Iowa became the 28th state to ban smoking in any public place, including bars and restaurants. Six additional states (for a total of 28) required cigarettes to be wrapped in self-extinguishing paper to prevent fires; this effectively made the statute a national requirement.

Health-conscious California became the first state to ban trans fats and also the first to require posting of calorie and nutritional content on fast-food menus. In another antiobesity move, five states boosted the mandatory time that schoolchildren must spend at recess or gym classes.

Budget problems forced several states (including California, Illinois, Missouri, New Mexico, and Pennsylvania) to postpone expansion of state health insurance coverage. Iowa, Colorado, and Montana expanded children's health care, and Florida and Maine increased funding for their novel health insurance assistance programs. New Jersey became the first state to require that all children have health insurance, though the measure contained no enforcement clause.

New Jersey joined California and Washington in mandating that employers provide up to six weeks of paid leave annually to care for family members, but funding for Washington's law never materialized during the year. Seeking to curb infant deaths, Nebraska on July 1 joined states providing a "safe haven" for unwanted children. The new law failed to specify any age parameters, however, and within a few months, nearly three dozen older children, several from other states and some as old as 17, had been legally handed over to state care. At year's end

Nebraska legislators amended the law with a 30-day age limit.

Environment, Education. California became the first state to enact a law encouraging home building in areas near workplaces and public transportation; the measure was designed to curb suburban sprawl and air pollution. Connecticut joined four other states in capping greenhouse gas emissions, and Delaware, Florida, and New Hampshire also approved measures to reduce emissions blamed for global warming. Delaware approved a major offshore wind energy project.

Massachusetts became the first state to exempt non-food-based biofuels from state gasoline taxes and also approved a unique plan to manage its waters as a wind, wave, and tidal energy resource. Alaska issued a license for a \$20 billion natural gas pipeline. Meanwhile, California voters approved nearly \$10 billion in bonds for high-speed-rail construction between Los Angeles and San Francisco.

Minnesota voters set aside a percentage of state sales-tax revenue for wetland protection. Alaska voters, seeking to protect moose, approved a game-management program that allowed the shooting of wolves from airplanes. Missouri voters approved a measure that required utilities to produce 15% of energy through renewable sources by 2021, but Californians rejected a more drastic requirement of 50% by 2025. Hawaii became the first state to require solar-powered water heaters in new homes.

Some 32 states increased funding for prekindergarten education programs, but some plans were trimmed in late-year budget cutting. A shortage of funds torpedoed Arizona Gov. Janet Napolitano's plan to grant free public college tuition to all high-school graduates who had at least a B average.

Regulation. Reacting to high accident rates, several states tightened restrictions on new drivers, particularly teenagers. Virginia established for teen drivers a "baby DUI" law, a strict .02 blood-alcohol standard, which was one-quarter the allowable amount for adults. California banned teens from using cell phones while driving and also outlawed text messaging for all drivers. California and Washington joined three states that banned motorist use of handheld cellular phones. Arizona and Ohio voters rejected proposals to tighten restrictions on "payday lenders" accused of having predatory business practices. (DAVID C. BECKWITH)

URUGUAY

Area: 177,879 sq km (68,679 sq mi)
Population (2008 est.): 3,350,000
Capital: Montevideo
Head of state and government: President Tabaré Ramón Vázquez Rosas

As Uruguayan Pres. Tabaré Vázquez completed his penultimate year in office in 2008, he enjoyed an approval rating well above 50%. Vázquez, leader of the leftist coalition the Progressive Encounter–Broad Front (EP-FA), could not succeed himself without a constitutional amendment, however, and he repeatedly and unequivocally indicated that he did not intend to seek reelection. This left Danilo Astori, Vázquez’s former finance minister, and José Mujica, chairman of the Senate and a former Tupamaro guerrilla leader, as the two front-runners for the coalition’s presidential nomination. Among the opposition, the Colorado Party barely reached double digits in the polls. The Blanco Party (PN), polling above 30%, perhaps had the best chance to unseat the EP-FA—especially if, as many ex-

pected, former president Luis Lacalle obtained PN’s nomination.

Uruguay experienced another year of positive economic results. The economy grew at about 10%. Inflation remained under double digits, running at an expected 7.5%; real salaries were up by more than 12%; and unemployment dropped to 7.6%. In the last half of the year, however, the global economic crisis began to affect the country, with the Uruguayan peso falling from 19 to 24 against the U.S. dollar and significant layoffs occurring in the meatpacking and textile industries. Nevertheless, President Vazquez vowed to bring down the retailer inflation rate to the promised 3–7% threshold (the figure had risen to 8.1% in the first 11 months of the year) and to guard against food price speculation or monopolization of food.

Crime and personal security remained important issues during the year. The country’s minister of the interior, Daisy Tourné, came under severe criticism because of Uruguay’s sharply rising crime rate. Strikes and labour unrest increased during the year as labour unions pressured the leftist government for better wages. In November the Uruguayan parliament passed the country’s first legislation permitting abortion, but Vázquez vetoed this measure a few days later.

(MARTIN WEINSTEIN)

An activist in Montevideo, Uruguay, demonstrates on November 14, the day that Pres. Tabaré Vázquez vetoed a law, passed by the parliament, that had legalized first-trimester abortions.

UZBEKISTAN

Area: 447,400 sq km (172,700 sq mi)
Population (2008 est.): 27,345,000
Capital: Tashkent
Chief of state and head of government: President Islam Karimov, assisted by Prime Minister Shavkat Mirziyayev

In 2008 Uzbekistan continued to maintain good relations with Russia while seeking to improve its contacts with the West. In February, Uzbek Pres. Islam Karimov hailed Russian military assistance, and at the end of March the Uzbek Senate ratified Uzbekistan’s return to the Collective Security Treaty Organization. During Russian Prime Minister Vladimir Putin’s visit to Tashkent in September, an economic cooperation pact for 2008–12 was signed. Included in the accord was an agreement on the construction of a new pipeline for the export of Uzbek natural gas to Russia.

During the course of the year, the sanctions imposed by the European Union were reviewed and largely dropped; in September, however, the Uzbek authorities appealed to the EU for an end to the “double standard” that they felt was being applied to them. The sanctions had been imposed after the Uzbek refusal to permit independent investigation of the Andijan events in 2005, during which government troops reportedly killed hundreds of unarmed demonstrators. International human rights groups and Uzbek activists appealed to the EU not to lift the sanctions merely because a few human rights activists had been released from prison. In September Uzbekistan officially banned the use of child labour in the cotton harvest, but this did not prevent refusals by U.S. and British firms to buy Uzbek cotton because children were forced to work as pickers.

In April Karimov visited Kazakhstan, describing that country as a key partner of Uzbekistan in Central Asia, but he rejected the Kazakh concept of a Central Asian union. Relations were less smooth with Tajikistan. Much of the Central Asian region, including Uzbekistan, was affected by the extremely cold weather in January and February; the Uzbek authorities refused to honour an agreement to de-

liver electricity to Tajikistan, which was far more severely affected than was Uzbekistan, on the grounds that the power was needed at home. Only in March, after the worst of the winter was past, did Uzbekistan resume power supplies. In August Uzbekistan accused Kyrgyzstan of having violated a water-sharing agreement, holding back water that was needed for irrigation of Uzbek farms; Kyrgyzstan denied the charge. Agreements between the five Central Asian states in October raised hopes in the region that a solution might soon be found to resolving intraregional power and water-use problems. (BESS BROWN)

VANUATU

Area: 12,190 sq km (4,707 sq mi)

Population (2008 est.): 233,000

Capital: Port Vila

Chief of state: President Kalkot Mataskelekele

Head of government: Prime Ministers Ham Lini and, from September 22, Edward Natapei

Vanuatu's economy grew at 5.7% in 2008, but it remained fragile, with GDP per capita rates having remained unchanged for some 20 years. Growth was slower in inaccessible rural areas, with continuing growth of squatter settlements. Despite the problems, tourism expanded by 8.5%, and low-cost regional airlines opened markets in Australia and New Zealand, which saw airline arrivals increase by 19%. Vanuatu sent its first 200 overseas seasonal workers to labour in New Zealand's horticulture industry, and the country was invited to participate in a parallel temporary-worker scheme to be set up in Australia. Remittances from these seasonal workers were expected to broaden the sources of Vanuatu's national income.

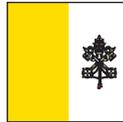

A record 334 candidates contested Vanuatu's September 2 general election. While elections traditionally revolved around personality, in 2008 certain themes—including free education and health care, access to credit, and the promotion of opportunities for indigenous business—emerged as key electoral issues. In the event the Vanuaku Pati (VP) earned the most seats in

the parliament, and Edward Natapei of the VP formed a coalition government. Former prime minister Ham Lini of the National United Party was named deputy prime minister.

On the international front, Port Vila became the headquarters of the Melanesian Spearhead Group (MSG), a political coalition of Melanesian states. In May Vanuatu hosted the MSG leaders' 2008 summit in its new secretariat building, which was provided by China.

(CLUNY MACPHERSON)

VATICAN CITY STATE

Area: 44 ha (109 ac)

Population (2008 est.): 930; about 3,000 workers live outside the Vatican

Chief of state: (sovereign pontiff) Pope Benedict XVI

Head of administration: Secretary of State Tarcisio Cardinal Bertone

As part of the Vatican's continuous diplomatic action, Pope Benedict XVI met visitors from many countries in 2008. One was Iraqi Prime Minister Nuri al-Maliki, who in turn invited the pontiff to Iraq. Syria's grand mufti, Ahmad Bader Hassoun, also extended an

invitation to the pope to visit that country. In April, Pope Benedict made his first trip to the U.S. since his elevation in 2005. During a six-day visit to Washington, D.C., and New York City, the pontiff met with U.S. Pres. George W. Bush, addressed the United Nations, visited the site of the Sept. 11, 2001, terrorist attacks on the World Trade Center, and celebrated mass at Yankee Stadium. He also spoke on the recent scandal of priestly sexual abuse and met privately with several victims. Later in the year the Vatican announced an interest in playing a role in possible multilateral negotiations over the future of Jerusalem.

During the year a number of representatives of the international Islamic community sought new opportunities for debate to overcome recent misunderstandings. Changes in the Roman Catholic liturgy for the Good Friday celebration prompted a response by members of the Jewish faith, who also expressed the wish to intensify dialogue. In early November the Vatican hosted an unprecedented summit with Muslim representatives from several countries and branches of Islam.

The pope voiced concern about rising world secularism and about renewed nationalism in 2008, a risk perceived especially in connection with the conflict between Russia and Georgia. The Vatican also focused attention on some of the pernicious consequences of globalization, such as economic dualism and

Pope Benedict XVI greets members of the crowd who attended mass on April 20 at Yankee Stadium in New York City. The event took place during the pontiff's six-day visit to the United States.

Chang W. Lee/AP

the plight of immigrants seeking haven in economically advanced countries. The Holy See raised special objections to policies announced in Italy that were intended to marginalize immigrants.

The Vatican fared poorly on the financial front during the fiscal year owing to the poor performance of its investments and unfavorable exchange rates for the U.S. dollar. Most of the Vatican's investments and donations were in dollars, while its expenses were in euros. (GREGORY O. SMITH)

VENEZUELA

Area: 916,445 sq km (353,841 sq mi)
Population (2008 est.): 27,884,000
Capital: Caracas
Head of state and government: President Hugo Chávez Frías

On Nov. 30, 2008, Pres. Hugo Chávez asked Venezuela's official government political party, the United Socialist Party of Venezuela (PSUV), to call for a popular referendum that would amend the 1999 constitution to allow for the indefinite reelection of the president. Voters had narrowly rejected a similar proposal in a December 2007 constitutional referendum that would also have centralized power even further.

In the November 23 elections, opponents of Chávez's socialist revolution retained the two governorships that they had won in 2004 and added three more. These five states encompassed 44% of Venezuela's population. Opposition candidates also won election as the mayors of Caracas, Maracaibo, and Petare (a zone in eastern Caracas dominated by shantytowns), which had traditionally supported the government. On the other hand, the PSUV won a substantial majority of the governorships, mayoralties, and state legislative seats at stake. Chávez interpreted these results, mixed though they were, as strengthening his chances of winning approval for constitutional changes in a second referendum—if he acted quickly in order to blunt the ability of the opposition to take advantage of the gains that they had made in the regional and local elections.

The decline in world oil prices during the second half of the year caused eco-

nom problems. Revenue tumbled as the price of Venezuelan crude fell almost 70% between July and December. Rainy-day funds totaling more than \$40 billion enabled Chávez to avoid significant cutbacks in public spending. Nevertheless, the global credit crunch raised the spectre of default or the rescheduling of Venezuela's dollar-denominated debt. The economic growth rate slowed during the year to 6%, down from 8.4% in 2007. Inflation increased to 30.9% over the 2007 rate of 19%. Traditional vulnerabilities became a greater concern, since Venezuela was more dependent than ever before on oil sales, which contributed roughly one-half of central government revenue, 95% of export revenue, and 15% of GDP. Also of concern was the continuing lack of transparency in public accounts, which contributed to creditor and investor nervousness. In October the Economist Intelligence Unit estimated that the central government's true fiscal position was worse than the official statistics suggested. This was due to the channeling of additional off-budget spending through the national development fund and the state oil company, *Petróleos de Venezuela*. These conditions increased the likelihood that the country's currency would come under pressure for significant devaluation, especially if high public spending continued without a significant rise in oil prices.

In the international arena, Venezuela continued to strengthen relations with countries capable of challenging the United States. Chávez signed new bilateral agreements with Iran, Russia, and China. He also attempted to form an axis of militant socialist countries in the Western Hemisphere. The U.S. government chided Venezuela over the increase in cocaine trafficking through its national territory and over the support of the Revolutionary Armed Forces of Colombia (FARC) insurgency by some of Chávez's closest confidants. Venezuelan hostility was an important consideration in U.S. Pres. George W. Bush's decision to reestablish the U.S. Navy's Fourth Fleet (oriented in the Caribbean and Latin America). The U.S. government was especially concerned over Venezuela's purchase since 2005 of more than \$4 billion in arms from Russia, including aircraft and attack submarines. Relations with Brazil grew more cordial in 2008 as Chávez and Pres. Luis Ignacio Lula da Silva signed a number of bilateral cooperation agreements on energy, education, and agriculture. Venezuela also joined Brazil

and other South American countries in establishing the Union of South American Nations (UNASUR), which would integrate two existing customs unions, the Common Market of the South (Mercosur) and the Andean Community. Membership in UNASUR fit well with Chávez's goal of crafting a multipolar world. (DAVID J. MYERS)

VIETNAM

Area: 331,212 sq km (127,882 sq mi)
Population (2008 est.): 88,537,000
Capital: Hanoi
Chief of state: President Nguyen Minh Triet
Head of government: Prime Minister Nguyen Tan Dung

Domestic politics in Vietnam in 2008 were shaped largely by economic issues and concern over rising social unrest. In February inflation began to rise, reaching a high of 28.3% in August. By year's end Vietnam's economy had be-

Vietnamese Roman Catholics attend a mass in September outside the Hanoi Cathedral, near one of the pieces of property that church officials claimed had been illegally seized by government authorities.

gun to feel the impact of the global financial crisis.

The Central Committee of the Vietnam Communist Party (VCP) met three times during the year to address these issues. The first of these meetings (the sixth plenum), held in January, focused on reform of the legal system in order to create institutions compatible with Vietnam's "socialist-oriented market economy." The plenum also raised salaries and social welfare for those who had rendered service to the country in the past.

Accelerated inflation resulted in more than 500 strikes in the first half of the year by workers who could not subsist on their wages. Three-fourths of the strikes took place in foreign-invested enterprises, mainly in Ho Chi Minh City and the surrounding provinces. Most strikes were relatively short-lived and resulted in pay increases and modest improvements in working conditions. In early April the Politburo directed the cabinet to draw up a list of eight major measures to control inflation, stabilize the economy, and ensure social welfare.

In other news, social unrest broke out in the Central Highlands in mid-April when long-festering grievances by the Degar ethnic minority over land rights, religious persecution, and police brutality led to mass demonstrations in Dak Lak and Gia Lai provinces. Later that month police launched a preemptive crackdown against pro-democracy dissidents to prevent any disruption to the Beijing Olympic torch relay as it passed through Ho Chi Minh City. In May security officials responded to growing media assertiveness in reporting high-level corruption by arresting two leading journalists and their police informants. The detainees later were convicted. In August the press credentials of seven journalists and editors from four newspapers were revoked, and in October two more editors were dismissed. Meanwhile, the seventh plenum met in July and adopted three far-reaching policy resolutions on youth, intellectuals, and farmers in an effort to ensure the loyalty of these groups to the Communist Party in the period up to 2020.

Over the course of the year, the Roman Catholic Church and local authorities in Hanoi became embroiled in a dispute over ownership of two pieces of property that the church claimed had been illegally taken from it. Catholics were vilified in the state media. Tensions rose in August and September when the police, bolstered by army veterans and revolutionary youth, inter-

vened to break up peaceful prayer vigils. Local authorities attempted to end the matter by converting the disputed land into public parks.

The Politburo's economic assessment, issued on August 12, lowered Vietnam's official growth target to 6.5% (from an 8% growth average in each of the previous three years). In October the Central Committee met for the third time at the eighth plenum; top priority was assigned to reducing the rate of inflation to a single digit by 2010.

In 2008 all of Vietnam's top leaders visited Beijing: party Secretary-General Nong Duc Manh in May–June, Pres. Nguyen Minh Triet in August, and Prime Minister Nguyen Tan Dung in October. Bilateral relations reached a new high on June 1 with the joint declaration of a comprehensive strategic partnership between Vietnam and China. On December 31, just hours before the midnight deadline, Vietnam and China settled the demarcation boundary for a long-standing border dispute. A maritime dispute was still pending, however. Vietnam's relations with the United States also were strengthened in June with the first official visit to the country by Prime Minister Dung, who met with Pres. George W. Bush in the White House. (CARLYLE A. THAYER)

YEMEN

Area: 528,076 sq km (203,891 sq mi)

Population (2008 est.): 23,013,000

Capital: Sanaa

Chief of state: President Maj. Gen. 'Ali 'Abdallah Salih

Head of government: Prime Minister Ali Muhammad Mujawar

In 2008 Yemen continued its open-door policy for tens of thousands of Somali refugees fleeing poverty and war, a policy that put a strain on the country's meagre resources. A large number of refugees died during treacherous journeys across the Gulf of Aden. The UN High Commissioner for Refugees recommended a global initiative to address the problem of Somali and other African refugees in Yemen.

A suicide car-bomb attack on the U.S. embassy in Sanaa on September 17 killed at least 18 people. Pres. Maj.

Gen. 'Ali 'Abdallah Salih accused the Islamist terrorist cell that was arrested in connection with the bombing of having ties with Israel, a charge that the Israeli government denied.

In October flooding from torrential rains caused extreme devastation, especially in the province of Hadramawt, where most of the houses were made of mud brick, and damage was extensive. Dozens were killed in the flooding, which also affected Sanaa.

During the year media attention was brought to the Yemeni practice of child marriage when three Yemeni child brides—one only eight years old—came forward to accuse their fathers of having forced them to marry against their will and to seek divorces in the Yemeni courts. Amendments to Yemeni law in the last decade had removed the legal age of consent for marriage, and the decision on when a girl could marry was left to her parents.

(AYESHA SIDDIQUA CHAUDHRY)

ZAMBIA

Area: 752,612 sq km (290,585 sq mi)

Population (2008 est.): 11,670,000

Capital: Lusaka

Head of state and government: President Levy Mwanawasa and, from June 29 (acting until November 2), Rupiah Banda

The leadership of Zambia changed suddenly in 2008 when Pres. Levy Mwanawasa died on August 19 after having suffered a severe stroke on June 29 while attending a summit meeting in Egypt of the African Union. (See OBITUARIES.) Vice Pres. Rupiah Banda became the acting president pending a by-election on October 30, for which he was chosen as the ruling Movement for Multiparty Democracy (MMD) candidate. Banda won by a narrow margin and was sworn in as president on November 2; however, the opposition challenged the result, alleging electoral irregularities.

Economic growth remained impressive in the early part of the year, but inflation soared later as a result of the high cost of food and fuel. Moreover, there was growing concern that the country was relying disproportionately on foreign earnings from copper exports. Meanwhile, the vast majority of Zambians remained poor, and jobs were scarce. The government attempted to help poorer farmers by supplying subsidized seed and fertilizer, but, as Mwanawasa freely admitted, the infrastructure was in such poor condition that marketing crops was difficult. Heavy floods at the beginning of the year increased food shortages, damaging between 60% and 80% of the country's food crops and prompting a ban on the export of corn (maize).

Assurances were given in February that the Chinese nationals working at the Chinese-owned Chambishi Copper Smelter (CCS) would be replaced by Zambians once construction had been completed. Nevertheless, discontent over low wages at the CCS remained a problem, especially when the Luanshya Copper Mines raised wages by 18%. CCS workers went on strike and on March 4 destroyed equipment and property. All 500 workers involved were dismissed, but most of them were subsequently reinstated, and further action was taken against only the ringleaders.

Tobacco production, which provided 400,000 jobs, fell markedly during 2008 owing to the strength of the kwacha against the U.S. dollar. New hope for employment came in August, however, when a bill was introduced in the parliament enabling the president to acquire land along the Angolan border on which foreign companies would be permitted to explore for oil.

Concerns over the situation in neighbouring Zimbabwe led Mwanawasa as chairman of the Southern Africa Development Community (SADC) to call an

extraordinary summit meeting of that body. Only a guarded recommendation resulted from the meeting, however, after Zimbabwean Pres. Robert Mugabe called Mwanawasa's action an intrusion into the affairs of a sovereign state. Within Zambia itself Mwanawasa's efforts to urge the drafting of a new constitution more appropriate to the needs of the whole country were taken up by his successor. (KENNETH INGHAM)

ZIMBABWE

Area: 390,757 sq km (150,872 sq mi)

Population (2008 est.): 11,350,000, of which about 3,000,000 people might be living outside the country

Capital: Harare

Chief of state and head of government:
President Robert Mugabe

In the legislative elections in Zimbabwe on March 29, 2008, the Zimbabwe African National Union–Patriotic Front (ZANU-PF) lost control of the House of Assembly, winning 97 seats while Morgan Tsvangirai's mainstream Movement for Democratic Change (MDC) won 99 and Arthur Mutambara's breakaway faction of the MDC gained 10. There was a lengthy delay in announcing the results of the presidential election (also held in March), but eventually Tsvangirai was reported to have tallied 48% of the vote to 43% for incumbent Robert Mugabe of ZANU-PF. Because neither candidate garnered the constitutionally required minimum of more than 50%, a runoff election was scheduled for June 27. Intimidation of MDC supporters by police and ZANU-PF members began immediately. It became so bad that Tsvangirai, claiming that fair elections were impossible, withdrew from the contest on June 22 and took refuge in the Dutch embassy in Harare. The election went ahead, however, and Mugabe was sworn in as president on June 29.

As these events unfolded, South African Pres. Thabo Mbeki, acting on behalf of the Southern African Development Community (SADC), attempted to reconcile the opposing factions. On July 21 he brokered a framework agreement for three-party talks aimed at creating a government of national unity. Disagreements over the distribution of

With inflation in Zimbabwe on its way to 2,000,000%, a man carries cash to buy groceries in Harare on March 5.

cabinet seats delayed the talks, which then adjourned on August 12 to allow Tsvangirai to reflect on a key area of disagreement, the assignment of the chairmanship of the cabinet. In the meantime, though ZANU-PF had agreed to support Mutambara's candidate for speaker of the House of Assembly, his own supporters lined up instead behind Tsvangirai's winning candidate. On September 15 all three parties signed a power-sharing agreement, but by the end of October controversy had again erupted, and further progress was halted.

Against this backdrop, the neglected economy continued its rapid decline. In January the new 10-million-Zimbabwe-dollar note, officially valued at £168 (about \$325), traded on the black market for £1.68 (about \$3.25). By August inflation exceeded 2,000,000%, shops were empty, there was little food in the markets, and hundreds of thousands were starving. Nevertheless, in June Anglo American mining company announced its intention to invest \$400 million in a platinum mine in central Zimbabwe, and British-American Tobacco and Barclays Bank said that they would maintain though not expand existing operations. An outbreak of cholera late in the year reached epidemic proportions and forced the Mugabe regime to appeal for international assistance. (KENNETH INGHAM)

World Data

This 16th-century bridge was built during the Ottoman Empire. It is a symbol of Prizren, Kosovo's picturesque second largest city with a 2004 population of 107,614, situated in the foothills of the Šar Mountains in southern Kosovo.

INTRODUCTION

Britannica World Data provides a statistical portrait of some 220 countries and dependencies of the world, at a level appropriate to the significance of each. It contains 217 country statements (the “Nations of the World” section), ranging in length from one to seven pages, and permits, in the 15 major thematic tables (the “Comparative National Statistics” [CNS] section), comparisons among these larger countries and 3 other states.

Updated annually, *Britannica World Data* is particularly intended as direct, structured support for many of Britannica’s other reference works—encyclopaedias, yearbooks, atlases—at a level of detail that their editorial style or design do not permit.

Like the textual, graphic, or cartographic modes of expression of these other products, statistics possess their own inherent editorial virtues and weaknesses. Two principal goals in the creation of *Britannica World Data* were up-to-dateness and comparability, each possible to maximize separately, but not always possible to combine. If, for example, research on some subject is completed during a particular year (x), figures may be available for 100 countries for the preceding year ($x - 1$), for 140 countries for the year before that ($x - 2$), and for 180 countries for the year before that ($x - 3$).

Which year should be the basis of a thematic compilation for 218 countries so as to give the best combination of up-to-dateness and comparability? And, should $x - 1$ be adopted for the thematic table, ought up-to-dateness in the country table (for which year x is already available) be sacrificed for agreement with the thematic table? In general, the editors have opted for maximum up-to-dateness in the country statistical boxes and maximum comparability in the thematic tables.

Comparability, however, also resides in the meaning of the numbers compiled, which may differ greatly from country to country. The headnotes to the thematic tables explain many of these methodological problems; the Glossary serves the same purpose for the country statistical pages. Published data do not always provide the researcher or editor with a neat, unambiguous choice between a datum compiled on two different bases (say, railroad track length, or route length), one of which is wanted and the other not. More often a choice must be made among a variety of official, private, and external intergovernmental (UN, FAO, IMF) sources, each reporting its best data but each representing a set of problems: (1) of methodological variance from (or among) international conventions; (2) of analytical completeness (data for a single year may, successively, be projected [based on 10 months’ data], preliminary [for 12 months], final, revised or adjusted, etc.); (3) of time frame, or accounting interval (data may represent a full Gregorian calendar year [preferred], a fiscal year, an Islamic or other national or religious year, a multiyear period or average [when a one-year statement would contain unrepresentative results]); (4) of continuity with previous data; and the like. Finally, published data on a

particular subject may be complete and final but impossible to summarize in a simple manner. The education system of a single country may include, for example, public and private sectors; local, state, or national systems; varying grades, tracks, or forms within a single system; or opportunities for double-counting or fractional counting of a student, teacher, or institution. When no recent official data exist, or they exist, but may be suspect, the tables may show unofficial estimates, a range (of published opinion), analogous data, or no data at all.

The published basis of the information compiled is the statistical collections of Encyclopædia Britannica, Inc., some of the principal elements of which are enumerated in the Bibliography. Holdings for a given country may include any of the following: the national statistical abstract; the constitution; the most recent censuses of population; periodic or occasional reports on vital statistics, social indicators, agriculture, mining, labour, manufacturing, domestic and foreign trade, finance and banking, transportation, and communications. Further information is received in a variety of formats—telephone, letter, fax, microfilm and microfiche, and most recently, in electronic formats such as computer disks, CD-ROMs, and the Internet. So substantial has the resources of the Internet become that it was decided to add uniform resource locators (URLs) to the great majority of country pages and a number of the CNS tables (summary world sites with data on all countries still being somewhat of a rarity) so as to apprise the reader of the possibility and means to access current information on these subjects year-round.

The recommendations offered are usually to official sites (national statistical offices, general national governments, central banks, embassies, intergovernmental organizations [especially the UN Development Programme], and the like). Though often dissimilar in content, they will usually be updated year-round, expanded as opportunity permits, and lead on to related sites, such as parliamentary offices, information offices, diplomatic and consular sites, news agencies and newspapers, and, beyond, to the myriad academic, commercial, and private sites now accessible from the personal computer. While these URLs were correct and current at the time of writing, they may be subject to change.

The great majority of the social, economic, and financial data contained in this work should not be interpreted in isolation. Interpretive text of long perspective, such as that of the *Encyclopædia Britannica* itself; political, geographic, and topical maps, such as those in the *Britannica Atlas*; and recent analysis of political events and economic trends, such as that contained in the articles of the *Book of the Year*, will all help to supply analytic focus that numbers alone cannot. By the same token, study of those sources will be made more concrete by use of *Britannica World Data* to supply up-to-date geographic, demographic, and economic detail.

GLOSSARY

A number of terms that are used to classify and report data in the “Nations of the World” section require some explanation.

Those italicized terms that are used regularly in the country compilations to introduce specific categories of information (e.g., *birth rate*, *budget*) appear in this glossary in italic boldface type, followed by a description of the precise kind of information being offered and how it has been edited and presented.

All other terms are printed here in roman boldface type. Many terms have quite specific meanings in statistical reporting, and they are so defined here. Other terms have less specific application as they are used by different countries or organizations. Data in the country compilations based on definitions markedly different from those below will usually be footnoted.

Terms that appear in small capitals in certain definitions are themselves defined at their respective alphabetical locations.

Terms whose definitions are marked by an asterisk (*) refer to data supplied only in the larger two- to four-page country compilations.

activity rate, see participation/activity rates.

age breakdown, the distribution of a given population by age, usually reported here as percentages of total population in 15-year age brackets except for, when available, the 75–84 group. When substantial numbers of persons do not know, or state, their exact age, distributions may not total 100.0%.

aquatic plants production, the weight of aquatic plants (primarily seaweeds) harvested in freshwater or marine areas; the share harvested by farming is *aquaculture* production.

area, the total surface area of a country or its administrative subdivisions, including both land and inland (nontidal) water area. Land area is usually calculated from “mean low water” on a “plane table,” or flat, basis.

area and population, a tabulation usually including the first-order administrative subdivisions of the country (such as the states of the United States), with capital (headquarters, or administrative seat), area, and population. When these subdivisions are especially numerous or, occasionally, nonexistent, a planning, electoral, census, or other nonadministrative scheme of regional subdivisions has been substituted.

associated state, see state.

atheist, in statements of religious affiliation, one who professes active opposition to religion; “nonreligious” refers to those professing only no religion, nonbelief, or doubt.

balance of payments, a financial statement for a country for a given period showing the balance among: (1) transactions in goods, services, and income between that country and the rest of the world, (2) changes in ownership or valuation of that country’s monetary gold, SPECIAL DRAWING RIGHTS, and claims on and liabilities to the rest of the world, and (3) unrequited transfers and counterpart entries needed (in an accounting sense) to balance transactions and changes among any of the foregoing types of exchange that are not mutually offsetting. Detail of national law as to what constitutes a transaction, the basis of its valuation, and the

size of a transaction visible to fiscal authorities all result in differences in the meaning of a particular national statement.*

balance of trade, the net value of all international goods trade of a country, usually excluding reexports (goods received only for transshipment), and the percentage that this net represents of total trade.

Balance of trade refers only to the “visible” international trade of goods as recorded by customs authorities and is thus a segment of a country’s BALANCE OF PAYMENTS, which takes all visible and invisible trade with other countries into account. (Invisible trade refers to imports and exports of money, financial instruments, and services such as transport, tourism, and insurance.) A country has a favourable, or positive (+), balance of trade when the value

of exports exceeds that of imports and negative (–) when imports exceed exports.

barrel (bbl), a unit of liquid measure. The barrel conventionally used for reporting crude petroleum and petroleum products is equal to 42 U.S. gallons, or 159 litres. The number of barrels of crude petroleum per metric ton, ranging typically from 6.20 to 8.13, depends upon the specific gravity of the petroleum. The world average is roughly 7.33 barrels per ton.

birth rate, the number of live births annually per 1,000 of midyear population. Birth rates for individual countries may be compared with the estimated world annual average of 20.3 births per 1,000 population in 2005.

budget, the annual receipts and expenditures—of a central government for its activities only; does not include state, provincial, or local

governments or semipublic (parastatal, quasi-nongovernmental) corporations unless otherwise specified. Figures for budgets are limited to ordinary (recurrent) receipts and expenditures, wherever possible, and exclude capital expenditures—*i.e.*, funds for development and other special projects originating as foreign-aid grants or loans.

When both a recurrent and a capital budget exist for a single country, the former is the budget funded entirely from national resources (taxes, duties, excises, etc.) that would recur (be generated by economic activity) every year. It funds the most basic governmental services, those least able to suffer interruption. The capital budget is usually funded by external aid and may change its size considerably from year to year.

capital, usually, the actual seat of government and administration of a state. When more than one capital exists, each is identified by kind; when interim arrangements exist during the creation or movement of a national capital, the *de facto* situation is described.

Anomalous cases are annotated, such as those in which (1) the *de jure* designation under the country's laws differs from actual local practice (*e.g.*, Benin's designation of one capital in constitutional law, but another in actual practice), (2) international recognition does not validate a country's claim (as with the proclamation by Israel of a capital on territory not internationally recognized as part of Israel), or (3) both a state and a capital have been proclaimed on territory recognized as part of another state (as with the Turkish Republic of Northern Cyprus).

capital budget, *see* budget.

causes of death, as defined by the World Health Organization (WHO), "the disease or injury which initiated the train of morbid events leading directly to death, or the circumstances of accident or violence which produced the fatal injury." This principle, the "underlying cause of death," is the basis of the medical judgment as to cause; the statistical classification system according to which these causes are grouped and named is the *International List of Causes of Death*, the latest revision of which is the Tenth. Reporting is usually in terms of events per 100,000 population. When data on actual causes of death are unavailable, information on morbidity, or illness rate, usually given as reported cases per 100,000 of infectious diseases (notifiable to WHO as a matter of international agreement), may be substituted.

chief of state/head of government, paramount national governmental officer(s) exercising the highest executive and/or ceremonial roles of a country's government. In general usage, the chief of state is the formal head of a national state. The primary responsibilities of the chief of state may range from the purely ceremonial—convening legislatures and greeting foreign officials—to the exercise of complete national executive authority. The head of government, when this function exists separately, is the officer nominally charged (by the constitution) with the majority of actual executive powers, though they may not in practice be exercised, especially in military or single-party regimes in which effective power may reside entirely outside the executive governmental machinery provided by the constitution. A prime minister, for example, usually the actual head of government, may in practice exercise only Cabinet-level authority.

In communist countries an official identified as the chief of state may be the chairman of the policy-making organ, and the official given as the head of government the chairman of the nominal administrative/executive organ.

c.i.f. (trade valuation): *see* imports.

commonwealth (U.K. and U.S.), a self-governing political entity that has regard to the common weal, or good; usually associated with the United Kingdom or United States.

Examples include the Commonwealth (composed of independent states [from 1931 onward]), Puerto Rico since 1952, and the Northern Marianas since 1979.

communications, collectively, the means available for the public transmission of information within a country. Data are tabulated for: daily newspapers and their total circulation; television as total numbers of receivers; telephone data as landlines, or the number of subscriber lines (not receivers) having access to the public switched network; cellular telephones and Internet broadband users as number of subscribers; and personal computers and Internet users as number of units. For each, a rate per 1,000 persons is given.

constant prices, an adjustment to the members of a financial time series to eliminate the effect of inflation year by year. It consists of referring all data in the series to a single year so that "real" change may be seen.

constitutional monarchy, *see* monarchy.

consumer price index (CPI), also known as the retail price index, or the cost-of-living index, a series of index numbers assigned to the price of a selected "basket," or assortment, of basic consumer goods and services in a country, region, city, or type of household in order to measure changes over time in prices paid by a typical household for those goods and services. Items included in the CPI are ordinarily determined by governmental surveys of typical household expenditures and are assigned weights relative to their proportion of those expenditures. Index values are period averages unless otherwise noted.

coprincipality, *see* monarchy.

current prices, the valuation of a financial aggregate as of the year reported.

daily per capita caloric intake (supply), the calories equivalent to the known average daily supply of foodstuffs for human consumption in a given country divided by the population of the country (and the proportion of that supply provided, respectively, by vegetable and animal sources). The daily per capita caloric intake of a country may be compared with the corresponding recommended minimum daily requirement. The latter is calculated by the Food and Agriculture Organization of the United Nations from the age and sex distributions, average body weights, and environmental temperatures in a given region to deter-

mine the calories needed to sustain a person there at normal levels of activity and health. The daily per capita caloric requirement ranges from 2,200 to 2,500.

de facto population, for a given area, the population composed of those actually present at a particular time, including temporary residents and visitors (such as immigrants not yet granted permanent status, "guest" or expatriate workers, refugees, or tourists), but excluding legal residents temporarily absent.

de jure population, for a given area, the population composed only of those legally resident at a particular time, excluding temporary residents and visitors (such as "guest" or expatriate workers, refugees, or tourists), but including legal residents temporarily absent.

death rate, the number of deaths annually per 1,000 of midyear population. Death rates for individual countries may be compared with the estimated world annual average of 8.6 deaths per 1,000 population in 2005.

density (of population), usually, the DE FACTO POPULATION of a country divided by its total area. Special adjustment is made for large areas of inland water, desert, or other uninhabitable areas—*e.g.*, excluding the ice cap of Greenland.

dependency, an area annexed to, or controlled by, an independent state but not an integral part of it; a non-self-governing territory. A dependency has a charter and may have a degree of self-government. A crown dependency is a dependency originally chartered by the British government (*see* Table).

direct taxes, taxes levied directly on firms and individuals, such as taxes on income, profits, and capital gains. The *immediate* incidence, or burden, of direct taxes is on the firms and individuals thus taxed; direct taxes on firms may, however, be passed on to consumers and other economic units in the form of higher prices for goods and services, blurring the distinction between direct and indirect taxation.

divorce rate, the number of legal, civilly recognized divorces annually per 1,000 population.

doubling time, the number of complete years required for a country to double its population at its current rate of natural increase.

earnings index, a series of index numbers comparing average wages in a collective industrial sample for a country or region with the same industries at a previous period to measure changes over time in those wages. It is

most commonly reported for wages paid on a daily, weekly, or monthly basis; annual figures may represent total income or averages of these shorter periods. The scope of the earnings index varies from country to country. The index is often limited to earnings in manufacturing industries. The index for each country applies to all wage earners in a designated group and ordinarily takes into account basic wages (overtime is normally distinguished), bonuses, cost-of-living allowances, and contributions toward social security. Some countries include payments in kind. Contributions toward social security by employers are usually excluded, as are social security benefits received by wage earners.

economically active population, *see* population economically active.

education, tabulation of the principal elements of a country's educational establishment, classified as far as possible according to the country's own system of primary, secondary, and higher levels (the usual age limits for these levels being identified in parentheses), with total number of schools (physical facilities) and of teachers and students (whether full- or part-time). The student-teacher ratio is calculated whenever available data permit.

educational attainment, the distribution of the population age 25 and over with completed educations by the highest level of formal education attained or completed; it must sometimes be reported, however, for age groups still in school or for the economically active only.

emirate, *see* monarchy.

enterprise, a legal entity formed to conduct a business, which it may do from more than one establishment.

ethnic/linguistic composition, ethnic, racial, or linguistic composition of a national population, reported here according to the most reliable breakdown available, whether published in official sources (such as a census) or in external analysis (when the subject is not addressed in national sources).

exchange rate, the value of one currency compared with another, or with a standardized unit of account such as the SPECIAL DRAWING RIGHT, or as mandated by local statute when one currency is "tied" by a par value to another. Rates given usually refer to free market values when the currency has no, or very limited, restrictions on its convertibility into other currencies.

exports, material goods legally leaving a country (or customs area) and subject to customs regulations. The total value and distribution by percentage of the major items (in preference to groups of goods) exported are given, together with the distribution of trade among major trading partners (usually single countries or trading blocs). Valuation of goods exported is free on board (f.o.b.) unless otherwise specified. The value of goods exported and imported f.o.b. is calculated from the cost of production and excludes the cost of transport.

external debt, public and publicly guaranteed debt with a maturity of more than one year owed to nonnationals of a country and repayable in foreign currency, goods, or services. The debt may be an obligation of a national or subnational governmental body (or an agency of either), of an autonomous public body, or of a private debtor that is guaranteed by a public entity. The debt is usually either outstanding (contracted) or disbursed (drawn).

external territory (Australia), *see* territory.

federal, consisting of first-order political subdivisions that are prior to and independent of the central government in certain functions.

federal constitutional monarchy, *see* monarchy.

federal republic, *see* republic.

federation, union of coequal, preexisting political entities that retain some degree of autonomy and (usually) right of secession within the union.

fertility rate, *see* total fertility rate.

financial aggregates, tabulation of seven-year time series, providing principal measures of the financial condition of a country, including: (1) the exchange rate of the national currency against the U.S. dollar, the pound sterling, and the International Monetary Fund's SPECIAL DRAWING RIGHT (SDR), (2) the amount and kind of international reserves (holdings of SDRs, gold, and foreign currencies) and reserve position of the country in the IMF, and (3) principal economic rates and prices (central bank discount rate, government bond yields, and industrial stock [share] prices). For BALANCE OF PAYMENTS, the origin in terms of component balance of trade items and balance of invisibles (net) is given.*

fisheries production, the live-weight equivalent of the aquatic animals (including fish, crustaceans, mollusks, and other aquatic mammals) caught in freshwater or marine areas by national fleets and landed in domestic or foreign harbours for commercial, industrial, or subsistence purposes. The share of fisheries production that is harvested by farming is *aquaculture* production.

f.o.b. (trade valuation), *see* exports.

food, *see* daily per capita caloric intake.

foreign direct investment (FDI), a long-term investment with a significant degree of control by a business entity or individual of one country into another country's economy. FDI comprises three components—equity capital, reinvested earnings, and intra-company loans. The net balance of the three FDI components is often volatile from one year to the next. If negative for a particular time period, the balance of the three components is called a reverse investment, or disinvestment.

form of government/political status, the type of administration provided for by a country's constitution—whether or not suspended by extralegal military or civil action, although such de facto administrations are identified—together with the number of members (elected, appointed, and ex officio) for each legislative house, named according to its English rendering. Dependent states (*see* Table) are classified according to the status of their political association with the administering country.

gross domestic product (GDP), the total value of the final goods and services produced by residents and nonresidents within a given country during a given accounting period, usually a year. Unless otherwise noted, the value is given in current prices of the year indicated. The *System of National Accounts* (SNA, published under the joint auspices of the UN, IMF, OECD, EC, and World Bank) provides a framework for international comparability in classifying domestic accounting aggregates and international transactions comprising "net factor income from abroad," the measure that distinguishes GDP and GNP.

gross national income (GNI), also called gross national product (GNP), the total value of final goods and services produced both from within a given country and from external (foreign) transactions in a given accounting period, usually a year. Unless otherwise noted, the value is given in current prices of the year indicated. GNI is equal to GROSS DOMESTIC PRODUCT adjusted by net factor income from abroad, which is the income residents receive from abroad for factor services (labour, investment, and interest) less similar payments made to nonresidents who contribute to the domestic economy.

head of government, *see* chief of state/head of government.

health, a group of measures including number of accredited physicians currently practicing or employed and their ratio to the total population; total hospital beds and their ratio; and INFANT MORTALITY RATE.

household, economically autonomous individual or group of individuals living in a single

dwelling unit. A family household is one composed principally of individuals related by blood or marriage.

household income and expenditure, data for average size of a HOUSEHOLD (by number of individuals) and median household income. Sources of income and expenditures for major items of consumption are given as percentages.

In general, household income is the amount of funds, usually measured in monetary units, received by the members (generally those 14 years old and over) of a household in a given time period. The income can be derived from (1) wages or salaries, (2) nonfarm or farm SELF-EMPLOYMENT, (3) transfer payments, such as pensions, public assistance, unemployment benefits, etc., and (4) other income, including interest and dividends, rent, royalties, etc. The income of a household is expressed as a gross amount before deductions for taxes. Data on expenditure refer to consumption of personal or household goods and services; they normally exclude savings, taxes, and insurance; practice with regard to inclusion of credit purchases differs markedly.

imports, material goods legally entering a country (or customs area) and subject to customs regulations; excludes financial movements. The total value and distribution by percentage of the major items (in preference to groups of goods) imported are given, together with the direction of trade among major trading partners (usually single countries), trading blocs (such as the European Union), or customs areas (such as Belgium-Luxembourg). The value of goods imported is given free on board (f.o.b.) unless otherwise specified; f.o.b. is defined above under EXPORTS.

The principal alternate basis for valuation of goods in international trade is that of cost, insurance, and freight (c.i.f.); its use is restricted to imports, as it comprises the principal charges needed to bring the goods to the customs house in the country of destination. Because it inflates the value of imports relative to exports, more countries have, latterly, been estimating imports on an f.o.b. basis as well.

incorporated territory (U.S.), *see* territory.

independent, of a state, autonomous and controlling both its internal and external affairs. Its date usually refers to the date from which the country was in effective control of these affairs within its present boundaries, rather than the date independence was proclaimed or the date recognized as a de jure act by the former administering power.

indirect taxes, taxes levied on sales or transfers of selected intermediate goods and services, including excises, value-added taxes, and tariffs, that are ordinarily passed on to the ultimate consumers of the goods and services. Figures given for individual countries are limited to indirect taxes levied by their respective central governments unless otherwise specified.

infant mortality rate, the number of children per 1,000 live births who die before their first birthday. Total infant mortality includes neonatal mortality, which is deaths of children within one month of birth.

invisibles (invisible trade), *see* balance of trade.

kingdom, *see* monarchy.

labour force, portion of the POPULATION ECONOMICALLY ACTIVE (PEA) comprising those most fully employed or attached to the labour market (the unemployed are considered to be "attached" in that they usually represent persons previously employed seeking to be reemployed), particularly as viewed from a short-term perspective. It normally includes those who are self-employed, employed by others (whether full-time, part-time, seasonally, or on some other less than full-time, basis), and, as noted above, the unemployed (both those previously employed and those seeking work for the first time). In the "gross domestic product and labour force" table, the majority

of the labour data provided refer to population economically active, since PEA represents the longer-term view of working population and, thus, subsumes more of the marginal workers who are often missed by shorter-term surveys.

land use, distribution by classes of vegetational cover or economic use of the land area only (excluding inland water, built-up areas, and wasteland), reported as percentages. The principal categories utilized include: (1) arable land under temporary cultivation including land left fallow for less than five years, (2) land under permanent cultivation (significantly tree crops but also grapes, pineapples, and bananas), (3) pastures and rangeland, which includes land in temporary or permanent use whose principal purpose is the growing of animal fodder, and (4) forest areas, whose definition overlaps with other land use classes per the FAO *State of the World's Forests*; forest areas may include scrub forests, forest plantations, and recently afforested or reforested land.

life expectancy, the number of years a person born within a particular population group (age cohort) would be expected to live, based on actuarial calculations.

literacy, the ability to read and write a language with some degree of competence; the precise degree constituting the basis of a particular national statement is usually defined by the national census and is often tested by the census enumerator. Elsewhere, particularly where much adult literacy may be the result of literacy campaigns rather than passage through a formal educational system, definition and testing of literacy may be better standardized.

major cities, usually the five largest cities/towns proper (national capitals are almost always given, regardless of size); fewer cities/towns may be listed if there are fewer urban localities in the country. For multipage tables, 10 or more may be listed.* Populations for cities/towns will usually refer to the city/town proper—*i.e.*, the legally bounded corporate entity, or the most compact, contiguous, demographically urban portion of the entity defined by the local authorities. Occasionally figures for METROPOLITAN AREAS, urban areas, or urban agglomerations are cited when the relevant civil entity at the core of a major agglomeration had an unrepresentatively small population.

manufacturing, mining, and construction enterprises/retail sales and service enterprises, a detailed tabulation of the principal industries in these sectors, showing for each industry the number of enterprises and employees, wages in that industry as a percentage of the general average wage, and the value of that industry's output in terms of value added or turnover.*

marriage rate, the number of legal, civilly recognized marriages annually per 1,000 population.

material well-being, a group of measures indicating the percentage of households or dwellings possessing certain goods or appliances, including automobiles, telephones, television receivers, refrigerators, air conditioners, and washing machines.*

metropolitan area, a city and the region of dense, predominantly urban, settlement around the city; the population of the whole usually has strong economic and cultural affinities with the central city.

military expenditure, the apparent value of all identifiable military expenditure by the central government on hardware, personnel, pensions, research and development, etc., reported here both as a percentage of the GNP, with a comparison to the world average, and as a per capita value in U.S. dollars.

military personnel, *see* total active duty personnel.

mobility, the rate at which individuals or households change dwellings, usually measured

between censuses and including international as well as domestic migration.*

monarchy, a government in which the CHIEF OF STATE holds office, usually hereditarily and for life, but sometimes electively for a term. The state may be a coprincipality, emirate, kingdom, principality, sheikhdom, or sultanate. The powers of the monarch may range from absolute (*i.e.*, the monarch both reigns and rules) through various degrees of limitation of authority to nominal, as in a constitutional monarchy, in which the titular monarch reigns but others, as elected officials, effectively rule.

monetary unit, currency of issue, or that in official use in a given country; name and abbreviation or symbol according to local practice or name and 3-digit code according to the ISO (International Organization for Standardization); and valuation in U.S. dollars and U.K. pounds sterling, usually according to free-market rates.

See also exchange rate.

natural increase, also called natural growth, or the balance of births and deaths, the excess of births over deaths in a population; the rate of natural increase is the difference between the BIRTH RATE and the DEATH RATE of a given population. The estimated world average during 2005 was 11.7 per 1,000 population, or 1.35% annually. Natural increase is added to the balance of migration to calculate the total growth of that population.

nonreligious, *see* atheist.

official development assistance, officially administered grants and concessional loans that donors (usually developed countries) give to developing countries to promote economic development and welfare.

official language(s), that (or those) prescribed by the national constitution for day-to-day conduct and publication of a country's official business or, when no explicit constitutional provision exists, that of the constitution itself, the national gazette (record of legislative activity), or like official documents. Other languages may have local protection, may be permitted in parliamentary debate or legal action (such as a trial), or may be "national languages," for the protection of which special provisions have been made, but these are not deemed official. The United States, for example, does not yet formally identify English as "official," though it uses it for virtually all official purposes.

official name, the local official form(s), short or long, of a country's legal name(s) taken from the country's constitution or from other official documents. The English-language form is usually the protocol form in use by the country, the U.S. Department of State, and the United Nations.

official religion, generally, any religion prescribed or given special status or protection by the constitution or legal system of a country. Identification as such is not confined to constitutional documents utilizing the term explicitly.

organized territory (U.S.), *see* territory.

overseas department (France), *see* department.

overseas territory (France), *see* territory.

parliamentary state, *see* state.

part of a realm, a dependent Dutch political entity with some degree of self-government and having a special status above that of a colony (*e.g.*, the prerogative of rejecting for local application any law enacted by The Netherlands).

participation/activity rates, measures defining differential rates of economic activity within a population. Participation rate refers to the percentage of those employed or economically active who possess a particular characteristic (sex, age, etc.); activity rate refers to the fraction of the total population who are economically active.

passenger-miles, or **passenger-kilometres**, aggregate measure of passenger carriage by a speci-

fied means of transportation, equal to the number of passengers carried multiplied by the number of miles (or kilometres) each passenger is transported. Figures given for countries are often calculated from ticket sales and ordinarily exclude passengers carried free of charge.

people's republic, *see* republic.

place of birth/national origin, if the former, numbers of native- and foreign-born population of a country by actual place of birth; if the latter, any of several classifications, including those based on origin of passport at original admission to country, on cultural heritage of family name, on self-designated (often multiple) origin of (some) ancestors, and on other systems for assigning national origin.*

political status, *see* form of government/political status.

population, the number of persons present within a country, city, or other civil entity at the date of a census of population, survey, cumulation of a civil register, or other enumeration. Unless otherwise specified, populations given are DE FACTO, referring to those actually present, rather than DE JURE, those legally resident but not necessarily present on the referent date. If a time series, noncensus year, or per capita ratio referring to a country's total population is cited, it will usually refer to midyear of the calendar year indicated.

population economically active, the total number of persons (above a set age for economic labour, usually 10–15 years) in all employment statuses—self-employed, wage- or salary-earning, part-time, seasonal, unemployed, etc. The International Labour Organisation defines the economically active as "all persons of either sex who furnish the supply of labour for the production of economic goods and services." National practices vary as regards the treatment of such groups as armed forces, inmates of institutions, persons seeking their first job, unpaid family workers, seasonal workers and persons engaged in part-time economic activities. In some countries, all or part of these groups may be included among the economically active, while in other countries the same groups may be treated as inactive. In general, however, the data on economically active population do not include students, persons occupied solely in family or household work, retired persons, persons living entirely on their own means, and persons wholly dependent upon others.

See also labour force.

population projection, the expected population in the years 2010 and 2020, embodying the country's own projections wherever possible. Estimates of the future size of a population are usually based on assumed levels of fertility, mortality, and migration. Projections in the tables, unless otherwise specified, are medium (*i.e.*, most likely) variants, whether based on external estimates by the United Nations, World Bank, or U.S. Department of Commerce or on those of the country itself.

price and earnings indexes, tabulation comparing the change in the CONSUMER PRICE INDEX over a period of seven years with the change in the general labour force's EARNINGS INDEX for the same period.

principality, *see* monarchy.

production, the physical quantity or monetary value of the output of an industry, usually tabulated here as the most important items or groups of items (depending on the available detail) of primary (extractive) and secondary (manufactured) production, including construction. When a single consistent measure of value, such as VALUE ADDED, can be obtained, this is given, ranked by value; otherwise, and more usually, quantity of production is given.

public debt, the current outstanding debt of all periods of maturity for which the central government and its organs are obligated. Publicly guaranteed private debt is excluded. For

countries that report debt under the World Bank Debtor Reporting System (DRS), figures for outstanding, long-term EXTERNAL DEBT are given.

purchasing power parity, an economic theory used to determine the number of units in a country's currency that are required to buy the same amount of goods and services in another country. As such it is often used to compare the standards of living between countries expressed in a common currency which is usually U.S.\$.. *Britannica World Data* publishes only purchasing power parity rates as calculated by the World Bank method.

quality of working life, a group of measures including weekly hours of work (including overtime); rates per 100,000 for job-connected injury, illness, and mortality; coverage of labour force by insurance for injury, permanent disability, and death; workdays lost to labour strikes and stoppages; and commuting patterns (length of journey to work in minutes and usual method of transportation).*

railroads, mode of transportation by self-driven or locomotive-drawn cars over fixed rails. Length-of-track figures include all mainline and spurline running track but exclude switching sidings and yard track. Route length, when given, does not compound multiple running tracks laid on the same trackbed.

recurrent budget, *see* budget.

religious affiliation, distribution of nominal religionists, whether practicing or not, as a percentage of total population. This usually assigns to children the religion of their parents.

remittances, amount of a migrant's earnings sent from the migration destination to the place of origin. Remittance data are compiled somewhat differently from one country source to another but usually include cash transfers of long-term legal migrants. Cash transfers of short-term ("for less than one year of residence") legal migrants or the cash transfers of illegal migrants and refugees are also often included with remittances. The standard (but not universal) sources used in BWD for national remittances are the latest editions of World Bank publications and UNCTAD *Handbook of Statistics*. These two sources may also (1) include net wages and salaries of all nonresident migrants and (2) approximate the value of migrants' transfers of household and personal effects to their place of origin as part of a broader remittances definition.

republic, a state with elected leaders and a centralized presidential form of government, local subdivisions being subordinate to the national government. A *federal republic* (as distinguished from a unitary republic) is a republic in which power is divided between the central government and the constituent subnational administrative divisions (e.g., states, provinces, or cantons) in whom the central government itself is held to originate, the division of power being defined in a written constitution and jurisdictional disputes usually being settled in a court; sovereignty usually rests with the authority that has the power to amend the constitution. A *unitary republic* (as distinguished from a federal republic) is a republic in which power originates in a central authority and is not derived from constituent subdivisions. A *people's republic*, in the dialectics of Communism, is the first stage of development toward a communist state, the second stage being a *socialist republic*. An *Islamic republic* is structured around social, ethical, legal, and religious precepts central to the Islamic faith.

retail price index, *see* consumer price index.

retail sales and service enterprises, *see* manufacturing, mining, and construction enterprises/retail sales and service enterprises.

roundwood, wood obtained from removals from forests, felled or harvested (with or

without bark), in all forms. Roundwood used for fuel is fuelwood; other roundwood used in construction, paper products, flooring, furniture manufacture, etc., is called industrial roundwood.

rural, *see* urban-rural.

self-employment, work in which income derives from direct employment in one's own business, trade, or profession, as opposed to work in which salary or wages are earned from an employer.

self-governing, of a state, in control of its internal affairs in degrees ranging from control of most internal affairs (though perhaps not of public order or of internal security) to complete control of all internal affairs (*i.e.*, the state is autonomous) but having no control of external affairs or defense. In this work the term self-governing refers to the final stage in the successive stages of increasing self-government that generally precede independence.

service/trade enterprises, *see* manufacturing, mining, and construction enterprises/retail sales and service enterprises.

sex distribution, ratios, calculated as percentages, of male and female population to total population.

sheikhdom, *see* monarchy.

social deviance, a group of measures, usually reported as rates per 100,000 for principal categories of socially deviant behaviour, including specified crimes, alcoholism, drug abuse, and suicide.*

social participation, a group of measures indicative of the degree of social engagement displayed by a particular population, including rates of participation in such activities as elections, voluntary work or memberships, trade unions, and religion.*

social security, public programs designed to protect individuals and families from loss of income owing to unemployment, old age, sickness or disability, or death and to provide other services such as medical care, health and welfare programs, or income maintenance.

socialist republic, *see* republic.

sources of income, *see* household income and expenditure.

Special Drawing Right (SDR), a unit of account utilized by the International Monetary Fund (IMF) to denominate monetary reserves available under a quota system to IMF members to maintain the value of their national currency unit in international transactions.*

state, in international law, a political entity possessing the attributes of: territory, permanent civilian population, government, and the capacity to conduct relations with other states. Though the term is sometimes limited in meaning to fully independent and internationally recognized states, the more general sense of an entity possessing a *preponderance* of these characteristics is intended here. It is, thus, also a first-order civil administrative subdivision, especially of a federated union. An associated state is an autonomous state in free association with another that conducts its external affairs and defense; the association may be terminated in full independence at the instance of the autonomous state in consultation with the administering power. A *parliamentary state* is an independent state of the Commonwealth that is governed by a parliament and that may recognize the British monarch as its titular head.

structure of gross domestic product and labour force, tabulation of the principal elements of the national economy, according to standard industrial categories, together with the corresponding distribution of the labour force (when possible POPULATION ECONOMICALLY ACTIVE) that generates the GROSS DOMESTIC PRODUCT.

sultanate, *see* monarchy.

territory, a noncategorized political dependency; a first-order administrative subdivision; a

dependent political entity with some degree of self-government, but with fewer rights and less autonomy than a colony because there is no charter. An *external territory* (Australia) is a territory situated outside the area of the country. An *organized territory* (U.S.) is a territory for which a system of laws and a settled government have been provided by an act of the United States Congress. An *overseas territory* (France) is an overseas subdivision of the French Republic with elected representation in the French Parliament, having individual statutes, laws, and internal organization adapted to local conditions.

ton-miles, or **ton-kilometres**, aggregate measure of freight hauled by a specified means of transportation, equal to tons of freight multiplied by the miles (or kilometres) each ton is transported. Figures are compiled from waybills (nationally) and ordinarily exclude mail, specie, passengers' baggage, the fuel and stores of the conveyance, and goods carried free.

total active duty personnel, full-time active duty military personnel (excluding militias and part-time, informal, or other paramilitary elements), with their distribution by percentages among the major services.

total fertility rate, the sum of the current age-specific birth rates for each of the child-bearing years (usually 15-49). It is the probable number of births, given present fertility data, that would occur during the lifetime of each woman should she live to the end of her child-bearing years.

tourism, service industry comprising activities connected with domestic and international travel for pleasure or recreation; confined here to international travel and reported as expenditures in U.S. dollars by tourists of all nationalities visiting a particular country and, conversely, the estimated expenditures of that country's nationals in all countries of destination.

transfer payments, *see* household income and expenditure.

transport, all mechanical methods of moving persons or goods. Data reported for national establishments include: for railroads, length of track and volume of traffic for passengers and cargo (but excluding mail, etc.); for roads, length of network and numbers of passenger cars and of commercial vehicles (*i.e.*, trucks and buses); and for air transport, traffic data for passengers and cargo.

undernourished population, the number of persons according to an FAO study whose daily caloric consumption (based on a weighted average of all age and sex groups) is below a minimum level needed for maintaining a healthy life and performing light physical activity.

unincorporated territory (U.S.), *see* territory.

unitary republic, *see* republic.

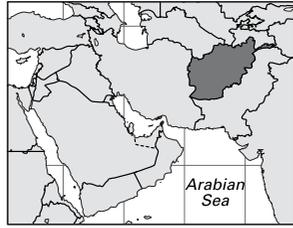

urban-rural, social characteristic of local or national populations, defined by predominant economic activities, "urban" referring to a group of largely nonagricultural pursuits, "rural" to agriculturally oriented employment patterns. The distinction is usually based on the country's own definition of urban, which may depend only upon the size (population) of a place or upon factors like employment, administrative status, density of housing, etc.

value added, also called value added by manufacture, the gross output value of a firm or industry minus the cost of inputs—raw materials, supplies, and payments to other firms—required to produce it. Value added is the portion of the sales value or gross output value that is actually created by the firm or industry. Value added generally includes labour costs, administrative costs, and operating profits.

The Nations of the World

Afghanistan

Official name: Islamic Republic of Afghanistan (Jomhūri-ye Eslāmī-ye Afghānestān [Dari]); Da Afghanistan Eslami Jamhuriyat (Pashto)¹.
Form of government: Islamic republic¹ with two legislative bodies (House of Elders [102]; House of the People [249]).
Head of state and government: President.
Capital: Kabul.
Official languages: Dari; Pashto².
Official religion: Islam.
Monetary unit: (new) afghani (Af); valuation (Sept. 8, 2008) 1 U.S.\$ = Af 46.73; 1 £ = Af 82.56³.

(2005) 34,000; gemstones (particularly lapis lazuli), n.a. Manufacturing (value added in Af '000,000; 2005–06): food 48,575; chemicals 1,206; cement, bricks, and ceramics 809; textiles, wearing apparel, and fur 569; base metals 139. Energy production (consumption): electricity (kW-hr; 2006–07) 916,900,000 (483,600,000); hard coal (metric tons; 2005) 33,000 (33,000); crude petroleum, none (none); petroleum products (metric tons; 2005) none (186,000); natural gas (cu m; 2005) 2,600,000 (2,600,000).
Household income and expenditure (2003). Average household size 8.0; sources of income: wages and salaries 49%, self-employment 47%; expenditure (2004)¹²; food 60.6%, housing and energy 16.5%, clothing 9.1%.
Population economically active (2005): total 4,296,300; activity rate of total population 18.0% (participation rates: female 47.0%; unemployed 8.5%).

Price index (2005 = 100)				
	2004	2005	2006	2007
Consumer price index	89.3	100.0	109.1	132.5

Land use as % of total land area (2003): in temporary crops 12.1%, in permanent crops 0.2%, in pasture 46.0%; overall forest area (2005) 1.3%.
Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (1998) 1.0; remittances, n.a.; foreign direct investment (2004–06 avg.)²¹³; official development assistance (2006) 3,000. Disbursements for (U.S.\$'000,000): n.a.

Foreign trade¹⁴

Balance of trade (current prices)						
	2001–02	2002–03	2003–04	2004–05	2005–06	2006–07
U.S.\$'000,000	-1,628	-2,352	-1,957	-1,872	-2,087	-2,328
% of total	92.3%	92.2%	87.2%	75.4%	73.1%	73.7%

Imports (2006–07): U.S.\$2,744,000,000 (machinery and equipment 19.4%; household items and medicine 12.0%; food 12.0%; base and fabricated metals 10.0%; mineral fuels 9.3%). **Major import sources** (2005–06): Japan 16.8%; Pakistan 15.9%; China 12.8%; Russia 9.2%; Uzbekistan 8.3%.
Exports (2006–07): U.S.\$416,000,000 (carpets and handicrafts 45.0%; dried fruits 30.3%; fresh fruits 9.4%; skins 5.5%). **Major export destinations** (2005–06): Pakistan 77.6%; India 6.0%; Russia 3.4%; U.A.E. 2.9%.

Transport and communications

Transport. Railroads (2006): none. Roads (2005): total length 34,782 km (paved 7%). Vehicles (2004–05): passenger cars 197,449; trucks and buses 123,964. Air transport (2004–05): passenger-km 681,000,000; metric ton-km cargo 20,624,000.

Communications							
Medium	date	number in '000s	units per 1,000 persons	Medium	date	number in '000s	units per 1,000 persons

Demography

Area: 919,595 sq mi, 2,381,741 sq km.

Population (2008): 34,574,000.

Density (2008): persons per sq mi 37.6, persons per sq km 14.5.

Urban-rural (2005): urban 60.0%; rural 40.0%.

Sex distribution (2005): male 50.46%; female 49.54%.

Age breakdown (2005): under 15, 29.7%; 15–29, 32.1%; 30–44, 21.0%; 45–59, 10.8%; 60–74, 5.0%; 75–84, 1.2%; 85 and over, 0.2%.

Population projection: (2010) 35,630,000; (2020) 40,868,000.

Doubling time: 56 years.

Ethnic composition (2000): Algerian Arab 59.1%; Berber 26.2%, of which Arabized Berber 3.0%; Bedouin Arab 14.5%; other 0.2%.

Religious affiliation (2000): Muslim 99.7%, of which Sunni 99.1%, Ibādīyah 0.6%; Christian 0.3%.

Major cities (1998): Algiers 1,519,570 (urban agglom. [2007] 3,354,000); Oran 692,516; Constantine 462,187; Annaba 348,554; Batna 242,514.

Vital statistics

Birth rate per 1,000 population (2006): 17.1 (world avg. 20.3).

Death rate per 1,000 population (2006): 4.6 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 12.5 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 1.89.

Marriage rate per 1,000 population (2005): 8.5.

Life expectancy at birth (2006): male 71.7 years; female 74.9 years.

Notified cases of infectious diseases per 100,000 population (2003): measles 39.8; meningitis 19.6; brucellosis 8.7; hepatitis 6.5; dysentery 6.1.

National economy

Budget (2006). Revenue: DA 3,639,900,000,000 (hydrocarbon revenue 76.9%, nonhydrocarbon revenue 23.1%). Expenditures: DA 2,452,700,000,000 (current expenditure 58.5%, capital expenditure 41.5%).

Public debt (external, outstanding; 2006): U.S.\$3,738,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2006): wheat 2,687,930, potatoes 2,180,961, barley 1,235,880, tomatoes 796,160, onions 703,873, dates 491,188, oranges 474,453, grapes 398,018, olives 364,733; livestock (number of live animals) 19,615,730 sheep, 3,754,590 goats; roundwood 7,742,000 cu m, of which fuelwood 99%; fisheries production (2005) 126,627 (from aquaculture, negligible). Mining and quarrying (2006): iron ore 1,996,000; phosphate rock 1,510,000; zinc (metal content) 572. Manufacturing (value added in U.S.\$'000,000; 2005): food and beverages 1,230; fabricated metals 880; refined petroleum/manufactured gas 720; motor vehicles and parts 400. Energy production (consumption): electricity (kW-hr; 2005) 32,873,000,000 (32,846,000,000); hard coal (metric tons; 2005) none (779,000); crude petroleum (barrels; 2006) 524,700,000 ([2005] 142,200,000); petroleum products (metric tons; 2005) 37,994,000 (10,393,000); natural gas (cu m; 2006) 84,900,000,000 ([2005] 31,450,000,000).

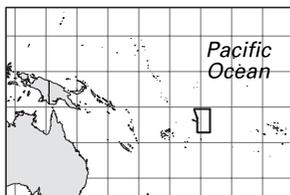

Land use as % of total land area (2003): in temporary crops 3.2%, in permanent crops 0.2%, in pasture 13.3%; overall forest area (2005) 1.0%.

Household income and expenditure. Average household size (2004) 6.2; disposable income per household (2002) c. U.S.\$5,700; sources of income (2004): self-employment 39.9%, wages and salaries 36.9%, transfers 23.2%; expenditure (1989)⁴: food and beverages 44.1%, clothing and footwear 11.6%, transportation and communications 11.5%, household furnishings 6.8%.

Gross national income (GNI; 2007): U.S.\$122,465,000,000 (U.S.\$3,620 per capita); purchasing power parity GNI (U.S.\$7,850 per capita [estimate]).

American Samoa

Official name: American Samoa (English); Amerika Samoa (Samoan).
Political status: unincorporated and unorganized territory of the United States with two legislative houses (Senate [18]; House of Representatives [21]).

Chief of state: President of the United States.

Head of government: Governor.
Capital: Fagatogo² (legislative and judicial) and Utulei (executive).

Official languages: English; Samoan.

Official religion: none.

Monetary unit: dollar (U.S.\$); valuation (Sept. 8, 2008) 1 U.S.\$ = £0.57.

Vital statistics

Birth rate per 1,000 population (2006): 16.9 (world avg. 20.3); (2001) within marriage 25.7%; outside of marriage 74.3%.

Death rate per 1,000 population (2006): 5.4 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 11.5 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 2.24.

Marriage/divorce rates per 1,000 population (2001): 23.6/1.2.

Life expectancy at birth (2006): male 69.8 years; female 74.7 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 317, of which cerebrovascular disease 127, ischemic heart disease 71; malignant neoplasms (cancers) 129; communicable diseases 106; diabetes mellitus 54; accidents and injuries 33.

National economy

Budget (2007). Revenue: EC\$718,300,000 (tax revenue 91.4%, of which taxes on international transactions 38.3%, taxes on income and profits 14.0%; current nontax revenue 5.1%; grants 2.8%; development revenue 0.7%). Expenditures: EC\$923,800,000 (current expenditures 78.3%, of which transfers and subsidies 21.7%; development expenditures 21.7%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2005): tropical fruit (including papayas, guavas, soursops, and oranges) 7,900, mangoes 1,430, melons 840, eggplants 340, lemons and limes 285, carrots 240, "Antiguan Black" pineapples 210; livestock (number of live animals) 19,000 sheep, 14,300 cattle; roundwood, n.a.; fisheries production 2,999 (from aquaculture, none). Mining and quarrying: crushed stone for local use. Manufacturing: manufactures include cement, handicrafts, and furniture, as well as electronic components for export. Energy production (consumption): electricity (kWh; 2005) 109,000,000 (109,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2005) none (134,000); natural gas, none (none).

Population economically active (2001): total 39,564; activity rate of total population 51.5% (participation rates: ages 15–64, 77.0%; female c. 50%; unemployed 8.4%).

Price and earnings indexes (2000 = 100)

Mobility (1999). Population age 15 and over living in the same residence as in 1998: 84.4%; different residence between states, regions, and neighbourhoods 15.6%.
Households (2006). Total number of households 8,058,248. Average household size 2.6; 1 person (2003–04) 25.4%, 2 persons (2003–04) 33.9%, 3 or more persons (2003–04) 40.7%. Family households 5,665,000 (70.3%), nonfamily 2,393,000 (29.7%), of which 1-person 26.5%.
Immigration (2004–05): permanent immigrants admitted 123,400, from United Kingdom 14.7%, New Zealand 14.0%, China 9.0%, India 7.6%, Sudan 4.6%, South Africa 3.7%, Philippines 3.4%, Malaysia 2.4%, Singapore 2.4%, Sri Lanka 1.9%, Vietnam 1.8%, Iraq 1.5%. Refugee arrivals: 13,200. Emigration 59,200.

Vital statistics

Birth rate per 1,000 population (2006): 12.8 (world avg. 20.3); (2005) within marriage 67.8%; outside of marriage 32.2%.
Death rate per 1,000 population (2006): 6.5 (world avg. 8.6).
Natural increase rate per 1,000 population (2006): 6.3 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2005): 1.81.
Marriage/divorce rates per 1,000 population (2005): 5.4/2.6.
Life expectancy at birth (2005): male 78.5 years; female 83.3 years.
Major causes of death per 100,000 population (2005): diseases of the circulatory system 229.4; malignant neoplasms (cancers) 188.8; respiratory diseases 53.2; accidents and violence 26.9; diabetes 17.4; suicides 10.3.

Social indicators

Quality of working life. Average workweek (2006): 33.2 hours. Working 50 hours a week or more (2006) 22.5%. Annual rate per 100,000 workers for: accidental injury and industrial disease (2004): 1,220; death (2004) 1.0. Proportion of employed persons insured for damages or income loss resulting from: injury 100%; permanent disability 100%; death 100%. Working days lost to industrial disputes per 1,000 employees (2006): 22. Means of transportation to work (2003): private automobile 74.5%; public transportation 12.0%; motorcycle, bicycle, and foot 5.7%. Discouraged job seekers (2006): 52,900 (0.5% of labour force).

Distribution of household income (2003–04)

percentage of household income by quintile ⁶				
lowest	second	third	fourth	highest
8.2%	13.1%	17.9%	23.3%	37.4%

Educational attainment (2005). Percentage of population age 15–64 having: no formal schooling and incomplete secondary education 48.5%; completed secondary and postsecondary, technical, or other certificate/diploma 28.9%; bachelor's degree 14.2%; incomplete graduate and graduate degree or diploma 5.4%; unknown 3.0%.

Social participation. Eligible voters participating in last national election (2004): 94%; voting is compulsory. Trade union membership in total workforce (2006): 20.3%.

Social deviance (2005). Offense rate per 100,000 population for: murder 1.3; sexual assault (2003) 92; assault (2003) 798; auto theft 419; burglary and housebreaking (2004) 1,534; robbery 69. Incidence per 100,000 in general population of: prisoners 124; suicide 10.3.

Material well-being (2005). Households possessing: refrigerator 99.9%; washing machine 96.4%; dishwasher 41.5%; automobiles per 1,000 population (2006) 544.

National economy

Gross national income (GNI; 2007): U.S.\$755,795,000,000 (U.S.\$35,960 per capita); purchasing power parity GNI (U.S.\$33,340 per capita).

Demography

Population (2008): 10,697,000.

Density (2008): persons per sq mi 907.5, persons per sq km 350.4.

Urban-rural (2005): urban 97.2%; rural 2.8%.

Sex distribution (2005): male 48.94%; female 51.06%.

Age breakdown (2005): under 15, 16.8%; 15–29, 18.1%; 30–44, 21.9%; 45–59, 20.8%; 60–74, 14.1%; 75–84, 6.5%; 85 and over, 1.8%.

Population projection: (2010) 10,843,000; (2020) 11,353,000.

Ethnic composition (2000): Flemish 53.7%; Walloon (French) 31.6%; Italian 2.6%; French 2.0%; Arab 1.8%; German 1.5%; Berber 0.9%; other 5.9%.

Religious affiliation (2001): self-identified Roman Catholic 46.7%; other Christian 2.6%; Muslim 3.9%; nonreligious/secular/other 46.8%.

Major cities (2007): Brussels 1,809,242⁹; Antwerp 466,203; Gent (Ghent) 235,143; Charleroi 201,550; Liège 188,907; Mons 91,196.

Vital statistics

Birth rate per 1,000 population (2007): 11.4 (world avg. 20.3); within marriage 61.0%; outside of marriage 39.0%.

Death rate per 1,000 population (2007): 9.7 (world avg. 8.6).

Total fertility rate (avg. births per childbearing woman; 2005): 1.72.

Marriage/divorce rates per 1,000 population (2006): 4.3/2.8.

Life expectancy at birth (2006): male 76.6 years; female 82.3 years.

Major causes of death per 100,000 population (2002): cardiovascular diseases 359.6, of which ischemic heart disease 145.5, cerebrovascular disease 89.7; malignant neoplasms (cancers) 275.3.

National economy

Budget (2005). Revenue: €149,218,000,000 (social security contributions 28.2%, personal income tax 24.3%, taxes on goods and services 23.0%). Expenditures: €149,504,000,000 (social insurance benefits 46.3%, of which health 12.6%; wages 24.1%; interest on debt 9.1%; capital expenditure 5.4%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugar beets 5,746,892, potatoes 2,877,685, wheat 1,480,710, corn (maize) 602,642, barley 365,049, chicory roots 361,305, apples 330,000, pears 218,000; livestock (number of live animals) 6,270,000 pigs, 2,639,700 cattle; roundwood 5,075,000 cu m, of which fuelwood 13%; fisheries production (2005) 25,767 (from aquaculture 5%). Mining and quarrying (2005): Belgian bluestone 1,200,000 cu m. Manufacturing (value added in €'000,000; 2005): chemicals and chemical products 8,903; base and fabricated metals 7,116; food/beverages/tobacco 6,046; transport equipment 3,331; electrical and optical equipment 3,264; value of traded polished diamonds handled in Antwerp (2005) U.S.\$15,900,000,000¹⁰. Energy production (consumption): electricity (kW-hr; 2007) 88,278,000,000 (93,248,000,000¹¹); hard coal (metric tons; 2005) none (7,474,000); lignite (metric tons; 2005) 109,000 (283,000); crude petroleum (barrels; 2005) none (235,000,000); petroleum products (metric tons; 2005) 27,934,000 (17,176,000); natural gas (cu m; 2005) none, (16,825,000,000).

Household income and expenditure. Avg. household size (2005) 2.4; average net income per household (2003) €24,455 (U.S.\$27,602); sources of income (2003): wages and transfer payments 69.3%, property income 11.1%; expenditure (2004): housing 21.0%, food, beverages, tobacco 15.8%, transportation 13.4%, recreation and culture 8.6%.

Land use as % of total land area (2003): in temporary crops 27.6%, in permanent crops 0.8%, in pasture 17.7%; overall forest area (2005) 22.0%.

Population economically active (2006): total 4,647,200; activity rate 44.2% (participation rates: ages 15–64, 58.8%; female 44.4%; unemployed [2007] 6.9%).

Demography

Population (2008): 9,694,000².

Density (2008): persons per sq mi 22.9, persons per sq km 8.8.

Urban-rural (2005): urban 64.2%; rural 35.8%.

Sex distribution (2006): male 49.85%; female 50.15%.

Age breakdown (2005): under 15, 38.1%; 15–29, 27.1%; 30–44, 17.6%; 45–59, 10.4%; 60–74, 5.3%; 75–84, 1.3%; 85 and over, 0.2%.

Population projection: (2010) 10,031,000; (2020) 11,638,000.

Doubling time: 34 years.

Ethnic composition (2001): Amerindian c. 62%, of which Quechua c. 31%, Aymara c. 25%; mestizo c. 28%; white c. 10%, of which German c. 3%.

Religious affiliation (2001): Roman Catholic c. 78%; Protestant/independent Christian c. 16%; other Christian c. 3%, of which Mormon 1.8%; nonreligious 2.5%; other 0.5%.

Major cities (2001): Santa Cruz 1,116,059 (urban agglomeration [2005] 1,320,000); La Paz 789,585 (urban agglomeration [2005] 1,527,000); El Alto 647,350³; Cochabamba 516,683; Oruro 201,230; Sucre 193,873.

Vital statistics

Birth rate per 1,000 population (2007): 27.9 (world avg. 20.3).

Death rate per 1,000 population (2007): 7.6 (world avg. 8.6).

Natural increase rate per 1,000 population (2007): 20.3 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2007): 3.54.

Life expectancy at birth (2007): male 63.3 years; female 67.5 years.

Major causes of death per 100,000 population (2000)⁴: circulatory system diseases 370.3; communicable diseases 122.6; external causes 109.7; malignant neoplasms (cancers) 73.5.

National economy

Budget (2006). Revenue: Bs 30,071,900,000 (taxes on hydrocarbons 35.4%; other tax income 49.5%; other 15.1%). Expenditures: Bs 26,876,500,000 (current expenditure 65.3%; capital expenditure 34.7%).

Public debt (external, outstanding; 2006): U.S.\$3,203,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugarcane 6,200,000, soybeans 1,900,000, potatoes 755,000, corn (maize) 686,000, cassava 373,700, rice 276,000, bananas 188,000, sunflower seeds 170,000, sorghum 150,000, seed cotton 80,000, chestnuts (2006) 35,000, coffee 27,500⁵; livestock (number of live animals) 8,990,000 sheep, 7,515,000 cattle, 2,490,000 pigs, 1,925,000 goats, (2004) 1,900,000 llamas and alpacas, (2006) 717,000 asses, 456,000 horses; roundwood (2006) 3,080,060 cu m, of which fuelwood 74%; fisheries production (2006) 7,130 (from aquaculture 6%). Mining and quarrying (metal content; 2005): zinc 157,019; tin 18,694; silver 420; gold 8,906 kg. Manufacturing (value added in Bs '000,000; 2004)⁶: food products 1,545; beverages and tobacco products 581; petroleum products 497; textiles, clothing, and leather products 420; bricks, cement, and ceramics 314. Energy production (consumption): electricity (kW-hr; 2005) 5,230,000,000 (5,235,000,000); coal, none (none); crude petroleum (barrels; 2005) 16,600,000 (15,800,000); petroleum products (metric tons; 2005) 1,639,000 (1,849,000); natural gas (cu m; 2005) 11,875,000,000 (997,000,000).

Population economically active (2000): total 3,823,937; activity rate of total population 46.2% (participation rates: ages 15–64, 71.8%; female 44.6%; unemployed [2006] 8% in urban areas; underemployment widespread).

Price and earnings indexes (2000 = 100)

Expenditures: P 20,122,200,000 (general government services including defense 27.7%, education 24.5%, economic services 15.4%, health 12.4%, transfers 9.0%).
Public debt (external, outstanding; 2006): U.S.\$384,000,000.
Population economically active (2001): total 587,882⁶; activity rate of total population 35.0%⁶ (participation rates: ages 15–64, 57.6%⁶; female 43.8%⁶; unemployed [2004] more than 20%).

Price and earnings indexes (2000 = 100)

	2001	2002	2003	2004	2005	2006	2007
Consumer price index	106.6	115.1	125.7	134.4	146.0	162.9	174.4
Monthly earnings index ⁷	111.4	127.6	137.1

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): roots and tubers 93,000, sorghum 33,000, pulses 17,500, corn (maize) 12,000, sunflower seeds 7,000; livestock (number of live animals) 3,100,000 cattle, 1,960,000 goats, 3,000,000 sheep; roundwood (2005) 765,750 cu m, of which fuelwood 86%; fisheries production (2005) 132 (from aquaculture, none).
Mining and quarrying (2006): soda ash 255,677; nickel ore (metal content) 38,000; copper ore (metal content) 24,300; diamonds 34,293,000 carats⁸.
Manufacturing (value added in U.S.\$'000,000; 2004): beverages 50; motor vehicles (1997) 33; textiles 12; tanned and processed leather 2. Energy production (consumption): electricity (kWh; 2005) 912,000,000 (2,602,000,000); hard coal (metric tons; 2006) 962,000 ([2004] 916,000); crude petroleum, none (none); petroleum products (metric tons; 2005) none (n.a.).
Land use as % of total land area (2003): in temporary crops 0.7%, in permanent crops 0.01%, in pasture 45.2%; overall forest area (2005) 21.1%.

Household income and expenditure (2002–03). Average household size (2004) 4.3; average annual disposable income per household P 29,095 (U.S.\$5,320), of which cash income P 25,519 (U.S.\$4,670); expenditure: food and nonalcoholic beverages 23.7%, transportation 15.6%, housing and energy 12.9%, alcoholic beverages and tobacco 9.6%, household furnishings 8.0%.

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2006) 537; remittances (2007) 117; foreign direct investment (FDI; 2004–06 avg.) 316; official development assistance (2006) 65. Disbursements for (U.S.\$'000,000): tourism (2006) 277; remittances (2007) 118.

Foreign trade¹²

Balance of trade (current prices)

	2002	2003	2004	2005	2006	2007
U.S.\$'000,000	+588	+891	+878	+1,148	+1,452	+1,150
% of total	14.3%	17.3%	14.3%	15.0%	19.2%	12.1%

Imports (2005): U.S.\$3,247,000,000 (machinery and apparatus 16.3%; food, beverages, and tobacco 13.7%; mineral fuels 13.3%; transport equipment 12.5%; chemical and rubber products 11.9%). **Major import sources:** Customs Union of Southern Africa (CUSA) 85.1%; Europe 6.5%; Zimbabwe 1.5%.
Exports (2005): U.S.\$4,395,000,000 (diamonds 75.1%; copper-nickel matte 10.3%; textiles 5.0%; meat products 1.7%). **Major export destinations:** Europe 77.0%, of which U.K. 75.7%; CUSA 9.0%; Zimbabwe 4.1%.

Transport and communications

Transport. Railroads (2002): route length 552 mi, 888 km; (2001) passenger-km 106,000,000; (2001) metric ton-km cargo 747,000,000. Roads (2004): total length 24,455 km (paved 33%). Vehicles (2005): passenger cars 82,056; trucks and buses 74,387. Air transport (2002)¹³: passenger-km 96,000,000; metric ton-km cargo 300,000.

Families. Average family size (2005) 3.2; (1996) 1–2 persons 25.2%, 3 persons 20.3%, 4 persons 22.2%, 5–6 persons 23.3%, 7 or more persons 9.0%.

Emigration (2000): Brazilian emigrants living abroad 1,887,895; in the U.S. 42.3%, in Paraguay 23.4%, in Japan 12.0%.

Immigration (2000): foreign-born immigrants living in Brazil 683,830; from Europe 56.3%, of which Portugal 31.2%; South/Central America 21.0%; Asia 17.8%, of which Japan 10.4%.

Vital statistics

Birth rate per 1,000 population (2006): 17.3 (world avg. 20.3).

Death rate per 1,000 population (2006): 6.2 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 11.1 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 2.30.

Life expectancy at birth (2006): male 68.7 years; female 76.2 years.

Marriage/divorce rates per 1,000 population (2005): 6.3/1.3.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 151.6; malignant neoplasms (cancers) 72.7; diseases of the respiratory system 53.6; violence and suicide 32.5; accidents 31.0; diseases of the digestive system 26.0; infectious and parasitic diseases 25.6.

Adult population (ages 15–49) living with HIV (2007): 0.6%; (world avg. 0.8%).

Social indicators

Educational attainment (2005). Percentage of population age 25 and over having: no formal schooling or less than one year of primary education 15.0%; 1 to 3 years of primary education 13.7%; complete primary/incomplete secondary 40.2%; complete secondary 18.8%; 1 to 3 years of higher education 3.8%; 4 years or more of higher education 8.0%; unknown 0.5%.

Distribution of income (2003)

percentage of national income by decile/quintile									
1	2	3	4	5	6	7	8	9	10 (highest)
0.8	1.8	— 6.2 —	— 10.7 —	— 18.4 —	— 16.3 —	— 45.8			

Quality of working life. Proportion of employed population receiving minimum wage (2002): 53.5%. Number and percentage of children (age 5–17) working: 5,400,000 (12.6% of age group).

Access to services (1999)⁸. Proportion of households having access to: electricity (2002) 96.0%, of which urban households having access 98.8%, rural households having access 73.2%; safe public (piped) water supply 79.8%, of which urban households having access 92.3%, rural households having access 24.9%; public (piped) sewage system 43.6%, of which urban households having access 52.5%, rural households having access 4.5%; no sewage disposal 8.5%, of which urban households having no disposal 2.9%, rural households having no disposal 32.9%.

Social participation. Voter turnout at last (October 2006) national legislative election: 83.3%. Trade union membership in total workforce (2001): 19,500,000. Practicing Roman Catholic population in total affiliated Roman Catholic population (2000): large cities 10–15%; towns and rural areas 60–70%.

Social deviance. Annual murder rate per 100,000 population (2002): Brazil 28; Rio de Janeiro only, 56; São Paulo only, 54.

Leisure. Favorite leisure activities include: playing soccer, dancing, rehearsing all year in neighbourhood samba groups for celebrations of Carnival, and competing in water sports, volleyball, and basketball.

Material well-being (2003). Households possessing: television receiver 89.9%, of which urban 94.5%, rural 69.4%; refrigerator 86.7%, of which urban 91.7%, rural 60.0%; washing machine 34.0%, of which urban 38.1%, rural 10.0%.

National economy

Gross national income (GNI; 2007): U.S.\$1,133,030,000,000 (U.S.\$5,910 per capita); purchasing power parity GNI (U.S.\$9,370 per capita).

Demography

Population (2008): 8,691,000.

Density (2008)⁷: persons per sq mi 867.5, persons per sq km 334.9.

Urban-rural (2007): urban 9.9%; rural 90.1%.

Sex distribution (2005): male 48.82%; female 51.18%.

Age breakdown (2005): under 15, 45.1%; 15–29, 29.0%; 30–44, 13.7%; 45–59, 8.2%; 60–74, 3.2%; 75–84, 0.7%; 85 and over, 0.1%.

Population projection: (2010) 9,281,000; (2020) 12,266,000.

Doubling time: 24 years.

Ethnic composition (2000): Hutu 80.9%; Tutsi 15.6%; Lingala 1.6%; Twa

Pygmy 1.0%; other 0.9%.

Religious affiliation (2004): Christian c. 67%, of which Roman Catholic c. 62%;

Protestant c. 5%; traditional beliefs c. 23%; Muslim c. 10%.

Major cities (2004): Bujumbura 340,300; Gitega 46,900; Muyinga 45,300; Ngozi 40,200; Ruyigi 36,800.

Vital statistics

Birth rate per 1,000 population (2005): 45.6 (world avg. 20.3).

Death rate per 1,000 population (2005): 16.1 (world avg. 8.6).

Natural increase rate per 1,000 population (2005): 29.5 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 6.80.

Life expectancy at birth (2005): male 47.0 years; female 49.8 years.

Adult population (ages 15–49) **living with HIV** (2007): 2.0%⁸ (world avg. 0.8%).

Major causes of death per 100,000 population (2002): HIV/AIDS-related c. 370;

lower respiratory infections c. 185; diarrheal diseases c. 128; war-related c.

114; perinatal conditions c. 100; malaria c. 57.

National economy

Budget (2006). Revenue: FBu 220,170,000,000 (tax revenue 71.3%, of which sales tax 37.8%, taxes on international trade 11.7%, company income tax 11.1%, personal income tax 8.7%; grants 18.8%; nontax revenue 6.9%; other 3.0%). Expenditures: FBu 319,061,000,000 (current expenditure 70.1%, of which debt service 6.4%; capital expenditure 27.9%; other 2.0%).

Public debt (external, outstanding; September 2006): U.S.\$1,227,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007):

bananas 1,600,000, sweet potatoes 835,000, cassava 710,000, dry beans 220,000,

sugarcane 180,000, corn (maize) 115,000, sorghum 75,000, rice 69,500, taros 62,000,

peas 33,500, coffee 15,595, tea 7,700, seed cotton 4,600; livestock (number of live animals) 750,000 goats, 400,000 cattle, 250,000 sheep;

roundwood (2006) 9,014,000 cu m, of which fuelwood 96%; fisheries production (2005) 14,200 (from aquaculture 1%). Mining and quarrying (2006): columbite-tantalite ore 16,177 kg; gold 4,313 kg. Manufacturing (2005): beer 1,012,500 hectolitres; carbonated beverages 143,600 hectolitres; cottonseed oil 135,900 litres; sugar 19,058 tons; cigarettes 419,055,000 units; blankets 43,253 units; fabrics 4,811,000,000 sq m. Energy production (consumption): electricity (kW-hr; 2005) 101,000,000 (172,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2005) none (71,000); natural gas, none (none); peat (metric tons; 2005) 4,700 ([2000] 12,000).

Household income and expenditure (2004)⁹. Average household size 5.6; average annual income per household c. FBu 168,000 (c. U.S.\$153); sources of income: agriculture/livestock c. 91%, other c. 9%; expenditure: food c. 46%, housing, n.a., debt service c. 14%, alcoholic beverages and tobacco c. 8%, transportation c. 6%, health c. 5%, clothing c. 4%.

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2006) 1.3; remittances (2007) negligible; foreign direct investment (2004–06 avg.) 97; official development assistance (2006) 415. Disbursements for (U.S.\$'000,000): tourism (2006) 125; remittances (2007) negligible.

Gross national income (GNI; 2007): U.S.\$923,000,000 (U.S.\$110 per capita); purchasing power parity GNI (U.S.\$330 per capita).

Cambodia

Official name: Preah Reach Ana Pak Kampuchea (Kingdom of Cambodia).

Demography

Population (2008): 18,468,000.

Density (2008): persons per sq mi 102.6, persons per sq km 39.6.

Urban-rural (2007): urban 56.0%; rural 44.0%.

Sex distribution (2006): male 50.15%; female 49.85%.

Age breakdown (2006): under 15, 41.5%; 15–29, 29.0%; 30–44, 15.7%; 45–59, 8.8%; 60–74, 4.1%; 75–84, 0.8%; 85 and over, 0.1%.

Population projection: (2010) 19,294,000; (2020) 23,471,000.

Doubling time: 31 years.

Ethnic composition (1983): Fang 19.6%; Bamileke and Bamum 18.5%; Duala, Luanda, and Basa 14.7%; Fulani 9.6%; Tikar 7.4%; Mandara 5.7%; Maka 4.9%; Chamba 2.4%; Mbom 1.3%; Hausa 1.2%; French 0.2%; other 14.5%.

Religious affiliation (2005): Roman Catholic 27.4%; traditional beliefs 22.2%; Protestant 20.2%; Sunni Muslim 20.0%; nonreligious/other 10.2%.

Major urban areas (2004): Douala 1,532,800; Yaoundé 1,434,700; Garoua 409,000; Kousséri 332,900; Bamenda 298,500; Maroua 297,600.

Vital statistics

Birth rate per 1,000 population (2006): 35.6 (world avg. 20.3).

Death rate per 1,000 population (2006): 13.0 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 22.6 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 4.58.

Life expectancy at birth (2006): male 51.7 years; female 53.0 years.

Adult population (ages 15–49) living with HIV (2007): 5.1%⁴ (world avg. 0.8%).

Major causes of death per 100,000 population (2002): HIV/AIDS-related c. 308; lower respiratory infections c. 201; malaria c. 119; diarrheal diseases c. 88; perinatal conditions c. 69.

National economy

Budget (2005). Revenue: CFAF 1,590,000,000,000 (non-oil revenue 69.4%, of which VAT 22.0%, direct taxes 16.5%, customs duties 11.9%, nontax revenue 7.9%; oil revenue 27.6%; grants 3.0%). Expenditures: CFAF 1,278,000,000,000 (current expenditure 82.6%, of which interest on public debt 10.1%; capital expenditure 16.1%; other 1.3%).

Gross national income (GNI; 2007): U.S.\$19,447,000,000 (U.S.\$1,050 per capita); purchasing power parity GNI (U.S.\$2,120 per capita).

Immigration (2004): permanent immigrants admitted 235,824; from Asia 48.6%, of which China 15.4%, India 10.8%, Philippines 5.6%; Europe 17.8%, of which U.K. 2.6%, France 2.1%; U.S. 3.2%; refugee arrivals 26,526; overall refugee population (end of 2004) 141,398.

Vital statistics

Birth rate per 1,000 population (2005–06): 10.6 (world avg. 20.3); (1997) within marriage 72.3%; outside of marriage 27.7%.
Death rate per 1,000 population (2005–06): 7.2 (world avg. 8.6).
Natural increase rate per 1,000 population (2005–06): 3.4 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2006): 1.61.
Marriage/divorce rates per 1,000 population: (2006) 4.6/(2003) 2.2.
Life expectancy at birth (2006): male 76.9 years; female 83.7 years.
Major causes of death per 100,000 population (2002): diseases of the circulatory system 240.6; malignant neoplasms (cancers) 207.5; diseases of the respiratory system 56.6; accidents and violence 44.1 (including suicide 11.6).

Social indicators

Educational attainment (2004). Percentage of population age 15 and over having: incomplete primary and complete primary education 8.8%; incomplete secondary 15.7%; complete secondary 19.3%; some university/higher vocational 39.0%; bachelor's degree or higher 17.2%.

Distribution of income (1999)				
percentage of household income by quintile				
1	2	3	4	5 (highest)
7.4%	11.6%	15.3%	24.2%	41.5%

Quality of working life. Average workweek (2005): 35.2 hours. Annual rate per 100,000 workers for (2005): injury, accident, or industrial illness 2,090; death 6.8. Average days lost to labour stoppages per 1,000 employee-workdays (2001): 0.7. Average commuting distance (2001): 4.5 mi, 7.2 km; mode of transportation: automobile 80.7%, public transportation 10.5%, walking 6.6%, other 2.2%. Labour force covered by a pension plan (2001): 33.6%.
Access to services. Proportion of households having access to: electricity (2002) 100%; public water supply (1996) 99.8%; public sewage collection (1996) 99.3%.

Social participation. Eligible voters participating in last national election (January 2006): 64.9%. Population over 18 years of age participating in voluntary work (2000): 26.7%. Union membership as percentage of civilian labour force (2003) 25.0%. Attendance at religious services on a weekly basis (2006): 17%.

Social deviance (2004). Offense rate per 100,000 population for: violent crime 946.1, of which assault 731.8, sexual assault 73.7, homicide 2.0; property crime 3,990.9, of which auto theft 530.7, breaking and entering 859.9.

Leisure (1998). Favourite leisure activities (hours weekly): television (2004) 21.4; radio (2005) 19.1; social time 13.3; reading 2.8; sports and entertainment 1.4.

Material well-being (2003). Households possessing: automobile 62.4%; telephone 96.3%; cellular phone 53.9%; colour television 99.0%; central air conditioner 39.3%; cable television 65.1%; home computers 66.8%; Internet access 56.9%.

Cayman Islands

Official name: Cayman Islands.
Political status: overseas territory (United Kingdom) with one legislative house (Legislative Assembly [18¹]).
Chief of state: British Monarch, represented by Governor.
Head of government: Leader of Government Business.
Capital: George Town.
Official language: none.
Official religion: none.
Monetary unit: 1 Cayman Islands dollar (CIS); valuation (Sept. 8, 2008) CI\$1.00 = U.S.\$1.23² = £0.70.

Area and population

Islands	area		population
	sq mi	sq km	1999 census
Grand Cayman ³	76	197	37,473
Cayman Brac ⁴	15	39	1,822
Little Cayman ⁴	11	28	115
TOTAL	102 ⁵	264 ⁵	39,410

Demography

Population (2008): 55,500.
Density (2008)⁶: persons per sq mi 596.8, persons per sq km 230.3.
Urban-rural (2005): urban 100%; rural 0%.
Sex distribution (2005): male 48.88%; female 51.12%.
Age breakdown (2005): under 15, 21.0%; 15–29, 18.3%; 30–44, 25.9%; 45–59, 22.6%; 60–74, 9.2%; 75 and over, 3.0%.
Population projection: (2010) 58,000; (2020) 72,000.
Doubling time: 68 years.
Ethnic composition (2000): mulatto 51.5%; West Indian black 25.8%; British 19.3%; Jewish 1.9%; Indo-Pakistani 0.3%; other 1.2%.⁷
Religious affiliation (2000): Protestant (significantly Presbyterian) c. 55%; Spiritist (Rastafarian) c. 15%; independent Christian c. 10%; unaffiliated Christian c. 10%; nonreligious c. 4%; Jewish c. 2%; other c. 4%.
Major urban areas (2007): George Town 31,785; West Bay 11,436; Bodden Town 6,918.

Vital statistics

Birth rate per 1,000 population (2006): 13.7 (world avg. 20.3).
Death rate per 1,000 population (2006): 3.5 (world avg. 8.6).
Natural increase rate per 1,000 population (2006): 10.2 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2005): 1.90.
Marriage/divorce rates per 1,000 population (2006): 9.9⁸/2.9.
Life expectancy at birth (2005): male 77.3 years; female 82.6 years.
Major causes of death per 100,000 population (2000): diseases of the circulatory system 136.8, of which ischemic heart disease 39.8; malignant neoplasms (cancers) 99.5; accidents and violence 34.8.

National economy

Revenue (2005). Revenue: CI\$428,600,000 (taxes on international trade 40.1%; sales tax 40.0%; property tax 5.0%). Expenditures: CI\$430,300,000 (current expenditures 78.9%, of which wages and salaries 38.1%, transfers 17.8%; capital expenditures 11.3%; other 9.8%).
Public debt (December 2005): U.S.\$207,500,000.
Production (metric tons except as noted). Agriculture, forestry, fishing (2007): bananas 210, pumpkins, squash, and gourds 75, guavas and mangoes 35, plantains 35, yams 32, tomatoes 25; livestock (number of live animals) 1,300 cattle, 400 pigs, 270 goats; roundwood, n.a.; fisheries production (2005) 125 (from aquaculture, none). Mining and quarrying: crushed stone for local use. Manufacturing: industries include fish and turtle processing, handicrafts, and small-boat building⁹. Energy production (consumption): electricity (kW-hr; 2005) 454,000,000 (454,000,000); coal (metric tons; 2005) none (none); crude petroleum (barrels; 2005) none (none); petroleum products (metric tons; 2005) none (163,000); natural gas (cu m; 2005) none (none).
Gross national income (at current market prices; 2005): U.S.\$2,217,000,000 (U.S.\$47,744 per capita).

Demography

Population (2008): 10,111,000².
Density (2008): persons per sq mi 20.4, persons per sq km 7.9.
Urban-rural (2007): urban 26.3%; rural 73.7%.
Sex distribution (2005): male 48.82%; female 51.18%.
Age breakdown (2005): under 15, 48.0%; 15–29, 26.7%; 30–44, 13.7%; 45–59, 7.3%; 60–74, 3.5%; 75 and over, 0.8%.
Population projection (2010) 10,543,000; (2020) 12,756,000.
Doubling time: 27 years.
Ethnolinguistic composition (1993): Sara 27.7%; Sudanic Arab 12.3%; Mayo-Kebbi peoples 11.5%; Kanem-Bornu peoples 9.0%; Ouadaï peoples 8.7%; Hadjerai (Hadjarai) 6.7%; Tangale (Tandjilé) peoples 6.5%; Gorane peoples 6.3%; Fitri-Batha peoples 4.7%; Fulani (Peul) 2.4%; other 4.2%.
Religious affiliation (2005): Sunni Muslim 57.0%; animist 18.8%; Protestant 10.5%; other (significantly Roman Catholic and nonreligious) 13.7%.
Major cities (2000): N'Djamena (2005) 888,000³; Moundou 108,728; Sarh 95,050; Abéché 63,165; Kelo 36,643; Pala 31,281.

Vital statistics

Birth rate per 1,000 population (2007): 42.4 (world avg. 20.3).
Death rate per 1,000 population (2007): 16.7 (world avg. 8.6).
Natural increase rate per 1,000 population (2007): 25.7 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2007): 5.56.
Life expectancy at birth (2007): male 46.2 years; female 48.3 years.
Adult population (age 15–49) living with HIV (2007): 3.5%⁴ (world avg. 0.8%).
Major causes of death per 100,000 population (2002): lower respiratory infections c. 226; HIV/AIDS-related c. 204; malaria c. 181; diarrheal diseases c. 124.

National economy

Budget (2005). Revenue: CFAF 311,100,000,000 (tax revenue 45.9%; petroleum revenue 43.7%; nontax revenue 10.4%). Expenditures: CFAF 482,000,000,000 (capital expenditure 61.9%; current expenditure 38.1%, of which wages and salaries 13.9%, materials and supply 7.8%, transfer payments 7.1%, defense 6.3%, debt service 2.9%).
Public debt (external, outstanding; 2006): U.S.\$1,686,000,000.
Production (metric tons except as noted). Agriculture, forestry, fishing (2007): rice 1,290,000, sorghum 700,000, millet 550,000, peanuts (groundnuts) 450,000, cassava 330,000, seed cotton 260,000, yams 235,000, corn (maize) 200,000, pulses 122,000, sesame seed 35,300, gum arabic (2006) 20,000; livestock (number of live animals) 6,820,300 cattle, 6,096,390 goats, 2,981,800 sheep, 749,500 camels; roundwood (2006) 7,361,000 cu m, of which fuelwood 90%; fisheries production (2005) 70,000 (from aquaculture, none). Mining and quarrying (2006): aggregate (gravel) 300,000; natron 12,000; salt 10,000; gold 150 kg. Manufacturing (2004–05): cotton fibre 88,158; refined sugar 51,823; woven cotton fabrics (2000) 1,000,000 metres; carbonated beverages 104,205 hectolitres; beer 76,485 hectolitres; edible oil (2003–04) 74,514 hectolitres; cigarettes 41,873,000 packs. Energy production (consumption): electricity (kWh; 2005) 100,000,000 (100,000,000); coal, none (none); crude petroleum (barrels; 2006) 55,900,000 (n.a.); petroleum products (metric tons; 2005) none (61,000); natural gas, none (none).
Household income and expenditure. Average household size (2004) 5.0; average annual income per household (1993) CFAF 96,806 (U.S.\$458); sources of income (1995–96; urban): informal-sector employment and entrepreneurship 36.7%, transfers 24.8%, wages 23.6%, ownership of real estate 8.6%.
Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2005) 14; remittances, n.a.; foreign direct investment (2004–06 avg.) 603; official development assistance (2006) 284. Disbursements from (U.S.\$'000,000): tourism (2002) 80; remittances, n.a.

Population economically active (2003)⁵: total 3,385,000; activity rate of total population 37.1% (participation rates: ages 15–64, 70.2%; female 47.3%).

China

Official name: Zhonghua Renmin Gongheguo (People's Republic of China).

Form of government: single-party people's republic with one legislative house (National People's Congress [3,000]).

Chief of state: President.

Head of government: Premier.

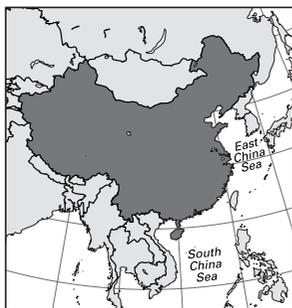

Capital: Beijing (Peking).

Official language: Mandarin Chinese.

Official religion: none.

Monetary unit: renminbi (yuan) (Y); valuation (Sept. 8, 2008)

1 U.S.\$ = Y 6.84; 1 £ = Y 12.08.

Total fertility rate (avg. births per childbearing woman; 2005): 1.72. **Marriage/divorce rates** per 1,000 population: (2004) 6.7/(2005) 1.4. **Life expectancy at birth** (2005): male 70.9 years; female 74.3 years. **Adult population** (ages 15–49) **living with HIV** (2007): 0.1%⁸ (world avg. 0.8%). **Major causes of death** per 100,000 population (2002): malignant neoplasms (cancers) 133.5, of which stomach cancer 31.9, liver cancer 24.9; cerebrovascular disease 126.9; chronic obstructive pulmonary disease 98.6; ischemic heart disease 54.0; accidents and poisoning 52.3; infectious and parasitic diseases 39.0, of which tuberculosis 20.8; diseases of the digestive system 27.9; violence/suicide 24.0.

Social indicators

Educational attainment (2000). Percentage of population age 15 and over having: no schooling and incomplete primary 15.6%; completed primary 35.7%; some secondary 34.0%; complete secondary 11.1%; some postsecondary through advanced degree 3.6%.

Distribution of income (2004)

percentage of urban household income by quintile				
1	2	3	4	5 (highest)
9.2	13.7	17.5	22.4	37.2

Quality of working life. Average workweek (1998): 40 hours. Annual rate per 100,000 workers for (2006): death in mining, industrial, or commercial enterprises 3.33. Death toll from work accidents (2006) 112,822.

Access to services. Percentage of population having access to electricity (2003) 97.7%. Percentage of total (urban, rural) population with safe public water supply (2002) 83.6% (94.0%, 73.0%). Sewage system (1999): total (urban, rural) households with flush apparatus 20.7% (50.0%, 4.3%), with pit latrines 69.3% (33.6%, 86.7%), with no latrine 5.3% (7.8%, 4.1%).

Social participation. Eligible voters participating in last national election: n.a. Population participating in voluntary work: n.a. Trade union membership in total labour force (2004): c. 18%. Percentage of population who consider themselves religious (2005–06) 31.4%.

Social deviance. Annual reported arrest rate per 100,000 population (2004) for: murder, n.a.; rape, n.a.; thievery 197; robbery 23.

Material well-being. Urban households possessing (number per household; 2004): bicycles 1.4; colour televisions 1.3; washing machines 1.0; refrigerators 0.9; air conditioners 0.7; cameras 0.5. Rural families possessing (number per household; 2004): bicycles 1.2; colour televisions 0.8; washing machines 0.4; refrigerators 0.2; air conditioners 0.05; cameras 0.04.

National economy

Gross national income (GNI; 2007): U.S.\$3,120,891,000,000 (U.S.\$2,360 per capita); purchasing power parity GNI (U.S.\$5,370 per capita).

Structure of gross domestic product and labour force

	2003		2002

Demography

Population (2008): 1,324,681,000.

Density (2008): persons per sq mi 358.4, persons per sq km 138.4.

Urban-rural (2007⁴): urban 43.9%; rural 56.1%.

Sex distribution (2007⁴): male 51.52%; female 48.48%.

Age breakdown (2004): under 15, 19.3%; 15–29, 22.1%; 30–44, 27.2%; 45–59, 19.0%; 60–74, 9.6%; 75–84, 2.4%; 85 and over, 0.4%.

Population projection: (2010) 1,338,442,000; (2020) 1,407,520,000.

Ethnic composition (2000): Han (Chinese) 91.53%; Chuang 1.30%; Manchu 0.86%; Hui 0.79%; Miao 0.72%; Uighur 0.68%; Tuchia 0.65%; Yi 0.62%; Mongolian 0.47%; Tibetan 0.44%; Puyi 0.24%; Tung 0.24%; Yao 0.21%; Korean 0.15%; Pai 0.15%; Hani 0.12%; Kazakh 0.10%; Li 0.10%; Tai 0.09%; other 0.54%.

Religious affiliation (2005): nonreligious 39.2%; Chinese folk-religionist 28.7%; Christian 10.0%, of which unregistered Protestant 7.7%⁷, registered Protestant 1.2%⁷, unregistered Roman Catholic 0.5%⁷, registered Roman Catholic 0.4%⁷; Buddhist 8.4%; atheist 7.8%; traditional beliefs 4.4%; Muslim 1.5%.

Major urban agglomerations (2007): Shanghai 14,987,000; Beijing 11,106,000; Guangzhou 8,829,000; Shenzhen 7,581,000; Wuhan 7,243,000; Tianjin 7,180,000; Chongqing 6,461,000; Shenyang 4,787,000; Dongguan 4,528,000; Chengdu 4,123,000; Xi'an 4,009,000; Nanjing 3,679,000; Guiyang 3,662,000; Harbin 3,621,000; Changchun 3,183,000; Dalian 3,167,000; Zibo 3,061,000; Hangzhou 3,007,000; Kunming 2,931,000; Taiyuan 2,913,000; Qingdao 2,866,000; Jinan 2,798,000; Zhengzhou 2,636,000; Fuzhou 2,606,000; Changsha 2,604,000; Lanzhou 2,561,000.

Households. Average family household size (2004) 3.6, of which urban family households 3.0, rural family households 4.1; 1 person 7.8%, 2 persons 19.6%, 3 persons 31.4%, 4 persons 21.8%, 5 persons 12.4%, 6 or more persons 7.0%; non-family households 0.8%.

Mobility (2004). Population residing in registered enumeration area 91.3%; population not residing in registered enumeration area for more than 6 months 7.4%; remainder 1.3%.

Vital statistics

Birth rate per 1,000 population (2006): 12.1 (world avg. 20.3).

Death rate per 1,000 population (2006): 6.8 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 5.3 (world avg. 11.7).

paints, and soaps 45,727; transportation equipment 35,000; iron and steel 34,119; nonelectrical machinery (incl. computers) 31,395; food products 25,776; textiles 23,036; tobacco products 19,010; cement, bricks, and tiles 16,334; refined petroleum 15,554; fabricated metal products 11,731; wearing apparel 11,073; nonferrous base metals 10,899. Distribution of industrial production (percentage of total value added by sector; 2004): directly state-owned and state-controlled enterprises 42.4%; private enterprises 15.1%; collectives 5.3%; remainder¹¹ 37.2%. Retail trade (percentage of total sales by sector; 2004): domestically funded enterprises 81.8%, of which shareholding corporations 29.2%, limited liability corporations 23.8%, private enterprises 18.3%, state-owned enterprises 6.8%, collectives 1.0%; foreign-funded enterprises 11.1%; Hong Kong-, Macau-, or Taiwan-based enterprises 7.1%.

¹Côte d'Ivoire is the official protocol version of the country name since 1986. ²Côte d'Ivoire was split between a government-controlled south and a rebel-held north from September 2002 through March 2007. The peace accord signed between the warring factions in March 2007 enabled the creation of a power-sharing transitional government in April 2007. ³Both positions were transitional as of December 2008. ⁴Local population only (in 1998 foreigners constituted 26% of the population). At least 1 million foreigners have been forced to leave southern Côte d'Ivoire from September 2002. ⁵Statistically derived midpoint of range. ⁶A UN embargo on rough diamond exports was in effect from November 2004 to November 2007. ⁷Estimates of the ILO Employment Trends Unit. ⁸Weights of consumer price index components. ⁹Import duties and taxes. ¹⁰Detail does not add to total given because of rounding. ¹¹Abidjan airport only. ¹²Circulation of four daily newspapers only. ¹³Subscribers. ¹⁴Based on sample survey of 4,572 persons (38% urban, 62% rural). ¹⁵1996–97. ¹⁶2000–01. ¹⁷Universities of Abobo-Adjamé and Cocody only. ¹⁸The gendarmerie or the national police force reinforces the army. ¹⁹Peacekeeping troops: UN (September 2008) 7,800, French (March 2008) 1,800; however, dismantling of the buffer zone occupied by the peacekeeping troops began in April 2007.

Demography

Population (2008): 19,624,000.

Density (2008): persons per sq mi 158.4, persons per sq km 61.2.

Urban-rural (2007): urban 48.1%; rural 51.9%.

Sex distribution (2007): male 50.75%; female 49.25%.

Age breakdown (2007): under 15, 41.2%; 15–29, 29.2%; 30–44, 16.5%; 45–59, 8.4%; 60–74, 3.9%; 75–84, 0.6%; 85 and over, 0.2%.

Population projection: (2010) 20,375,000; (2020) 24,315,000.

Ethnolinguistic composition (1998)¹⁴: Akan 42.1%; Mande 26.5%; other 31.4%.

Religious affiliation (2005): traditional beliefs c. 37%; Christian c. 32%, of which Roman Catholic c. 17%, Protestant c. 8%, independent Christian c. 7%; Muslim c. 28%; other c. 3%.

Major cities (2005): Abidjan (agglomeration) 3,576,000; Bouaké 573,700; Daloa 215,100; Yamoussoukro (2003) 185,600; Korhogo (2003) 115,000.

Vital statistics

Birth rate per 1,000 population (2007): 33.3 (world avg. 20.3).

Death rate per 1,000 population (2007): 11.6 (world avg. 8.6).

Total fertility rate (avg. births per childbearing woman; 2007): 4.33.

Life expectancy at birth (2007): male 53.3 years; female 54.5 years.

Adult population (ages 15–49) living with HIV (2007): 3.9%⁵ (world avg. 0.8%).

Major causes of death per 100,000 population (2002): HIV/AIDS-related c. 299; malaria c. 153; lower respiratory infections c. 132; diarrheal diseases c. 102; perinatal conditions c. 92.

National economy

Budget (2005). Revenue: CFAF 1,566,000,000,000 (tax revenue 79.9%; nontax revenue 14.1%; grants 6.0%). Expenditures: CFAF 1,536,600,000,000 (current expenditure 78.4%; interest on public debt 11.5%; remainder 10.1%).

Public debt (external, outstanding; 2006): U.S.\$10,830,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): yams 4,900,000, cassava 2,110,000, plantains 1,590,000, oil palm fruit 1,448,000, cacao beans 1,300,000, sugarcane 1,100,000, rice 677,000, corn (maize) 600,000, taro 355,000, seed cotton 290,000, bananas 235,000, coffee 171,000, cashew nuts 130,000, natural rubber 128,000, peanuts (groundnuts) 85,000, fonio 9,700; livestock (number of live animals) 1,523,000 sheep, 1,500,000 cattle; roundwood (2006) 10,087,000 cu m, of which fuelwood 87%; fisheries production 33,461 (from aquaculture 2%). Mining and quarrying (2006): gold 1,324 kg; diamonds 420,000 carats⁶. Manufacturing (value added in CFAF '000,000,000; 1997): food 156.6, of which cocoa and chocolate 72.4, vegetable oils 62.7; chemicals 60.2; wood products 55.9; refined petroleum 46.0; textiles 37.9. Energy production (consumption): electricity (kW-hr; 2005) 5,578,000,000 (4,181,000,000); coal, none (none); crude petroleum (barrels; 2007) 18,800,000 ([2005] 30,000,000); petroleum products (metric tons; 2005) 3,136,000 (974,000); natural gas (cu m; 2005) 1,661,000,000 (1,661,000,000).

Population economically active (2003)⁷: total 6,544,000; activity rate of total population 37.2% (participation rates: ages 15–64, 65.5%; female 28.9%).

Price index (2000 = 100)

	2001	2002	2003	2004	2005	2006	2007
Consumer price index	104.3	107.5	111.1	112.7	117.1	120.0	122.3

Household income and expenditure. Average household size (2004) 8.0; expenditure (1996)⁸: food 32.2%, housing and energy 13.9%, hotels and restaurants 12.3%, transportation 9.6%, clothing 7.4%, household equipment 5.7%.

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2003) 50; remittances (2007) 179; foreign direct investment (2004–06 avg.) 283; official development assistance (2006) 251. Disbursements for (U.S.\$'000,000): tourism (2001) 192; remittances (2007) 19.

Croatia

Official name: Republika Hrvatska (Republic of Croatia).

Form of government: multiparty republic with one legislative house (Croatian Parliament [153¹]).

Head of state: President.

Head of government: Prime Minister.

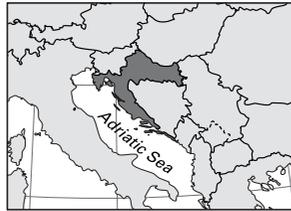

Capital: Zagreb.

Cyprus

Island of Cyprus

Area: 3,572 sq mi, 9,251 sq km.
Population (2008): 1,076,000¹.

Two de facto states currently exist on the island of Cyprus: the Republic of Cyprus (ROC), predominantly Greek in character, occupying the southern two-thirds of the island, which is the original and still the internationally recognized de jure government of the whole island; and the Turkish Republic of Northern Cyprus (TRNC), proclaimed unilaterally Nov. 15, 1983, on territory originally secured for the Turkish Cypriot population by the July 20, 1974, intervention of Turkey. Only Turkey recognizes the TRNC. Provision of separate data below does not imply recognition of either state's claims but is necessitated by the lack of unified data.

Republic of Cyprus

Official name: Kipriakí Dhimokratía (Greek); Kıbrıs Cumhuriyeti (Turkish) (Republic of Cyprus).

Form of government: unitary multiparty republic with a unicameral legislature (House of Representatives [80]).

Head of state and government: President.

Capital: Lefkosia (conventional Nicosia).

Official languages: Greek; Turkish.

Monetary unit: euro (€); valuation (Sept. 8, 2008)

1 U.S.\$ = €0.70; 1 £ = €1.24³.

Demography

Area: 2,276 sq mi, 5,896 sq km.

Population (2008): 805,000⁵.

Age breakdown (2006): under 15, 18.4%; 15–29, 23.9%; 30–44, 21.8%; 45–59, 19.2%; 60–74, 11.7%; 75–84, 3.9%; 85 and over, 1.1%.

Ethnic composition (2000): Greek Cypriot 91.8%; Armenian 3.3%; Arab 2.9%, of which Lebanese 2.5%; British 1.4%; other 0.6%.

Religious affiliation (2001): Greek Orthodox 94.8%; Roman Catholic 2.1%, of which Maronite 0.6%; Anglican 1.0%; Muslim 0.6%; other 1.5%.

Urban areas (2005): Lefkosia 219,200⁷; Limassol 172,500; Larnaca 77,000.

Vital statistics

Birth rate per 1,000 population (2006): 11.2 (world avg. 20.3).

Death rate per 1,000 population (2006): 6.8 (world avg. 8.6).

Total fertility rate (avg. births per childbearing woman; 2005): 1.42.

Life expectancy at birth (2004–05): male 77.0 years; female 81.7 years.

National economy

Budget (2005). Revenue: £C 3,273,700,000 (excises and import duties 41.4%, income tax 22.3%, social security contributions 19.9%). Expenditures: £C 3,459,300,000 (current expenditures 91.3%, development expenditures 8.7%).

Gross national income (GNI; 2007): U.S.\$19,617,000,000 (U.S.\$24,940 per capita); purchasing power parity GNI (U.S.\$26,370 per capita).

Major city and towns: Djibouti (2006) c. 325,000²; Dikhil (1991) 20,480; 'Ali Sabih (1991) 16,423; Tadjoura (1991) 7,309.

Vital statistics

Birth rate per 1,000 population (2006): 39.5 (world avg. 20.3).

Death rate per 1,000 population (2006): 19.3 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 20.2 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 5.31.

Marriage/divorce rates per 1,000 population (1999): 8.9/2.8.

Life expectancy at birth (2006): male 41.9 years; female 44.5 years.

Major causes of death per 100,000 population (2002): communicable diseases 742; cardiovascular diseases 205; accidents, injuries, and violence 81; malignant neoplasms (cancers) 62; respiratory diseases 22.

Adult population (ages 15–49) living with HIV (2007): 3.1% (world avg. 0.8%).

National economy

Budget (2005). Revenue: FDJ 46,710,000,000 (tax revenue 65.8%, of which indirect taxes 26.3%, direct taxes 24.8%, transit taxes, harbour dues and other registration fees 14.7%; nontax revenue 17.5%; grants 16.7%). Expenditures: FDJ 46,378,000,000 (current expenditures 74.7%; capital expenditures 25.3%).

Public debt (external, outstanding; February 2006): U.S.\$474,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): vegetables 25,597, lemons and limes 1,800, dry beans 1,500, tomatoes 1,200, dry chilies and peppers 300; livestock (number of live animals) 512,000 goats, 466,000 sheep, 297,000 cattle, 69,000 camels; roundwood, none; fisheries production (2006) 260 (from aquaculture, none). Mining and quarrying: mineral production limited to locally used construction materials such as basalt and evaporated salt (2006) 138,000. Manufacturing (2003): structural detail, n.a.; products of limited value include furniture, nonalcoholic beverages, meat and hides, light electromechanical goods, and mineral water. Energy production (consumption): electricity (kW-hr; 2005) 255,000,000 (255,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2005) none (135,000); natural gas (cu m; 2004) none (4,380,000); geothermal, wind, and solar resources are substantial but largely undeveloped.

Population economically active (2003): total 299,000³; activity rate of total population 39.1%³ (participation rates: ages 15–64, 69.0%³; female 39.5%³; unemployed [2006] c. 60%).

Price index (2000 = 100)	2000	2001	2002	2003
Consumer price index	100.0	101.8	102.4	104.5

Household income and expenditure. Average household size (2004) 6.4; income per household: n.a.; sources of income: n.a.; expenditure (1999)⁴: food 36.2%, housing and energy 18.1%, tobacco and related products 14.4%, transportation 8.8%, household furnishings 7.7%.

Gross national income (GNI; 2007): U.S.\$908,000,000 (U.S.\$1,090 per capita); purchasing power parity GNI (U.S.\$2,260 per capita).

Demography

Population (2008): 5,794,000.

Density (2008): persons per sq mi 713.2, persons per sq km 275.4.

Urban-rural (2007): urban 62.7%; rural 37.3%.

Sex distribution (2007): male 47.34%; female 52.66%.

Age breakdown (2007): under 15, 33.9%; 15–29, 26.9%; 30–44, 18.5%; 45–59, 11.3%; 60–74, 6.5%; 75–84, 2.1%; 85 and over, 0.8%.

Population projection: (2010) 5,885,000; (2020) 6,366,000.

Doubling time: 59 years.

Ethnic composition (2000): mestizo 88.3%; Amerindian 9.1%, of which Pipil 4.0%; white 1.6%; other/unknown 1.0%.

Religious affiliation (2005): Roman Catholic c. 71%; independent Christian c. 11%; Protestant c. 10%; Jehovah's Witness c. 2%; other c. 6%.

Major cities (2007): San Salvador 316,090 (urban agglomeration 1,433,000); Santa Ana 245,421; Soyapango 241,403³; San Miguel 218,410; Mejicanos 140,751³.

Vital statistics

Birth rate per 1,000 population (2005): 16.3 (world avg. 20.3); (1998) within marriage 27.2%; outside of marriage 72.8%.

Death rate per 1,000 population (2005): 4.5 (world avg. 8.6).

Natural increase rate per 1,000 population (2005): 11.8 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 3.12.

Marriage/divorce rates per 1,000 population (2005): 3.6/0.7.

Life expectancy at birth (2006): male 67.9 years; female 75.3 years.

Major causes of death per 100,000 population (2001): diseases of the circulatory system 88.3; malignant neoplasms (cancers) 49.4; accidents 47.4; diseases of the respiratory system 45.0; homicide and suicide 43.1.

National economy

Budget (2005). Revenue: U.S.\$2,307,500,000 (VAT 47.8%, individual income taxes 29.0%, import duties 7.8%, nontax revenue 5.5%, other 9.9%). Expenditures: U.S.\$2,484,600,000 (education 18.6%, defense and public security 11.4%, public health and welfare 9.8%, public works 6.3%, other 53.9%).

Public debt (external, outstanding; 2006): U.S.\$5,504,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugarcane 5,400,000, corn (maize) 836,695, sorghum 181,694, dry beans 99,305, coffee 94,514, plantains 88,526, papayas 78,900, oranges 66,978, tobacco 1,100; livestock (number of live animals) 1,380,112 cattle, 451,482 pigs, 96,000 horses; roundwood (2006) 4,886,196 cu m, of which fuelwood 86%; fisheries production (2006) 46,296 (from aquaculture 7%). Mining and quarrying (2004): limestone 1,161,000. Manufacturing (value added in U.S.\$'000,000; 2004): food products 875; textiles and wearing apparel 262; chemicals and chemical products 262; refined petroleum 234; beverages 217; printing and publishing 167. Energy production (consumption): electricity (kW-hr; 2006) 5,293,000,000 (5,204,000,000); coal, none (none); crude petroleum (barrels; 2005) none (7,280,000); petroleum products (metric tons; 2005) 1,012,000 (1,898,000); natural gas, none (none).

Household income and expenditure. Average household size (2007) 4.2; average income per household (2004) U.S.\$5,016; expenditure (June 2005)⁴: food, beverages, and tobacco 36.4%, housing and energy 16.8%, transportation and communications 10.2%, household furnishings 8.4%.

Land use as % of total land area (2003): in temporary crops 31.9%, in permanent crops 12.1%, in pasture 38.3%; overall forest area (2005) 14.4%.

Population economically active (2004): total 2,710,237; activity rate of total population 40.1% (participation rates: ages 15–64, 63.2%; female 39.6%; unemployed [2005] 7.2%).

Demography

Population (2008): 62,028,000.

Density (2008): persons per sq mi 295.3, persons per sq km 114.0.

Urban-rural (2003): urban 76.3%; rural 23.7%.

Sex distribution (2007²): male 48.60%; female 51.40%.

Age breakdown (2006²): under 15, 18.4%; 15–29, 19.1%; 30–44, 21.1%; 45–59, 20.4%; 60–74, 12.7%; 75–84, 6.3%; 85 and over, 2.0%.

Population projection: (2010) 62,677,000; (2020) 65,393,000.

Ethnic composition (2000): French 76.9%; Algerian and Moroccan Berber 2.2%; Italian 1.9%; Portuguese 1.5%; Moroccan Arab 1.5%; Fleming 1.4%; Algerian Arab 1.3%; Basque 1.3%; Jewish 1.2%; German 1.2%; Vietnamese 1.0%; Catalan 0.5%; other 8.1%.

Religious affiliation (2004): Roman Catholic 64.3%, of which practicing c. 8%; nonreligious/atheist c. 27%; Muslim 4.3%; Protestant 1.9%; Buddhist c. 1%; Jewish 0.6%; Jehovah's Witness 0.4%; Orthodox 0.2%; other 0.3%.

Major cities (2005): Paris 2,153,600 (urban agglomeration 9,854,000); Marseille 820,900 (1,384,000); Lyon 466,400 (1,408,000); Toulouse 435,000 (839,000); Nice 347,900 (915,000); Nantes 281,800 (544,932⁴); Strasbourg 272,700 (427,245⁴); Montpellier 244,300 (287,981⁴); Bordeaux 230,600 (794,000); Lille 225,100 (1,031,000); Rennes 209,900 (272,263⁴); Reims 184,800 (215,581⁴); Le Havre 183,900 (248,547⁴); Saint-Étienne 175,700 (291,960⁴).

Households (2004). Average household size 2.36; 1 person 32.8%, 2 persons 32.5%, 3 persons 15.1%, 4 persons 12.8%, 5 persons or more 6.8%. Individual households 14,320,000 (56.0%); collective households 11,232,000 (44.0%).

Immigration: total immigrant population (2005²) c. 4,850,000; immigrants admitted (2002) 205,707, of which North African 30.7%, EU 20.8%, sub-Saharan African 15.2%, Asian 14.1%, other European 11.8%.

Vital statistics

Birth rate per 1,000 population (2006): 13.1 (world avg. 20.3); (2005) within marriage 52.6%; outside of marriage 47.4%.

Death rate per 1,000 population (2006): 8.4 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 4.7 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 2.00.

Marriage/divorce rates per 1,000 population: (2006) 4.4/(2003) 2.1.

Life expectancy at birth (2006): male 77.2 years; female 84.1 years.

Major causes of death per 100,000 population (2004): malignant neoplasms (cancers) 251.9; diseases of the circulatory system 243.0; accidents and violence 61.7; diseases of the respiratory system 50.0; diseases of the digestive system 37.8; endocrine, metabolic, and nutritional disorders 31.1.

Adult population (ages 15–49) living with HIV (2007): 0.4% (world avg. 0.8%).

Social indicators

Educational attainment (2002). Percentage of population age 25–64 with no formal schooling through lower-secondary education 35%, upper secondary/higher vocational 41%, university 24%.

Quality of working life. Legally worked week for full-time employees (2005) 36.0 hours. Rate of fatal injuries per 100,000 insured workers (2004): 3.7. Average days lost to labour stoppages per 1,000 workers (2004): 13. Trade union membership (2003): 1,900,000 (c. 8% of labour force).

Access to services (2004). Proportion of principal residences having: electricity 97.4%; indoor toilet 94.6%; indoor kitchen with sink 94.2%; hot water 60.3%; air conditioner 15.4%.

Social participation. Eligible voters participating in last (May 2007) national election: 84.0%. Population over 15 years of age participating in voluntary associations (1997): 28.0%. Percentage of population who "never" or "almost never" attend church services (2000) 60%; percentage of Roman Catholic population who attend Mass weekly (2003) 12%.

Social deviance. Offense rate per 100,000 population (2006) for: murder 1.5, rape 16.0, other assault 269.2; theft (including burglary and housebreaking) 3,403.8. Incidence per 100,000 in general population of: homicide (2001) 0.8; suicide (2001) 16.1.

Leisure. Members of sports federations (2004): 15,226,000, of which football (soccer) 2,147,000, tennis 1,066,000. Movie tickets sold (2005): 174,200,000. Average daily hours of television viewing for population age 4 and over (2005): 3.43.

Material well-being (2004). Households possessing: automobile 81%; colour television 95%; personal computer 45%; washing machine 92%; microwave 74%; dishwasher (2001) 39%.

National economy

Gross national income (2006)⁵: U.S.\$2,256,465,000,000 (U.S.\$35,725 per capita).

TOTAL		32,253	83,534	157,213

Demography

Population (2008): 217,000.

Density (2008): persons per sq mi 6.7, persons per sq km 2.6.

Urban-rural (2003): urban 75.4%; rural 24.6%.

Sex distribution (2005): male 50.58%; female 49.42%.

Age breakdown (2005): under 15, 29.3%; 15–29, 22.8%; 30–44, 21.1%; 45–59, 17.4%; 60–74, 7.2%; 75 and over, 2.2%.

Population projection: (2010) 228,000; (2020) 280,000.

Doubling time: 26 years.

Ethnic composition (2000): Guianese Mulatto 37.9%; French 8.0%; Haitian 8.0%; Surinamese 6.0%; Antillean 5.0%; Chinese 5.0%; Brazilian 4.9%; East Indian 4.0%; other (other West Indian, Hmong, other South American) 21.2%.

Religious affiliation (2000): Christian 84.6%, of which Roman Catholic 80.0%, Protestant 3.9%; Chinese folk-religionist 3.6%; Spiritist 3.5%; nonreligious/atheist 3.0%; traditional beliefs 1.9%; Hindu 1.6%; Muslim 0.9%; other 0.9%.

Major cities (1999)¹: Cayenne (2003) 60,500 (urban agglomeration 84,181); Saint-Laurent-du-Maroni 19,211; Kourou 19,107; Matoury 18,032²; Rémire-Montjoly 15,555².

Vital statistics

Birth rate per 1,000 population (2006): 30.5 (world avg. 20.3); (2005) within marriage c. 10%; outside of marriage c. 90%.

Death rate per 1,000 population (2006): 3.5 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 27.0 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 4.10.

Marriage/divorce rates per 1,000 population: (2005) 3.0/(2003) 0.8.

Life expectancy at birth (2006): male 74.0 years; female 80.8 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system c. 85; violence and accidents c. 80; malignant neoplasms (cancers) c. 58; infectious and parasitic diseases c. 35, of which HIV/AIDS c. 23; endocrine and metabolic disorders c. 16; diseases of the digestive system c. 12.

National economy

Budget (2002). Revenue: €145,000,000 (direct taxes 33.1%, indirect taxes 31.7%, revenue from French central government 20.7%). Expenditures: €145,000,000 (current expenditures 83.4%, capital expenditures 16.6%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): rice 23,000, cassava 10,300, cabbages 6,300, sugarcane 5,500, bananas 4,500, taro 4,100, tomatoes 3,700, green beans 3,300; livestock (number of live animals) 10,500 pigs, 9,200 cattle; roundwood (2006) 171,376 cu m, of which fuelwood 61%; fisheries production (2006) 5,207 (from aquaculture 1%). Mining and quarrying (2004): stone, sand, and gravel 3,000; gold 2,564 kg; tantalum 1,500 kg. Manufacturing (2001): pork 1,245; chicken meat 560; finished wood products 3,172 cu m³; rum (2004) 3,786 hectolitres; other products include leather goods, clothing, rosewood essence, yogurt, and beer. Number of satellites launched from the Kourou Space Centre (2007): 64. Energy production (consumption): electricity (kW-hr; 2005) 430,000,000 ([2007] 582,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2005) none (267,000); natural gas, none (none).

Household income and expenditure. Average household size (1999) 3.3; income per household (2000) €30,542 (U.S.\$28,139); sources of income (2000): wages and salaries 55.4%, self-employment 17.6%, transfer payments 14.4%; expenditure (2005)⁵: food and beverages 21.7%, housing and energy 20.8%, transportation and communications 15.4%, restaurants and hotels 7.9%, household furnishings 7.3%, clothing and footwear 6.4%.

Land use as % of total land area (2003): in temporary crops 0.14%, in permanent crops 0.05%, in pasture 0.08%; overall forest area (2005) 91.8%.

Gross domestic product (at current market prices; 2006): U.S.\$3,410,000,000 (U.S.\$16,589 per capita).

Demography

Population (2008): 4,360,000⁸.
Density (2008):⁸ persons per sq mi 196.0, persons per sq km 75.7.
Urban-rural (2005):⁸ urban 52.3%; rural 47.7%.
Sex distribution (2006):⁸ male 47.50%; female 52.50%.
Age breakdown (2006):⁸ under 15, 17.9%; 15–29, 24.2%; 30–44, 21.5%; 45–59, 18.9%; 60 and over, 17.5%.
Population projection:⁸ (2010) 4,298,000; (2020) 4,060,000.
Ethnic composition (2002):⁸ Georgian 83.8%; Azerbaijani 6.5%; Armenian 5.7%; Russian 1.5%; Ossetian 0.9%; other 1.6%.
Religious affiliation (2005):⁹ Georgian Orthodox 54.8%; Sunnī Muslim 14.5%; Shī'ī Muslim 5.0%; Armenian Apostolic (Orthodox) 3.9%; Catholic 0.8%; Yazidi 0.4%; Protestant 0.4%; nonreligious 13.0%; other 7.2%.
Major cities (2006): Tbilisi 1,103,300; Kutaisi 190,100; Batumi 122,100; Rustavi 118,200; Sokhumi (2002) 45,000.

Vital statistics

Birth rate per 1,000 population (2005):⁸ 10.7 (world avg. 20.3); within marriage 50.3%; outside of marriage 49.7%.
Death rate per 1,000 population (2005):⁸ 9.9 (world avg. 8.6).
Natural increase rate per 1,000 population (2005):⁸ 0.8 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2005):⁸ 1.35.
Marriage/divorce rates per 1,000 population (2005):⁸ 4.1/0.4.
Life expectancy at birth (2005):⁸ male 69.3 years; female 76.7 years.
Major causes of death per 100,000 population (2005):⁸ diseases of the circulatory system 630.3; malignant neoplasms (cancers) 101.6; accidents, poisoning, and violence 28.4; diseases of the digestive system 27.6.

National economy

Budget (2005). Revenue: GEL 3,257,200,000 (tax revenue 74.0%, of which VAT 30.3%, income tax 8.9%, excise tax 8.8%, taxes on corporate profits 6.5%; nontax revenue 23.0%; grants 3.0%). Expenditures: GEL 3,280,800,000 (social security and welfare 19.1%, defense 12.1%, general public service 10.8%, education 8.8%, public order 8.7%, energy 7.0%).
Population economically active (2005): total 2,023,900; activity rate of total population 44.1% (participation rates: ages 15–64, 68.4%; female 46.9%; unemployed 13.8%).

Price and earnings indexes (2000 = 100)

Immigration (2003): immigrant arrivals 601,759, from Poland 14.6%, Turkey 8.0%, Russia 5.2%, Romania 3.9%, Serbia and Montenegro 3.6%.

Vital statistics

Birth rate per 1,000 population (2007): 8.3 (world avg. 20.3); (2004) within marriage 72.0%; outside of marriage 28.0%.

Death rate per 1,000 population (2007): 10.1 (world avg. 8.6).

Natural increase rate per 1,000 population (2007): –1.8 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2007): 1.37.

Marriage/divorce rates per 1,000 population (2007): 4.5/2.3.

Life expectancy at birth (2005–07): male 76.9 years; female 82.3 years.

Major causes of death per 100,000 population (2003): diseases of the circulatory system 384.0; malignant neoplasms (cancers) 253.6; diseases of the respiratory system 70.3; diseases of the digestive system 51.2; accidents, poisoning, and violence 38.8.

Social indicators

Educational attainment (2002). Percentage of population age 25–64 having: no formal schooling through lower secondary 17%; upper secondary/higher vocational 60%; university 23%.

Quality of working life. Average workweek (2005): 38.2 hours. Annual rate per 100,000 workers (2005) for: injuries or accidents at work 2,835; deaths 2.4. Proportion of labour force insured for damages of income loss resulting from: injury, virtually 100%; permanent disability, virtually 100%; death, virtually 100%. Average days lost to labour stoppages per 1,000 workers (2005): 0.5.

Access to services. Proportion of dwellings (2002) having: electricity, virtually 100%; piped water supply, virtually 100%; flush sewage disposal (1993) 98.4%; public fire protection, virtually 100%.

Social participation. Eligible voters participating in last (September 2005) national election 77.7%. Trade union membership in total workforce (2003): c. 18%. Practicing religious population: 5% of Protestants (1994) and 15% of Roman Catholics (2003) “regularly” attend religious services.

Social deviance (2000). Offense rate per 100,000 population for: murder and manslaughter 3.8; sexual abuse 37.0, of which rape and forcible sexual assault 11.7, child molestation 10.2; assault and battery 153.2; theft 754.2.

Leisure. Favourite leisure activities include playing football (soccer; registered participants, 2004) 6,272,804, as well as watching television, going to the cinema, attending theatrical and musical performances, and visiting museums.

Material well-being (2005). Households possessing: automobile 76.8%; telephone (2006) 95.2%; mobile telephone (2006) 80.6%; refrigerator 99.1%; television (2004) 95.0%; DVD player 50.1%; washing machine (2004) 95.5%; clothes dryer 39.3%; personal computer (2006) 71.6%; dishwasher 59.1%; microwave oven 67.0%; Internet access (2006) 57.9%; MP3 player 14.7%.

National economy

Budget (2004). Revenue: €639,220,000,000 (social security contributions 58.3%; tax revenue 37.6%, of which individual income taxes 13.7%, taxes on goods and services 10.2%, excise taxes 10.2%; nontax revenue 2.2%; other 1.9%). Expenditures: €691,480,000,000 (social benefits 71.4%; grants 7.9%; interest 5.7%; compensation of employees 5.5%).

Total public debt (2004): U.S.\$1,732,000,000,000.

Production (metric tons except as noted; 2007). Agriculture, forestry, fishing: cereal grains 42,294,600 (of which wheat 21,366,800, barley 11,034,200), sugar beets 26,114,000, potatoes 11,604,500, rapeseed 5,320,000, grapes 1,300,000, apples 911,900, cabbages 735,500, gooseberries (2006) 40,000, hops 28,600, currants 8,800; livestock (number of live animals) 26,530,000 pigs, 12,600,800 cattle, 2,444,400 sheep, 108,000,000 chickens; roundwood (2006) 62,290,000 cu m, of which fuelwood 13%; fisheries production (2006) 333,216 (from aquaculture 11%). Mining and quarrying (metric tons; 2005): potash (potassium oxide content) 3,664,000; feldspar 500,000. Manufacturing (value added in U.S.\$'000,000; 2003): transportation equipment 80,003, of which motor vehicles 46,854, motor vehicle parts 20,655; nonelectrical machinery and apparatus 64,943; electrical machinery and electronics 47,403, of which electricity distribution and control apparatus 18,799; fabricated metal products 41,855; food and food products 31,727; paints, soaps, and pharmaceuticals 26,172; industrial chemicals 20,211; printing and publishing 19,829; professional and scientific equipment 19,045, of which medical, measuring, and testing appliances 16,737; plastic products 17,333; cement, bricks, and ceramics 10,736.

Manufacturing enterprises (2000)

	no. of enterprises	no. of employees	wages as a % of avg. of all wages	annual value added (€'000,000)
Manufacturing of which	40,052	6,424,000	100.0	600,009

Demography

Population (2008): 56,700.

Density (2008): persons per sq mi 0.36, persons per sq km 0.14.

Urban-rural (2006): urban (town) 82.7%; rural (settlement) 17.3%.

Sex distribution (2006): male 53.04%; female 46.96%.

Age breakdown (2006): under 15, 23.9%; 15–29, 21.1%; 30–44, 24.3%; 45–59, 19.4%; 60–74, 8.8%; 75–84, 1.7%; 85 and over, 0.8%.

Population projection: (2010) 57,000; (2020) 59,000.

Doubling time: 86 years.

Ethnic composition (2000): Greenland Eskimo 79.1%; Danish 13.6%; other 7.3%.

Religious affiliation (2000): Protestant 69.2%, of which Evangelical Lutheran 64.2%, Pentecostal 2.8%; other Christian 27.4%; other/nonreligious 3.4%.

Major towns (2007): Nuuk (Godthåb) 14,719; Sisimiut (Holsteinsborg) 5,344; Ilulissat (Jakobshavn) 4,512; Qaqortoq (Julianehåb) 3,238.

Vital statistics

Birth rate per 1,000 population (2006): 16.0 (world avg. 20.3); (1993) within marriage 29.2%; outside of marriage 70.8%.

Death rate per 1,000 population (2006): 7.9 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 8.1 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 2.40.

Marriage/divorce rates per 1,000 population (1999): 4.5/n.a.

Life expectancy at birth (2006): male 66.4 years; female 73.6 years.

Major causes of death per 100,000 population (1996–98): diseases of the circulatory system 187.5; malignant neoplasms (cancers) 181.5; violence 95.8; infectious and parasitic diseases 64.9; suicides 63.7; diseases of the respiratory system 51.8; accidents 46.4.

National economy

Budget (general government; 2005). Revenue: DKK 8,031,552,000 (block grant from Danish government 45.4%; income tax 32.3%; import duties 6.9%; other 15.4%). Expenditures: DKK 7,466,650,000 (social welfare 25.4%, education 17.9%, health 12.0%, public order 3.2%, defense 3.0%).

Tourism (2006): number of overnight stays at hotels 245,432, of which visitors from within Greenland 104,012, from Denmark 101,387, from the U.S. 9,536.

Land use as % of total land area (2003): in temporary crops, negligible, in permanent crops, none, in pasture 0.6%; overall forest area (2005) negligible.

Production (metric tons except as noted). Agriculture, fishing, other marine: locally grown broccoli, cauliflower, and cabbage sold commercially for the first time in 2007, potatoes also produced; fish catch (2004) 262,200 (by local boats 192,000, of which prawn 144,400, capelin 42,000, halibut 40,600, crab 6,400; by foreign boats 70,100); other marine catch: whales/narwhals [2006] 606, porpoises [2006] 2,373, seals [2005] 188,068; livestock (number of live animals; 2006) 21,289 sheep, 2,318 tame reindeer, 217 horses; animal products (value of external sales in DKK '000; 2004) sealskins 23,026, polar bear skins (1998) 579 (164 polar bears killed by trophy hunters in 2004). Mining: 4. Manufacturing: principally handicrafts and fish processing. Energy production (consumption): electricity (kWh-yr; 2005) 272,000,000 (272,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2005) none (181,000); natural gas, none (none).

Gross national income (2006): U.S.\$1,618,000,000 (U.S.\$27,991 per capita).

Grenada

Official name: Grenada.

Form of government: constitutional monarchy with two legislative houses (Senate [13]; House of Representatives [15]).

Chief of state: British Monarch represented by Governor-General.

Head of government: Prime Minister.

Capital: St. George's.

Official language: English.

Official religion: none.

Monetary unit: Eastern Caribbean dollar (EC\$); valuation (Sept. 8, 2008)

1 U.S.\$ = EC\$2.70; 1 £ = EC\$4.77.

Demography

Population (2008): 179,000.

Density (2008):³ persons per sq mi 856.5, persons per sq km 330.9.

Urban-rural (2003): urban 93.7%; rural 6.3%.

Sex distribution (2006): male 50.94%; female 49.06%.

Age breakdown (2006): under 15, 29.0%; 15–29, 23.0%; 30–44, 22.2%; 45–59, 16.1%; 60–74, 7.4%; 75 and over, 2.3%.

Population projection: (2010) 189,000; (2020) 226,000.

Doubling time: 48 years.

Ethnic composition (2000): Pacific Islander 44.6%, of which Chamorro 37.0%; Asian 32.5%, of which Filipino 26.3%, Korean 2.5%; white 6.8%; black 1.0%; mixed 13.9%; other 1.2%.

Religious affiliation (2005): Roman Catholic c. 72%; Protestant c. 12%; non-religious/other c. 16%.

Major populated places (2000): Tamuning 10,833; Mangilao 7,794; Yigo 6,391; Astumbo 5,207; Hagåtña 1,122.

Vital statistics

Birth rate per 1,000 population (2006): 18.8 (world avg. 20.3); (2004) within marriage 42.8%; outside of marriage 57.2%.

Death rate per 1,000 population (2006): 4.5 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 14.3 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 2.58.

Marriage/divorce rates per 1,000 population (2004): 9.4/11.9.

Life expectancy at birth (2006): male 75.5 years; female 81.8 years.

Major causes of death per 100,000 population (2003): diseases of the heart 122.1; malignant neoplasms (cancers) 69.9; cerebrovascular disease 31.9; accidents 31.9; bacterial infections 16.6; suicide 13.6.

National economy

Budget (2003). Revenue: U.S.\$426,276,454 (local taxes 81.8%, federal contributions 15.3%, other 2.9%). Expenditures: U.S.\$342,550,414 (education 46.1%, public order 16.0%, health 3.9%, social protection 2.7%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): coconuts 53,200, vegetables 2,685, watermelons 2,500, roots and tubers 2,630, eggs 750, fruits 620; livestock (number of live animals) 210,000 chickens, 5,200 pigs; roundwood, n.a.; fisheries production (2006) 891 (from aquaculture 18%). Mining and quarrying: sand and gravel. Manufacturing (value of sales in U.S.\$'000; 2002): food processing 26,733; printing and publishing 7,382; fabricated metal products 4,052. Energy production (consumption): electricity (kWh; 2005) 1,897,000,000 (1,897,000,000); petroleum products (metric tons; 2002) none (1,333,000).

Household income and expenditure. Average household size (2003) 3.7; annual mean (median) household income (2003) U.S.\$41,196 (U.S.\$33,457); sources of income: n.a.; expenditure (2007)⁴: health care 20.4%, household furnishings 15.7%, food and nonalcoholic beverages 14.7%, energy 11.3%, transportation 8.6%, clothing and footwear 6.7%, housing 5.3%.

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2005) 1,149; remittances, n.a.; foreign direct investment (FDI), n.a. Disbursements for (U.S.\$'000,000): tourism, n.a.; remittances, n.a.; FDI, n.a. **Gross domestic product** (at current market prices; 2005): U.S.\$3,700,000,000 (U.S.\$22,661 per capita).

Budget (2005). Revenue: Q 24,521,300,000 (tax revenue 95.2%, of which VAT 43.8%, income tax 24.7%; nontax revenue 4.8%). Expenditures: Q 28,500,500,000 (current expenditures 66.4%; capital expenditures 33.6%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): sugarcane 18,000,000, corn (maize) 1,100,000, bananas 1,010,000, oil palm fruit 630,000, plantains 275,000, coffee 216,600, cardamom and nutmeg 19,000; livestock (number of live animals; 2007) 2,800,000 cattle, 265,000 sheep, 27,000,000 chickens; roundwood (2006) 17,063,047 cu m, of which fuelwood 97%; fisheries production (2006) 34,960 (from aquaculture 47%). Mining and quarrying (2005): gypsum 349,589; gold 740 kg; marble 3,000 cu m. Manufacturing (value added in Q '000,000; 2005)⁵: food products 213; beverages 98; textiles 75; wearing apparel 51; fabricated metal products 42. Energy production (consumption): electricity (kW-hr; 2005) 7,550,000,000 (7,238,000,000); coal (metric tons; 2005) none (408,000); crude petroleum (barrels; 2006) 7,340,000 ([2005] 735,000); petroleum products (metric tons; 2005) 26,000 (3,048,000); natural gas, none (none).

Household income and expenditure. Average household size (2002) 4.4; income per household (1989) Q 4,306 (U.S.\$1,529); sources of income: n.a.; expenditure (2000)⁶: food and beverages 32.9%, household furnishings 14.7%, clothing 11.8%, recreation and culture 9.2%, health 7.3%.

Land use as % of total land area (2003): in temporary crops 13.3%, in permanent crops 5.6%, in pasture 24.0%; overall forest area (2005) 36.3%.

Gross national income (GNI; 2007): U.S.\$32,585,000,000 (U.S.\$2,440 per capita); purchasing power parity GNI (U.S.\$4,440 per capita).

Guernsey¹

Official name: Bailiwick of Guernsey.
Political status: crown dependency (United Kingdom) with one legislative house (States of Deliberation [50², 3, 4]).
Chief of state: British Monarch represented by Lieutenant Governor.
Head of government: Chief Minister⁵ assisted by the Policy Council.
Capital: St. Peter Port.
Official language: English.
Official religion: none.
Monetary unit: Guernsey pound⁶; valuation (Sept. 8, 2008)
 1 Guernsey pound = U.S.\$1.77.

Demography

Population (2008): 1,503,000.

Density (2008): persons per sq mi 138.4, persons per sq km 53.4.

Urban-rural (2003): urban 34.0%; rural 66.0%.

Sex distribution (2005): male 48.53%; female 51.47%.

Age breakdown (2005): under 15, 41.6%; 15–29, 28.1%; 30–44, 16.1%; 45–59, 9.4%; 60–74, 4.1%; 75 and over, 0.7%.

Population projection: (2010) 1,565,000; (2020) 1,893,000.

Doubling time: 33 years.

Ethnic composition (1996): Balante 30%; Fulani 20%; Mandyako 14%; Malinke 13%; Pepel 7%; nonindigenous Cape Verdean mulatto 2%; other 14%.

Religious affiliation (2005): traditional beliefs c. 49%; Muslim c. 42%; Christian/other c. 9%.

Major cities (2004): Bissau 305,700; Bafatá 15,000; Cacheu 14,000; Gabú 10,000.

Vital statistics

Birth rate per 1,000 population (2005): 37.6 (world avg. 20.3).

Death rate per 1,000 population (2005): 16.7 (world avg. 8.6).

Natural increase rate per 1,000 population (2005): 20.9 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 4.93.

Marriage/divorce rates per 1,000 population: n.a./n.a.

Life expectancy at birth (2005): male 44.8 years; female 48.5 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 165, HIV/AIDS 126, accidents, poisoning, and violence 114, malignant neoplasms (cancers) 66, chronic respiratory diseases 41.

National economy

Budget (2005). Revenue: CFAF 41,378,000,000 (tax revenue 44.3%, of which taxes on international trade 15.5%, general sales tax 13.6%; grants 32.4%; nontax revenue 23.3%, of which fishing licenses 18.2%). Expenditures: CFAF 60,524,000,000 (current expenditures 72.7%, of which wages and salaries 35.1%, scheduled external interest payments 11.1%; capital expenditures 27.3%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): roots and tubers 116,000, rice 88,700, cashew nuts 81,000, oil palm fruit 80,000, millet 50,000, coconuts 45,500, plantains 40,000, peanuts (groundnuts) 21,000, pork 12,200, seed cotton 5,500, cattle meat 5,450; livestock (number of live animals) 549,800 cattle, 390,500 pigs; roundwood (2006) 592,000 cu m, of which fuelwood 71%; fisheries production (2006) 6,200 (from aquaculture, none). Mining and quarrying: extraction of construction materials only. Manufacturing (2003): processed wood 11,000; bakery products 7,900; wood products 4,400; dried and smoked fish 3,800; soap 2,400; vegetable oils 37,000 hectolitres. Energy production (consumption): electricity (kW-hr; 2005) 61,000,000 (61,000,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2005) none (88,000); natural gas, none (none).

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2005) 1.6; remittances (2006) 29; foreign direct investment (2006 avg.) 18; official development assistance (2006) 82. Disbursements for (U.S.\$'000,000): tourism (2005) 10; remittances (2006) 5.

Population economically active (2003): total 643,000; activity rate of total population 47.2% (participation rates [1995]: over age 10, 65.5%; female 39.9%; unemployed, n.a.).

Price index (2000 = 100)

Demography

Population (2008): 315,000.

Density (2008): persons per sq mi 34.3, persons per sq km 13.2.

Urban-rural (2007): urban 92.6%; rural 7.4%.

Sex distribution (2008): male 51.10%; female 48.90%.

Age breakdown (2006): under 15, 21.8%; 15–29, 21.9%; 30–44, 21.5%; 45–59, 18.9%; 60–74, 10.2%; 75–84, 4.3%; 85 and over, 1.4%.

Population projection (2010): 321,000; (2020) 355,000.

Ethnic composition (2008): Icelandic 93.2%; European 5.5%, of which Polish 2.7%, Nordic 0.6%; Asian 0.8%; other 0.5%.

Religious affiliation (2007): Evangelical Lutheran 80.7%; Roman Catholic 2.5%; other Christian 6.8%; other/not specified 10.0%.

Major cities (2008): Reykjavik 119,000 (urban area [2006] 187,426); Kópavogur 29,795⁶; Hafnarfjörður 25,434⁶; Akureyri 17,390; Gardabær 10,272⁶.

Vital statistics

Birth rate per 1,000 population (2007): 14.6 (world avg. 20.3); within marriage 36.2%; outside of marriage 63.8%.

Death rate per 1,000 population (2007): 6.2 (world avg. 8.6).

Natural increase rate per 1,000 population (2007): 8.4 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2007): 2.10.

Marriage/divorce rates per 1,000 population (2007): 5.5/1.6.

Life expectancy at birth (2007): male 79.4 years; female 82.9 years.

Major causes of death per 100,000 population (2006): diseases of the circulatory system 188.0, of which ischemic heart diseases 95.7, cerebrovascular disease 41.7; malignant neoplasms (cancers) 154.2; diseases of the nervous system 52.0; accidents and violence 43.9; diseases of the respiratory system 39.4.

National economy

Budget (2007). Revenue: ISK 454,588,000,000 (tax revenue 78.4%, of which VAT 42.9%, individual income tax 31.5%; nontax revenue 21.6%, of which social security contributions 8.9%). Expenditures: ISK 403,199,000,000 (social security and health 48.8%, education 10.6%, social affairs 9.4%, interest payment 6.9%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): potatoes 13,000, cereals 11,246, tomatoes 1,603, hay 1,993,773 cu m; livestock (number of live animals) 454,812 sheep, 70,660 cattle, 41,497 mink; roundwood, n.a.; fisheries production (value in ISK '000,000) 80,251, of which cod 29,585, haddock 14,538, redfish 7,646, herring 5,700, saithe 4,263, capelin 4,247, blue whiting 3,022; fisheries production by tonnage 1,395,716 (from aquaculture [2006] 1%). Mining and quarrying (2005): diatomite 3,236. Manufacturing (value of sales in ISK '000,000; 2007): food products and beverages (mainly preserved and processed fish) 202,606; base metals 76,581; printing and publishing 37,075; cement, bricks, and ceramics 32,781; fabricated metal products 26,335; machinery and apparatus 14,064. Energy production (consumption): electricity (kW-hr; 2006) 9,924,900,000 (9,925,000,000); coal (metric tons; 2005) none (117,000); crude petroleum, none (none); petroleum products (metric tons; 2005) none (720,000); natural gas, none (none).

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2006) 439; remittances (2007) 41; foreign direct investment (FDI; 2004–06 avg.) 2,555. Disbursements for (U.S.\$'000,000): tourism (2006) 1,076; remittances (2007) 100; FDI (2004–06 avg.) 4,815.

Population economically active (2007): total 181,500; activity rate of total population 58.5% (participation rates: ages 16–74, 83.3%; female 45.5%; unemployed [July 2007–June 2008] 2.4%).

Vital statistics

Birth rate per 1,000 population (2006): 23.5 (world avg. 20.3).

Death rate per 1,000 population (2006): 7.5 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 16.0 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 2.78.

Marriage/divorce rates per 1,000 population: n.a./n.a.

Life expectancy at birth (2005): male 63.6 years; female 65.2 years.

Major causes of death per 100,000 population (2002): infectious and parasitic diseases 420, of which HIV/AIDS 34; diseases of the circulatory system 268, of which ischemic heart disease 146; accidents, homicide, and other violence 100; malignant neoplasms (cancers) 71; chronic respiratory diseases 58.

Adult population (ages 15–49) living with HIV (2007): 0.3% (world avg. 0.8%).

Social indicators

Educational attainment (2001). Percentage of population age 25 and over having: no formal schooling 48.1%; incomplete primary education 9.0%; complete primary 22.1%; secondary 13.7%; higher 7.1%.

Distribution of expenditure (2004–05)

percentage of household expenditure by decile/quintile									
1	2	3	4	5	6	7	8	9	10 (highest)
3.6	4.5	—11.3—	—	—14.9—	—	—20.4—	—	14.2	31.1

Quality of working life. Average workweek (2006): c. 50 hours¹⁵. Rate of fatal injuries per 100,000 employees (2004) 28¹⁵. Agricultural workers in servitude to creditors (early 1990s) 10–20%. Children ages 5–14 working as child labourers (2003): 35,000,000 (14% of age group). Percentage of population living below the poverty line (2004–05): 21.7%.

Access to services (2001). Percentage of total (urban, rural) households having access to: electricity for lighting purposes (2003) 61.5% (90.8%, 51.6%), kerosene for lighting purposes 36.9% (8.3%, 46.6%), water closets 18.0% (46.1%, 7.1%), pit latrines 11.5% (14.6%, 10.3%), no latrines 63.6% (26.3%, 78.1%), closed drainage for waste water 12.5% (34.5%, 3.9%), open drainage for waste water 33.9% (43.4%, 30.3%), no drainage for waste water 53.6% (22.1%, 65.8%). Type of fuel used for cooking in households (2003): firewood 61.1% (20.0%, 74.9%), LPG (liquefied petroleum gas) 20.8% (55.4%, 9.1%), cow dung 7.4% (1.8%, 9.3%), kerosene 4.7% (13.0%, 1.9%), coal 1.5% (3.3%, 0.9%), other 4.6% (6.6%, 3.9%). Source of drinking water: hand pump or tube well 41.3% (21.3%, 48.9%), piped water 36.7% (68.7%, 24.3%), well 18.2% (7.7%, 22.2%), river, canal, spring, public tank, pond, or lake 2.7% (0.7%, 3.5%).

Social participation. Eligible voters participating in April/May 2004 national election: 58.1%. Registered trade unions (2004): 74,403.

Social deviance (2003)¹⁶. Offense rate per 100,000 population for: murder 3.1; rape 1.5; dacoity (gang robbery) 0.5; theft 23.0; riots 5.4. Rate of suicide per 100,000 population (2002): 11.2, in Kerala 30.8.

Material well-being (2001). Total (urban, rural) households possessing: television receivers 31.6% (64.3%, 18.9%), telephones 9.1% (23.0%, 3.8%), scooters, motorcycles, or mopeds 11.7% (24.7%, 6.7%), cars, jeeps, or vans 2.5% (5.6%, 1.3%). Households availing banking services 35.5% (49.5%, 30.1%).

National economy

Gross national income (GNI; 2007): U.S.\$1,069,427,000,000 (U.S.\$950 per capita); purchasing power parity GNI (U.S.\$2,740 per capita).

Demography

Population (2008): 81,800.
Density (2008): persons per sq mi 370.3, persons per sq km 143.0.
Urban-rural (2006): urban 71.6%; rural 28.4%.
Sex distribution (2006): male 49.37%; female 50.63%.
Age breakdown (2006): under 15, 16.9%; 15–29, 17.2%; 30–44, 22.0%; 45–59, 21.1%; 60–74, 14.4%; 75–84, 6.0%; 85 and over, 2.4%.
Population projection: (2010) 83,000; (2020) 87,000.
Population by place of birth (2006): Isle of Man 47.6%; United Kingdom 43.9%, of which England 37.2%, Scotland 3.4%, Northern Ireland 2.1%, Wales 1.2%; Ireland 2.1%; other Europe 2.0%; other 4.4%.
Religious affiliation (2000): Christian 63.7%, of which Anglican 40.5%, Methodist 9.9%, Roman Catholic 8.2%; other (mostly nonreligious) 36.3%.
Major towns (2006): Douglas 26,218; Onchan 9,172; Ramsey 7,309; Peel 4,280; Port Erin 3,575.

Vital statistics

Birth rate per 1,000 population (2007): 11.3 (world avg. 20.3); (2004) within marriage 63.9%; outside of marriage 36.1%.
Death rate per 1,000 population (2007): 9.7 (world avg. 8.6).
Natural increase rate per 1,000 population (2007): 1.6 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2006): 1.65.
Marriage/divorce rates per 1,000 population (2004) 4.5/(2003) 4.4.
Life expectancy at birth (2006): male 75.3 years; female 81.2 years.
Major causes of death per 100,000 population (2004): diseases of the circulatory system 454.9, of which ischemic heart diseases 146.9, diseases of pulmonary circulation 130.2; malignant neoplasms (cancers) 244.8; diseases of the respiratory system 144.3; cerebrovascular disease 104.4; accidents 33.5.

National economy

Budget (2006–07). Revenue: £606,415,000 (customs duties and excise taxes 72.3%; income taxes 26.7%, of which resident 25.7%, nonresident 1.0%; non-tax revenue 1.0%). Expenditures: £528,200,000 (health and social security 40.8%; education 18.0%; transportation 7.6%; home affairs 6.7%; tourism and recreation 5.0%).
Public debt: n.a.
Production. Agriculture, forestry, fishing: main crops include hay, oats, barley, wheat, and orchard crops; livestock (number of live animals; 2007) 145,864 sheep, 36,934 cattle, 565 pigs; fish catch (value of principal catch in £; 2006): 3,053,961, of which scallops 1,505,919, queen scallops 803,205, crab 372,656, lobster 328,618; fisheries production by tonnage (2007) 3,547 metric tons (from aquaculture, none). Mining and quarrying: sand and gravel. Manufacturing (value added in U.S.\$; 2001–02): electrical and nonelectrical machinery/apparatus, textiles, other 76,100,000; food and beverages 21,900,000. Energy production (consumption): electricity (kW-hr; 2006) n.a. (379,200,000); crude petroleum, none (n.a.); petroleum products, n.a. (n.a.); natural gas, none (n.a.).
Household income and expenditure. Average household size (2006) 2.4; income per household (1995–96) £24,180 (U.S.\$37,965); sources of income (1995–96): wages and salaries 63.0%, transfer payments 16.0%, self-employment 10.0%, property income 8.0%, other 3.0%; expenditure (January 2008)⁷: recreation and culture 22.2%, housing and energy 15.5%, food and nonalcoholic beverages 13.1%, transportation 12.0%, restaurants and hotels 8.1%, household furnishings 5.7%.
Gross national income (at current market prices; 2004–05): U.S.\$2,719,000,000 (U.S.\$33,960 per capita).

Demography

Population (2008): 59,760,000.

Density (2008): persons per sq mi 513.6; persons per sq km 198.3.

Urban-rural (2005): urban 67.6%; rural 32.4%.

Sex distribution (2005³): male 48.54%; female 51.46%.

Age breakdown (2005): under 15, 14.0%; 15–29, 16.5%; 30–44, 23.8%; 45–59, 20.1%; 60–74, 16.3%; 75–84, 7.2%; 85 and over, 2.1%.

Population projection (2010) 60,497,000; (2020) 62,462,000.

Ethnolinguistic composition (2000): Italian 96.0%; North African Arab 0.9%; Italo-Albanian 0.8%; Albanian 0.5%; German 0.4%; Austrian 0.4%; other 1.0%.

Religious affiliation (2005): Roman Catholic c. 83%, of which practicing c. 28%; Muslim c. 2%; nonreligious/atheist c. 14%; other c. 1%.

Major cities/urban agglomerations (2007): Rome 2,705,603 (3,339,000); Milan 1,303,437 (2,945,000); Naples 975,139 (2,250,000); Turin 900,569 (1,652,000); Palermo 666,552 (863,000); Genoa 615,686; Bologna 373,026; Florence 365,966; Bari 325,052; Catania 301,564; Venice 268,934; Verona 260,718; Messina 245,159; Padua 210,301.

Households. Average household size (2005³) 2.5; composition of households (2001): 1 person 24.9%, 2 persons 27.1%, 3 persons 21.6%, 4 persons 19.0%, 5 or more persons 7.4%. Family households (2001): 21,810,676, of which couple with children 41.5%, single family 24.9%, couple without children 20.8%, mother with children 7.3%, father with children 1.6%.

Immigration (2006): foreign residents c. 4,000,000 (mostly North African but also including c. 500,000 Romanians).

Vital statistics

Birth rate per 1,000 population (2006): 9.5 (world avg. 20.3); (2004) within marriage 85.1%; outside of marriage 14.9%.

Death rate per 1,000 population (2006): 9.4 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 0.1 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 1.35.

Marriage/divorce rates per 1,000 population: (2006) 4.2/(2003) 0.7.

Life expectancy at birth (2006): male 78.6 years; female 84.0 years.

Major causes of death per 100,000 population (2003): diseases of the circulatory system 429.5; malignant neoplasms 282.9; diseases of the respiratory system 73.0; accidents and violence 45.5; diseases of the digestive system 42.9.

Adult population (ages 15–49) living with HIV (2007): 0.4%⁶ (world avg. 0.8%).

Social indicators

Educational attainment (2002). Percentage of labour force ages 25 to 64 having: no formal schooling through lower secondary education 55.6%; completed upper secondary 34.0%; completed higher 10.4%.

Quality of working life. Average workweek (2004): 39.7 hours. Annual rate per 100,000 workers (2005) for: nonfatal injury 2,848; fatal injury 5. Number of working days lost to labour stoppages per 1,000 workers (2005): 40.

Material well-being. Rate per 100 households possessing (2006): mobile phone 82.3; personal computer 46.1; Internet access 35.6; satellite television 25.0.

Social participation. Eligible voters participating in last national election (April 9–10, 2006): 83%. Trade union membership in total workforce (2004): c. 30%.

Social deviance (2003). Offense rate per 100,000 population for: murder 1.2; rape 4.8; theft 2,306; robbery 72.5; drug trafficking 64.7; suicide 7.0⁷.

Access to services (2002). Nearly 100% of dwellings have access to electricity, a safe water supply, and toilet facilities.

Leisure (2006). Favourite leisure activities (attendance per 100 people age 6 and over): cinema 48.9; museum/art exhibition 27.7; sporting events 27.3; discotheque 24.8; archaeological sites/monuments 21.1.

National economy

Gross national income (GNI; 2007): U.S.\$1,991,284,000,000 (U.S.\$33,540 per capita); purchasing power parity GNI (U.S.\$29,850 per capita).

Mobility (2007). Percentage of total population moving: within a prefecture 2.3%; between prefectures 2.0%.

Vital statistics

Birth rate per 1,000 population (2007): 8.6 (world avg. 20.3).
Death rate per 1,000 population (2007): 8.8 (world avg. 8.6).
Natural increase rate per 1,000 population (2007): –0.2 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2007): 1.34.
Marriage/divorce rate per 1,000 population (2007): 5.7 (average age at first marriage, men 30.1 years; women 28.3 years)/2.0.
Life expectancy at birth (2007): male 79.2 years; female 86.0 years.
Major causes of death per 100,000 population (2007): malignant neoplasms (cancers) 303.6; heart disease 158.4; cerebrovascular disease 114.6; pneumonia 99.4; accidents 34.3; suicide 27.8; renal failure 19.5; diseases of the liver 14.6; pulmonary disease 13.4; diabetes mellitus 12.6.

Social indicators

Educational attainment (2003). Percentage of population ages 25–64 having: no formal schooling through lower-secondary education 16%; upper secondary/higher vocational 47%; university 37%.

Distribution of income (2000)

percentage of average household income by quintile				
1	2	3	4	5 (highest)
11.2	15.3	18.7	23.0	31.7

Quality of working life. Average hours worked per month (2007): 154.2. Annual rate of industrial deaths per 100,000 workers (2006): 3.0. Proportion of labour force insured for damages or income loss resulting from injury, permanent disability, and death (2005): 53.1%. Average man-days lost to labour stoppages per 1,000 workdays (2006): 1.8. Average duration of journey to work⁷ (2003): 34.2 minutes. Rate per 1,000 workers of discouraged workers (unemployed no longer seeking work; 1997): 89.4.
Access to services (2004). Proportion of households having access to: safe public water supply 96.9%; public sewage system c. 65%.
Social participation. Eligible voters participating in last national election (July 2007): 59%. Adult population working as volunteers at least once in the year (2006) 26.2%. Trade union membership in total workforce (2006): 15.1%.

Social deviance (2005). Offense rate per 100,000 population for: homicide 1.0; robbery 3.0; larceny and theft 151.6. Incidence in general population of: alcoholism per 100,000 population, n.a.; drug and substance abuse 0.1. Rate of suicide per 100,000 population (2007): 24.1.

Leisure/use of personal time

Discretionary daily activities (2006)

(Population age 10 years and over)

	weekly average hrs./min.
Total discretionary daily time	6:23
of which	
Hobbies and amusements	0:45
Sports	0:15
Learning (except schoolwork)	0:12
Social activities	0:22
Radio, television, newspapers, and magazines	2:24
Rest and relaxation	1:25
Other activities	1:00

Major leisure activities (2006)

(Population age 10 years and over)

	percentage of participation		total
	male	female

Jersey

Official name: Bailiwick of Jersey.
Political status: crown dependency (United Kingdom) with one legislative house (Assembly of the States of Jersey [58]¹).

Chief of state: British Monarch represented by Lieutenant Governor.

Head of government: Chief Minister² assisted by the Council of Ministers.

Capital: Saint Helier.

Official language: English³.

Official religion: none.

Monetary unit: Jersey pound (£); valuation (Sept. 8, 2008) 1 Jersey pound = U.S.\$1.77; at par with the British pound.

Household income and expenditure. Average household size (2007) 2.3; median annual household income (2004–05) £34,000 (U.S.\$62,100); sources of income: n.a.; expenditure (2004–05): housing 29.2%, recreation 14.2%, transportation 11.6%, food 9.8%, restaurants and hotels 5.8%, household furnishings 5.5%.

Population economically active (2001): total 48,105; activity rate of total population 55.2% (participation rates: ages 15–64 [male], 15–59 [female] 81.7%; female 44.1%; unemployed [2006] 2.3%).

Price index (2000 = 100)¹⁰

	2002	2003	2004	2005	2006	2007	2008
Consumer price index	108.4	113.4	117.3	120.2	123.9	126.7	134.0

Public debt: none.

Selected balance of payments data. Receipts from (U.S.\$'000,000): tourism (2006) 422; remittances, n.a.; foreign direct investment (FDI), n.a. Disbursements for (U.S.\$'000,000): tourism, n.a.; remittances, n.a.; FDI, n.a.

Land use as % of total land area (1997): in temporary and permanent crops c. 29%, in pasture c. 22%; overall forest area (2005) 4.1%⁴.

Foreign trade

Imports: ¹¹Major import sources (2001): mostly the United Kingdom.

Exports: ¹¹agricultural and marine exports (2001): £34,000,000 (potatoes 67.4%, greenhouse tomatoes 19.1%, flowers 3.3%, zucchini 3.0%, crustaceans 2.0%, mollusks 2.0%). **Major export destinations:** mostly the United Kingdom.

Transport and communications

Transport. Railroads: none. Roads (1995): total length 346 mi, 557 km (paved 100%). Vehicles (2002): passenger cars 74,007; trucks and buses 12,957. Air transport, n.a.

Demography

Population (2008): 23,867,000.

Density (2008): persons per sq mi 503.5, persons per sq km 194.4.

Urban-rural (2005): urban 61.6%; rural 38.4%.

Sex distribution (2005): male 48.49%; female 51.51%.

Age breakdown (2005): under 15, 24.2%; 15–29, 22.8%; 30–44, 25.5%; 45–59, 15.0%; 60–74, 10.5%; 75 and over, 2.0%.

Population projection: (2010) 24,015,000; (2020) 24,838,000.

Doubling time: 77 years.

Ethnic composition (1999): Korean 99.8%; Chinese 0.2%.

Religious affiliation (2005): mostly nonreligious/atheist; autonomous religious activities almost nonexistent.

Major cities (2005): P'yŏngyang 3,351,000⁶; Namp'o 1,102,000⁶; Hamhŭng 804,000⁶; Ch'ŏngjin (1993) 582,480; Kaesŏng (1993) 334,433; Sinŭiju (1993) 326,011.

Vital statistics

Birth rate per 1,000 population (2005): 16.1 (world avg. 20.3).

Death rate per 1,000 population (2005): 7.1 (world avg. 8.6).

Natural increase rate per 1,000 population (2005): 9.0 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 2.15.

Marriage/divorce rates per 1,000 population (1987): 9.3/0.2.

Life expectancy at birth (2005): male 68.7 years; female 74.2 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 288; malignant neoplasms (cancers) 90; diseases of the respiratory system 62; injuries, violence, and accidents 62.

National economy

Budget (1999). Revenue: 19,801,000,000 won (turnover tax and profits from state enterprises). Expenditures: 20,018,200,000 won (1994; national economy 67.8%, social and cultural affairs 19.0%, defense 11.6%).

Population economically active (2003)⁷: total 10,708,000; activity rate of total population 48.1% (participation rates: ages 15–64, 67.4%; female 39.4%; unemployed [2000] 24.1%).

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): rice 2,165,000, potatoes 1,900,000, corn (maize) 1,645,000, cabbages 700,000, apples 635,000, soybeans 350,000, sweet potatoes 290,000, dry beans 265,000, wheat 200,000, pears 125,000, peaches and nectarines 120,000, green onions 98,000, garlic 95,000, pumpkins, squash, and gourds 80,000, barley 80,000, cucumbers and gherkins 66,000, tomatoes 65,000, tobacco leaves 63,000, rye 52,000; livestock (number of live animals) 3,300,000 pigs, 2,760,000 goats, 576,000 cattle, 173,000 sheep; roundwood (2006) 7,334,996 cu m, of which fuelwood 80%; fisheries production (2006) 268,700 (from aquaculture 24%). Mining and quarrying (2007): iron ore (metal content) 1,400,000; magnesite 1,000,000; phosphate rock 300,000; zinc (metal content) 70,000; sulfur 42,000; lead (metal content) 13,000; copper (metal content) 12,000; silver 20; gold 2,000 kg. Manufacturing (2006): cement 6,155,000; steel semimanufactures (1994) 2,700,000; coke 2,000,000; crude steel 1,181,000; pig iron (2005) 900,000; fertilizers 454,000; textile fabrics (2004) 100,000,000 sq m. Energy production (consumption): electricity (kW-hr; 2005) 22,913,000,000 (22,913,000,000); hard coal (metric tons; 2005) 24,060,000 (23,935,000); lignite (metric tons; 2005) 7,746,000 (7,746,000); crude petroleum (barrels; 2005) none (3,500,000); petroleum products (metric tons; 2005) 459,000 (916,000); natural gas, none (none).

Korea, South

Demography

Population (2008): 2,143,000.
Density (2008): persons per sq mi 508.8, persons per sq km 196.5.
Urban-rural (2006): urban 37%; rural 63%.
Sex distribution (2006): male 50.9%; female 49.1%.
Age breakdown (2003): under 15, 32.2%; 15–59, 58.7%; 60 and over, 9.1%.
Population projection: (2010) 2,202,000; (2020) 2,523,000.
Doubling time: 55 years.
Ethnic composition (2008): Albanian 92.0%; Serb 5.3%; other 2.7%.
Religious affiliation (2006): Muslim (including nominal population) c. 91%; Orthodox c. 5.5%; Roman Catholic c. 3%; Protestant c. 0.5%.
Major cities (2004)⁸: Priština 165,844; Prizren 107,614; Ferizaj 71,758; Mitrovicë 68,929; Gjakovë 68,645; Pejë 68,551.

Vital statistics

Birth rate per 1,000 population (2007): 15.6 (world avg. 20.3); within marriage 55.0%; outside of marriage 41.5%; unknown 3.5%.
Death rate per 1,000 population (2007): 3.1 (world avg. 8.6).
Natural increase rate per 1,000 population (2007): 12.5 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2003): 3.0.
Marriage/divorce rates per 1,000 population (2007): 7.9/0.7.
Life expectancy at birth (2004)⁹: male 69.8 years; female 71.4 years.
Major causes of death per 100,000 population: n.a.

National economy

Budget (2007–08). Revenue: €2,148,400,000 (tax revenue 79.7%, of which border taxes [including customs duties and VAT] 59.8%, domestic taxes [mostly income and corporate taxes] 19.9%; nontax revenue 20.3%). Expenditures: €1,523,000,000 (current expenditure 81.1%, of which wages and salaries 32.8%, transfers 27.8%; capital expenditure 18.9%).
Public debt (external, outstanding): n.a.
Production (metric tons except as noted). Agriculture, forestry, fishing (2006): wheat 239,464, hay 184,677, corn (maize) 138,248, potatoes 71,245, peppers 62,925, cabbage 25,012, tomatoes 15,195, plums 11,467, onions 11,376, beans 10,627, apples 9,372, grapes 7,463; livestock (number of live animals) 381,995 cattle, 100,814 sheep, 2,337,086 chickens; roundwood 328,154 cu m, of which fuelwood 95%; fisheries production, n.a. Mining and quarrying (2008):¹⁰ Manufacturing (2006): cement, bricks, and tiles for reconstruction of housing; food; beverages. Energy production (consumption): electricity (kW-hr; 2007–08) 4,192,650,000 (2,710,462,000); hard coal, none (none); lignite (metric tons; 2007–08) 6,787,305 (n.a.); crude petroleum, none (none); petroleum products, none (n.a.); natural gas, none (none).
Gross national income (at current market prices; 2005): U.S.\$3,364,000,000 (U.S.\$1,640 per capita).

Population (2008): 5,281,000.

Density (2008): persons per sq mi 68.4, persons per sq km 26.4.

Urban-rural (2007): urban 34.7%; rural 65.3%.

Sex distribution (2005): male 49.03%; female 50.97%.

Age breakdown (2005): under 15, 31.5%; 15–29, 29.8%; 30–44, 18.8%; 45–59, 12.0%; 60–74, 5.7%; 75–84, 1.9%; 85 and over, 0.3%.

Population projection: (2010) 5,400,000; (2020) 5,917,000.

Doubling time: 43 years.

Ethnic composition (2005): Kyrgyz 67.4%; Uzbek 14.2%; Russian 10.3%; Hui 1.1%; Uighur 1.0%; other 6.0%.

Religious affiliation (2000): Muslim (mostly Sunni) 60.8%; Christian 10.4%, of which Russian Orthodox 7.7%; nonreligious 21.6%; atheist 6.3%; other 0.9%.

Major cities (1999): Bishkek 750,327; Osh 208,520; Jalal-Abad 70,401; Karakol 64,322; Tokmok 59,409.

Vital statistics

Birth rate per 1,000 population (2007): 23.5 (world avg. 20.3); (1994) within marriage 83.2%; outside of marriage 16.8%.

Death rate per 1,000 population (2007): 7.3 (world avg. 8.6).

Natural increase rate per 1,000 population (2007): 16.2 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 2.69.

Marriage/divorce rates per 1,000 population (2004): 6.8/1.0.

Life expectancy at birth (2007): male 63.6 years; female 72.2 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 417; communicable, maternal, perinatal, and nutritional conditions 155; malignant neoplasms 76; diseases of the respiratory system 63.

National economy

Budget (2005). Revenue: KGS 20,368,100,000 (tax revenue 80.3%, of which VAT 34.8%, income tax 8.6%, profit tax 6.3%; nontax revenue 17.7%; grants 2.0%). Expenditures: KGS 20,143,700,000 (administration, defense, and police 30.5%; education 24.4%; social security 14.2%; health 11.3%).

Public debt (external, outstanding; 2006): U.S.\$1,860,000,000.

Population economically active (2005): total 2,260,600; activity rate of total population 43.4% (participation rates: ages 15–64 [2002] 68.7%; female 42.9%; unemployed 8.1%).

Price and earnings indexes (2000 = 100)

	2001	2002	2003	2004	2005	2006	2007

Demography

Population (2008): 2,266,000.

Density (2008): persons per sq mi 90.9, persons per sq km 35.1.

Urban-rural (2008¹): urban 67.9%; rural 32.1%.

Sex distribution (2008¹): male 46.10%; female 53.90%.

Age breakdown (2008¹): under 15, 13.7%; 15–29, 22.8%; 30–44, 20.9%; 45–59, 20.5%; 60–74, 15.0%; 75–89, 6.8%; 90 and over, 0.3%.

Population projection: (2010) 2,245,000; (2020) 2,136,000.

Ethnic composition (2008¹): Latvian 59.2%; Russian 28.0%; Belarusian 3.7%; Ukrainian 2.5%; Polish 2.4%; Lithuanian 1.3%; other 2.9%.

Religious affiliation (2005): Orthodox c. 29%, of which Russian c. 16%; Roman Catholic c. 19%; Lutheran c. 14%; nonreligious c. 26%; atheist/other c. 12%. **Major cities** (2008¹): Riga 717,371; Daugavpils 105,958; Liepāja 85,050; Jelgava 65,635; Jūrmala 55,580.

Vital statistics

Birth rate per 1,000 population (2007): 10.2 (world avg. 20.3); within marriage 57.0%; outside of marriage 43.0%.

Death rate per 1,000 population (2007): 14.5 (world avg. 8.6).

Natural increase rate per 1,000 population (2007): -3.3 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2007): 1.41.

Marriage/divorce rates per 1,000 population (2007): 6.8/3.3.

Life expectancy at birth (2007): male 65.8 years; female 76.5 years.

Major causes of death per 100,000 population (2007): diseases of the circulatory system 792.8; malignant neoplasms (cancers) 263.5; accidents, poisoning, and violence 125.0; diseases of the digestive system 56.8.

National economy

Budget (2006). Revenue: Ls 4,213,000,000 (tax revenue 56.4%, of which VAT 22.3%, income taxes 16.0%, corporate taxes 6.0%; nontax revenue 43.6%, of which social security contributions 23.2%). Expenditures: Ls 4,237,100,000 (social security and welfare 25.9%, education 14.6%, health 10.3%, police 6.7%, defense 4.2%).

Public debt (external, outstanding; March 2007): U.S.\$1,224,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): wheat 807,300, potatoes 642,000, barley 363,200, rapeseed 211,700, rye 181,100, oats 130,200, cabbages 56,600; livestock (number of live animals) 416,800 pigs, 377,100 cattle; roundwood (2006) 12,844,600 cu m, of which fuelwood 8%; fisheries production 153,800 (from aquaculture, negligible). Mining and quarrying (2006): peat 1,000,000; limestone 468,100. Manufacturing (value added in Ls '000,000; 2006): food products 262.4; wood products (excluding furniture) 231.6; printing and publishing 85.3; cement, bricks, and ceramics 80.4. Energy production (consumption): electricity (kW-hr; 2007–08) 4,803,000,000 (7,658,000,000); coal (metric tons; 2007–08) none (174,000); crude petroleum², none (none); petroleum products² (metric tons; 2007–08) none (1,531,000); natural gas (cu m; 2007–08) none (1,652,000,000).

Household income and expenditure (2005). Average household size (2008) 2.5; annual disposable income per household Ls 3,855 (U.S.\$6,823); sources of income: wages and salaries 71.7%, pensions and transfers 22.0%, self-employment 5.4%; expenditure (2007): food, beverages, and tobacco 28.5%, transportation and communications 20.7%, housing and energy 10.2%, clothing and footwear 8.6%.

Land use as % of total land area (2003): in temporary crops 15.4%, in permanent crops 0.2%, in pasture 9.8%; overall forest area (2005) 47.4%.

Gross national income (GNI; 2007): U.S.\$22,595,000,000 (U.S.\$9,930 per capita); purchasing power parity GNI (U.S.\$16,890 per capita).

Demography

Population (2008): 2,020,000⁵.
Density (2008): persons per sq mi 172.4, persons per sq km 66.5.
Urban-rural (2007): urban 24.8%; rural 75.2%.
Sex distribution (2006)³: male 48.69%; female 51.31%.
Age breakdown (2001)³: under 15, 35.8%; 15–29, 31.2%; 30–44, 14.7%; 45–59, 10.0%; 60–74, 6.0%; 75 and over, 2.1%; unknown 0.2%.
Population projection⁵: (2010) 2,044,000; (2020) 2,163,000.
Doubling time: over 100 years.
Ethnic composition (2000): Sotho 80.3%; Zulu 14.4%; other 5.3%.
Religious affiliation (2000): Christian 91.0%, of which Roman Catholic 37.5%, unaffiliated Christian 23.9%, Protestant (mostly Reformed and Anglican) 17.7%, independent Christian 11.8%; traditional beliefs 7.7%; other 1.3%.
Major urban centres (2004): Maseru 178,300; Maputsoe 36,200; Mafeteng 36,000; Teyateyaneng 23,700; Hlotse 23,400.

Vital statistics

Birth rate per 1,000 population (2006): 25.1 (world avg. 20.3).
Death rate per 1,000 population (2006): 22.7 (world avg. 8.6).
Natural increase rate per 1,000 population (2006): 2.4 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2006): 3.28.
Life expectancy at birth (2006): male 40.4 years; female 39.1 years.
Adult population (ages 15–49) **living with HIV** (2007): 23.2%⁶ (world avg. 0.8%).
Major causes of death per 100,000 population (2002): HIV/AIDS-related c. 1,624; cardiovascular diseases c. 205; lower respiratory infections c. 89; diarrheal diseases c. 84.

National economy

Budget (2006–07). Revenue: M 6,479,200,000 (tax revenue 89.3%, of which customs receipts 60.9%, income and profit tax 15.0%, sales tax 11.0%; non-tax revenue 9.3%; grants 1.4%). Expenditures: M 4,909,100,000 (education and community services 26.8%, health and social security 14.0%, public order 11.9%, defense 5.4%, interest payments 2.0%).
Public debt (external, outstanding; 2006): U.S.\$633,000,000.
Production (metric tons except as noted). Agriculture, forestry, fishing (2007): potatoes 96,000, corn (maize) 50,800, vegetables 20,000, sorghum 11,200, wheat 10,400, dry beans 5,500; livestock (number of live animals) 1,025,000 sheep, 715,000 goats, 695,000 cattle, 66,000 pigs, 55,000 horses; roundwood 2,060,539 cu m, of which fuelwood 100%; fisheries production (2006) 47 (from aquaculture 4%). Mining and quarrying (2006): diamonds 37,000 carats. Manufacturing (value of manufactured exports; U.S.\$'000,000; 2002): apparel or clothing accessories 233.7; footwear 23.9; television receivers 13.8. Energy production (consumption): electricity (kW-hr; 2004) 250,000,000 (244,500,000); coal, none (none); crude petroleum, none (none); petroleum products (metric tons; 2003) none (100,000); natural gas, none (none).
Population economically active (2003): total 640,000⁷; activity rate of total population 35.5%⁷ (participation rates: ages 15–64, 60.8%⁷; female 45.0%⁷; unemployed [2005] c. 50%).

Demography

Population (2008): 5,871,000.

Density (2008): persons per sq mi 8.6, persons per sq km 3.3.

Urban-rural (2005): urban 84.8%; rural 15.2%.

Sex distribution (2006): male 51.93%; female 48.07%.

Age breakdown (2005): under 15, 30.1%; 15–29, 32.2%; 30–44, 19.8%; 45–59, 11.4%; 60–74, 5.3%; 75–84, 1.0%; 85 and over, 0.2%.

Population projection: (2010) 6,050,000; (2020) 7,026,000.

Doubling time: 30 years.

Ethnic composition (2000): Arab 87.1%, of which Libyan 57.2%, Bedouin 13.8%, Egyptian 7.7%, Sudanese 3.5%, Tunisian 2.9%; Amazigh (Berber) 6.8%, of which Arabized 4.2%; other 6.1%.

Religious affiliation (2000): Muslim (nearly all Sunnī) 96.1%; Orthodox 1.9%; Roman Catholic 0.8%; other 1.2%.

Major cities (2005): Tripoli (Tarābulus) 911,643 (urban agglom. 2,098,000); Banghāzī 685,367 (urban agglom. 1,114,000); Mīsrātah (2003) 121,669.

Vital statistics

Birth rate per 1,000 population (2005): 26.8 (world avg. 20.3).

Death rate per 1,000 population (2005): 3.5 (world avg. 8.6).

Natural increase rate per 1,000 population (2005): 23.3 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2005): 3.34.

Marriage/divorce rates per 1,000 population (2002): 6.0/0.3.

Life expectancy at birth (2005): male 74.3 years; female 78.8 years.

Major causes of death per 100,000 population (2002): diseases of the circulatory system 185, of which ischemic heart disease 98; infectious and parasitic diseases 72; malignant neoplasms (cancers) 44; accidents, injuries, and violence 43; chronic respiratory diseases 16.

National economy

Budget (2007). Revenue: LD 54,114,000,000 (oil revenues 89.9%, other 10.1%). Expenditures: LD 31,018,000,000 (development expenditures 59.7%; current expenditures 40.3%, of which wages and salaries 23.5%).

Public debt (external outstanding; 2005): U.S.\$3,900,000,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2007): watermelons 268,000, potatoes 196,000, tomatoes 190,000, dry onions 181,000, dates 175,000, olives 165,000, wheat 100,000, almonds 25,000; livestock (number of live animals) 4,500,000 sheep, 1,265,000 goats, 130,000 cattle, 47,000 camels, 25,000,000 chickens; roundwood (2006) 1,017,191 cu m, of which fuelwood 88%; fisheries production (2006) 40,827 (from aquaculture 1%). Mining and quarrying (2006): lime 250,000; gypsum 175,000; salt 40,000. Manufacturing (value of production in LD '000,000; 1996): base metals 212, electrical equipment 208, petrochemicals 175, food products 79, cement and other building materials 68. Energy production (consumption): electricity (kW-hr; 2005) 22,500,000,000 (22,500,000,000); coal (metric tons; 2002) none (4,000); crude petroleum (barrels; 2007) 653,800,000 ([2005] 129,000,000); petroleum products (metric tons; 2007) 16,300,000 (8,607,000); natural gas (cu m; 2005) 11,700,000,000 (6,441,000,000).

Household income and expenditure. Average household size (2006) 5.9; income per household: n.a.; sources of income: n.a.; expenditure: n.a.

Population economically active (2003): total 2,137,000⁵; activity rate of total population 37.9%⁵ (participation rates: ages 15 to 64, 56.7%⁵; female 24.7%⁵; unemployed [2004] 30.0%).

Ethnic composition (nationality; 2000): Marshallese 88.5%; U.S. white 6.5%; other Pacific Islanders and East Asians 5.0%.

Religious affiliation (1999): Protestant 85.0%, of which United Church of Christ 54.8%, Assemblies of God 25.8%; Roman Catholic 8.4%; Mormon 2.1%; nonreligious 1.5%; other/unknown 3.0%.

Major towns (1999): Majuro² (2004) 20,800; Ebeye (in Kwajalein Atoll) 9,345; Lajra (in Majuro Atoll) 2,256; Ajeltake (in Majuro Atoll) 1,170; Enewetak 823.

Vital statistics

Birth rate per 1,000 population (2006): 33.0 (world avg. 20.3).

Death rate per 1,000 population (2006): 4.7 (world avg. 8.6).

Natural increase rate per 1,000 population (2006): 28.3 (world avg. 11.7).

Total fertility rate (avg. births per childbearing woman; 2006): 3.84.

Life expectancy at birth (2006): male 68.3 years; female 72.3 years.

Major causes of death per 100,000 population (2003–04; registered deaths only): sepsis/septicemia 83.7; malignant neoplasms (cancers) 41.9; myocardial infarction 27.3; pneumonia 25.5; suicide 23.7.

National economy

Budget (2005). Revenue: U.S.\$83,900,000 (U.S. government grants 63.9%; tax revenue 26.4%, of which income tax 11.7%, import duties 9.3%; nontax revenue 9.7%). Expenditures: U.S.\$86,900,000 (current expenditure 80.2%, capital expenditure 19.8%).

Public debt (external, outstanding; 2006–07): U.S.\$98,700,000.

Production (metric tons except as noted). Agriculture, forestry, fishing (2002–03): copra (2007) 5,491, breadfruit 4,536, coconuts 885, bananas 161, pandanus 114, taro 108; livestock (number of live animals) 12,900 pigs, 86,000 chickens; roundwood, n.a.; fisheries production (2006) 42,019, of which skipjack 37,661 (from aquaculture, none). Mining and quarrying: for local construction only. Manufacturing (2005): copra 5,194; coconut oil and processed (chilled or frozen) fish are important products; the manufacture of hand-crafts and personal items (clothing, mats, boats, etc.) by individuals is also significant. Energy production (consumption): electricity (kW-hr; 2005) 81,000,000 (81,000,000⁶); coal, none (none); petroleum products, n.a. (n.a.⁶).

Population economically active (1999): total 14,677; activity rate of total population 28.9% (participation rates: ages 15–64, 52.1%; female 34.1%; unemployed [2007] 30.9%).

Price and earnings indexes (2001 = 100)

Demography

Population (2008): 106,683,000.
Density (2008): persons per sq mi 140.7, persons per sq km 54.3.
Urban-rural (2005): urban 76.0%; rural 24.0%.
Sex distribution (2005): male 48.66%; female 51.34%.
Age breakdown (2005): under 15, 30.7%; 15–29, 26.3%; 30–44, 20.4%; 45–59, 11.8%; 60–74, 5.9%; 75–84, 1.7%; 85 and over, 0.5%; unknown 2.7%.
Population projection: (2010) 108,396,000; (2020) 115,762,000.
Doubling time: 49 years.
Ethnic composition (2000): mestizo 64.3%; Amerindian 18.0%, of which detribalized 10.5%; Mexican white 15.0%; Arab 1.0%; Mexican black 0.5%; Spaniard 0.3%; U.S. white 0.2%; other 0.7%.
Religious affiliation (2000): Christian 96.3%, of which Roman Catholic 87.0%, Protestant 3.2%, independent Christian 2.7%, unaffiliated Christian 1.4%, other Christian (mostly Mormon and Jehovah's Witness) 2.0%; Muslim 0.3%; nonreligious 3.1%; other 0.3%.
Major cities/urban agglomerations (2005/2007): Mexico City 8,463,906 (19,028,000); Ecatepec 1,687,549; Guadalajara 1,600,894 (4,198,000); Puebla 1,399,519 (2,195,000); Juárez 1,301,452 (1,343,000); Tijuana 1,286,187 (1,553,000); León 1,137,465 (1,488,000); Ciudad Netzahuacóyotl 1,136,304; Monterrey 1,133,070 (3,712,000); Zapopan 1,026,492; Naulcapan 792,226; Chihuahua 748,518 (841,000); Mérida 734,153 (1,017,000); Guadalupe 691,434; San Luis Potosí 685,934 (1,050,000); Tlalnepantla 674,417; Aguascalientes 663,671 (927,000); Mexicali 653,046 (935,000); Hermosillo 641,791; Saltillo 633,667 (802,000); Acapulco 616,394; Morelia 608,049; Culiacán 605,304 (837,000); Querétaro 596,450 (1,032,000); other cities with an urban agglomeration of more than one million include: Torreon 548,723 (1,201,000) and Toluca 467,712 (1,584,000).
Households. Total households (2005) 24,006,357; distribution by size (2005): 1 person 7.3%, 2 persons 14.0%, 3 persons 18.2%, 4 persons 22.8%, 5 persons 17.4%, 6 persons 9.5%, 7 or more persons 10.8%.
Migration. Legal Mexican immigrants entering the U.S. in 2004: 173,664; total number of illegal Mexican immigrants in U.S. (2006) 6,600,000.

Vital statistics

Birth rate per 1,000 population (2007): 18.6 (world avg. 20.3).
Death rate per 1,000 population (2007): 4.8 (world avg. 8.6).
Natural increase rate per 1,000 population (2007): 13.8 (world avg. 11.7).
Total fertility rate (avg. births per childbearing woman; 2007): 2.10.

Marriage/divorce rates per 1,000 population (2006): 5.6/0.7.
Life expectancy at birth (2006): male 72.4 years; female 77.2 years.
Major causes of death per 100,000 population (2005): diseases of the circulatory system 107.4; endocrine, metabolic, and nutritional disorders 77.8; malignant neoplasms (cancers) 63.7; accidents and violence 50.9; diseases of the digestive system 45.7; diseases of the respiratory system 41.5.
Adult population (ages 15–49) living with HIV (2007): 0.3%⁷ (world avg. 0.8%).

Social indicators

Educational attainment (2005). Percentage of population age 15 and over having: no formal schooling 8.4%; incomplete primary education 14.3%; complete primary 17.6%; incomplete/complete secondary 25.2%; vocational/professional 31.3%; advanced university (masters or doctorate degree) 0.7%; other/unknown 2.5%.
Access to services (2005). Proportion of dwellings having: electricity 96.6%; piped water supply 87.8%; piped sewage 84.8%.

Distribution of income (2006)

percentage of household income by decile									
1	2	3	4	5	6	7	8	9	10 (highest)
2.3	3.6	4.2	5.4	6.3	7.3	9.4	11.7	15.6	34.2

Material well-being. Percentage of households possessing (2005): television 91.0%, refrigerator 79.0%, washing machine 62.7%, computer 19.6%.
Quality of working life. Average workweek (2004): 43.5 hours⁸. Annual rate per 100,000 insured workers for (2004): injury 2,922; death 11. Labour stoppages (2001): 35, involving 23,234 workers.
Social participation. Eligible voters participating in last national election (July 2006): 58.6%. Trade union membership in total workforce (2000): formal sector only, less than 20%; both formal and informal sectors, c. 17%. Practicing religious population (1995–97): percentage of adult population attending church services at least once per week 46%.
Social deviance (2006). Formally registered offense rate per 100,000 population for: murder 6.1; property damage 14.9; rape 4.5; battery 31.5; robbery 67.1; illegal narcotics possession 15.6; fraud 4.5; squatting 3.2; breaking and entering 2.7. Incidence per 100,000 in general population of: alcoholism (2000) 7.6; suicide (2006) 3.4.

National economy

Gross national income (GNI; 2007): U.S.\$878,020,000,000 (U.S.\$8,340 per capita); purchasing power parity GNI (U.S.\$12,580 per capita).
